General Land Office
Relinquishment Act Lease Form
Revised, September 1997

MF114883

The State of Texas

Austin, Texas

OIL AND GAS LEASE

THIS AGREEMENT is made and entered into this 28th day of March, 20 13, between the State of Texas, acting by and through its agent, **WISE ASSET NO. 8, LTD.**, a Texas limited partnership, and **WISE ASSET NO. 10, LTD.**, a Texas limited partnership of 6851 NE Loop 820, Suite 200, North Richland Hills, Texas 76180
(Give Permanent Address)
said agent herein referred to as the owner of the soil (whether one or more), and **COG OPERATING LLC**, a Delaware limited liability company of One Concho Center, 600 W. Illinois, Midland, Texas 79701 hereinafter called Lessee.
(Give Permanent Address)

1. GRANTING CLAUSE. For and in consideration of the amounts stated below and of the covenants and agreements to be paid, kept and performed by Lessee under this lease, the State of Texas acting by and through the owner of the soil, hereby grants, leases and lets unto Lessee, for the sole and only purpose of prospecting and drilling for and producing oil and gas, laying pipe lines, building tanks, storing oil and building power stations, telephone lines and other structures thereon, to produce, save, take care of, treat and transport said products of the lease, the following lands situated in **Culberson** County, State of Texas, to-wit:

as described in Addendum 1, attached to and made a part hereof

containing 30,518.72 acres, more or less. The bonus consideration paid for this lease is as follows:

To the State of Texas: Twelve Million One Hundred Thirty-One Thousand Two Hundred Forty-Five and 50/100 Dollars ($ 12,131,245.50)

To the owner of the soil: Twelve Million One Hundred Thirty-One Thousand Two Hundred Forty-Five and 50/100 Dollars ($ 12,131,245.50)

Total bonus consideration: Twenty-Four Million Two Hundred Sixty-Two Thousand Four Hundred Ninety-One and no/100 Dollars ($ 24,262,491.00)

The total bonus consideration paid represents a bonus of Eight Hundred Dollars ($ 800.00) per acre, on 30,328.11 net acres.

2. TERM. Subject to the other provisions in this lease, this lease shall be for a term of Three (3) years from this date (herein called "primary term") and as long thereafter as oil and gas, or either of them, is produced in paying quantities from said land. As used in this lease, the term "produced in paying quantities" means that the receipts from the sale or other authorized commercial use of the substance(s) covered exceed out of pocket operational expenses for the six months last past.

CULBERSON COUNTY TEXAS

True and Correct copy of Original filed in Culberson County Clerks Office

PLATS

3. DELAY RENTALS. If no well is commenced on the leased premises on or before one (1) year from this date, this lease shall terminate, unless on or before such anniversary date Lessee shall pay or tender to the owner of the soil or to his credit in the n/a Bank, at n/a, or its successors (which shall continue as the depository regardless of changes in the ownership of said land), the amount specified below; in addition, Lessee shall pay or tender to the COMMISSIONER OF THE GENERAL LAND OFFICE OF THE STATE OF TEXAS, AT AUSTIN, TEXAS, a like sum on or before said date. Payments under this paragraph shall operate as a rental and shall cover the privilege of deferring the commencement of a well for one (1) year from said date. Payments under this paragraph shall be in the following amounts:

To the owner of the soil: n/a

Dollars ($ n/a)

To the State of Texas: n/a

Dollars ($ n/a)

Total Delay Rental: n/a

Dollars ($ n/a)

In a like manner and upon like payments or tenders annually, the commencement of a well may be further deferred for successive periods of one (1) year each during the primary term. All payments or tenders of rental to the owner of the soil may be made by check or sight draft of Lessee, or any assignee of this lease, and may be delivered on or before the rental paying date. If the bank designated in this paragraph (or its successor bank) should cease to exist, suspend business, liquidate, fail or be succeeded by another bank, or for any reason fail or refuse to accept rental, Lessee shall not be held in default for failure to make such payments or tenders of rental until thirty (30) days after the owner of the soil shall deliver to Lessee a proper recordable instrument naming another bank as agent to receive such payments or tenders.

4. PRODUCTION ROYALTIES. Upon production of oil and/or gas, Lessee agrees to pay or cause to be paid one-half (1/2) of the royalty provided for in this lease to the Commissioner of the General Land Office of the State of Texas, at Austin, Texas, and one-half (1/2) of such royalty to the owner of the soil:

(A) OIL. Royalty payable on oil, which is defined as including all hydrocarbons produced in a liquid form at the mouth of the well and also as all condensate, distillate, and other liquid hydrocarbons recovered from oil or gas run through a separator or other equipment, as hereinafter provided, shall be 25% part of the gross production or the market value thereof, at the option of the owner of the soil or the Commissioner of the General Land Office, such value to be determined by 1) the highest posted price, plus premium, if any, offered or paid for oil, condensate, distillate, or other liquid hydrocarbons, respectively, of a like type and gravity in the general area where produced and when run, or 2) the highest market price thereof offered or paid in the general area where produced and when run, or 3) the gross proceeds of the sale thereof, whichever is the greater. Lessee agrees that before any gas produced from the leased premises is sold, used or processed in a plant, it will be run free of cost to the royalty owners through an adequate oil and gas separator of conventional type, or other equipment at least as efficient, so that all liquid hydrocarbons recoverable from the gas by such means will be recovered. The requirement that such gas be run through a separator or other equipment may be waived, in writing, by the royalty owners upon such terms and conditions as they prescribe.

(B) NON PROCESSED GAS. Royalty on any gas (including flared gas), which is defined as all hydrocarbons and gaseous substances not defined as oil in subparagraph (A) above, produced from any well on said land (except as provided herein with respect to gas processed in a plant for the extraction of gasoline, liquid hydrocarbons or other products) shall be 25% part of the gross production or the market value thereof, at the option of the owner of the soil or the Commissioner of the General Land Office, such value to be based on the highest market price paid or offered for gas of comparable quality in the general area where produced and when run, or the gross price paid or offered to the producer, whichever is the greater; provided that the maximum pressure base in measuring the gas under this lease shall not at any time exceed 14.65 pounds per square inch absolute, and the standard base temperature shall be sixty (60) degrees Fahrenheit, correction to be made for pressure according to Boyle's Law, and for specific gravity according to tests made by the Balance Method or by the most approved method of testing being used by the industry at the time of testing.

(C) PROCESSED GAS. Royalty on any gas processed in a gasoline plant or other plant for the recovery of gasoline or other liquid hydrocarbons shall be 25% part of the residue gas and the liquid hydrocarbons extracted or the market value thereof, at the option of the owner of the soil or the Commissioner of the General Land Office. All royalties due herein shall be based on one hundred percent (100%) of the total plant production of residue gas attributable to gas produced from this lease, and on fifty percent (50%), or that percent accruing to Lessee, whichever is the greater, of the total plant production of liquid hydrocarbons attributable to the gas produced from this lease; provided that if liquid hydrocarbons are recovered from gas processed in a plant in which Lessee (or its parent, subsidiary or affiliate) owns an interest, then the percentage applicable to liquid hydrocarbons shall be fifty percent *(50%)* or the highest percent accruing to a third party processing gas through such plant under a processing agreement negotiated at arm's length (or if there is no such third party, the highest percent then being specified in processing agreements or contracts in the industry), whichever is the greater. The respective royalties on residue gas and on liquid hydrocarbons shall be determined by 1) the highest market price paid or offered for any gas (or liquid hydrocarbons) of comparable quality in the general area, or 2) the gross price paid or offered for such residue gas (or the weighted average gross selling price for the respective grades of liquid hydrocarbons), whichever is the greater. In no event, however, shall the royalties payable under this paragraph be less than the royalties which would have been due had the gas not been processed.

(D) OTHER PRODUCTS. Royalty on carbon black, sulphur or any other products produced or manufactured from gas (excepting liquid hydrocarbons) whether said gas be "casinghead," "dry," or any other gas, by fractionating, burning or any other processing shall be 25% part of the gross production of such products, or the market value thereof, at the option of the owner of the soil or the Commissioner of the General Land Office, such market value to be determined as follows: 1) on the basis of the highest market price of each product for the same month in which such product is produced, or 2) on the basis of the average gross sale price of each product for the same month in which such products are produced; whichever is the greater.

5. MINIMUM ROYALTY. During any year after the expiration of the primary term of this lease, if this lease is maintained by production, the royalties paid under this lease in no event shall be less than an amount equal to the total annual delay rental herein provided; otherwise, there shall be due and payable on or before the last day of the month succeeding the anniversary date of this lease a sum equal to the total annual rental less the amount of royalties paid during the preceding year. If Paragraph 3 of this lease does not specify a delay rental amount, then for the purposes of this

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

paragraph, the delay rental amount shall be one dollar ($1.00) per acre.

6. ROYALTY IN KIND. Notwithstanding any other provision in this lease, at any time or from time to time, the owner of the soil or the Commissioner of the General Land Office may, at the option of either, upon not less than sixty (60) days notice to the holder of the lease, require that the payment of any royalties accruing to such royalty owner under this lease be made in kind. The owner of the soil's or the Commissioner of the General Land Office's right to take its royalty in kind shall not diminish or negate the owner of the soil's or the Commissioner of the General Land Office's rights or Lessee's obligations, whether express or implied, under this lease.

7. NO DEDUCTIONS. Lessee agrees that all royalties accruing under this lease (including those paid in kind) shall be without deduction for the cost of producing, gathering, storing, separating, treating, dehydrating, compressing, processing, transporting, and otherwise making the oil, gas and other products hereunder ready for sale or use. Lessee agrees to compute and pay royalties on the gross value received, including any reimbursements for severance taxes and production related costs.

8. PLANT FUEL AND RECYCLED GAS. No royalty shall be payable on any gas as may represent this lease's proportionate share of any fuel used to process gas produced hereunder in any processing plant. Notwithstanding any other provision of this lease, and subject to the written consent of the owner of the soil and the Commissioner of the General Land Office, Lessee may recycle gas for gas lift purposes on the leased premises or for injection into any oil or gas producing formation underlying the leased premises after the liquid hydrocarbons contained in the gas have been removed; no royalties shall be payable on the recycled gas until it is produced and sold or used by Lessee in a manner which entitles the royalty owners to a royalty under this lease.

9. ROYALTY PAYMENTS AND REPORTS. All royalties not taken in kind shall be paid to the Commissioner of the General Land Office at Austin, Texas, in the following manner:

Payment of royalty on production of oil and gas shall be as provided in the rules set forth in the Texas Register. Rules currently provide that royalty on oil is due and must be received in the General Land Office on or before the 5th day of the second month succeeding the month of production, and royalty on gas is due and must be received in the General Land Office on or before the 15th day of the second month succeeding the month of production, accompanied by the affidavit of the owner, manager or other authorized agent, completed in the form and manner prescribed by the General Land Office and showing the gross amount and disposition of all oil and gas produced and the market value of the oil and gas, together with a copy of all documents, records or reports confirming the gross production, disposition and market value including gas meter readings, pipeline receipts, gas line receipts and other checks or memoranda of amount produced and put into pipelines, tanks, or pools and gas lines or gas storage, and any other reports or records which the General Land Office may require to verify the gross production, disposition and market value. In all cases the authority of a manager or agent to act for the Lessee herein must be filed in the General Land Office. Each royalty payment shall be accompanied by a check stub, schedule, summary or other remittance advice showing by the assigned General Land Office lease number the amount of royalty being paid on each lease. If Lessee pays his royalty on or before thirty (30) days after the royalty payment was due, then Lessee owes a penalty of 5% on the royalty or $25.00, whichever is greater. A royalty payment which is over thirty (30) days late shall accrue a penalty of 10% of the royalty due or $25.00 whichever is greater. In addition to a penalty, royalties shall accrue interest at a rate of 12% per year; such interest will begin to accrue when the royalty is sixty (60) days overdue. Affidavits and supporting documents which are not filed when due shall incur a penalty in an amount set by the General Land Office administrative rule which is effective on the date when the affidavits or supporting documents were due. The Lessee shall bear all responsibility for paying or causing royalties to be paid as prescribed by the due date provided herein. Payment of the delinquency penalty shall in no way operate to prohibit the State's right of forfeiture as provided by law nor act to postpone the date on which royalties were originally due. The above penalty provisions shall not apply in cases of title dispute as to the State's portion of the royalty or to that portion of the royalty in dispute as to fair market value.

10. (A) RESERVES, CONTRACTS AND OTHER RECORDS. Lessee shall annually furnish the Commissioner of the General Land Office with its best possible estimate of oil and gas reserves underlying this lease or allocable to this lease and shall furnish said Commissioner with copies of all contracts under which gas is sold or processed and all subsequent agreements and amendments to such contracts within thirty (30) days after entering into or making such contracts, agreements or amendments. Such contracts and agreements when received by the General Land Office shall be held in confidence by the General Land Office unless otherwise authorized by Lessee. All other contracts and records pertaining to the production, transportation, sale and marketing of the oil and gas produced on said premises, including the books and accounts, receipts and discharges of all wells, tanks, pools, meters, and pipelines shall at all times be subject to inspection and examination by the Commissioner of the General Land Office, the Attorney General, the Governor, or the representative of any of them.

(B) PERMITS, DRILLING RECORDS. Written notice of all operations on this lease shall be submitted to the Commissioner of the General Land Office by Lessee or operator five (5) days before spud date, workover, re-entry, temporary abandonment or plug and abandonment of any well or wells. Such written notice to the General Land Office shall include copies of Railroad Commission forms for application to drill. Copies of well tests, completion reports and plugging reports shall be supplied to the General Land Office at the time they are filed with the Texas Railroad Commission. All applications, permits, reports or other filings that reference this lease or any specific well on the leased premises and that are submitted to the Texas Railroad Commission or any other governmental agency shall include the word "State" in the title. Additionally, in accordance with Railroad Commission rules, any signage on the leased premises for the purpose of identifying wells, tank batteries or other associated improvements to the land must also include the word "State." Lessee shall supply the General Land Office with any records, memoranda, accounts, reports, cuttings and cores, or other information relative to the operation of the above-described premises, which may be requested by the General Land Office, in addition to those herein expressly provided for. Lessee shall have an electrical and/or radioactivity survey made on the bore-hole section, from the base of the surface casing to the total depth of well, of all wells drilled on the above described premises and shall transmit a true copy of the log of each survey on each well to the General Land Office within fifteen (15) days after the making of said survey.

(C) PENALTIES. Lessee shall incur a penalty whenever reports, documents or other materials are not filed in the General Land Office when due. The penalty for late filing shall be set by the General Land Office administrative rule which is effective on the date when the materials were due in the General Land Office.

11. DRY HOLE/CESSATION OF PRODUCTION DURING PRIMARY TERM. If, during the primary term hereof and prior to discovery and production of oil or gas on said land, Lessee should drill a dry hole or holes thereon, or if during the primary term hereof and after the discovery and actual production of oil or gas from the leased premises such production thereof should cease from any cause, this lease shall not terminate if on or before the expiration of sixty (60) days from date of completion of said dry hole or cessation of production Lessee commences additional drilling or reworking operations thereon, or pays or tenders the next annual delay rental in the same manner as provided in this lease. If, during the last year of the primary term or within sixty (60) days prior thereto, a dry hole be completed and abandoned, or the production of oil or gas should cease for any cause,

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

Lessee's rights shall remain in full force and effect without further operations until the expiration of the primary term; and if Lessee has not resumed production in paying quantities at the expiration of the primary term, Lessee may maintain this lease by conducting additional drilling or reworking operations pursuant to Paragraph 13, using the expiration of the primary term as the date of cessation of production under Paragraph 13. Should the first well or any subsequent well drilled on the above described land be completed as a shut-in oil or gas well within the primary term hereof, Lessee may resume payment of the annual rental in the same manner as provided herein on or before the rental paying date following the expiration of sixty (60) days from the date of completion of such shut-in oil or gas well and upon the failure to make such payment, this lease shall ipso facto terminate. If at the expiration of the primary term or any time thereafter a shut-in oil or gas well is located on the leased premises, payments may be made in accordance with the shut-in provisions hereof.

12. DRILLING AND REWORKING AT EXPIRATION OF PRIMARY TERM. If, at the expiration of the primary term, neither oil nor gas is being produced on said land, but Lessee is then engaged in drilling or reworking operations thereon, this lease shall remain in force so long as operations on said well or for drilling or reworking of any additional wells are prosecuted in good faith and in workmanlike manner without interruptions totaling more than sixty (60) days during any one such operation, and if they result in the production of oil and/or gas, so long thereafter as oil and/or gas is produced in paying quantities from said land, or payment of shut-in oil or gas well royalties or compensatory royalties is made as provided in this lease.

13. CESSATION, DRILLING, AND REWORKING. If, after the expiration of the primary term, production of oil or gas from the leased premises, after once obtained, should cease from any cause, this lease shall not terminate if Lessee commences additional drilling or reworking operations within sixty (60) days after such cessation, and this lease shall remain in full force and effect for so long as such operations continue in good faith and in workmanlike manner without interruptions totaling more than sixty (60) days. If such drilling or reworking operations result in the production of oil or gas, the lease shall remain in full force and effect for so long as oil or gas is produced from the leased premises in paying quantities or payment of shut-in oil or gas well royalties or payment of compensatory royalties is made as provided herein or as provided by law. If the drilling or reworking operations result in the completion of a well as a dry hole, the lease will not terminate if the Lessee commences additional drilling or reworking operations within sixty (60) days after the completion of the well as a dry hole, and this lease shall remain in effect so long as Lessee continues drilling or reworking operations in good faith and in a workmanlike manner without interruptions totaling more than sixty (60) days. Lessee shall give written notice to the General Land Office within thirty (30) days of any cessation of production.

14. SHUT-IN ROYALTIES. For purposes of this paragraph, "well" means any well that has been assigned a well number by the state agency having jurisdiction over the production of oil and gas. If, at any time after the expiration of the primary term of a lease that, until being shut in, was being maintained in force and effect, a well capable of producing oil or gas in paying quantities is located on the leased premises, but oil or gas is not being produced for lack of suitable production facilities or lack of a suitable market, then Lessee may pay as a shut-in oil or gas royalty an amount equal to double the annual rental provided in the lease, but not less than $1,200 a year for each well capable of producing oil or gas in paying quantities. If Paragraph 3 of this lease does not specify a delay rental amount, then for the purposes of this paragraph, the delay rental amount shall be one dollar ($1.00) per acre. To be effective, each initial shut-in oil or gas royalty must be paid on or before: (1) the expiration of the primary term, (2) 60 days after the Lessee ceases to produce oil or gas from the leased premises, or (3) 60 days after Lessee completes a drilling or reworking operation in accordance with the lease provisions; whichever date is latest. Such payment shall be made one-half (1/2) to the Commissioner of the General Land Office and one-half (1/2) to the owner of the soil. If the shut-in oil or gas royalty is paid, the lease shall be considered to be a producing lease and the payment shall extend the term of the lease for a period of one year from the end of the primary term, or from the first day of the month following the month in which production ceased, and, after that, if no suitable production facilities or suitable market for the oil or gas exists, Lessee may extend the lease for four more successive periods of one (1) year by paying the same amount each year on or before the expiration of each shut-in year.

15. COMPENSATORY ROYALTIES. If, during the period the lease is kept in effect by payment of the shut-in oil or gas royalty, oil or gas is sold and delivered in paying quantities from a well located within one thousand (1,000) feet of the leased premises and completed in the same producing reservoir, or in any case in which drainage is occurring, the right to continue to maintain the lease by paying the shut-in oil or gas royalty shall cease, but the lease shall remain effective for the remainder of the year for which the royalty has been paid. The Lessee may maintain the lease for four more successive years by Lessee paying compensatory royalty at the royalty rate provided in the lease of the market value of production from the well causing the drainage or which is completed in the same producing reservoir and within one thousand (1,000) feet of the leased premises. The compensatory royalty is to be paid monthly, one-half (1/2) to the Commissioner of the General Land Office and one-half (1/2) to the owner of the soil, beginning on or before the last day of the month following the month in which the oil or gas is produced from the well causing the drainage or that is completed in the same producing reservoir and located within one thousand (1,000) feet of the leased premises. If the compensatory royalty paid in any 12-month period is an amount less than the annual shut-in oil or gas royalty, Lessee shall pay an amount equal to the difference within thirty (30) days from the end of the 12-month period. Compensatory royalty payments which are not timely paid will accrue penalty and interest in accordance with Paragraph 9 of this lease. None of these provisions will relieve Lessee of the obligation of reasonable development nor the obligation to drill offset wells as provided in Texas Natural Resources Code 52.173; however, at the determination of the Commissioner, and with the Commissioner's written approval, the payment of compensatory royalties can satisfy the obligation to drill offset wells.

16. RETAINED ACREAGE. Notwithstanding any provision of this lease to the contrary, after a well producing or capable of producing oil or gas has been completed on the leased premises, Lessee shall exercise the diligence of a reasonably prudent operator in drilling such additional well or wells as may be reasonably necessary for the proper development of the leased premises and in marketing the production thereon.

(A) VERTICAL. In the event this lease is in force and effect two (2) years after the expiration date of the primary or extended term it shall then terminate as to all of the leased premises, EXCEPT (1) 40 acres surrounding each oil well capable of producing in paying quantities and 320 acres surrounding each gas well capable of producing in paying quantities (including a shut-in oil or gas well as provided in Paragraph 14 hereof), or a well upon which Lessee is then engaged in continuous drilling or reworking operations, or (2) the number of acres included in a producing pooled unit pursuant to Texas Natural Resources Code 52.151-52.154, or (3) such greater or lesser number of acres as may then be allocated for production purposes to a proration unit for each such producing well under the rules and regulations of the Railroad Commission of Texas, or any successor agency, or other governmental authority having jurisdiction. If at any time after the effective date of the partial termination provisions hereof, the applicable field rules are changed or the well or wells located thereon are reclassified so that less acreage is thereafter allocated to said well or wells for production purposes, this lease shall thereupon terminate as to all acreage not thereafter allocated to said well or wells for production purposes. Notwithstanding the termination of this lease as to a portion of the lands covered hereby, Lessee shall nevertheless continue to have the right of ingress to and egress from the lands still subject to this lease for all purposes described in Paragraph 1 hereof, together with easements and rights-of-way for existing roads, existing pipelines and other existing facilities on, over and across all the lands described in Paragraph 1 hereof ("the retained lands"), for access to and from the retained lands and for the gathering or transportation of oil, gas and other minerals produced from the retained lands.

(B) HORIZONTAL. In the event this lease is in force and effect two (2) years after the expiration date of the primary or extended term it shall

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

further terminate as to all depths below 100 feet below the total depth drilled (hereinafter "deeper depths") in each well located on acreage retained in Paragraph 16 (A) above, unless on or before two (2) years after the primary or extended term Lessee pays an amount equal to one-half (1/2) of the bonus originally paid as consideration for this lease (as specified on page 1 hereof). If such amount is paid, this lease shall be in force and effect as to such deeper depths, and said termination shall be delayed for an additional period of two (2) years and so long thereafter as oil or gas is produced in paying quantities from such deeper depths covered by this lease.

(C) IDENTIFICATION AND FILING. The surface acreage retained hereunder as to each well shall, as nearly as practical, be in the form of a square with the well located in the center thereof, or such other shape as may be approved by the Commissioner of the General Land Office. Within thirty (30) days after partial termination of this lease as provided herein, Lessee shall execute and record a release or releases containing a satisfactory legal description of the acreage and/or depths not retained hereunder. The recorded release, or a certified copy of same, shall be filed in the General Land Office, accompanied by the filing fee prescribed by the General Land Office rules in effect on the date the release is filed. If Lessee fails or refuses to execute and record such release or releases within ninety (90) days after being requested to do so by the General Land Office, then the Commissioner at his sole discretion may designate by written instrument the acreage and/or depths to be released hereunder and record such instrument at Lessee's expense in the county or counties where the lease is located and in the official records of the General Land Office and such designation shall be binding upon Lessee for all purposes.

17. OFFSET WELLS. Neither the bonus, delay rentals, nor royalties paid, or to be paid, under this lease shall relieve Lessee of his obligation to protect the oil and gas under the above-described land from being drained. Lessee, sublessee, receiver or other agent in control of the leased premises shall drill as many wells as the facts may justify and shall use appropriate means and drill to a depth necessary to prevent undue drainage of oil and gas from the leased premises. In addition, if oil and/or gas should be produced in commercial quantities within 1,000 feet of the leased premises, or in any case where the leased premises is being drained by production of oil or gas, the Lessee, sublessee, receiver or other agent in control of the leased premises shall in good faith begin the drilling of a well or wells upon the leased premises within 100 days after the draining well or wells or the well or wells completed within 1,000 feet of the leased premises start producing in commercial quantities and shall prosecute such drilling with diligence. Failure to satisfy the statutory offset obligation may subject this lease and the owner of the soil's agency rights to forfeiture. Only upon the determination of the Commissioner of the General Land Office and with his written approval may the payment of compensatory royalty under applicable statutory parameters satisfy the obligation to drill an offset well or wells required under this paragraph.

18. FORCE MAJEURE. If, after a good faith effort, Lessee is prevented from complying with any express or implied covenant of this lease, from conducting drilling operations on the leased premises, or from producing oil or gas from the leased premises by reason of war, rebellion, riots, strikes, acts of God, or any valid order, rule or regulation of government authority, then while so prevented, Lessee's obligation to comply with such covenant shall be suspended and Lessee shall not be liable for damages for failure to comply with such covenants; additionally, this lease shall be extended while Lessee is prevented, by any such cause, from conducting drilling and reworking operations or from producing oil or gas from the leased premises. However, nothing in this paragraph shall suspend the payment of delay rentals in order to maintain this lease in effect during the primary term in the absence of such drilling or reworking operations or production of oil or gas.

19. WARRANTY CLAUSE. The owner of the soil warrants and agrees to defend title to the leased premises. If the owner of the soil defaults in payments owed on the leased premises, then Lessee may redeem the rights of the owner of the soil in the leased premises by paying any mortgage, taxes or other liens on the leased premises. If Lessee makes payments on behalf of the owner of the soil under this paragraph, Lessee may recover the cost of these payments from the rental and royalties due the owner of the soil.

20. (A) PROPORTIONATE REDUCTION CLAUSE. If the owner of the soil owns less than the entire undivided surface estate in the above described land, whether or not Lessee's interest is specified herein, then the royalties and rental herein provided to be paid to the owner of the soil shall be paid to him in the proportion which his interest bears to the entire undivided surface estate and the royalties and rental herein provided to be paid to the Commissioner of the General Land Office of the State of Texas shall be likewise proportionately reduced. However, before Lessee adjusts the royalty or rental due to the Commissioner of the General Land Office, Lessee or his authorized representative must submit to the Commissioner of the General Land Office a written statement which explains the discrepancy between the interest purportedly leased under this lease and the actual interest owned by the owner of the soil. The Commissioner of the General Land Office shall be paid the value of the whole production allocable to any undivided interest not covered by a lease, less the proportionate development and production cost allocable to such undivided interest. However, in no event shall the Commissioner of the General Land Office receive as a royalty on the gross production allocable to the undivided interest not leased an amount less than the value of one-sixteenth (1/16) of such gross production.

(B) REDUCTION OF PAYMENTS. If, during the primary term, a portion of the land covered by this lease is included within the boundaries of a pooled unit that has been approved by the School Land Board and the owner of the soil in accordance with Natural Resources Code Sections 52.151-52.154, or if, at any time after the expiration of the primary term or the extended term, this lease covers a lesser number of acres than the total amount described herein, payments that are made on a per acre basis hereunder shall be reduced according to the number of acres pooled, released, surrendered, or otherwise severed, so that payments determined on a per acre basis under the terms of this lease during the primary term shall be calculated based upon the number of acres outside the boundaries of a pooled unit, or, if after the expiration of the primary term, the number of acres actually retained and covered by this lease.

21. USE OF WATER. Lessee shall have the right to use water produced on said land necessary for operations under this lease except water from wells or tanks of the owner of the soil; provided, however, Lessee shall not use potable water or water suitable for livestock or irrigation purposes for waterflood operations without the prior consent of the owner of the soil.

22. AUTHORIZED DAMAGES. Lessee shall pay the owner of the soil for damages caused by its operations to all personal property, improvements, livestock and crops on said land.

23. PIPELINE DEPTH. When requested by the owner of the soil, Lessee shall bury its pipelines below plow depth.

24. WELL LOCATION LIMIT. No well shall be drilled nearer than two hundred (200) feet to any house or barn now on said premises without the written consent of the owner of the soil.

25. POLLUTION. In developing this area, Lessee shall use the highest degree of care and all proper safeguards to prevent pollution. Without limiting the foregoing, pollution of coastal wetlands, natural waterways, rivers and impounded water shall be prevented by the use of containment facilities sufficient to prevent spillage, seepage or ground water contamination. In the event of pollution, Lessee shall use all means at its disposal to

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson Count Clerks Office

recapture all escaped hydrocarbons or other pollutant and shall be responsible for all damage to public and private properties. Lessee shall build and maintain fences around its slush, sump, and drainage pits and tank batteries so as to protect livestock against loss, damage or injury; and upon completion or abandonment of any well or wells, Lessee shall fill and level all slush pits and cellars and completely clean up the drilling site of all rubbish thereon. Lessee shall, while conducting operations on the leased premises, keep said premises free of all rubbish, cans, bottles, paper cups or garbage, and upon completion of operations shall restore the surface of the land to as near its original condition and contours as is practicable. Tanks and equipment will be kept painted and presentable.

26. REMOVAL OF EQUIPMENT. Subject to limitations in this paragraph, Lessee shall have the right to remove machinery and fixtures placed by Lessee on the leased premises, including the right to draw and remove casing, within one hundred twenty (120) days after the expiration or the termination of this lease unless the owner of the soil grants Lessee an extension of this 120-day period. However, Lessee may not remove casing from any well capable of producing oil and gas in paying quantities. Additionally, Lessee may not draw and remove casing until after thirty (30) days written notice to the Commissioner of the General Land Office and to the owner of the soil. The owner of the soil shall become the owner of any machinery, fixtures, or casing which are not timely removed by Lessee under the terms of this paragraph.

27. (A) ASSIGNMENTS. Under the conditions contained in this paragraph and Paragraph 29 of this lease, the rights and estates of either party to this lease may be assigned, in whole or in part, and the provisions of this lease shall extend to and be binding upon their heirs, devisees, legal representatives, successors and assigns. However, a change or division in ownership of the land, rentals, or royalties will not enlarge the obligations of Lessee, diminish the rights, privileges and estates of Lessee, impair the effectiveness of any payment made by Lessee or impair the effectiveness of any act performed by Lessee. And no change or division in ownership of the land, rentals, or royalties shall bind Lessee for any purpose until thirty (30) days after the owner of the soil (or his heirs, devisees, legal representatives or assigns) furnishes the Lessee with satisfactory written evidence of the change in ownership, including the original recorded muniments of title (or a certified copy of such original) when the ownership changed because of a conveyance. A total or partial assignment of this lease shall, to the extent of the interest assigned, relieve and discharge Lessee of all subsequent obligations under this lease. If this lease is assigned in its entirety as to only part of the acreage, the right and option to pay rentals shall be apportioned as between the several owners ratably, according to the area of each, and failure by one or more of them to pay his share of the rental shall not affect this lease on the part of the land upon which pro rata rentals are timely paid or tendered; however, if the assignor or assignee does not file a certified copy of such assignment in the General Land Office before the next rental paying date, the entire lease shall terminate for failure to pay the entire rental due under Paragraph 3. Every assignee shall succeed to all rights and be subject to all obligations, liabilities, and penalties owed to the State by the original lessee or any prior assignee of the lease, including any liabilities to the State for unpaid royalties.

(B) ASSIGNMENT LIMITATION. Notwithstanding any provision in Paragraph 27(a), if the owner of the soil acquires this lease in whole or in part by assignment without the prior written approval of the Commissioner of the General Land Office, this lease is void as of the time of assignment and the agency power of the owner may be forfeited by the Commissioner. An assignment will be treated as if it were made to the owner of the soil if the assignee is:

(1) a nominee of the owner of the soil;
(2) a corporation or subsidiary in which the owner of the soil is a principal stockholder or is an employee of such a corporation or subsidiary;
(3) a partnership in which the owner of the soil is a partner or is an employee of such a partnership;
(4) a principal stockholder or employee of the corporation which is the owner of the soil;
(5) a partner or employee in a partnership which is the owner of the soil;
(6) a fiduciary for the owner of the soil; including but not limited to a guardian, trustee, executor, administrator, receiver, or conservator for the owner of the soil; or
(7) a family member of the owner of the soil or related to the owner of the soil by marriage, blood, or adoption.

28. RELEASES. Under the conditions contained in this paragraph and Paragraph 29, Lessee may at any time execute and deliver to the owner of the soil and place of record a release or releases covering any portion or portions of the leased premises, and thereby surrender this lease as to such portion or portions, and be relieved of all subsequent obligations as to acreage surrendered. If any part of this lease is properly surrendered, the delay rental due under this lease shall be reduced by the proportion that the surrendered acreage bears to the acreage which was covered by this lease immediately prior to such surrender; however, such release will not relieve Lessee of any liabilities which may have accrued under this lease prior to the surrender of such acreage.

29. FILING OF ASSIGNMENTS AND RELEASES. If all or any part of this lease is assigned or released, such assignment or release must be recorded in the county where the land is situated, and the recorded instrument, or a copy of the recorded instrument certified by the County Clerk of the county in which the instrument is recorded, must be filed in the General Land Office within 90 days of the last execution date accompanied by the prescribed filing fee. If any such assignment is not so filed, the rights acquired under this lease shall be subject to forfeiture at the option of the Commissioner of the General Land Office.

30. DISCLOSURE CLAUSE. All provisions pertaining to the lease of the above-described land have been included in this instrument, including the statement of the true consideration to be paid for the execution of this lease and the rights and duties of the parties. Any collateral agreements concerning the development of oil and gas from the leased premises which are not contained in this lease render this lease invalid.

31. FIDUCIARY DUTY. The owner of the soil owes the State a fiduciary duty and must fully disclose any facts affecting the State's interest in the leased premises. When the interests of the owner of the soil conflict with those of the State, the owner of the soil is obligated to put the State's interests before his personal interests.

32. FORFEITURE. If Lessee shall fail or refuse to make the payment of any sum within thirty days after it becomes due, or if Lessee or an authorized agent should knowingly make any false return or false report concerning production or drilling, or if Lessee shall fail or refuse to drill any offset well or wells in good faith as required by law and the rules and regulations adopted by the Commissioner of the General Land Office, or if Lessee should fail to file reports in the manner required by law or fail to comply with rules and regulations promulgated by the General Land Office, the School Land Board, or the Railroad Commission, or if Lessee should refuse the proper authority access to the records pertaining to operations, or if Lessee or an authorized agent should knowingly fail or refuse to give correct information to the proper authority, or knowingly fail or refuse to furnish the General Land Office a correct log of any well, or if Lessee shall knowingly violate any of the material provisions of this lease, or if this lease is assigned and the assignment is not filed in the General Land Office as required by law, the rights acquired under this lease shall be subject to forfeiture by the Commissioner, and he shall forfeit same when sufficiently informed of the facts which authorize a forfeiture, and when forfeited the area shall again be subject to lease under the terms of the Relinquishment Act. However, nothing herein shall be construed as waiving the automatic termination of this lease by operation of law or by reason of any special limitation arising hereunder. Forfeitures may be set aside and this lease and all rights thereunder

CULBERSON COUNTY TEXAS
True and Correct
copy of
Original filed in
Culberson County
Clerks Office

reinstated before the rights of another intervene upon satisfactory evidence to the Commissioner of the General Land Office of future compliance with the provisions of the law and of this lease and the rules and regulations that may be adopted relative hereto.

33. LIEN. In accordance with Texas Natural Resources Code 52.136, the State shall have a first lien upon all oil and gas produced from the area covered by this lease to secure payment of all unpaid royalty and other sums of money that may become due under this lease. By acceptance of this lease, Lessee grants the State, in addition to the lien provided by Texas Natural Resources Code 52.136 and any other applicable statutory lien, an express contractual lien on and security interest in all leased minerals in and extracted from the leased premises, all proceeds which may accrue to Lessee from the sale of such leased minerals, whether such proceeds are held by Lessee or by a third party, and all fixtures on and improvements to the leased premises used in connection with the production or processing of such leased minerals in order to secure the payment of all royalties or other amounts due or to become due under this lease and to secure payment of any damages or loss that Lessor may suffer by reason of Lessee's breach of any covenant or condition of this lease, whether express or implied. This lien and security interest may be foreclosed with or without court proceedings in the manner provided in the Title 1, Chap. 9 of the Texas Business and Commerce Code. Lessee agrees that the Commissioner may require Lessee to execute and record such instruments as may be reasonably necessary to acknowledge, attach or perfect this lien. Lessee hereby represents that there are no prior or superior liens arising from and relating to Lessee's activities upon the above-described property or from Lessee's acquisition of this lease. Should the Commissioner at any time determine that this representation is not true, then the Commissioner may declare this lease forfeited as provided herein.

34. POOLING. Lessee is hereby granted the right to pool or unitize the royalty interest of the owner of the soil under this lease with any other leasehold or mineral interest for the exploration, development and production of oil or gas or either of them upon the same terms as shall be approved by the School Land Board and the Commissioner of the General Land Office for the pooling or unitizing of the interest of the State under this lease pursuant to Texas Natural Resources Code 52.151-52.154. The owner of the soil agrees that the inclusion of this provision in this lease satisfies the execution requirements stated in Texas Natural Resources Code 52.152.

35. INDEMNITY. Lessee hereby releases and discharges the State of Texas and the owner of the soil, their officers, employees, partners, agents, contractors, subcontractors, guests, invitees, and their respective successors and assigns, of and from all and any actions and causes of action of every nature, or other harm, including environmental harm, for which recovery of damages is sought, including, but not limited to, all losses and expenses which are caused by the activities of Lessee, its officers, employees, and agents arising out of, incidental to, or resulting from, the operations of or for Lessee on the leased premises hereunder, or that may arise out of or be occasioned by Lessee's breach of any of the terms or provisions of this Agreement, or by any other negligent or strictly liable act or omission of Lessee. Further, Lessee hereby agrees to be liable for, exonerate, indemnify, defend and hold harmless the State of Texas and the owner of the soil, their officers, employees and agents, their successors or assigns, against any and all claims, liabilities, losses, damages, actions, personal injury (including death), costs and expenses, or other harm for which recovery of damages is sought, under any theory including tort, contract, or strict liability, including attorneys' fees and other legal expenses, including those related to environmental hazards, on the leased premises or in any way related to Lessee's failure to comply with any and all environmental laws; those arising from or in any way related to Lessee's operations or any other of Lessee's activities on the leased premises; those arising from Lessee's use of the surface of the leased premises; and those that may arise out of or be occasioned by Lessee's breach of any of the terms or provisions of this Agreement or any other act or omission of Lessee, its directors, officers, employees, partners, agents, contractors, subcontractors, guests, invitees, and their respective successors and assigns. Each assignee of this Agreement, or an interest therein, agrees to be liable for, exonerate, indemnify, defend and hold harmless the State of Texas and the owner of the soil, their officers, employees, and agents in the same manner provided above in connection with the activities of Lessee, its officers, employees, and agents as described above. **EXCEPT AS OTHERWISE EXPRESSLY LIMITED HEREIN, ALL OF THE INDEMNITY OBLIGATIONS AND\OR LIABILITIES ASSUMED UNDER THE TERMS OF THIS AGREEMENT SHALL BE WITHOUT LIMITS AND WITHOUT REGARD TO THE CAUSE OR CAUSES THEREOF (EXCLUDING PRE-EXISTING CONDITIONS), STRICT LIABILITY, OR THE NEGLIGENCE OF ANY PARTY OR PARTIES (INCLUDING THE NEGLIGENCE OF THE INDEMNIFIED PARTY), WHETHER SUCH NEGLIGENCE BE SOLE, JOINT, CONCURRENT, ACTIVE, OR PASSIVE.**

36. ENVIRONMENTAL HAZARDS. Lessee shall use the highest degree of care and all reasonable safeguards to prevent contamination or pollution of any environmental medium, including soil, surface waters, groundwater, sediments, and surface or subsurface strata, ambient air or any other environmental medium in, on, or under, the leased premises, by any waste, pollutant, or contaminant. Lessee shall not bring or permit to remain on the leased premises any asbestos containing materials, explosives, toxic materials, or substances regulated as hazardous wastes, hazardous materials, hazardous substances (as the term "Hazardous Substance" is defined in the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 U.S.C. Sections 9601, et seq.), or toxic substances under any federal, state, or local law or regulation ("Hazardous Materials"), except ordinary products commonly used in connection with oil and gas exploration and development operations and stored in the usual manner and quantities. **LESSEE'S VIOLATION OF THE FOREGOING PROHIBITION SHALL CONSTITUTE A MATERIAL BREACH AND DEFAULT HEREUNDER AND LESSEE SHALL INDEMNIFY, HOLD HARMLESS AND DEFEND THE STATE OF TEXAS AND THE OWNER OF THE SOIL FROM AND AGAINST ANY CLAIMS, DAMAGES, JUDGMENTS, PENALTIES, LIABILITIES, AND COSTS (INCLUDING REASONABLE ATTORNEYS' FEES AND COURT COSTS) CAUSED BY OR ARISING OUT OF (1) A VIOLATION OF THE FOREGOING PROHIBITION OR (2) THE PRESENCE, RELEASE, OR DISPOSAL OF ANY HAZARDOUS MATERIALS ON, UNDER, OR ABOUT THE LEASED PREMISES DURING LESSEE'S OCCUPANCY OR CONTROL OF THE LEASED PREMISES. LESSEE SHALL CLEAN UP, REMOVE, REMEDY AND REPAIR ANY SOIL OR GROUND WATER CONTAMINATION AND DAMAGE CAUSED BY THE PRESENCE OR RELEASE OF ANY HAZARDOUS MATERIALS IN, ON, UNDER, OR ABOUT THE LEASED PREMISES DURING LESSEE'S OCCUPANCY OF THE LEASED PREMISES IN CONFORMANCE WITH THE REQUIREMENTS OF APPLICABLE LAW. THIS INDEMNIFICATION AND ASSUMPTION SHALL APPLY, BUT IS NOT LIMITED TO, LIABILITY FOR RESPONSE ACTIONS UNDERTAKEN PURSUANT TO CERCLA OR ANY OTHER ENVIRONMENTAL LAW OR REGULATION. LESSEE SHALL IMMEDIATELY GIVE THE STATE OF TEXAS AND THE OWNER OF THE SOIL WRITTEN NOTICE OF ANY BREACH OR SUSPECTED BREACH OF THIS PARAGRAPH, UPON LEARNING OF THE PRESENCE OF ANY HAZARDOUS MATERIALS, OR UPON RECEIVING A NOTICE FROM ANY GOVERNMENTAL AGENCY PERTAINING TO HAZARDOUS MATERIALS WHICH MAY AFFECT THE LEASED PREMISES. THE OBLIGATIONS OF LESSEE HEREUNDER SHALL SURVIVE THE EXPIRATION OR EARLIER TERMINATION, FOR ANY REASON, OF THIS AGREEMENT.**

37. APPLICABLE LAW. This lease is issued under the provisions of Texas Natural Resources Code 52.171 through 52.190, commonly known as the Relinquishment Act, and other applicable statutes and amendments thereto, and if any provision in this lease does not conform to these statutes, the statutes will prevail over any nonconforming lease provisions.

38. EXECUTION. This oil and gas lease must be signed and acknowledged by the Lessee before it is filed of record in the county records and in the General Land Office of the State of Texas. Once the filing requirements found in Paragraph 39 of this lease have been satisfied, the effective date of this lease shall be the date found on Page 1.

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

39. LEASE FILING. Pursuant to Chapter 9 of the Texas Business and Commerce Code, this lease must be filed of record in the office of the County Clerk in any county in which all or any part of the leased premises is located, and certified copies thereof must be filed in the General Land Office. This lease is not effective until a certified copy of this lease (which is made and certified by the County Clerk from his records) is filed in the General Land Office in accordance with Texas Natural Resources Code 52.183. Additionally, this lease shall not be binding upon the State unless it recites the actual and true consideration paid or promised for execution of this lease. The bonus due the State and the prescribed filing fee shall accompany such certified copy to the General Land Office.

ADDENDUM 1

Attached to and Made a Part of Oil and Gas Lease dated March 28, 2013, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as the Lessor, to COG Operating LLC, as the Lessee

---

40. **Lease; Conflicting Provisions.** The terms set forth in the lease agreement to which this addendum is attached (i.e., the main body of the lease), including, but not limited to Paragraphs 1—39, together with the terms set forth in this addendum, including Paragraphs 40-48, comprise the lease. All references in the main body of the lease and this addendum to "this lease" or "the lease" refer to the main body of this lease, as amended, supplemented or otherwise modified by this addendum. In the event of a conflict between a term set forth in the main body of the lease and a term set forth in this addendum, then, except as otherwise expressly provided in this addendum, the conflicting provision of this addendum shall control.

41. **Definitions.** Except as otherwise expressly stated in this lease, the terms set forth below shall have the meanings ascribed thereto. A term defined in this lease, whether in this paragraph or elsewhere in this lease, shall include both the singular and the plural. RRC rules referenced herein are codified, as of the date of this lease, in Title 16, Part 1, Chapter 3 of the Texas Administrative Code.

(a) "Acreage Block" shall have the meaning ascribed thereto in Paragraph 41.

(b) "Actual drilling" means the penetration of the earth with a rotary rig cable of drilling, and intended to drill, to the objective depth.

(c) "Completed," when used to described the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil and/or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged.

(d) "Continuous Development" shall have the meaning ascribed thereto in Paragraph 46.a.

(e) "Earned Acreage Block" shall have the meaning ascribed thereto in Paragraph 45.b.

(f) "Gas well" shall have the meaning ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

(g) Omitted.

(h) "Horizontal Drainhole Well" shall have the meaning ascribed thereto in RRC Rule 86 (Title 16, Part 1, Chapter 3, Rule §86, Texas Administrative Code), as amended by applicable field rules, if any.

(i) "Oil well" shall have the definition ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

(j) "Owner" means the owner of the soil.

(k) "Producing Unit" shall have the meaning ascribed thereto in Paragraph 47.

(l) "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

(m) "Vertical Well" means a well (defined below) other than a Horizontal Well.

(n) "Well" (or "well"), unless otherwise expressly provided in this lease, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

42. **Leased Premises; Acreage Blocks.** As of the date of this lease, the lands covered by this lease consist of eleven (11) blocks of land (numbered I – XI below) located in Culberson County, Texas, described as follows ("Acreage Blocks"):

Acreage Block	Section	Block	Township	Gross Acres (more or less)
I	6	60	1	661.00
	2	61	1	677.00
	4	61	1	668.00

43. **Owner's Representation Regarding Ownership; Negation of Warranty.** Owner represents, but does not warrant (all warranties, express or implied, being hereby negated) that it owns the following interests in the leased premises (the "Surface Interests"):

(i) an undivided 75% of the surface estate in Section 30 and the S/2 SE/4 of Section 32, Block 60, Township 1, Culberson County, Texas; and

(ii) 100% of the surface estate in the remainder of the leased premises.

If it should be determined that Owner, at the time this lease was executed and delivered, did not own any part or parts of the Surface Interests (such part or parts of the Surface Interests being referred to herein as the "Unowned Surface Interests"), then, subject to the further provisions of this paragraph, Lessee shall have the right to recover from Owner the share of the bonus consideration paid to Owner attributable to such Unowned Surface Interests (the "Overpaid Bonus"); provided, however, nothing in this paragraph shall be construed as entitling Lessee to recover from the State of Texas the share of the bonus consideration paid to the State of Texas attributable to such Unowned Surface Interests.

Notwithstanding anything in this paragraph to the contrary, Lessee's right to recover Overpaid Bonus from Owner under the provisions of this paragraph shall be conditioned upon the following:

(i) Not later than 18 months from the date of this lease, Lessee shall furnish Owner and the State of Texas with a detailed written explanation of each title defect, issue and/or discrepancy giving rise to Lessee's right of recovery, together with a copy of the written opinion rendered of an attorney licensed in Texas in support of such right of recovery ("Claim for Reimbursement"); and

(ii) Owner must not have owned the Unowned Surface Interests for which Lessee is seeking recovery at the time this lease was executed and delivered.

Once both of these conditions have been met, then Owner, not later than 45 days following its receipt of Lessee's Claim for Reimbursement, shall refund the Overpaid Bonus to Lessee.

44. **Standards of Lessee's Conduct; Drilling and Completion of Wells.** At all times while this lease is in force, either in whole or in part, Lessee shall conduct its operations and activities, and otherwise fulfill its obligations, under this lease as would a reasonably prudent operator, in a good and workman like manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations and orders. Without limiting the foregoing, and except as otherwise agreed in writing by Owner, the State of Texas and Lessee, each well commenced by Lessee pursuant to this lease shall be drilled:

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

(i) in a bona fide attempt to produce oil and/or gas;

(ii) at a legal location (or locations) of Lessee's choice on the leased premises; and

(iii) with reasonable diligence through completion.

Absent the prior written consent of Owner and the State of Texas, which consent shall not be unreasonably withheld, Lessee shall not drill any well having take points (as defined in RRC Rule 86) in more than one Acreage Block.

45. **Exploration Program; Delay in Expiration of Primary Term; Initial Lease Segregation.**

a. **Exploration Program.** During the first three (3) years of this lease, Lessee shall drill at least eleven (11) wells on the leased premises, as more particularly provided below (the "Exploration Program"). Each well drilled pursuant to, or as a part of, the Exploration Program shall be referred to herein as an "Exploration Program Well."

Each Exploration Program Well shall be drilled and completed in accordance with the provisions of Paragraph 44.

In conducting the Exploration Program, and notwithstanding any other provision of this Paragraph 45.a to the contrary, Lessee shall in no event:

(i) commence the actual drilling of less than three (3) Exploration Program Wells prior to the expiration of one year from the date of this lease (the "1st Year Program Wells");

(ii) commence the actual drilling of less than seven (7) Exploration Program Wells, inclusive of the 1st Year Wells, prior to the expiration of two years from the date of this lease (the "1st and 2nd Year Program Wells"); or

(iii) commence the actual drilling of less than eleven (11) Exploration Program Wells, inclusive of the 1st and 2nd Year Program Wells, prior to the expiration of three years from the date of this lease.

If Lessee fails to timely commence the Exploration Program or, having timely commenced the Exploration Program, fails to prosecute the Exploration Program in accordance with the provisions of this Paragraph 45.a, then, as the sole consequence of such failure and notwithstanding the provisions of Paragraph 2, the primary term shall automatically expire.

Nothing in this Paragraph 45.a shall be construed as prohibiting Lessee from drilling one or more wells on the leased premises in addition to the Exploration Program Wells.

b. **Lessee's Right to Delay Expiration of Primary Term.** Lessee shall have the one-time right, but not the obligation, to delay the expiration of the primary term (as provided in Paragraph 2 or earlier terminated under the provisions of Paragraph 45.a) as to any one or more Acreage Blocks for a period of two (2) years, by:

(i) advising Owner and the State of Texas in writing, not later than sixty (60) days prior to the expiration of the primary term, of Lessee's desire to so delay the expiration of the primary term as to such Acreage Block or Blocks; and

(ii) paying Owner and the State of Texas (in equal shares), prior to the expiration of the primary term, an amount equal to $400.00 per acre times the total number of

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

net acres in such Acreage Block or Blocks covered by this lease (the "Delay Rental").

Lessee may exercise its rights under this Paragraph 45.b as to any Acreage Block or Blocks, even if Lessee has previously commenced the drilling of, drilled, and/or completed a well thereon; provided, such rights may not be exercised as to a fractional part or parts of an Acreage Block or Blocks, but must be exercised as to all of the lands within such Acreage Block or Blocks.

If Lessee timely and properly exercises its rights under this provision as to any Acreage Block or Blocks, then, with respect to such Acreage Block or Blocks only, then the primary term shall automatically continue for a period of two (2) additional years from the date the primary term would have expired had Lessee not exercised such rights.

c. **Retention of Earned Acreage Blocks; Initial Lease Segregation.**

(1) **Earned Acreage Blocks.** Subject to the lease savings provisions of Paragraphs 12, 13, 14 (as amended in this addendum), 15 and 18, and to Paragraph 46 below, upon the expiration of the primary term (as provided in Paragraph 2, earlier terminated under the provisions of Paragraph 45.a, or extended under the provisions of Paragraph 45.b), this lease shall automatically expire as to the entire leased premises, save and except any Acreage Block on which:

(i) there is located at least one well then producing oil and/or gas in paying quantities; or

(ii) Lessee is then engaged in the actual drilling of a well, provided that such well is drilled and thereafter completed in accordance with the provisions of Paragraph 44,

(an "Earned Acreage Block"). If, at the expiration of the primary term, there are no Earned Acreage Blocks, this lease shall automatically expire in its entirety, as to all of the lands described in Paragraph 41.

(2) **Lease Segregation.** If, upon the expiration of the primary term (as provided in Paragraph 2, earlier terminated under the provisions of Paragraph 45.a, or extended under the provisions of Paragraph 45.b), this lease is in force and effect as to two or more Earned Acreage Blocks, then this lease shall automatically be segregated at such time into separate and distinct leases, each of which shall cover a single Earned Acreage Block (a "Segregated Lease"). Each such Segregated Lease shall be deemed to contain the same terms and provisions as those set forth in this lease, including, but not limited to, Paragraph 46; provided, however, the premises covered by such Segregated Lease shall include only the Earned Acreage Block to which such Segregated Lease applies. Operations on and/or production from (or otherwise attributable to) one Segregated Lease shall not serve to maintain, or otherwise affect the status of, any other Segregated Lease.

46. **Continuous Development; Partial Expiration in Absence of Continuous Development.**

a. **Continuous Development.** This lease shall not, however, terminate pursuant to 45.c) at the end of the primary term (as originally provided in Paragraph 2, earlier terminated under the provisions of Paragraph 45.a, or extended under the provisions of Paragraph 45.b) as to an Earned Acreage Block(s) covered hereby if and for as long as Lessee is entitled to engage in Continuous Development relative to that Earned Acreage Block (i.e.

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

prior to the passing of a Commencement Deadline as to that particular Earned Acreage Block without the commencement of actual drilling of a Continuous Development Well in order to perpetuate this lease as to that Earned Acreage Block by Continuous Development), as more particularly provided below.

"Continuous Development" means the commencement of actual drilling of a well not later than 180 days following the expiration of the primary term (as originally provided in Paragraph 2, earlier terminated under the provisions of Paragraph 45.a, or extended under the provisions of Paragraph 45.b), and the continuous drilling of wells thereafter with not more than 210 days elapsing between the Completion of one well (whether the first or any subsequent Continuous Development Well) and the commencement of actual drilling of the next succeeding well; provided, Continuous Development as to an Earned Acreage Block shall also be deemed to have terminated upon any anniversary of the Lease following the expiration of the primary term (as originally provided in Paragraph 2, earlier terminated under the provisions of Paragraph 45.a, or extended under the provisions of Paragraph 45.b) if and to the extent Lessee did not commence actual drilling operations for a least two (2) wells during the immediately preceding Lease year. A "Continuous Development Well" means a well drilled pursuant to, or as a part of, Continuous Development. Continuous Development Wells must be drilled and completed in accordance with the provisions of Paragraph 44. "Commencement Deadline" means the date by which Lessee must commence actual drilling of a Continuous Development Well in order to perpetuate this lease by Continuous Development.

If, in conducting Continuous Development on an Earned Acreage Block covered by this lease, Lessee should commence actual drilling of any Continuous Development Well prior to the Commencement Deadline for such well, Lessee shall be entitled to save and accumulate the number of days between the date on which Lessee commenced actual drilling of such Continuous Development Well and the Commencement Deadline for such well ("Banked Days"), and thereafter use Banked Days to extend the Commencement Deadline for any subsequent Continuous Development Well or Wells on the Earned Acreage Block covered by this lease. Banked Days used to extend the Commencement Deadline for any Continuous Development Well shall be deducted from the total of Lessee's Banked Days. In no event shall Lessee be allowed to accumulate more than 180 Banked Days with respect to the Continuous Development being conducted by it on the Earned Acreage Block covered by this lease at any given time.

b. **Partial Expiration in Absence, or Upon Cessation, of Continuous Development.** If Lessee fails to timely commence Continuous Development on a particular Earned Acreage Block covered by this lease in accordance with Paragraph 46.a, or, having timely commenced Continuous Development on such Earned Acreage Block, thereafter ceases to engage in such Continuous Development, then, effective as of the expiration of the primary term (as originally provided in Paragraph 2, earlier terminated under the provisions of Paragraph 45.a, or extended under the provisions of Paragraph 45.b) or the date of drilling rig release from the last Continuous Development Well drilled on such Earned Acreage Block, whichever is the later to occur, and subject to the lease savings provisions of Paragraphs 12, 13, 14 (as amended in this addendum), 15 and 18, this lease shall automatically terminate as to that entire Earned Acreage Block, save and except the following ("Held Producing Units"):

(i) each well on the Earned Acreage Block producing oil and/or gas in paying quantities, and the lands within the geographic boundaries of the Producing Unit designated for such well; and

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

(ii) those depths in and under each such Producing Unit lying between the top of the Bell Canyon formation and the base of the deepest formation from which such well is then producing oil and/or gas (whether in paying quantities or not).

Further, this lease shall automatically be further segregated at such time into separate and distinct leases, solely for purposes of determining whether acreage within a Producing Unit Lease shall be held or the lease shall have expired as to said acreage, each of which shall cover a single Held Producing Unit (a "Producing Unit Lease"). Each Producing Unit Lease shall be deemed to contain the same terms and provisions as those set forth in this lease; provided, however, the premises covered by such Producing Unit Lease shall include only the Held Producing Unit to which such Producing Unit Lease applies. Operations on and/or production from (or otherwise attributable to) one Producing Unit Lease shall not serve to maintain, or otherwise affect the status of, any other Producing Unit Lease.

47. **Producing Units; Additional Lease Termination Events.**

a. **Producing Units.** Upon completion of any well as a producer of oil and/or gas, Lessee shall designate a geographic area surrounding such well (a "Producing Unit") by written instrument suitable for recording, and furnish the written designation to Owner and the State of Texas, in accordance with the further provisions hereof. The written designation may be filed by any party hereto in the county or counties in which all or part of the lands within such Producing Unit are located. Each Producing Unit shall be effective as of the date of first production of oil and/or gas from the well for which such Producing Unit has been designated.

Each Producing Unit shall conform to the spacing, density and proration provisions for such well, as permitted or prescribed in applicable RRC rules and/or orders; provided, however, no Producing Unit shall contain more than the maximum amount of acreage specified in the following tables, plus a tolerance of ten percent (10%):

VERTICAL WELLS		
Depth of Deepest Producing Formation		**Maximum Size of Producing Unit (in acres)**
Top of Bell Canyon to Base of Brushy Canyon		40

* If the distance from the first take point to the last take point is less than 100', then for purposes of computing the maximum amount of acreage that may be included in the Producing Unit designated for such well, the well shall be deemed to be a Vertical Well.

Each Producing Unit shall also be as nearly in the form of a square or rectangle as is reasonably practicable, and the surface location, bottom hole, penetration point, terminus, and take point locations of the well for which such Producing Unit has been designated shall be at legal locations in, on or under such unit.

Nothing herein shall be construed as prohibiting Lessee from revising an existing Producing Unit as to the amount or configuration of acreage included therein, or other matters, provided, however, the revised Producing Unit must comply with the requirements of this provision. Lessee may revise a Producing Unit as provided herein by furnishing the State of Texas and owner of the soil with a written instrument, suitable for recording, referencing or describing the existing Producing Unit and designating the revised Producing Unit. The effective date of the revised Producing Unit shall be the date such instrument is received by the State of Texas and owner of the soil, or as otherwise agreed by the parties. Such instrument may be recorded by the State of Texas, owner of the soil or Lessee in the county or counties in which the lands comprising the revised Producing Unit are located.

Except as otherwise expressly provided in this lease or agreed in writing by the State of Texas and owner of the soil, in advance, a Producing Unit formed or revised pursuant to this provision shall never contain lands other than lands then subject to this lease.

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

For purposes of this provision, "penetration point," "take point," "first take point," "last take point," and "terminus" shall have the meanings ascribed thereto in RRC Rule 86.

b. **Additional Lease Termination Events.** Notwithstanding any other provision of this lease to the contrary, but without limiting any other provision of this lease:

(1) If, following the expiration of the primary term, the production of oil and/or gas in paying quantities from a Producing Unit should cease, that Producing Unit shall remain in force for so long as there is not a cessation of both operations and of production for more than ninety (90) consecutive days, whether such operations be the same or different operations and/or on the same well or on a different or additional well or wells, and if production of oil or gas is commenced or restored without their having occurred a cessation of both operations and of production for more than ninety (90) consecutive days, that Producing Unit shall remain in force for so long thereafter as oil or gas is produced from said Producing Unit or said Producing Unit is otherwise maintained in force and effect.

(2) Upon the expiration of five (5) years following the cessation of Continuous Development, if any, as to a particular Earned Acreage Block, or the expiration of fifteen (15) years from the date of this lease, whichever is the later to occur, this lease shall automatically expire, on an Earned Acreage Block by Earned Acreage Block basis, as to:

(i) all of the lands within the geographic boundaries of the Producing Unit then covered by this Lease, save and except the minimum amount of acreage then necessary under RRC rules for the well to which such Producing Unit is dedicated to be produced at maximum allowables; and

(ii) all depths in and under such Producing Unit, save and except the depths situated between the top of the shallowest formation from which oil and/or gas is then being produced (whether in paying quantities or not) and the base of the deepest formation from which oil and/or gas is then being produced (whether in paying quantities or not).

(3) Upon the expiration of ten (10) years following the cessation of Continuous Development, if any, as to a particular Earned Acreage Block, or the expiration of twenty-five (25) years from the date of this lease, whichever is the later to occur, this lease shall automatically expire, on an Earned Acreage Block by Earned Acreage Block basis, as to all of the:

(i) lands within the geographic boundaries of the Producing Unit then covered by this Lease, save and except the minimum amount of acreage then necessary under RRC rules for the well to which such Producing Unit is dedicated to be produced at maximum allowables; and

(ii) depths and Horizons in and under such Producing Unit, save and except each formation within such Producing Unit then producing oil and/or gas (whether in paying quantities or not).

48. **Miscellaneous Provisions.**

a. **Duty to Develop.** Following cessation of Continuous Development, if any, or the expiration of the primary term, whichever is the later to occur, Lessee shall drill such additional well or wells in the same field or pool from which oil and/or gas is being produced, or capable of being produced, in paying quantities, as would a reasonably

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

prudent operator acting under the same or similar circumstances. Nothing in this provision shall be construed is limiting Lessee's implied duty to develop lands covered by this lease.

b. **Meetings.** Within a reasonable time following request by Owner and/or the State of Texas, Lessee agrees to meet with Owner and the State of Texas at the Texas General Land Office, or another mutually agreeable location, to discuss its operations and activities relating to this lease, including, but not limited to, past, present and planned (or anticipated) future operations affecting the surface and/or subsurface of the lands covered by this lease, and the results (or anticipated results) of those operations. Owner may disclose information obtained from Lessee during any such meeting with its partners, employees, contractors and consultants, but Owner shall be prohibited from disclosing, or allowing its partners, employees, contractors or consultants to disclose, Lessee's proprietary information to any other person or entity. Notwithstanding anything in this provision to the contrary, Lessee shall have no obligation to provide Owner its reserve data, geologic interpretations or other proprietary data, and Lessee shall not be required to meet with Owner more than twice per year pursuant to this provision.

c. **No Pooling Without Consent.** Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas Natural Resources Code §§ 52.151 - 52.154, the conflicting provision of said statutes shall control. In the event pooling is allowed, Lessee shall have the right, subject to the provisions of Paragraph 47, to designate the entire pooled unit as a Producing Unit.

d. **Information Requirements; Seismic.** Lessee agrees to promptly furnish Owner with the same information, reports and other documentation pertaining to its operations and activities under this lease that an operator is required to furnish a participating non-operator under the terms of the A.A.P.L. Form 610-1989 Model Form Operating Agreement ("Operations Information"). All Operations Information furnished to Owner will be kept strictly confidential until and unless it has been made available to the general public; provided, owner of the soil shall have the right to share the Operations Information with its owners, managers, contractors and consultants to the extent, and only to the extent, necessary or convenient to analyze and file same. In the event Lessee acquires proprietary seismic data covering all or part of the leased premises, Lessee agrees to grant Owner a free license to such data (including, but not limited to, field records, and processed and reprocessed data, to the extent its license allows it to do so without charge) over the portion or portions of the leased premises covered by such data, but shall not be required to furnish Owner its interpretations of any such data.

Without limiting the foregoing, Lessee further agrees as follows:

(1) Lessee shall allow Lessor and its representatives full access to all wells drilled pursuant to this lease, including, but not limited to, access to the records and reports pertaining thereto and to the derrick floor, at Lessor's sole risk and expense, and Lessor shall be furnished with samples or copies of all cores, cuttings, logs, drilling data, testing and completing data, and all other information obtained by Lessee pertaining to any well drilled hereunder. Upon request at any time, and from time to time, Lessee shall furnish Owner a current statement showing all wells that have been drilled and/or completed, or are being drilled or completed pursuant to this lease, the status of such wells, and current production information for such wells, if any, including, but not limited to, volumes, pricing and purchases.

(2) Unless and until Lessee is instructed otherwise, Lessee shall transmit all

CULBERSON COUNTY TEXAS

information required to be delivered to Owner pursuant to this provision or any other provision of the lease, using the contract person and information provided below.

Owner: Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd.

Owner's Designee: William D. Patterson

Physical Address of Owner:
6851 NE Loop 820, Suite 200
North Richland Hills, TX 76180

Telephone and Fax:
(817) 577-1131 ext. 206 (Work)
(817) 228-9184 (Mobile)
(817) 503-8985 (Fax)

Email:
billpatterson@petroleumlegal.com

(3) Without limiting the foregoing, Lessee agrees to deliver to Owner (or otherwise comply with) the following the following information and reports for each well drilled by Lessee pursuant to this lease:

(i) Notice by telephone of all proposed coring, drillstem testing, and logging in sufficient time for Owner to have a representative present.

(ii) Daily drilling, completion and initial potential test reports, and production reports for a period of at least three (3) months from the date of first production.

(iii) Daily mud logs (by email), and a print of the composite mud log.

(iv) Two field prints or preliminary prints, and two final prints of all logs run.

(v) Samples of any and all cores, if requested.

(vi) At or prior to the time actual drilling is commenced, Lessee's geologist in charge will contact Owner's designee to discuss any potential modification of the requirements under this paragraph and the necessary time requirements for notification of coring, logging, testing, etc.

(vii) Two copies of complete details of all drillstem tests taken, together with two copies of charts in bottom hole bomb.

(viii) One copy of the potential test.

(ix) One copy of completion and/or plugging report.

(x) One copy each of all other forms filed with the RRC and/or any other agency (whether state or federal).

Notwithstanding anything to the contrary above, Lessee shall never be obligated to provide reserve date, geologic interpretations or other proprietary or interpretive information. Any and all data and reports provided to Owner shall be without warrant of any kind or nature so that Lessee shall have absolutely no liability to Owner under any

CULBERSON COUNTY TEXAS
True and Correct copy of Original filed in Culberson County Clerks Office

theory or remedy arising, directly or indirectly, from providing same and Owner stipulates and agrees that it relies upon any such data and/or records at its own risk.

LESSOR SHALL FULLY INDEMNIFY AND HOLD HARMLESS LESSEE, ITS AGENTS, EMPLOYEES, CONTRACTORS, AND SUBCONTRACTORS, AND THEIR AGENTS, EMPLOYEES AND CONTRACTORS, FROM ANY AND ALL CLAIMS AND CAUSES OF ACTION, INCLUDING CONTRACTUAL CAUSES OF ACTION, ARISING FROM OR ASSERTED BY, THROUGH OR UNDER ANY PERSON ON WELL SITES, RIG FLOORS OR OTHER LESSEE OPERATIONAL AREAS AS INVITEES OF LESSOR, INCLUDING FOR ACTS OF A DIRECT OR INDIRECT INDEMNITEE'S ORDINARY NEGLIGENCE.

e. **Shut-in Wells.** Notwithstanding anything herein to the contrary, acreage held by shut-in royalties may not be maintained under this lease solely by the payment of shut-in royalties for any single period in excess of twelve (12) consecutive months or for more than three (3) years in the aggregate. For the sole purpose of computing the amount of shut-in royalties payable under Paragraph 14, it shall be deemed that the rental amount stipulated in Paragraph 3 is $5.00 per acre.

f. **Assignments.** Notwithstanding any other provision of this lease to the contrary, this lease may not be assigned absent the advance written consent of Owner and the State of Texas, which consent shall not be unreasonably withheld; provided, however, this condition to assignment shall not apply to Lessee's mortgage of all or part of its interest in the lease, or to its disposition of all, or substantially all, of its assets in the Permian Basin through merger, reorganization and/or consolidation.

g. **Releases.** If this lease expires or terminates for any cause, whether in whole or in part, Lessee shall immediately release this lease in writing as to the lands and/or depths that are no longer subject hereto; provided, however, the release of this lease, in whole or in part, shall not operate to lessen or relieve Lessee of any obligation or liability under or relating to this lease accruing prior to such expiration or termination. Lessee shall record all releases executed by it pursuant to this provision, and furnish copies thereof to Owner and the State of Texas.

h. **Binding Effect.** The provisions of this lease shall be covenants running with the lands, and shall inure to the benefit of and be binding upon Owner, the State of Texas and Lessee, and their respective heirs, successors, assigns, representatives, directors, principals, agents, employees, contractors and subcontractors.

i. **Surface Rights and Damages.** Simultaneously with the execution and delivery of this lease, Owner and Lessee have entered into a separate surface use and damages agreement which governing their respective rights and obligations in regard to the surface rights granted to Lessee, expressly or impliedly, herein.

Re: **State Lease MF 114883**

RAL Lease dated March 28, 2013 recorded in Doc. 68871, covering 30518.72 ac., Culberson Co., TX, Wise Asset No. 8, LTD, et al, agent for State of TX, Lessors

Dear Mr. Cowell:

The certified copy of the Relinquishment Act lease covering the above referenced tract has been approved and filed in our records under Mineral File numbers **MF-114883. Please refer to this lease number when making payments to the State and in all future correspondence concerning the lease. Failure to include the mineral file number may delay processing of any payments towards the lease.**

There are several contractual and statutory responsibilities for the Lessee which are material provisions of the lease as outlined in the agreement such as Section 10(B) which requires submission of written notice for all drilling, production and related activities. When forms are filed with the Texas Railroad Commission, they are required to be submitted to the General Land Office as well. Examples are W-1, Application to Drill; W-2, Oil Well Completion Report and Log; G-1, Gas Well Completion Report and Log; W-3, Plugging Report; G-5, Gas Well Classification Report; G-10, Gas Well Status Report; W-10, Oil Well Status Report; W-12, Inclination Report; electric logs; directional surveys.

Chapter 52 of the Texas Natural Resources Codes specifies that the surface owner's right to receive a portion of the revenues generated by the lease shall be in lieu of all damages to the soil. Therefore, any payments made for surface use or damages other than the authorized damages set out in the lease form must be shared equally with the state.

Your remittance of **$12,131,245.50** has been applied to the State's portion of the cash bonus. We are also in receipt of your filing and processing fees.

Sincerely yours,

Deborah A Cantu

SURFACE USE, DAMAGES AND WATER AGREEMENT

STATE OF TEXAS §
§
COUNTY OF CULBERSON §

This Surface Use, Damages and Water Agreement (the "Agreement"), dated and effective as of March 28, 2013, is between **Wise Asset No. 8, Ltd.** ("Wise 8") and **Wise Asset No. 10, Ltd.** ("Wise 10"), 6851 NE Loop 820, Suite 200, North Richland Hills, TX 76180 (collectively, "Grantor"), and **COG Operating LLC**, whose address is One Concho Center, 600 W. Illinois, Midland, Texas 79701 ("Grantee").

Recitals

Reference is made to that certain Oil & Gas Lease of even date herewith (the "Subject Lease"), by and between the State of Texas, acting by and through Grantor, as agent, and Grantee, covering the lands situated in Culberson County, Texas, described in Exhibit "A," attached to and made a part hereof (the "Mineral Classified Lands"). Wise 8 believes, but does not warrant, that it owns the surface of all of the Mineral Classified Lands, except:

(1) Section 30 and the S/2 SE/4 of Section 32, Block 60, Township 1, T&P Ry. Co. Survey, wherein Wise believes it owns an undivided 75% (rather than 100%) of the surface;

(2) Sections 46, Block 61, Township 1, T&P Ry. Co. Survey, Sections 10, 20, 28 and 30, and Section 12, all in Block 61, Township 2, T&P Ry. Co. Survey (the "Wise 10 Lands");

referred to herein, collectively, as the "Wise 8 Lands." Wise 10 believes, but does not warrant, that it owns the surface of the Wise 10 Lands.

Wise 10 also believes, but does not warrant, that it owns the surface of the lands situated in Culberson County, Texas, described in Exhibit "B," attached to and made a part hereof (the "Chevron Lands").

The surface of the Mineral Classified and Chevron Lands may be referred to herein, collectively, as the "Subject Lands."

The Subject Lands are subject to the mortgages, encumbrances, easements, rights-of-way, permits, grazing and other surface leases and agreements, if any, affecting said lands shown by or referenced in the official real property records of Culberson County, Texas.

Terms of Agreement

In consideration of the respective benefits to be derived by the parties hereunder, Grantor and Grantee hereby agree to the covenants and conditions set forth below. Except as otherwise expressly provided herein, in the event of a conflict between any of the terms of this Agreement and any of the terms of the Subject Lease, express or implied, the conflicting term of this Agreement shall prevail.

A. **Well Locations, Frac Pits, Facilities.** Subject to the terms of the Subject Lease and any applicable laws, rules, regulations and orders, Grantee shall have the right to choose the surface

location of each oil and gas well it drills on (i) the Mineral Classified Lands, pursuant to the Subject Lease, and (ii) the Chevron Lands, pursuant to a valid agreement between Grantee and the owner or owners of the oil and gas in and under said lands. Grantee shall pay Grantor Eight Thousand Dollars ($8,000.00) per location for each such well it drills having a surface location upon the Subject Lands not later than thirty (30) days following the construction of the pad site for such well. Absent Grantor's prior written consent, which consent shall not be unreasonably withheld, the pad site for an oil or gas well shall consist of no more acreage than is reasonably necessary for the drilling, completion and operation of such well, but in no event shall a pad site consist of more than four (4) acres (unless a pad site is used for multiple wells, in which event there shall be allowed an additional two (2) acres for each additional well drilled from the pad); provided, however, during drilling and completion operations, Grantee shall have the right, on a temporary basis, to use up to an additional one-half (1/2) acre of land adjoining the pad site for the construction of such pad site and the drilling and completion of the well located thereon, if and to the extent reasonably necessary.

Within 90 days following the cessation of drilling, reworking, deepening, completion and/or other operations on a pad site, Grantee shall restore any and all Subject Lands adjoining the pad site used for such operations or otherwise disturbed thereby, with the exception of caliche pits, to the condition such lands were in prior to the commencement of such operations (or as nearly thereto as reasonably practicable) and remove from such lands and the pad site all materials, equipment and other objects placed thereon by Grantee, except production and transportation equipment and facilities actually used in connection therewith. Within 90 days after the plugging and abandonment of any well, Grantee shall:

(i) level all dumps and mounds, and fill in all holes, pits, ditches and excavations (other than drainage ditches dug for the purpose of preventing erosion) created or used in connection with Grantor's operations on or relating to such well, and

(ii) remove from the pad site for such well, and adjacent lands, all materials, equipment, trash, debris and other objects placed on such lands by Grantor, excluding production and transportation equipment and facilities actually being used in Grantee's other operations on the Subject Lands.

Within 120 days following the termination of the Subject Lease as to any portion of the Subject Lands, Grantee shall remove from such Subject Lands all materials, above ground equipment and facilities, and all trash, debris and other items or objects placed on said lands by Grantee, unless same continue to be used in other operations on the Subject Lease by Grantee; and, except as otherwise directed by Grantee, restore such Subject Lands to the condition they were in prior to the granting of the Subject Lease insofar as is reasonably practicable.

Upon written request by Grantor, Grantee agrees to construct and maintain fences capable of turning cattle, sheep, goats and other livestock around all reserve pits, frac pits, tank batteries and other surface facilities placed on the Subject Lands by Grantee. In the event Grantee must cut trees or brush, Grantee agrees to remove from the Subject Lands, or otherwise dispose of, the cut trees or brush, as Grantor may reasonably direct. Without limiting the foregoing, Grantee agrees to place all trash and debris in adequate containers and periodically remove same from the premises.

B. **Caliche and Other Construction Material.** Grantee shall have the right to excavate gravel, dirt, caliche and other construction materials from any existing pit on the Subject Lands and from other sites on said lands approved in advance by Grantor (which approval shall not be unreasonably

withheld), and, subject to the other provisions of this Agreement, use such materials in the construction of roads, pad sites, pits and other operations sites, on (i) the Mineral Classified Lands, pursuant to the Subject Lease, or (ii) the Chevron Lands, pursuant to a valid agreement between Grantee and the owner or owners of the oil and gas in and under said lands. Grantee shall compensate Grantor for all such construction materials at the rate of Four Dollars and Fifty Cents ($4.50) per cubic yard used by Grantee within thirty (30) days following its excavation thereof.

C. **Roadways.** Grantee shall have the right to construct, use, maintain, inspect, repair, replace and operate new roadways, not to exceed twenty-five feet (25') in width, and to improve, use, maintain, inspect, repair and replace existing roadways, on and across the Subject Lands for the sole and only purposes of gaining access to and conducting operations: (i) pursuant to the Subject Lease or (ii) on the Chevron Lands pursuant to a valid agreement between Grantee and the owner or owners of the oil and gas in and under said lands; provided, new roadways must be constructed at locations discussed in advance with Grantor and thereafter located with reasonable accommodation of the interests of the surface estate communicated to Grantee incident to that discussion. Grantee shall also have the right to clear and, during periods of construction, improvement or maintenance, use up to an additional five feet (5') on each side of such road surface as and to the extent necessary for the safety of vehicular traffic, persons, livestock and/or game.

As compensation for the right to construct and use new roadways, Grantee shall pay Grantor an amount equal to Thirty Dollars ($30.00) per rod of new roadway constructed within 30 days following the completion of all, or a major phase, of construction. As compensation for the right to improve and use any existing roadway, Grantee shall identify the existing road or portion thereof that Grantee elects to use and pay Grantor an amount equal to Fifteen Dollars ($15.00) per rod for the portion of such roadway Grantee uses within 30 days of its first use thereof. In the absence of such an election and timely payment, use of an existing road shall be deemed to be, and to have been, without Grantor's permission. If Grantee desires to use an existing road, or portion thereof, that was built by and/or is being used by another oil and/or gas operator, Grantee agrees, prior to using such road or portion thereof, to enter into such agreement with such operator as may be required by such operator in connection with Grantee's use of such road.

Grantee's right to construct, use, maintain, inspect, repair, replace and operate new roadways, and improve, use, maintain, inspect, repair and replace existing roadways hereunder shall be for the sole purpose of transporting or hauling personnel, vehicles, equipment, facilities, machinery, materials and supplies used or to be used in the operations conducted by Grantee on (i) the Mineral Classified Lands, pursuant to the Subject Lease, or (ii) the Chevron Lands, pursuant to a valid agreement between Grantee and the owner or owners of the oil and gas in and under said lands.

Grantor, its owners, agents, representatives, employees, contractors, lessees, permittees, successor and assigns, shall have the concurrent right to use all existing roadways and any new roadways constructed by Grantee for any lawful purpose, provided that any such use of the existing or new roadways shall not be exercised in a manner so as to cause unreasonably interference with Grantee's rights hereunder. If Grantor expressly grants any third party oil and gas operator the right to use a roadway constructed by Grantee on the Subject Lands, Grantor shall require such operator to enter into an agreement with Grantee pursuant to which such operator shall be required to bear a proportionate share the costs of constructing, maintaining, repairing and improving such roadway, if any.

New roadways shall be constructed and, prior to first use, existing roadways shall be improved, with such materials and in such a manner that they are able to withstand heavy oilfield traffic and weather conditions typical of the area in which the roadways are located.

Grantee will construct such berms, diversion terraces and drainage ditches, install such drainage pipes, and take such other steps as may be reasonably necessary to reduce erosion of any new or existing roadway it constructs and/or uses pursuant to this Agreement, and of the Subject Lands adjacent thereto.

Nothing in this Agreement shall be construed as causing or allowing any roadway on the Subject Lands to be dedicated to public use or otherwise become a public road.

Grantee's construction, improvement and use of any roadway on the Subject Lands shall be conducted in a good, safe, legal and workmanlike manner. Grantee shall maintain all such roadways in a good, smooth and all-weather condition at all times while this Agreement is in force. Grantee agrees to frequently wet down dry roadways during times of heavy oilfield traffic. If Grantee should ever fail in its duty to maintain a roadway as required herein, then, in addition to any other remedies that may be available to Grantor herein, Grantor may, but will not be obligated, to take whatever action it deems reasonably necessary to bring such roadway into (or back into) a good, smooth and all-weather condition, and, in such event, shall be reimbursed by Grantee for the costs incurred by Grantor in connection therewith, plus a 10% administrative charge, immediately upon demand. All such costs, including such charge, shall bear interest from the date of demand at the lower of (i) the rate provided in Nat. Res. Code §91.403 plus an additional two (2) percent or (ii) the highest lawful rate.

Notwithstanding anything herein to the contrary, Grantor shall promptly repair, at no cost to Grantee, any damage to roadways used by Grantee pursuant to this Agreement caused by Grantor's use of or activities on such roadways.

While on the Subject Lands, Grantee shall have no right to leave roadways unless and only to the extent (i) such right exists under another provision of this Agreement, (ii) required in the construction, maintenance, repair or replacement of such roadway, (iii) required in order to avoid or properly respond to an emergency, or (iv) necessary to allow the passage of oncoming traffic.

Upon the termination of this Agreement or Grantee's cessation of use of any roadway, whichever is the first to occur, Grantee shall leave such roadway in a good, smooth, all-weather condition, and, if requested by Grantor, promptly reclaim, at its own cost, any other portion of the Subject Lands adjoining such roadways that may have been damaged or disturbed by Grantee's construction, maintenance, use of, or other activities on or relating to, such roadway. Grantee's duty to reclaim any such Subject Lands may consist of, but shall not be limited to, backfilling and leveling ruts and ditches (other than drainage ditches), shoring up berms and diversion terraces, replacing damaged or corroded drainage pipes, deepening drainage ditches, and seeding or re-seeding Subject Lands with grass seed of a type selected by Grantor and consistent with surrounding vegetation.

D. **Pipelines.** Subject to the further terms of this provision, Grantor hereby GRANTS AND CONVEYS to Grantee an easement (the "Pipeline Easement") to construct, lay, install, operate, use, maintain, inspect, repair and replace pipelines having an inside diameter of up to twelve inches (12") across strips of the Subject Lands up to thirty feet (30') in width (collectively, the "Easement Strips;" singularly, an "Easement Strip"), together with such risers, valves, meters and other appurtenances as may be reasonably required for the efficient and safe operation thereof (collectively, the "Pipelines;"

singularly, a "Pipeline"). Notwithstanding anything herein to the contrary, the sole and only purpose for which the Pipeline Easement is being granted herein is the transporting of oil, natural gas, fresh water and/or salt water (and other fluids produced from oil or gas wells) produced by Grantee from (i) the Mineral Classified Lands, pursuant to the Subject Lease, or (ii) the Chevron Lands, pursuant to a valid agreement between Grantee and the owner or owners of the oil and gas in and under said lands (collectively, the "Permitted Substances").

For as long as the Pipeline Easement remains in force, Grantee shall have such rights of ingress and egress over and upon the Easement Strip as may be reasonable and necessary to Grantee's full use and enjoyment of such easement. Such rights of ingress and egress shall never be exercised in a manner so as to interfere with Grantor's use of or activities upon the Subject Lands adjacent thereto. Notwithstanding anything else in this Agreement to the contrary, if Grantee fails to use an Easement Strip for the transportation of Permitted Substances for any continuous period of eighteen (18) months, the Pipeline Easement shall terminate insofar as it covers such Easement Strip and title to the Pipeline or Pipelines within such Easement Strip shall automatically vest in Grantor. Grantee shall notify Grantor, in advance, by telephone or electronic mail prior to entering the Subject Lands for the purpose of constructing, installing, repairing or replacing any Pipeline.

The route and location of each Easement Strip shall be approved in advance by Grantor; provided, however, such approval shall not be unreasonably withheld. Additionally, Pipelines shall be situated on the Subject Lands in an efficient manner such that the total acreage covered by the Easement Strips utilized by Grantee under the terms of the Pipeline Easement is minimized. Wherever practical, the Easement Strips shall abut roadways or fences.

Pipelines placed on the Subject Lands pursuant hereto shall be constructed in accordance with the industry standards and shall be maintained at all times in a good, safe and working condition. If reasonably necessary or advisable to prevent corrosion or rust, Grantee shall install cathodic protection systems along the Pipelines. Unless otherwise agreed by Grantor, which approval shall not be unreasonably withheld, Pipelines shall be buried to a safe depth, but in no event less than 24 inches subsurface unless rock impenetrable with ordinary ditching equipment is encountered at a lesser depth, in which event burial shall be immediately above the depth of such rock; provided, where any Pipeline crosses a grazing trail or road (whether improved or unimproved) the Pipeline shall be buried to a minimum depth of 36 inches beneath such road unless rock impenetrable with ordinary ditching equipment is encountered at a lesser depth, in which event burial shall be immediately above the depth of such rock. Grantee shall construct such berms, diversion terraces and ditches on or adjacent to the Easement Strip as necessary to divert storm water away from, and reasonably prevent erosion of, the Easement Strip and the Subject Lands or lands adjacent thereto. In cutting senderos (or paths) across creeks, streams, or rivers, or the dry beds of any of them, the banks shall be pushed or dragged outward from the channel so that the channel will not be obstructed.

When exercising its rights of ingress and egress upon an Easement Strip, Grantee shall leave all gates closed and locked. Grantee shall immediately repair any and all damage to the roads and/or routes utilized by Grantee to the extent such damage may be caused by or otherwise relate to Grantee's activities or operations in connection herewith. If and when necessary, during times of construction, repair or replacement of a Pipeline, Grantee shall have the temporary right to go upon an additional 5 feet of the Subject Lands on either side of the Easement Strip.

Pipelines and Pipeline appurtenances shall be maintained in a good, safe and working condition and shall be capable of withstanding any and all pressures that may be exerted upon them by the

substance(s) transported therein, and shall be operated in accordance with applicable statutes, laws, orders, rules and regulations.

Immediately following the construction, installation, maintenance, inspection, repair and/or replacement of any Pipeline, Grantee shall restore the surface of the Easement Strip on which the Pipeline is located to the condition it was in immediately prior to the commencement of such operation (or as nearly thereto as reasonably practicable).

Absent Grantor's prior written consent, which consent shall not be unreasonably withheld, Grantee shall not construct a roadway on any portion of an Easement Strip, and shall not use any portion of an Easement Strip as a roadway. Grantor, its successors and assigns, shall have the concurrent rights of ingress and egress upon, over and across any Easement Strip utilized by Grantee pursuant to the Pipeline Easement, and may use the surface of any Easement Strip for the grazing and herding of livestock, but shall not exercise its rights upon the Easement Strip in any manner so as to unreasonably interfere with Grantee's full use and enjoyment of the Pipeline Easement.

As consideration for the granting of the Pipeline Easement, Grantee agrees to pay Grantor, within thirty (30) days following the installation of each Pipeline, an amount equal to:

(a) if the Pipeline has an inside diameter of four inches (4") or less, $20.00 per lineal rod;

(b) if the Pipeline has an inside diameter of greater than four inches (4") but less than eight inches (8"), $30.00 per lineal rod; and,

(c) if the Pipeline has an inside diameter of greater than eight inches (8") but equal to or less than twelve inches (12"), $55.00 per lineal rod.

The construction and installation of any Pipeline having an inside diameter that is greater than twelve inches (12") shall be subject to separate negotiation.

E. **Power Lines.** Grantee shall have the right to install power lines on the Subject Lands for the purpose of supplying power for operations on (i) the Mineral Classified Lands, pursuant to the Subject Lease, or (ii) the Chevron Lands, pursuant to a valid agreement between Grantee and the owner or owners of the oil and gas in and under said lands. Above-ground power lines shall be constructed in such a manner so as to ensure they are able to withstand high winds and other weather conditions typical of the area in which the Subject Lands are situated. Grantee shall pay Grantor an amount equal to Fifteen Dollars ($15.00) per rod for each power line it installs within 30 days following completion of installation. Grantee shall have the right and duty to inspect, maintain, repair and replace, at its sole cost and risk, any power lines it installs pursuant to this provision as may be necessary to ensure the lines are in good and safe condition at all times. Upon termination of this Agreement for any reason, all power lines, together with the equipment, facilities and other appurtenances used in connection therewith, installed on the Subject Lands by Grantee shall be left, WHERE IS, AS IS, and title thereto shall automatically vest in Grantor. Upon Grantee's consent, which shall not be unreasonably withheld, Grantor shall have the concurrent right to use power transmitted through the power lines installed on the surface of the Subject Lands, at Grantor's sole risk, cost and expense, for grazing or domestic purposes, or in the production, storage and/or transportation of water.

F. **Other Sites.** Subject to Grantor's prior written consent, which consent shall not be unreasonably withheld, Grantee shall have the right to use a reasonable number of additional sites on

the Subject Lands for the construction, installation, and operation of frac pits, tank batteries, compressor stations, booster stations, and cathodic protection systems, together with the right of ingress to and egress from said sites; provided, however, such additional sites may only be constructed and installed if and as reasonably necessary for Grantee to efficiently conduct its operation on (i) the Mineral Classified Lands, pursuant to the Subject Lease, or (ii) the Chevron Lands, pursuant to a valid agreement between Grantee and the owner or owners of the oil and gas in and under said lands. Within 30 days following the completion of construction of any such additional site, Grantee shall pay Grantor an amount equal to One Thousand Seven Hundred Fifty Dollars ($1,750.00) per acre for the portion or portions of the Subject Lands so used. In exercising its rights under this provision, Grantee shall utilize only that portion or portions of the Subject Lands as may be reasonably necessary for the operations to be conducted thereon. Absent the express consent of Grantor, which consent shall not be unreasonably withheld, no additional site utilized by Grantee pursuant to this provision shall contain in excess of three (3) acres. This provision shall not be construed as granting Grantee the right to construct or place any amine plant, gas plant or other plant, or any offices or housing, on the Subject Lands, such right to be separately negotiated.

G. **Fences.** Subject to the other provisions of this Agreement, including, without limitation, the further terms of this provision, Grantee may cut and/or create an opening in any fence on the Subject Lands at the point the fence is crossed by a roadway constructed by Grantee or a Pipeline. Before cutting any fence, Grantee shall first install a steel H-brace on each side of the cut sufficient to prevent sagging in adjoining fence sections. Where the fence is crossed by a roadway constructed by Grantee hereunder, Grantee shall install a cattle guard capable of turning cattle, sheep, goats and other livestock at, and a substantial steel gate in, the opening. Where the fence is crossed by an Easement Strip, Grantee shall, immediately following the installation of any Pipeline thereon, either (i) rebuild and restore the fence to the condition it was in immediately prior to being cut (or better), or (ii) install a cattle guard capable of turning cattle, sheep, goats and other livestock at, and a substantial steel gate in, the opening. Unless otherwise agreed by Grantor, pits shall be dug (and maintained) beneath each cattle guard installed by Grantee on the Subject Lands to a depth of at least eighteen inches (18") subsurface unless rock impenetrable with ordinary ditching equipment is encountered at a lesser depth, in which event digging shall extend to the depth of such rock . Each fence post installed or replaced by Grantee shall be buried to a depth of not less than thirty inches (30") subsurface unless rock impenetrable with ordinary fencing equipment is encountered at a lesser depth, in which event digging shall extend to the depth of such rock. Without limiting the foregoing, Grantor shall have the right to approve the quality, design and construction of all fencing, cattle guards, gates and fence components. Grantee shall place a substantial lock on each gate it installs pursuant to this Agreement and furnish Grantor with a key or the combination for each such lock. Grantee shall keep all gates closed and locked at all times, except while passing through them. Upon termination of the Easement for any reason, Grantee shall immediately deliver to Grantor any and all gate keys in its possession, or in possession of Grantee's employees, agents, representatives, contractors, invitees, licensees or permittees.

All cattle guards, gates and adjoining fence sections installed or used by Grantee, or otherwise affected by Grantee's operations and activities, shall be maintained in good condition at all times while this Agreement remains in force. Any fencing, brace, gate, cattle guard and lock installed or placed on the Subject Lands, whether by Grantor or Grantee, shall be the sole property of Grantor.

If any fence or other equipment, personal property, fixture, facility or structure on the Subject Lands is damaged as a result of Grantee's operations or activities under this Agreement, Grantee shall promptly repair the damage to Grantee's reasonable satisfaction; provided, if Grantee fails to repair the damage promptly after it occurs, Grantor shall have the right to repair such damage itself; provided, if

Grantor does repair any such damage, Grantee shall immediately reimburse Grantor for the costs incurred by Grantor in connection therewith, plus an administrative charge equal to 10% of such costs, immediately upon written demand.

H. **Livestock.** If as a result of Grantee's operations or activities on the Subject Lands any livestock is killed or injured, Grantee shall pay Grantor, immediately upon demand, an amount equal to the fair market value of such livestock.

I. **Structures and Vegetation.** Unless otherwise expressly provided in this Agreement or agreed by Grantor in writing in advance, Grantee shall never move, remove, or otherwise alter, disturb or damage any equipment, personal property, fixture, facility or structure on the Subject Lands owned or operated by any party other than Grantee. At any time, and from time to time, while this Agreement remains in force, Grantee shall have the right to cut down and remove, or cut back, any vegetation, including, without limitation, grasses, crops, bushes, and trees (collectively, "Vegetation"), that substantially interferes with Grantee's full use and enjoyment of the rights and interests of Grantee under this Agreement, or as may be necessary or advisable for the safety of persons, livestock and other animals. If requested by Grantor, vegetation severed from the ground shall be buried at least twenty-four inches (24") below the surface of the earth or, at Grantor's option, delivered to Grantor to use or dispose of as Grantor sees fit.

J. **Water.** Grantee shall buy from Grantor all of the water necessary for Grantee's drilling, completion and other oil and gas operations on the Subject Lands; provided, however, if and to the extent Grantor is unable to provide Grantee water of sufficient quality and quantity to reasonably meet Grantee's needs for such operations at the time specified by Grantee, Grantee shall have the right to supplement its need for water in such operations by procuring water from another party or source.

Except as otherwise expressly provided in the foregoing paragraph, Grantee agrees to purchase and take delivery of Grantor's water at Grantee's frac pits or such other delivery point or points that may be specified in advance by Grantee (the "Frac Pits") and to pay the purchase price and transportation fee for such water as provided below; provided, however, in the event, and only in the event, Grantor does not have in place (and will be unable to have in place) tanks, electricity, pumps, water pipelines, meters and other water transportation facilities ("Water Transportation Infrastructure") sufficient to transport water from its water source to Grantee's Frac Pits at the time specified in advance by Grantee, Grantee shall have the right to purchase and take delivery of such water at Grantor's water source for the purchase price only, as provided below. All installation, operation, replacement and maintenance costs incurred for or in connection with any Water Infrastructure installed and used by Grantor to deliver water from the source to Grantee's Frac Pits under this Agreement shall be borne solely by Grantor. All installation, operation, replacement and maintenance costs incurred for or in connection with Water Infrastructure installed and used by Grantee to transport water from the source to Grantee's Frac Pits shall be borne solely by Grantee. If Grantee, acting in accordance with this provision, takes delivery of Grantee's water from the source, Grantee shall not be required to pay Grantor an easement or other similar fee for temporarily installing and using Water Transportation Infrastructure required to transport such water to Grantee's Frac Pits.

For all water delivered by Grantor to Grantee pursuant to this Agreement, Grantee shall pay Grantor the following cash consideration:

(i) as the purchase price for all such water from the source, Eight-Five Cents ($0.85) per barrel produced; plus

(ii) if the water is transported by Grantor to the delivery point specified by Grantee, a transportation fee equal to One Dollar Forty Cents ($1.40) per barrel of water delivered.

For purposes of this provision, a barrel shall be deemed to contain forty-two (42) U.S. gallons. Grantor shall invoice Grantee for all water delivered to Grantee pursuant to this provision. Grantee shall pay each invoice not later than thirty (30) days following Grantee's receipt thereof. Past due invoices for water delivered pursuant to this provision shall bear interest from the due date at the lower of (i) the rate provided in Nat. Res. Code §91.403 plus an additional two (2) percent or (ii) the highest lawful rate.

Water purchased by Grantee from Grantor shall be metered by Grantor at the point of delivery. The meter shall be calibrated no less often than yearly. Grantee shall have the right, at its own cost, to install its own meter(s) in addition to any meter(s) utilized by Grantor in the event of a dispute. Upon request by Grantee in advance, Grantor will provide water samples from the well to be used in Grantee's operations and will only deliver water to Grantee that has been sampled and approved by Grantee in advance. There shall be no adjustments for meter calibrations of five (5) percent or less. As to calibrations of more than five (5) percent, the amount due, both paid and unpaid, shall be adjusted for the period from the prior calibration based upon the best available evidence of actual water use.

In the event Grantee, acting in accordance with the above, is required to supplement the water acquired from Grantor hereunder by procuring water from third parties ("Third Party Water"), Grantee shall also have the right, at its sole cost and for no additional compensation to Grantor, to transport such Third Party Water onto and across the Subject Lands to Grantee's Frac Pits or the point or points of use by hauling the water across the roadways on such Subject Lands or transporting it through temporary water lines. Temporary water lines shall be (i) placed generally along routes that are discussed in advance with Grantor and thereafter located with reasonable accommodation of the interests of the surface estate communicated to Grantee incident to that discussion, (ii) placed on the Subject Lands in such a manner that they do not unreasonably interfere with Grantor's grazing and other operations and activities on the Subject Lands, and (iii) removed promptly upon completion of the specific operation for which the water is being transported.

If Grantor is unable or unwilling to supply sufficient quantities of water for us in Grantee's operations on the Subject Lands, Grantee shall have the right (but never the obligation) to drill one or more additional water wells on the Mineral Classified Lands at a location or locations agreed upon in advance by Grantor and Grantee; however, Grantee shall not have the right to drill water wells on the Chevron Lands absent Grantor's prior consent, which consent shall not be unreasonably withheld. Grantee shall be prohibited from drilling a water well closer than one-half (1/2) mile from any of Grantor's water wells, whether now existing or drilled by Grantor after the date of this Agreement. In the event any such additional water well is successfully drilled and Grantee is able to use the water produced therefrom in its operations, Grantor shall take over the operation of such well after it has been drilled, completed and equipped for production, and deliver the water produced therefrom to Grantee's Frac Pits. Grantee shall compensate Grantor for the water produced from such well and delivered to Grantee at the same rates provided above; provided, however, Grantee shall have the right to take as a credit against such compensation 200% of the direct out-of-pocket costs paid by Grantee to survey, drill, complete and equip such additional water well.

Upon termination of this Agreement, Grantee's cessation of operations in the area, whichever occurs first, title to the water wells drilled by Grantee on the Subject Lands, and the pumps, tubing and other associated equipment used in connection therewith, shall automatically become the exclusive

property of Grantor, WHERE IS, AS IS, without warranty of any kind or nature, express or implied, including but not limited to without warranty of MERCHANTIBILITY and/or of FITNESS FOR ANY PURPOSE, and with Grantor to assume any and all future liability and responsibility therefore, including but not limited to plugging liability. Upon request by Grantor, Grantee agrees to promptly plug and abandon any water well it drills on the Subject Lands that is unable to produce useable water, in accordance with applicable agency rules and/or orders.

Grantee agrees to use its best efforts to notify Grantor at least thirty (30) days in advance of any operation or operations on the Subject Lands for which water will be needed so as to allow Grantor enough time to deliver such water to Grantee on a timely basis. In the notice, Grantee will provide Grantor with an estimate of the approximate amount of water it will need for the operation (or operations) and the approximate date or dates on which its use(s) of the water will commence and Grantor will provide Grantee with an estimate of its ability to supply Grantee's water needs.

K. **Indemnification.** Grantee agrees to indemnify Grantor and hold Grantor harmless from and against any and all claims, damages, liabilities, actions, causes of action, suits and proceedings (hereinafter collectively referred to as "Liabilities") arising out of or in connection with the operations or other activities, or omissions, of Grantee, or any of Grantee's representatives, contractors, directors, officers, agents, employees, personnel, affiliates, parent company or subsidiaries (collectively, "Grantee's Associated Entities"), including, but not limited to, fines, assessments, money damages (actual, special, imputed, and otherwise) and interest, and any and all reasonable attorneys' fees, costs of collection, expert witness fees and costs of court incurred in defending against or responding to same. Notwithstanding anything herein to the contrary, Grantor may, in addition to availing itself of any and all rights and remedies provided for elsewhere herein, at law, or in equity, take any lawful steps prudent, necessary, and/or convenient to fully defend and protect itself from, or mitigate, any such Liabilities and to collect from Grantee immediately upon demand all of the costs, damages and other monies it expends or incurs (or for which it otherwise becomes obligated) in connection therewith, including, but not limited to, reasonable attorneys' fees, costs of collection, expert witness fees, costs of court and interest. There shall be excluded from Grantee's indemnity any Liabilities caused by the sole negligence, by the gross negligence or by willful act or omission to act of Grantor, or Grantor's representatives, contractors, directors, officers, agents, employees, personnel, affiliates, parent company and subsidiaries. Provided, Grantee's indemnity obligations hereunder shall be conditioned upon Grantor providing Grantee with notice and an opportunity to defend Grantor within a reasonable time of the assertion of Liabilities against Grantor and Grantor's rights of self-help as provided for above shall be limited to instances where Grantee has declined to indemnify and defend Grantee relative to a particular Liability. In the event Grantee assumes the defense of Grantor, Grantor shall be entitled to retain separate counsel at its own expense to serve as co-counsel with counsel represented by Grantee to defend Grantor.

Without limiting the generality of the foregoing, if any act or omission (or alleged act or omission) of Grantee, anyone acting with Grantee's consent or on Grantee's behalf (including, but not limited to, Grantee's Associated Entities), or any other person for whom Grantee is or may be liable, results in or gives rise to any contractual, statutory, mechanics' and materialmans', judgment, or other lien or charge, or any order or judgment (or abstract thereof), being filed against any portion of the Subject Lands, or against any of the improvements, personal property and/or fixtures located therein or thereon, then Grantee shall, at its sole cost, charge and expense, immediately cause same to be canceled and discharged of record unless same is being actively contested by Grantee.

L. **Miscellaneous.**

1. At all times while this Agreement is in force, Grantee shall:

a. keep the Subject Lands it enters, and the lands immediately adjacent thereto, free of trash and debris, and keep the roadways on said lands free of brush and vegetation;

b. be strictly prohibited from discharging any firearm, smoking, starting any fire, hunting, trapping, consuming alcohol, using or consuming illegal drugs, and conducting or participating in any illegal activity;

c. exercise due diligence, conduct its operations and activities hereunder itself in a reasonably prudent manner, and conduct itself in a good and workmanlike manner; and

d. comply with any and all applicable oil, gas and/or mineral leases, laws, rules, regulations and orders.

2. Promptly upon request, Grantee shall furnish Grantor with plats (and legal descriptions) reflecting the location of any and all roads, cattle guards, gates, pits (other than temporary pits), pad sites, production facilities, transportation facilities, including, without limitation, compressor stations, gathering lines, pipelines, salt water disposal lines, power lines and other facilities constructed, placed and/or by Grantee on the Subject Lands. Such plats shall be in the form of, or accompanied by, surveys, if available.

3. In the event of a change of ownership of the Subject Lands or of the right to receive any payment hereunder, Grantee shall not be bound by same until thirty (30) days after it is furnished with satisfactory evidence in recordable form of said change of ownership. In the event the surface of the Subject Lands becomes owned severally be different parties or is otherwise subdivided, all payments hereunder shall be due to the owner of that portion of the Subject Lands which are burdened with the surface use herein described. Provided, no change in the ownership of the Subject Lands or in the ownership of, or rights to receive payments hereunder, however accomplished shall operate to enlarge the obligations or diminish the rights of Grantee.

4. If Grantee violates, fails to perform or breaches any covenant contained in this Agreement, Grantor shall notify Grantee in writing of the violation, failure, or breach ("Breach"). Grantee shall have forty-five (45) days following its receipt of such notice within which to commence to cure the Breach. If Grantee fails or refuses to cure the Breach to within such 30-day period, Grantor may, at its sole option, but without obligation to do so, and without relinquishing any other rights available to it at law, cure the Breach itself, in which event Grantee shall be obligated to pay Grantor, immediately upon written demand, all costs incurred by Grantor in curing the Breach, and an additional administrative charge equal to 10% of all such costs. Provided, in no event shall Grantor ever be entitled by reason of this provision or otherwise to a double recovery, albeit by recovery of its costs of cure and damages or otherwise.

5. Notwithstanding the foregoing or any other provision of this Agreement to the contrary, it is expressly understood and agreed by Grantor and Grantee that Grantee shall be strictly prohibited from transporting or hauling water across any part of the Subject Lands for use in any drilling, completion or other operations, except (i) water sold by Grantor to Grantee pursuant to this Agreement, or (ii) as otherwise expressly allowed in this Agreement. Grantee shall pay Grantor an amount equal to $1.50 per barrel for all water transported or hauled across the Subject Lands in violation of this provision on or before thirty (30) days following Grantee's receipt of written demand for such payment.

6. Grantee's rights under this Agreement shall be subject to any and all existing easements, rights of way, leases and restrictions of record covering or affecting the Subject Lands. Grantee shall comply with such existing easements, rights of way, leases and restrictions in locating, constructing, improving, maintaining, repairing and replacing any roadway, equipment, facilities, pipeline on the Subject Lands.

7. Without limiting any of the foregoing, Grantee shall be prohibited from using the Subject Lands for any purpose other than the purposes expressly stipulated in this Agreement.

8. The obligations, restrictions and conditions imposed upon Grantee under this Agreement shall additionally apply to Grantee's agents, employees, contractors, representatives, invitees, permittees, licencees, successors and assigns. The failure of any such agents, employees, contractors, representatives, invitees, permittees and licencees to comply with the terms and provisions of this Agreement, and the other acts and omissions of such parties while on the Subject Lands, shall be imputed to Grantee, the effect being the same as if Grantee had committed such failure(s), acts and omissions itself.

9. The covenants, conditions and other provisions of this Agreement shall be binding upon and inure to the benefit of Grantor and Grantee, and their respective successors and assigns; provided, however, Grantee may not assign any of its rights under this Agreement without the advance written consent of Grantor, which consent shall not be unreasonably withheld. Grantee shall furnish a copy of the assignment to Grantor and, if the assignment has been recorded, the recording information for the assignment.

10. Notwithstanding anything else in this Agreement to the contrary, the termination of all or any part of this Agreement shall not serve to relieve Grantee of any liability or other obligation of Grantee accruing under this Agreement prior to such termination. The obligation of Grantee under this Agreement to remove materials, equipment, supplies, machinery, and other personal property, fixtures from the Subject Lands, and to reclaim and restore the Subject Lands used by Grantee or affected by Grantee's operations and activities, shall survive the termination of this Agreement.

11. If a party brings a lawsuit to enforce any of its rights hereunder, the prevailing party shall be entitled to recover reasonable attorney's fees, expert witnesses' fees, all reasonable costs of prosecuting the litigation and costs of court from non-prevailing party. The determination of "the prevailing party" shall be determined from the totality of the circumstances, including the relief sought relative to the relief granted, and may or may not be the party in whose favor judgment is entered.

12. Without limiting any of the foregoing provisions of this Agreement, upon termination of this Agreement as to any of the Subject Lands, or the cessation of Grantee's operations on all or any portion of the Subject Lands, whichever is the first to occur, Grantee shall promptly remove any and all trash, debris, materials, above-ground equipment, vehicles, machinery, supplies and other personal property placed on said terminated lands by Grantee, except to the extent still used in operations conducted by Grantee on (i) Mineral Classified Lands, pursuant to the Subject Lease, or (ii) the Chevron Lands, pursuant to a valid agreement between Grantee and the owner or owners of the oil and gas in and under said lands; and, Grantee shall further backfill and level pits, ditches and other holes (except drainage ditches), and generally restore the surface of said lands to the condition they were in immediately prior to the effective date of this Agreement (or as nearly thereto as reasonably practical). At any time while the Agreement is in force, Grantee shall, upon discovery or request by Grantor, promptly fill and level any material subsidence occurring on any of the Subject Lands as the result of Grantee's operations or other activities under this Agreement.

13. This Agreement may be not be amended except by written instrument signed by Grantor and Grantee. The waiver or waivers by Grantor of any of its rights hereunder, including, without limitation, the right of Grantor to enforce any provision hereof, shall not constitute a waiver, and shall not preclude or be construed as precluding Grantor from exercising any such right thereafter.

14. The terms and provisions of this Agreement shall be construed in accordance with the laws of the State of Texas (other than Texas conflicts laws which would result in the law of another jurisdiction being applicable, which Texas conflicts laws shall not be applicable). If any provision hereof is adjudged by a court of competent jurisdiction to be invalid, unenforceable, or illegal, such invalidity, unenforceability, or illegality shall have no bearing upon the validity or enforceability of any other provision hereof. In the event a lawsuit is filed by either party against the other and any cause of action alleged by either party therein (whether in the form of a claim or counterclaim) is predicated in whole or part upon any provision of this Agreement, the venue for such lawsuit shall be in Tarrant County, Texas, or, at Grantor's sole option, in Midland County, Texas.

15. All warranties and representations relating to title to or the state of Subject Lands, whether express, implied or statutory, are negated.

16. Except as otherwise agreed by the parties in advance, this Agreement shall not be recorded in Culberson County, but a copy hereof shall be filed with the Texas General Land Office.

17. This Agreement shall be not be binding upon either of the parties hereto until both have signed the Agreement where provided below and the Subject Lease has been accepted by the State of Texas after having been provided with a copy of this Agreement.

18. Except as otherwise expressly provided in this Agreement, any notice or other communication permitted or required under the terms of this Agreement shall be deemed properly given if in writing and, either (i) personally delivered, (ii) sent by certified mail via the United States Postal Service, by Federal Express, UPS or other courier service (with postage and other delivery charges prepaid), addressed to the recipient party at the physical address specified for such party below, or (iii) faxed to the recipient party using the fax number specified

for such party below. If either party wishes to change any of its contact information, such change shall be communicated to the other party in writing in accordance with this provision.

CC: "Drew Reid" <drew.reid@glo.state.tx.us>
Attachments: Addendum.Draft.Patterson.3.26.2013.Redline.docx

Paul and Marc:

I lied…I'm still at the office.

I've accepted most of the changes to the Addendum; however, please note my few revisions and comment. Bear in mind that Drew will need to approved the addendum.

Drew, please review the attached and let me and Paul and Marc know your thoughts. I know GLO doesn't normally allow the banking of credits in continuous development, but, overall, we are happy with the addendum and think that COG being allowed to bank up to 180 days of credit per Earned Acreage Block at any given time is fair under the circumstances.

Subject: Deal on Delaware Ranch

Bill,

Pursuant to our discussions earlier today we are ready to move forward at $800/ac. Please see the attached addendum that we will accept (I have provided a clean version and final draft noting changes).

We need the following:

1) GLO lease form needs to reflect paid-up in regard to rentals
2) Include clean version of addendum as attached
3) Surface Use & Damage Agreement (predicated that there are no surprises and follows the version dated 1/30/13 paragraph 48)
4) Percentage of ownership for Wise Asset No. 8, Ltd.
5) Percentage of ownership for Wise Asset No. 10, Ltd.
6) W-9's for completed for both entities and wiring instructions
7) Upon receipt we would like to schedule meeting this Wednesday or Thursday and execute

Concerning water we are good with the following:

- $0.85 per bbl at the source (COG supplies infrastructure to end point)

- $2.25 per bbl at COG specified end point (Delaware Ranch supplies Infrastructure)

- Delaware Ranch would have first call on water sales with the caveat that COG determines at its own discretion when we need to seek other water sources

- Damages waived if we have to lay temporary fresh water lines since we are purchasing the water from Wise. If these lines became permanent in nature at some point, we would then pay Wise damages as stated in

the surface use agreement.

Drew Reid - Delaware Ranch Lease Deal

From: "Bill Patterson" <billpatterson@petroleumlegal.com>
To: "Drew Reid" <drew.reid@glo.state.tx.us>
Date: 3/21/2013 12:46 PM
Subject: Delaware Ranch Lease Deal

Hi Drew:

Do you have time to talk with me this afternoon for about 15 minutes or so? We are at a point in our negotiations with COG that a deal is probably imminent. The terms are good, although we still wish the bonus were higher. It is $400/acre with the right to pay a "delay rental" of an additional $400/acre at the end of the primary term. But, they will commit to drilling 11 wells during the primary term (3 years). At the end of the primary term, the lease will bust up into 11 four-section blocks, and they have to continuously develop at the rate of 2 wells per year on EACH block. So, overall, the lease is really good.

I called Todd Meador at Cimarex yesterday to give them one more shot at making us an offer to lease. I told them they would have to give us basically the same terms we are already being offered, but they would have to come pretty close to doubling the bonus amount they offered us a month or two ago (which was only $350/acre for 30,000+ acres of Delaware Ranch). Their offer also was for a standard mineral classified lease with no primary term drilling obligations. They were so far off from what COG was offering, we haven't really talked with them since. Todd said he didn't think they could budge, but said he'd called their Executive VP in Denver. Well, he talked with the VP, and has just texted me that Cimarex is a player. And I had told Todd there would be very little negotiation, it would basically be a take-it-or-leave-it deal. I am supposed to talk with Todd in the next 30 minutes to see if they are really serious.

I need to clear some terms with you, by the way, and discuss some surface issues with you.

When would be a good time for me to call you?

Drew Reid - question re: lease

From: ~~Drew Reid~~
To: Patterson, Bill
Subject: question re: lease

COG

Bill,

All this sounds good. I want to say away from using the word "extend the primary term" and "option. So let do something like this :

Upon the expiration of the primary term (whether it occurs at the end of the original 3 years, at the end of the 2nd year or at the end of the 3rd year), the State of Texas and Wise Asset No. __, Ltd., has granted COG the one-time right to buy, on an acreage-block-by-acreage-block basis with an additional bonus payment of $400.00 per acre, two more years of primary term.

Let me know what you think and rework or reword this any way you need to.

Drew

>>> "Bill Patterson" <billpatterson@petroleumlegal.com> 2/26/2013 12:12 PM >>>
Drew:

We are negotiating on two leases right now, one with COG on the Delaware Ranch, and one with Conoco on the Rustler Hills Ranch.

The deal we are striking with COG provides for an initial bonus of $400/acre for approximately 30,000 acres, for a 3-year primary term. We are agreeing to 11 four-section acreage blocks. At the expiration of the primary term, the lease will split up into 11 separate leases. If COG has failed to drill on a particular acreage block, the lease will expire as that acreage block. On any acreage block COG has drilled on, though, COG may keep the lease in full force (as to that particular block), but conducting a 150-day continuous development program.

COG is obligating itself to drill 3 wells in the first year of the lease, 4 wells in second year, and 4 more wells in third year. If COG fails to drill the requisite number of obligation wells (or be drilling them) by the end of the first, second or third year of the lease, the primary term will automatically be reduced and end at the end of the year. For example, if COG fails to drill (or be drilling) its 3 obligation wells during the 1st year of the lease, then the primary term will expire at the end of the 1st year of the lease.

Upon the expiration of the primary term (whether it occurs at the end of the original 3 years, at the end of the 2nd year or at the end of the 1st year), COG will have the one-time right (option), on an acreage-block-by-acreage-block basis, to pay an additional bonus equal to $400/acre to extend the primary term of the lease 2 more years. In other words, once the lease has already busted up into separate leases covering the 11 acreage blocks, they have the option, on a block-by-block basis to:

(1) extend the primary term of the lease covering that block 2 more years by paying the additional bonus on the 4 sections covered by that lease;
(2) NOT pay the additional bonus and maintain the lease covering that block through continuous development; or
(3) allow the lease covering that block to expire and revert back to the lessor.

My question is: Is COG's right to extend the primary term okay? In one sense, it is a lease option, but

in another sense, it's just a right to extend the primary term.

By the way, if COG fails to drill an obligation well during the primary term, it can keep the primary term from being shortened by paying a monetary penalty for the well it failed to drill.

Feel free to call to discuss.

Thanks Drew.

Drew Reid - question re: lease

From: "Bill Patterson" <billpatterson@petroleumlegal.com>
To: "Drew Reid" <drew.reid@glo.state.tx.us>
Date: 2/26/2013 12:13 PM
Subject: question re: lease

Drew:

We are negotiating on two leases right now, one with COG on the Delaware Ranch, and one with Conoco on the Rustler Hills Ranch.

$12,000,000.00

The deal we are striking with COG provides for an initial bonus of $400/acre for approximately 30,000 acres, for a 3-year primary term. We are agreeing to 11 four-section acreage blocks. At the expiration of the primary term, the lease will split up into 11 separate leases. If COG has failed to drill on a particular acreage block, the lease will expire as that acreage block. On any acreage block COG has drilled on, though, COG may keep the lease in full force (as to that particular block), but conducting a 150-day continuous development program.

COG is obligating itself to drill 3 wells in the first year of the lease, 4 wells in second year, and 4 more wells in third year. If COG fails to drill the requisite number of obligation wells (or be drilling them) by the end of the first, second or third year of the lease, the primary term will automatically be reduced and end at the end of the year. For example, if COG fails to drill (or be drilling) its 3 obligation wells during the 1st year of the lease, then the primary term will expire at the end of the 1st year of the lease. otherwise will Grant COG

Upon the expiration of the primary term (whether it occurs at the end of the original 3 years, at the end of the 2nd year or at the end of the 1st year), COG ~~will have~~ the one-time right (option), on an acreage-block-by-acreage-block basis, ~~to pay~~ an additional bonus equal to $400/acre ~~to~~ extend the primary term ~~of the lease~~ 2 more years. In other words, once the lease has already busted up into separate leases covering the 11 acreage blocks, they have the option, on a block-by-block basis to:

(1) extend the primary term of the lease covering that block 2 more years by paying the additional bonus on the 4 sections covered by that lease;
(2) NOT pay the additional bonus and maintain the lease covering that block through continuous development; or
(3) allow the lease covering that block to expire and revert back to the lessor.

My question is: Is COG's right to extend the primary term okay? In one sense, it is a lease option, but in another sense, it's just a right to extend the primary term.

By the way, if COG fails to drill an obligation well during the primary term, it can keep the primary term from being shortened by paying a monetary penalty for the well it failed to drill.

Feel free to call to discuss.

Thanks Drew.

Drew Reid - info & question

From: "Bill Patterson" <billpatterson@petroleumlegal.com>
To: "Drew Reid" <drew.reid@glo.state.tx.us>
Date: 1/8/2013 4:13 PM
Subject: info & question

Drew:

How are you doing?

With regard to Devon, we met with them in OK City but never saw any reason to extend the primary of the leases we granted on Brooks and Rustler Hills Ranches. They finally rescinded their request. Currently they are trying to find a possible buyer for their leases, but have had no luck so far. They think the value of the leases (or, at the very least, what they would be willing to accept) is around $6 or 7mm. But, they would be willing to sell us a "release" of the leases for possibly $3.5 to 4mm. Interestingly, we believe we are about to receive an offer from Grella out of Midland, who is representing Conoco-Phillips, to lease not only the Brooks and Rustler Ranches, but the Delaware Ranch, Montgomery Ranch and some other acreage. 95% of the acreage they want to lease is R.A. lands. The offer should be around $750/acre across the board. The State's net share of the bonus, if we were able to pull this off, would be around $35 mm. All of the leases would have a 5-year primary term; however, the leases covering the Delaware Ranch and possibly the Brooks and Rustler Ranches, as well, would have drilling obligations during the primary term. We would require Conoco to drill on the Delaware Ranch as early as year 1, and possibly 3 or 4 wells total during the first year.

Conoco-Phillips is supposedly going to kick in an additional amount, over and above the bonus, to buy a release from Devon on the Rustler & Brooks Ranches. Otherwise, we would have to figure out how to do that ourselves, then recoup what we pay Devon out of the bonus. We can talk about that more.

I will call you as soon as we receive the written offer from Grella (Conoco).

Cimarex is also supposed to make a lease offer to us, but only for the Delaware Ranch and some adjacent acreage we own (which we call the "Denworth"). It would all be R.A. land, and the total acreage would be just over 30K acres. We would expect Cimarex to offer more than $750/acre on the Delaware because the drilling they are doing on the east side of that ranch looks decent-to-good, economically speaking. We are trying to land both offers at about the same time so we will have a choice to make. It is possible the best route would be to take the Cimarex offer (assuming Cimarex offers enough bonus and offers drilling obligations to us). Will keep you posted on that as well.

Finally, I have questions pertaining to the Relinquishment Act. With respect to R.A. lands, is gold considered a mineral, regardless of whether it is deposited near the surface (3-4 feet), at the surface, or beneath the surface? I'm assuming so. With that assumption, would the split be 60% to the State and 40% to the owner of the soil if surface destruction is the mining method for the gold? The reason we ask is that some cowboy yahoo contacted us a while back saying there's a lost gold stash or gold mine on our ranch and he knows where it is. We sent him packing, but what if he were right? So, I decided to go straight to the source for an answer on this "academic" question.

Drew Reid - Latest Addendum - Word format

From: "Bill Patterson" <billpatterson@petroleumlegal.com>
To: "Michael Grella" <mjgrella@mpetro.com>
Date: 1/28/2013 12:41 PM
Subject: Latest Addendum - Word format
CC: "Drew Reid" <drew.reid@glo.state.tx.us>, "Robert Cocanougher" <robert@wi...
Attachments: OGL.Draft.1.28.2013.word.doc

Mike:

Here is the latest draft of the addendum . . . in Word format. From this point forward, we can work in Word. (As I told you, I still use WordPerfect for most of my work, but I think the conversion of the document from WordPerfect to Word worked okay.)

If you or Conoco has changes, please be sure to use the "Track Changes" feature under the "Review" tab to make them.

Please note that I made a few changes from the draft you received last Friday. The changes are solely for clarification purposes with the exception of a few things mentioned below.

I've changed the last clause in Paragraph 45 to read as follows:

"Absent the prior written consent of the State of Texas and owner of the soil, which consent shall not be unreasonably withheld, Lessee shall not drill any well having a bore hole that is situated in more than one Acreage Block."

Previously, this clause prohibited drilling across section lines, when the intent was to prohibit drilling across acreage blocks. This prohibition will not have an impact upon drilling on the Delaware Ranch, but will affect drilling on the Montgomery and Rustler Ranches.

Under "Water Use" (Paragraph 48.b), I combined subparagraphs (1) and (2) in order to clarify that Wise has the duty to produce and deliver the water Wise sells Conoco at Wise's cost – $2.50 per barrel will bear production and transportation, including, but not limited to, the cost of electricity. I also added the following sentences to the end of subparagraph (1):

"The owner of the soil shall have no liability to Lessee whatsoever for its inability or failure to supply water to Lessee pursuant to this subparagraph, regardless of the cause for such inability. Lessee will advise the owner of the soil, in advance, with respect to the quality, quantity and timing of its anticipated water needs for each well it drills, re-enters, completes or recompletes pursuant hereto (or any other operation for which Lessee may need water), so as to afford the owner of the soil a reasonable amount of time to satisfy such needs."

Subparagraph (3) of Paragraph 48.b has been renumbered as subparagraph (2).

Paragraph 49.j now reads as follows:

"Notwithstanding any other provision of this lease to the contrary, this lease may not be assigned absent the advance written consent of the State of Texas and owner of the soil, which consent shall not be unreasonably withheld; provided, however, all or an undivided portion of this lease may be assigned, without the consent of the owner of the soil or State of Texas, to ConocoPhillips Company, provided that ConocoPhillips, or its subsidiary, is designated as the operator of record (with the RRC) in the operations conducted under this lease."

We have worked closely with the GLO over the past 4 years in the leasing of approximately 115,000 acres in Culberson County, and have a pretty good understanding of what the GLO will and will not approve. Nevertheless, we are keeping the GLO in the loop on all leasing discussions we have. I have therefore copied Drew Reid (GLO) with this email so he will know what lease terms we are discussing.

As mentioned previously, we will need to obtain the final approval from Wise's partners and the GLO of the final lease terms and form before closing can occur.

If you or anyone with Conoco has any questions, please do not hesitate to call or email me.

Bill

Attachments: Document.pdf

Bill,

Attached is a copy of the executed release for the Delaware Ranch lease. As soon as the plugging is complete on Montgomery Ranch I'll prepare same for that lease.

Would you like the original sent overnight to your attention for further handling and recording? If so I'll get in the mail this afternoon.

Thanks,

Aaron Tenenholz
Land Negotiator

> Thanks for the prompt response, Aaron.
>
> I wish for both COG's and EnCana's sake, EnCana had not moved forward with plugging all 3 Delaware Ranch wells. It would have saved EnCana a lot of money and COG might have been able to use the wellbores, which would have benefitted not only COG, but Wise and the State as well. Since EnCana did plug the wells (and in accordance with the terms of the lease addendum(s)), please furnish Wise and the GLO with detailed plugging reports, including the daily reports and any regulatory filings.
>
> As for our demand for releases of the Delaware and Montgomery Ranches, I'm sure if you guys will have your attorneys review the lease addendum(s) and give proper consideration of the facts, they will agree that the leases are completely dead and releases are owed to Wise and the State.
>
> In support of our position, please review the attached letters, both dated January 25, 2012, and from EnCana to the Wise partnerships. In those letters, EnCana advised Wise that the 3 wells it drilled on the Delaware Ranch and 2 wells it drilled on the Montgomery Ranch were non-commercial.
> The lease addendum for each ranch provides that if the required number of primary term obligation wells (3 on Delaware and 2 on Montgomery PER YEAR) are not drilled, the primary term will automatically expire at the end of the lease year during which EnCana failed to drill the required number of wells. EnCana drilled all 5 obligation wells during year 1, but drilled no wells during the second lease year. As a result, the primary terms of the leases on both ranches automatically expired in January of 2012.
> Furthermore, because the 5 wells EnCana drilled were not producing or capable of producing when the primary terms ended, then, arguably, there was nothing (no production and no lease savings mechanism) which would have maintained the leases in force as to ANY of the lease acreage beyond the end of the second lease year.
>
> However, even if one could make the argument that the leases were somehow maintained in force beyond the expiration of their primary terms, there is NO possible way the leases could have been maintained in force beyond January of this year. We did not push the matter last year because we had no outside interest in leasing the two ranches; however, we have no choice but to push it now.
>
> Please do whatever it takes to get the releases executed and delivered to us Monday so COG, the State and we can move forward without any worries.
>
> On a personal note, I hope you and your family have a happy Easter weekend and I'll look forward to hearing from you on Monday.

Subject: Releases.

Aaron:

I left you a message earlier. It is imperative that EnCana fully release the Delaware and Montgomery Ranch leases immediately. Wise just closed with COG this morning on leasing them the entire Delaware Ranch and they advise they still don't have the release from EnCana.

I've talked with Drew Reid at the GLO about the matter and the State considers the Delaware and Montgomery leases to be dead, as well. Under the provisions of the leases, the releases clearly must be delivered to us.

We do not want to take any chance of our deal with COG being jeopardized in any way and I'm sure the State feels the same way. There is way too much at stake on all sides.

I'm also told all three wells on the Delaware have now been plugged, despite the fact that COG was willing to at least consider assuming the P&A liability on them. I had thought that the plugging crew was being pulled off the job after the first well was plugged. Hopefully, I misheard and it was just the one Delaware well and both Montgomery wells that were plugged.

Please leave the frac pits as they were as we intend to use them.

I'm out of pocket the rest of the day but need a reply to my email this afternoon as others are waiting on me. If you will send me the executed releases, I will have them recorded. I would prefer to have them in hand by not later than tomorrow.

Thank you.

Subject: RE: Releases.

Bill,

Sorry I didn't get back with you yesterday, unfortunately most of the decision makers cut out early and are out today for the Easter holiday. I did discuss this briefly with some folks that were around and stated your case as to needing the releases and hope to have a definitive answer for you on Monday, but just won't be able to meet your deadline today because of the holiday.

I feel like the chances are much better today than yesterday that releases will be forthcoming, but just need the right folks on my end to make some decisions and give some approvals since our database shows them as valid and we have a system of checks and balances to make any changes. Typical large company red tape.

As for the Delaware Ranch, all 3 wells have been plugged as of yesterday and the crew is moving over to the Montgomery Ranch and rigging up today. As it took an immense amount of time to get a vendor out to this area I was told that operations would not halt until an LOI was signed with a potential new operator. Concho was aware of this but in our few conversations it was never stated that they were only interested in Delaware Ranch until I spoke with Doug yesterday, but by then it was too late. Jumping down to the Montgomery Ranch after the first Delaware Ranch well wouldn't have been an issue, but was under the impression that Concho was looking to lease everything and had some interest in all 5 wellbores.

I will revisit with the production group on Monday to reiterate the items we discussed and make sure they leave the pits as requested.

Hope you have a good weekend and I'll continue to diligently work on my end to try to get to a resolution.

Thanks,

43. **Owner's Representation Regarding Ownership; Negation of Warranty.** Owner represents, but does not warrant (all warranties, express or implied, being hereby negated) that it owns the following interests in the leased premises (the "Surface Interests"):

(i) an undivided 75% of the surface estate in Section 30 and the S/2 SE/4 of Section 32, Block 60, Township 1, Culberson County, Texas; and

(ii) 100% of the surface estate in the remainder of the leased premises.

If it should be determined that Owner, at the time this lease was executed and delivered, did not own any part or parts of the Surface Interests (such part or parts of the Surface Interests being referred to herein as the "Unowned Surface Interests"), then, subject to the further provisions of this paragraph, Lessee shall have the right to recover from Owner the share of the bonus consideration paid to Owner attributable to such Unowned Surface Interests (the "Overpaid Bonus"); provided, however, nothing in this paragraph shall be construed as entitling Lessee to recover from the State of Texas the share of the bonus consideration paid to the State of Texas attributable to such Unowned Surface Interests.

Notwithstanding anything in this paragraph to the contrary, Lessee's right to recover Overpaid Bonus from Owner under the provisions of this paragraph shall be conditioned upon the following:

(i) Not later than 18 months from the date of this lease, Lessee shall furnish Owner and the State of Texas with a detailed written explanation of each title defect, issue and/or discrepancy giving rise to Lessee's right of recovery, together with a copy of the written opinion rendered of an attorney licensed in Texas in support of such right of recovery ("Claim for Reimbursement"); and

(ii) Owner must not have owned the Unowned Surface Interests for which Lessee is seeking recovery at the time this lease was executed and delivered.

Once both of these conditions have been met, then Owner, not later than 45 days following its receipt of Lessee's Claim for Reimbursement, shall refund the Overpaid Bonus to Lessee.

44. **Standards of Lessee's Conduct; Drilling and Completion of Wells.** At all times while this lease is in force, either in whole or in part, Lessee shall conduct its operations and activities, and otherwise fulfill its obligations, under this lease as would a reasonably prudent operator, in a good and workman like manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations and orders. Without limiting the foregoing, and except as otherwise agreed in writing by Owner, the State of Texas and Lessee, each well commenced by Lessee pursuant to this lease shall be drilled:

NOTES

THE BASIS OF BEARING IS THE TEXAS COORDINATE SYSTEM OF 1927, CENTRAL ZONE (4203), AS DERIVED BY GPS MEASUREMENT BASED UPON THE CORS

ALL TEXAS STATE PLANE COORDINATES SHOWN HEREON ARE NAD 27 (NAD) COORDINATES AS COMPUTED BY CORPSCON VERSION 6.0.1. ALL GEOGRAPHIC COORDINATES SHOWN HEREON WERE COMPUTED USING CORPSCON VERSION 6.0.1. UNLESS OTHERWISE NOTED, ALL DISTANCES SHOWN HEREON ARE SURFACE DISTANCES BASED ON A "SURFACE ADJUSTMENT FACTOR" OF 1.00025 AS PUBLISHED BY THE TEXAS DEPARTMENT OF TRANSPORTATION FOR CULBERSON COUNTY, TEXAS.

ELEVATIONS SHOWN HEREON ARE NAVD88 AS DERIVED BY GPS.

THIS EXHIBIT IS FOR TEXAS RAILROAD COMMISSION WELL PERMITTING PURPOSES ONLY. BOUNDARY LINES AND ACREAGES SHOWN HEREON REFLECT THE SURVEYOR'S PROFESSIONAL OPINION OF MINERAL RIGHTS AS DETERMINED FROM CLIENT-PROVIDED OIL AND GAS MINERAL LEASE DOCUMENTATION. THE INFORMATION DEPICTED HEREON SHALL NOT BE USED IN THE CONVEYANCE OF FEE TITLE TO REAL PROPERTY.

ALL MEASUREMENTS TO LEASE, UNIT, AND SURVEY LINES ARE PERPENDICULAR TO SAID LINES. DIMENSIONS TO SURVEY LINES ARE APPROXIMATE.

THIS SURVEY WAS PREPARED WITHOUT THE BENEFIT OF A TITLE REPORT.

THIS EXHIBIT IS ACCOMPANIED BY A LEGAL DESCRIPTION OF EVEN DATE

Location: SUR-BELL I.,A-4752,BLK-60,TSHP-1S,SEC-14,--[TD=7400],[RRC 8],

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to the base of the RUSTLER, which is estimated to occur at a depth of 200 feet, must be protected.

This recommendation is adequate for wells drilled in this section 14.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

16. This request is for
45000 barrels of [X] crude oil OR [ ] condensate

17. Amount of oil/condensate in tanks
0 barrels on 11/27/2013

18. Storage capacity in bbls. Tank battery 1500 Test tanks 0 Total 1500

19. Previous request for clearance. Amount _____ barrels granted on _____

20. Reason for current request for clearance (explain briefly)
1st P-8. Well is currently being completed. Testing will follow well completion and a completion report will be filed.

County: CULBERSON Lease & Well No.: DR STATE EAST #1602&ALL Purpose: ND

Location: SUR-BELL I.,A-4752,BLK-60,TSHP-1S,SEC-16,--[TD=7200],[RRC 8],

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to the base of the RUSTLER, which is estimated to occur at a depth of 150 feet, must be protected.

This recommendation is adequate for wells drilled in this section 16.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail.

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is adequate for wells drilled in this section 20.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail.

Sincerely,

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

Currently there are no identified formations listed for this county. It is still the operators responsibility to isolate and report any potential flow zones that are encountered in the completion of this well.

W-1 Comments

Permit # 774650

Approved Date: Dec 16, 2013

[FILER Nov 27, 2013 9:30 AM]: Re-entering an old wellbore with no assigned API # from the RRC. Spud date 12/6/13.; [RRC STAFF Dec 3, 2013 3:49 PM]: There have been problems identified with this permit (see problem letter attachment). Notification sent.; [RRC STAFF Dec 5, 2013 7:28 AM]: As per Kacie Connally: Please change the name on this permit to show Castile State #1.

As per your request I have attached a wellbore diagram and I also have spoken to Lorenzo Garza regarding this matter. He suggested that I file for the W-1 and make a note that this wellbore doesn't have an API# and that a ghost 8000# would be assigned.

I have also attached an updated plat with the name change.; [RRC STAFF Dec 5, 2013 7:29 AM]: Problems identified with this permit are resolved.

RESTRICTIONS: This is a hydrogen sulfide field. Hydrogen Sulfide Fields with perforations must be isolated and tested per State Wide Rule 36 and a Form H-9 filed with the district office. Fields with SWR 10 authority to downhole commingle must be isolated and tested individually prior to commingling production.

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

Purpose: ND

Location: SUR-T&P,A-4760,BLK-61,TSHP-1S,SEC-14,--[TD=11500],[RRC 8],

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to a depth of 100 feet must be protected.

This recommendation is applicable to all wells drilled in this section 14.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail.

Sincerely,

Thanks David for the update
Drew

>>> David McElyea <DMcElyea@concho.com> 2/20/2014 3:42 PM >>> A-6768

Bill and Drew, just received the following updates:
42-109-80111 Sec 48, 61-1 Culberson
The Castile well (re-entry) in Section 48 is not going to work. The well will be P&A, could not use the wellbore. We will try and move the Section 14 well (the Plat I sent you this morning) to Section 48 and keep as a "deep" test. Should find out by next week. Gas is being flared on the Owl Hills well in Section 14. Royalties will be paid on this gas. Section 16 and Section 20 wells are shut-in, pending pipe line hookup, about 4 weeks to get the line there.

David

Hey David:

From the plat you sent, this well looks like a horizontal test, rather than vertical. You mentioned it will be a deep test. Will it be a Wolfcamp 1 or 3rd Bone Spring Test?

If you guys finally ink a deal with Chevron, would you expect to drill this as a two-mile lateral instead?

Bill

Bill, I have attached a Plat of the Well location for deep test in Section 14. Still working with Chevron (same song – second verse – second verse same as the first). Hoping to have the final version from them next week. I need to get with you to discuss the SWD for the Ranch, when you have the time.

Hope you have a good weekend...

David

Location: SUR-T&P,A-4751,BLK-60,TSHP-1S,SEC-8,--[TD=10500],[RRC 8],

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells drilled in this section 8.

Note: Unless stated otherwise this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail.

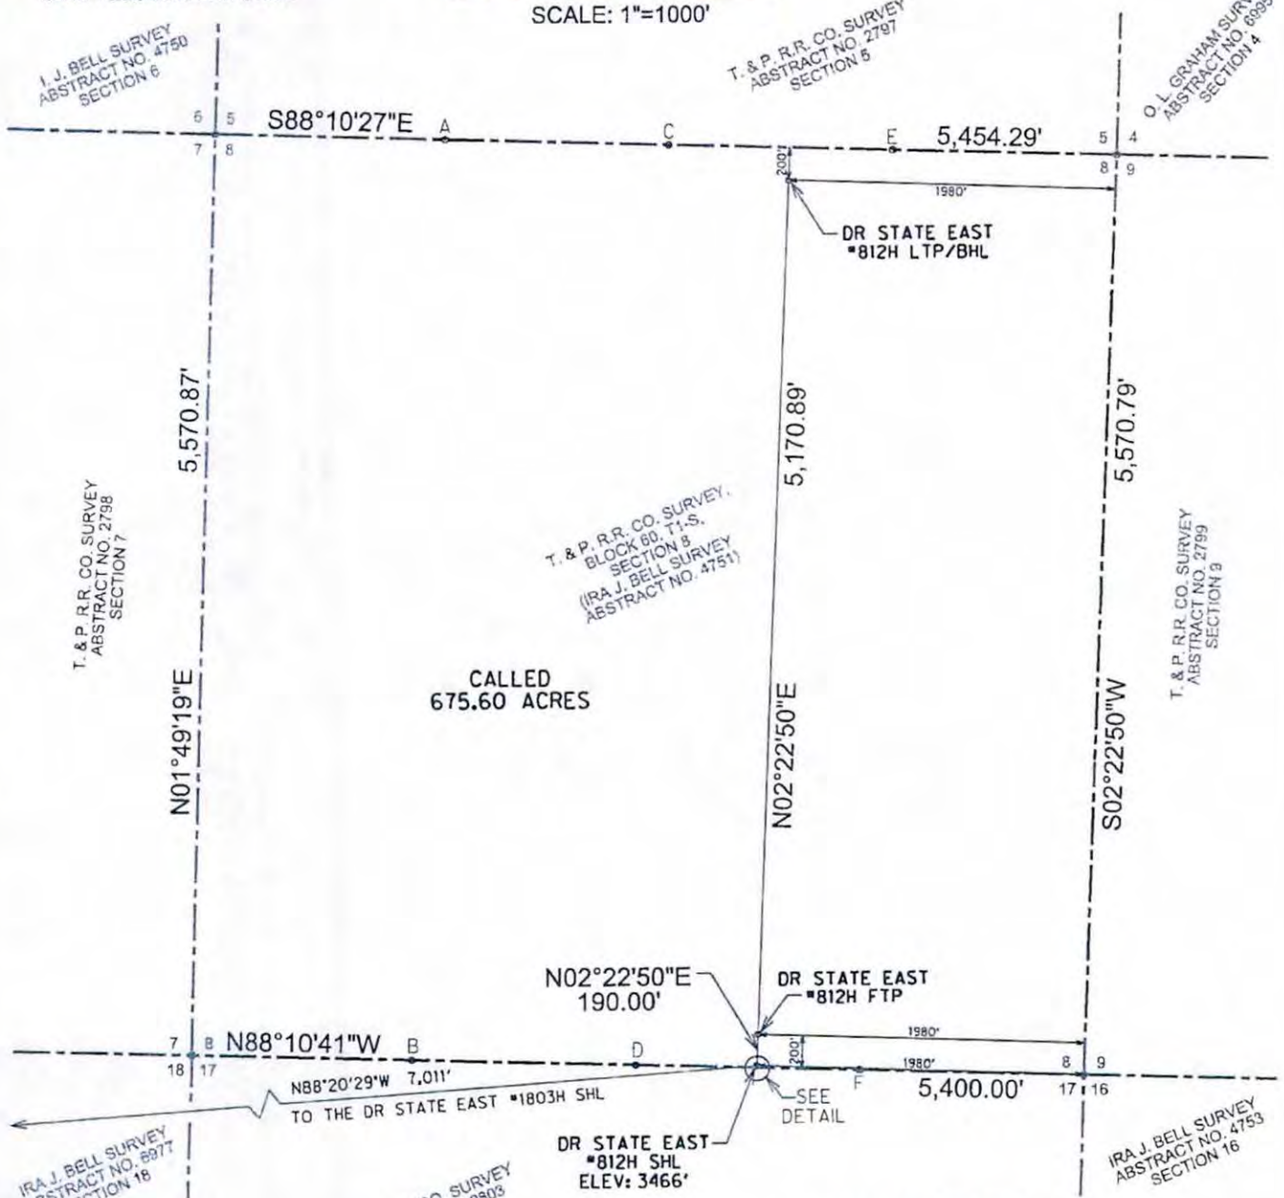
DR STATE EAST #812 SHL

0 500 1000 1500 2000

SCALE: 1"=1000'



NOTES

THE BASIS OF BEARING IS THE TEXAS COORDINATE SYSTEM OF 1927, CENTRAL ZONE (4203), AS DERIVED BY GPS MEASUREMENT BASED UPON THE CORS

ALL TEXAS STATE PLANE COORDINATES SHOWN HEREON ARE NAD 27 GRID COORDINATES AS COMPUTED BY CORPSCON VERSION 6.0.1. ALL GEOGRAPHIC COORDINATES SHOWN HEREON WERE CONVERTED USING CORPSCON VERSION 6.0.1. UNLESS OTHERWISE NOTED, ALL DISTANCES SHOWN HEREON ARE SURFACE DISTANCES BASED ON A "SURFACE ADJUSTMENT FACTOR" OF 1.00025 AS PUBLISHED BY THE TEXAS DEPARTMENT OF TRANSPORTATION FOR CULBERSON COUNTY, TEXAS

ELEVATIONS SHOWN HEREON ARE NAVD88 AS DERIVED BY GPS.

THIS EXHIBIT IS FOR TEXAS RAILROAD COMMISSION WELL PERMITTING PURPOSES ONLY. BOUNDARY LINES AND ACREAGES SHOWN HEREON REFLECT THE SURVEYORS PROFESSIONAL OPINION OF MINERAL RIGHTS AS DETERMINED FROM CLIENT-PROVIDED OIL AND GAS MINERAL LEASE DOCUMENTATION. THE INFORMATION DEPICTED HEREON SHALL NOT BE USED IN THE CONVEYANCE OF FEE TITLE TO REAL PROPERTY.

ALL MEASUREMENTS TO LEASE, UNIT, AND SURVEY LINES ARE PERPENDICULAR TO SAID LINES. DIMENSIONS TO SURVEY LINES ARE APPROXIMATE.

THIS SURVEY WAS PREPARED WITHOUT THE BENEFIT OF A TITLE REPORT.

THIS EXHIBIT IS ACCOMPANIED BY A LEGAL DESCRIPTION OF EVEN DATE.

C.M.1 FOUND 120-INCH DISC IN MOUND LOCATED AT THE NORTHWEST CORNER OF W. W. WEST SURVEY, ABSTRACT NO. 7000, SECTION 22 BEARS SOUTH 51°40'57" EAST 9,180.19' FROM DR STATE EAST #812H SHL

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells drilled in this section 28.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells drilled in this section 30.

Note: Unless stated otherwise this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to a depth of 100 feet must be protected.

This recommendation is applicable to all wells drilled in this section 12.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail

STATEMENT OF PRODUCTIVITY OF ACREAGE ASSIGNED TO PRORATION UNITS

Form P-15

Tracking No.: 103363

This facsimile P-15 was generated electronically from data submitted to the RRC.

The undersigned states that he is authorized to make this statement; that he has knowledge of the facts concerning the COG OPERATING LLC (OPERATOR), DR STATE EAST (LEASE), No. 1602H (WELL); that such well is completed in the SANDBAR (BONE SPRING) Field, CULBERSON County, Texas and that the acreage claimed, and assigned to such well for proration purposes as authorized by special rule and as shown on the attached certified plat embraces 160.0 acres which can reasonably be considered to be productive of hydrocarbons.

- CERTIFICATE -

I declare under penalties prescribed in Sec. 91.143, Texas Natural Resources Code, that I am authorized to make this report, that this report was prepared by me or under my supervision and direction, and that data and facts stated therein are true, correct, and complete, to the best of my knowledge,

Instruction to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide rules 8 (Water Protection), 13 (Casing, Cementing, Drilling, and Completion, and 14 (Well Plugging). For **offshore** operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

- An initial oil or gas completion report, **Form W-2 or G-1**, as required by Statewide or special field rules:
- Form **W-4**, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
- Form **W-3**, Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting **dry** holes, operators must complete
- Form **W-15, in addition to Form W-3, to show any casing cemented in the hole.**

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. **Surface casing.** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the Department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

D. **Centralizers.** Surface casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In nondeviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. **Exceptions and alternative casing programs.** The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. **An operator must obtain approval of any exception before beginning casing and cementing operations.**

F. **Intermediate and production casing.** For specific technical requirements, operators should consult Statewide Rule 13 (b) (3) and (4).

G. **Plugging and abandoning.** Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District Director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top of the well, and the casing must be cut off three feet below the ground surface. All cement plugs, except the top plug, must have sufficient slurry volume to fill 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementers approved by the Director of Field Operations. Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

E. H.J.H.

Instruction to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide rules 8 (Water Protection), 13 (Casing, Cementing, Drilling, and Completion, and 14 (Well Plugging). For **offshore** operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

* An initial oil or gas completion report, **Form W-2 or G-1**, as required by Statewide or special field rules:
* Form **W-4**, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
* Form **W-3,** Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting **dry** holes, operators must complete
*Form **W-15, in addition to Form W-3, to show any casing cemented in the hole.**

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. **Surface casing.** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the Department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

D. **Centralizers.** Surface casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In nondeviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. **Exceptions and alternative casing programs.** The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. **An operator must obtain approval of any exception before beginning casing and cementing operations.**

F. **Intermediate and production casing.** For specific technical requirements, operators should consult Statewide Rule 13 (b) (3) and (4).

G. **Plugging and abandoning.** Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District Director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top of the well, and the casing must be cut off three feet below the ground surface. All cement plugs, except the top plug, must have sufficient slurry volume to fill 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementers approved by the Director of Field Operations. Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

Instructions to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide Rules 8 (Water Protection), 13(Casing, Cementing, Drilling, and Completion), and 14 (Well Plugging). For offshore operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following.

- An initial oil or gas completion report, Form W-2 or G-1, as required by Statewide or special field rates;
- Form W-4, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
- Form W-3, Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting dry holes, operators must complete Form W-15, in addition to Form W-3, to show any casing cemented in the hole.

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. Surface Casing. An operator must set and cement sufficient surface casing to protect all usuable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Committee.

D. Centralizer. Surface Casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In Non-deviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. Exceptions and alternative casing programs. The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. An operator must obtain approval of any exception before beginning casing and cementing operations.

F. Intermediate and production casing. For specific technical requirement, operators should consult Statewide Rule 13 (3) and (4).

G. Plugging and abandoning. Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug

To plug and abandon a well, operators must use only cementer's approved by the Director of Field Operations. Cementing companies, service companies or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

Instruction to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide rules 8 (Water Protection), 13 (Casing, Cementing, Drilling, and Completion, and 14 (Well Plugging). For **offshore** operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

* An initial oil or gas completion report, **Form W-2 or G-1**, as required by Statewide or special field rules:
* Form **W-4**, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
* Form **W-3,** Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting **dry** holes, operators must complete
*Form **W-15, in addition to Form W-3, to show any casing cemented in the hole.**

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. **Surface casing.** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the Department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

D. **Centralizers.** Surface casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In nondeviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. **Exceptions and alternative casing programs.** The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. **An operator must obtain approval of any exception before beginning casing and cementing operations.**

F. **Intermediate and production casing.** For specific technical requirements, operators should consult Statewide Rule 13 (b) (3) and (4).

G. **Plugging and abandoning.** Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District Director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top of the well and the casing must be cut off three feet below the ground surface. All cement plugs, except the top plug, must have sufficient slurry volume to fill 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementers approved by the Director of Field Operations. Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

Location: SUR-BELL I.,A-4752,BLK-60,TSHP-1S,SEC-16,--[TD=7200],[RRC 8],

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to the base of the RUSTLER, which is estimated to occur at a depth of 150 feet, must be protected.

This recommendation is adequate for wells drilled in this section 16.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail.

21. Was swab used during this test? Yes [ ] No [X]

22. Oil produced prior to test (New & Reworked wells): 21317.0

23. Injection Gas-Oil Ratio:

REMARKS: N/A

INSTRUCTIONS: File an original and one copy of the completed FormW-2 in the appropriate RRC District Office within 30 days after completing a well and within 10 days after a potential test. If an operator does not properly report the results of a potential test within the 10-day period, the effective date of the allowable assigned to the well will not extend back more than 10 days before the W-2 was received in the District Office. (Statewide Rules 16 and 51) To report a completion or recompletion, fill in both sides of this form. To report a retest, fill in only the front side.

▶ WELL TESTERS CERTIFICATION

I declare under penalties prescribed in Sec. 91.143, Texas Natural Resources Code, that I conducted or supervised this test by observation of (a) meter readings or (b) the top and bottom gauges of each tank into which production was run during the test. I further certify that the potential test data shown above is true, correct, and complete, to the best of my knowledge.

STATEMENT OF PRODUCTIVITY OF ACREAGE ASSIGNED TO PRORATION UNITS

Form P-15

Tracking No.: 106252

This facsimile P-15 was generated electronically from data submitted to the RRC.

The undersigned states that he is authorized to make this statement; that he has knowledge of the facts concerning the COG OPERATING LLC (OPERATOR), DR STATE EAST (LEASE), No. 2003H (WELL); that such well is completed in the SANDBAR (BONE SPRING) Field, CULBERSON County, Texas and that the acreage claimed, and assigned to such well for proration purposes as authorized by special rule and as shown on the attached certified plat embraces 160.0 acres which can reasonably be considered to be productive of hydrocarbons.

- CERTIFICATE -

I declare under penalties prescribed in Sec. 91.143, Texas Natural Resources Code, that I am authorized to make this report, that this report was prepared by me or under my supervision and direction, and that data and facts stated therein are true, correct, and complete, to the best of my knowledge,

Instruction to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide rules 8 (Water Protection), 13 (Casing, Cementing, Drilling, and Completion, and 14 (Well Plugging). For **offshore** operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

* An initial oil or gas completion report, **Form W-2 or G-1**, as required by Statewide or special field rules:
* Form **W-4**, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
* Form **W-3,** Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting **dry** holes, operators must complete
*Form **W-15, in addition to Form W-3, to show any casing cemented in the hole.**

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. **Surface casing.** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the Department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

D. **Centralizers.** Surface casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In nondeviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. **Exceptions and alternative casing programs.** The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. **An operator must obtain approval of any exception before beginning casing and cementing operations.**

F. **Intermediate and production casing.** For specific technical requirements, operators should consult Statewide Rule [illegible] and 13.

G. **Plugging and abandoning.** Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District Director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top of the well, and the casing must be cut off three feet below the ground surface. All cement plugs, except the top plug, must have sufficient slurry volume to fill [illegible] feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementers approved by the Director of Field Operations. Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

Instruction to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide rules 8 (Water Protection), 13 (Casing, Cementing, Drilling, and Completion, and 14 (Well Plugging). For **offshore** operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

* An initial oil or gas completion report, **Form W-2 or G-1**, as required by Statewide or special field rules:
* Form **W-4**, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
* Form **W-3,** Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting **dry** holes, operators must complete
*Form **W-15, in addition to Form W-3, to show any casing cemented in the hole.**

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. **Surface casing.** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the Department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

D. **Centralizers.** Surface casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In nondeviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. **Exceptions and alternative casing programs.** The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. **An operator must obtain approval of any exception before beginning casing and cementing operations.**

F. **Intermediate and production casing.** For specific technical requirements, operators should consult Statewide Rule 13 (b) (3) and (4).

G. **Plugging and abandoning.** Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District Director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top of the well, and the casing must be cut off three feet below the ground surface. All cement plugs, except the top plug, must have sufficient slurry volume to fill 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementers approved by the Director of Field Operations. Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

Cementer: Fill in shaded areas.
Operator: Fill in other items.

Instructions to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide Rules 8 (Water Protection), 13(Casing, Cementing, Drilling, and Completion), and 14 (Well Plugging). For offshore operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

- An initial oil or gas completion report, Form W-2 or G-1, as required by Statewide or special field rates;
- Form W-4, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
- Form W-3, Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting dry holes, operators must complete Form W-15, in addition to Form W-3, to show any casing cemented in the hole.

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. Surface Casing. An operator must set and cement sufficient surface casing to protect all usuable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Committee.

D. Centralizer. Surface Casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In Non-deviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. Exceptions and alternative casing programs. The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. An operator must obtain approval of any exception before beginning casing and cementing operations.

F. Intermediate and production casing. For specific technical requirement, operators should consult Statewide Rule 13 (3) and (4).

G. Plugging and abandoning. Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementer's approved by the Director of Field Operations. Cementing companies, service companies or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

Instruction to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide rules 8 (Water Protection), 13 (Casing, Cementing, Drilling, and Completion, and 14 (Well Plugging). For **offshore** operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

* An initial oil or gas completion report, **Form W-2 or G-1**, as required by Statewide or special field rules:
* Form **W-4**, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
* Form **W-3,** Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting **dry** holes, operators must complete
*Form **W-15, in addition to Form W-3, to show any casing cemented in the hole.**

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. **Surface casing.** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the Department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

D. **Centralizers.** Surface casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In nondeviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. **Exceptions and alternative casing programs.** The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. **An operator must obtain approval of any exception before beginning casing and cementing operations.**

F. **Intermediate and production casing.** For specific technical requirements, operators should consult Statewide Rule 13 (b) (3) and (4).

G. **Plugging and abandoning.** Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District Director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top of the well, and the casing must be cut off three feet below the ground surface. All cement plugs, except the top plug, must have sufficient slurry volume to fill 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementers approved by the Director of Field Operations. Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is adequate for wells drilled in this section 20.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail.

Submittal Confirmation to District Office

Railroad Commission of Texas

Oil And Gas Division — Form P-8

Request for Clearance of Storage Tanks

Prior to Potential Test

Reference No. 18514

1. Operator's Name and Address (Exactly as shown on Form P-5 Organization Report)
COG OPERATING LLC
ONE CONCHO CENTER
600 W ILLINOIS AVE
MIDLAND, TX 79701-0000

2. RRC Operator Number: 166150

3. RRC District No.: 08

4. County of Well Site: CULBERSON

5. API No.: 42-109-32604

6. Field Name (Wildcat or exactly as shown on RRC records): SANDBAR (BONE SPRING)

7. Drilling Permit No.: 767547

8. Rule 37 Case No.:

9. Lease Name: DR STATE EAST

10. Oil lease No.:

11. Well No.: 2003H

12. Drilling completed on 11/23/2013

13. Completion report--Form W-2 or G-1--will be filed on 03/23/2014

14. Oil or condensate gatherer's name and address
WESTERN REFINING COMPANY, L.P.
212 N CLARK ST
EL PASO, TX 79905

(915) 775-3339

15. Authorization to transport oil or condensate (mark one)
[X] Form P-4 attached
[X] Form P-4 Filed on 01/02/2014

16. This request is for
45000 barrels of [X] crude oil OR [ ] condensate

17. Amount of oil/condensate in tanks
0 barrels on 01/02/2014

18. Storage capacity in bbls. Tank battery 1500 Test tanks 0 Total 1500

19. Previous request for clearance. Amount _____ barrels granted on _____

20. Reason for current request for clearance (explain briefly)
1st P-8. Well is currently being completed. Testing will follow well completion and a completion report will be filed.

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to a depth of 100 feet must be protected.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail.

STATEMENT OF PRODUCTIVITY OF ACREAGE ASSIGNED TO PRORATION UNITS

Form P-15

Tracking No.: 103381

This facsimile P-15 was generated electronically from data submitted to the RRC.

The undersigned states that he is authorized to make this statement; that he has knowledge of the facts concerning the COG OPERATING LLC (OPERATOR), OWL HILLS STATE (LEASE), No. 1402H (WELL); that such well is completed in the SANDBAR (BONE SPRING) Field, CULBERSON County, Texas and that the acreage claimed, and assigned to such well for proration purposes as authorized by special rule and as shown on the attached certified plat embraces 160.0 acres which can reasonably be considered to be productive of hydrocarbons.

- CERTIFICATE -

I declare under penalties prescribed in Sec. 91.143, Texas Natural Resources Code, that I am authorized to make this report, that this report was prepared by me or under my supervision and direction, and that data and facts stated therein are true, correct, and complete, to the best of my knowledge,

Instruction to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide rules 8 (Water Protection), 13 (Casing, Cementing, Drilling, and Completion, and 14 (Well Plugging). For **offshore** operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

* An initial oil or gas completion report, **Form W-2 or G-1**, as required by Statewide or special field rules:
* Form **W-4**, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
* Form **W-3,** Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting **dry** holes, operators must complete
*Form **W-15, in addition to Form W-3, to show any casing cemented in the hole.**

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. **Surface casing.** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the Department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

D. **Centralizers.** Surface casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In nondeviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. **Exceptions and alternative casing programs.** The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. **An operator must obtain approval of any exception before beginning casing and cementing operations.**

F. **Intermediate and production casing.** For specific technical requirements, operators should consult Statewide Rule 13 (b) (3) and (4).

G. **Plugging and abandoning.** Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District Director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top of the well, and the casing must be cut off three feet below the ground surface. All cement plugs, except the top plug, must have sufficient slurry volume to fill 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementers approved by the Director of Field Operations. Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

Instruction to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide rules 8 (Water Protection), 13 (Casing, Cementing, Drilling, and Completion, and 14 (Well Plugging). For **offshore** operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

* An initial oil or gas completion report, **Form W-2 or G-1**, as required by Statewide or special field rules:
* Form **W-4**, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
* Form **W-3,** Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting **dry** holes, operators must complete
*Form **W-15, in addition to Form W-3, to show any casing cemented in the hole.**

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. **Surface casing.** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the Department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

D. **Centralizers.** Surface casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In nondeviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. **Exceptions and alternative casing programs.** The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. **An operator must obtain approval of any exception before beginning casing and cementing operations.**

F. **Intermediate and production casing.** For specific technical requirements, operators should consult Statewide Rule 13 (b) (3) and (4).

G. **Plugging and abandoning.** Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District Director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top of the well, and the casing must be cut off three feet below the ground surface. All cement plugs, except the top plug, must have sufficient slurry volume to fill 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementers approved by the Director of Field Operations. Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

Instruction to Form W-15, Cementing Report

IMPORTANT: Operators and cementing companies must comply with the requirements of the Commission's Statewide rules 8 (Water Protection), 13 (Casing, Cementing, Drilling, and Completion, and 14 (Well Plugging). For **offshore** operations, see the requirements of Rule 13 (c).

A. What to file. An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form. Form W-15 should be filed with the following:

* An initial oil or gas completion report, **Form W-2 or G-1**, as required by Statewide or special field rules:
* Form **W-4**, Application for Multiple Completion, if the well is a multiple parallel casing completion; and
* Form **W-3,** Plugging Record, unless the W-3 is signed by the cementing company representative. When reporting **dry** holes, operators must complete
*Form **W-15, in addition to Form W-3, to show any casing cemented in the hole.**

B. Where to file. The appropriate Commission District Office for the county in which the well is located.

C. **Surface casing.** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Texas Department of Water Resources, Austin. Before drilling a well in any field or area in which no field rules are in effect or in which surface casing requirements are not specified in the applicable rules, an operator must obtain a letter from the Department of Water Resources stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

D. **Centralizers.** Surface casing must be centralized at the shoe, above and below a stage collar or diverting tool, if run, and through usable-quality water zones. In nondeviated holes, a centralizer must be placed every fourth joint from the cement shoe to the ground surface or to the bottom of the cellar. All centralizers must meet API specifications.

E. **Exceptions and alternative casing programs.** The District Director may grant an exception to the requirements of Statewide Rule 13. In a written application, an operator must state the reason for the requested exception and outline an alternate program for casing and cementing through the protection depth for strata containing usable-quality water. The District Director may approve, modify, or reject a proposed program. **An operator must obtain approval of any exception before beginning casing and cementing operations.**

F. **Intermediate and production casing.** For specific technical requirements, operators should consult Statewide Rule 13 (b) (3) and (4).

G. **Plugging and abandoning.** Cement plugs must be placed in the wellbore as required by Statewide Rule 14. The District Director may require additional cement plugs. For onshore or inland wells, a 10-foot cement plug must be placed in the top of the well, and the casing must be cut off three feet below the ground surface. All cement plugs, except the top plug, must have sufficient slurry volume to fill 100 feet of hole, plus ten percent for each 1,000 feet of depth from the ground surface to the bottom of the plug.

To plug and abandon a well, operators must use only cementers approved by the Director of Field Operations. Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

Location: SUR-BELL I.,A-4752,BLK-60,TSHP-1S,SEC-14,--[TD=7400],[RRC 8],

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to the base of the RUSTLER, which is estimated to occur at a depth of 200 feet, must be protected.

This recommendation is adequate for wells drilled in this section 14.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

Date Prepared: 5/27/2015
Effective Date: Date of First Sales or date of Last Settlement, as Applicable

Operator: COG OPERATING LLC
County/State: Culberson, TX
Property Description: SEC 8, T1S, BLK 60
SHL: 10 FSL 1980 FEL

Production: Oil __X__ Gas __X__ Other ____

Owner Name:	**TEXAS GENERAL LAND OFFICE**	**Owner Number:**	**001523**
Address:	**1700 N. CONGRESS AVENUE STE 935**	**Type of Interest:**	**RI**
	AUSTIN, TX 78701-1495		
Phone #:	**512-463-5001**	**Interest:**	**0.12500000** ✓

The undersigned certifies the ownership of their decimal in production or proceeds as described above payable by (Payor).

COG OPERATING LLC

Payor shall be notified, in writing, of any change in ownership, decimal interest, or payment address. All such changes shall be effective the first day of the month following receipt of such notice.

Payor is authorized to withhold payment pending resolution of a title dispute or adverse claim asserted regarding the interest in production claimed herein by the undersigned.

The undersigned agrees to indemnify and reimburse Payor any amount attributable to an interest to which the undersigned is not entitled.

Payor may accrue proceeds until the total amount equals $ 25.00, or pay annually, whichever occurs first, or as required by applicable state statutes.

This Division Order does not amend any lease or operating agreement between the undersigned and the lessee or operator or any other contracts for the purchase of oil or gas.

In addition to the terms and conditions of this Division Order, the undersigned and Payor may have certain statutory rights under the laws of the state in which the property is located.

Special Clauses:

Owner(s) Signature: _____	Witness: _____
Owner(s) Printed Name & Title _____	_____
Owner(s) Tax ID/SS No.: _____	
Owner(s) Daytime Telephone No: _____	
Owner(s) FAX Telephone No.: _____	

IMPORTANT: TO AVOID DELAY IN PAYMENT, YOUR SOCIAL SECURITY NUMBER OR TAX IDENTIFICATION NUMBER MUST BE SHOWN ABOVE. FEDERAL LAW REQUIRES YOU TO FURNISH YOUR SOCIAL SECURITY OR TAXPAYER IDENTIFICATION NUMBER. FAILURE TO COMPLY WILL RESULT IN TAX WITHHOLDING IN ACCORDANCE WITH FEDERAL LAW, WHICH WILL NOT BE REFUNDABLE BY PAYOR.

Re: State Lease Nos. MF105245 Grove State 72-21 1H
MF104191 Caldwell State 71-5 1H
MF114883 Dr State East 0812H and
MF112795 Espada State 3405

Dear Mrs. Bedingfield:

The Texas General Land Office (GLO) has received your Division Orders for the referenced units. These Division Orders have been filed in the appropriate mineral files.

The payment of royalties attributable to state-owned mineral and royalty interests is set by contract and applicable statutes and rules. The execution of division orders may, in some cases, affect the manner in which such payments are made or calculated. Therefore, Title 31, §9.32, of the Texas Administrative Code specifies that GLO staff cannot execute a division order or bind the state to any terms contained within it.

Subject to applicable state law and the state's right to take its production in-kind, the GLO acquiesces to the sale of oil and gas in accordance with the terms and conditions set out in the oil and gas leases. If you have questions concerning this matter, please feel free to e-mail me at the address below my signature.

We look forward to being put on pay status as soon as you are able to set up the wells in our RRAC system.

Thank you,

Vivian Hernandez

Working File Number: UPA158984

REMARKS:

- COG Operating LLC is requesting permanent oil and gas pooling from 4,950 feet TVD to 7,950 feet TVD in order to test the Bone Spring formation.
- The applicant plans to spud the unit well on October 27, 2015 with a proposed total depth of 10,000 feet TVD. A 10, 400 foot lateral is expected to be drilled.
- With Board approval of the unit the State's unit royalty participation will be 6.25%.
- The State will participate on a unitized basis from the date of first production.

POOLING COMMITTEE RECOMMENDATION:

The Pooling Committee recommends Board approval of a permanent oil and gas unit under the above-stated provisions.

POOLING AGREEMENT
COG OPERATING LLC
DR STATE CENTRAL #2501H UNIT
GLO UNIT NO. 7703
CULBERSON COUNTY, TEXAS

THIS AGREEMENT is entered into by and between the Commissioner of the General Land Office, on behalf of the State of Texas, as "Lessor" and COG Operating LLC, herein referred to as "Lessee", and such other interested parties as may join in the execution hereof, the undersigned parties herein collectively referred to as the "parties", in consideration of the mutual agreements hereinafter set forth and other valuable considerations, the receipt and sufficiency of which are hereby acknowledged, and for the purposes and upon the terms and conditions which follow:

PURPOSES: 1.

This Pooling Agreement ("Agreement") is made for the purposes of conservation and utilization of the pooled mineral, to prevent waste, to facilitate orderly development and to preserve correlative rights. To such end, it is the purpose of this Agreement to effect equitable participation within the unit formed hereby. This Agreement is intended to be performed pursuant to and in compliance with all applicable statutes, decisions, regulations, rules, orders and directives of any governmental agency having jurisdiction over the production and conservation of the pooled mineral and in its interpretation and application shall, in all things, be subject thereto.

UNIT DESCRIPTION: 2.

The oil and gas interests, which are included within the pooled unit, are listed on the attached Exhibit "A", to which leases and the records thereof reference is here made for all pertinent purposes. The pooled unit shall consist of all of the lands described in Exhibit "B" attached hereto and made a part hereof. A plat of the pooled unit is attached hereto as Exhibit "C".

MINERAL POOLED: 3.

The mineral pooled and unitized ("pooled mineral") hereby shall be oil and gas including all hydrocarbons that may be produced from an oil well or a gas well as such wells are recognized and designated by the Railroad Commission of Texas or other state regulatory agency having jurisdiction of the drilling and production of oil and gas wells. The pooled mineral shall extend to those depths underlying the surface boundaries of the pooled unit in the Bone Spring Formation being defined as the correlative equivalent of the stratigraphic interval occurring from 4,950 feet TVD to 7,950 feet TVD as seen on the Resistivity Log of the DR State East #3003H Well ("unitized interval").

POOLING AND EFFECT: 4.

The parties hereto commit all of their interests which are within the unit to the extent and as above described into said unit and unitize and pool hereunder the separate tracts described on the attached Exhibit "B", for and during the term hereof, so that such pooling or unitization shall have the following effect:

(a) The unit, to the extent as above described, shall be operated as an entirety for the exploration, development and production of the pooled mineral, rather than as separate tracts.

(b) All drilling operations, reworking or other operations with respect to the pooled mineral on land within the unit shall be considered as though the same were on each separate tract in the unit, regardless of the actual location of the well or wells thereon, for all purposes under the terms of the respective leases or other contracts thereon and this Agreement. In the event the unitized area covered by this Agreement is maintained in force by drilling or reworking operations conducted on a directional well drilled under the unitized area from a surface location on adjacent or adjoining lands not included within the boundaries of the unitized area, such operations shall be considered to have been commenced on the unitized area when drilling is commenced on the adjacent or adjoining land for the purpose of directionally drilling under the unitized area and production of oil or gas from the unitized area through any directional well surfaced on adjacent or adjoining land or drilling or reworking of any such directional well shall be considered production or drilling or reworking operations, as the case may be, on the unitized area for all purposes under this Agreement. Nothing in this Agreement is intended or shall be construed as granting to Lessee any leasehold interest, easements, or other rights in or with respect to any such adjacent or adjoining land in addition to any such leasehold interests, easements, or other rights which the lessee, operator or other interest owner in the unitized area may have lawfully acquired from the state or others.

(c) Production of the pooled mineral from the unit allocated to each separate tract, respectively, as hereinafter provided, shall be deemed to have been produced from each such separate tract in the unit, regardless of the actual location of the well or wells thereon, for all purposes under the terms of the respective leases or other contracts thereon and this Agreement.

(d) All rights to the production of the pooled mineral from the unit, including royalties and other payments, shall be determined and governed by the lease or other contract pertaining to each separate tract, respectively, based upon the production so allocated to such tract only, in lieu of the actual production of the pooled mineral therefrom. Provided that, payments that are made on a per acre basis shall be reduced according to the number of acres pooled and included herein, so that payments made on a per acre basis shall be calculated based upon the number of acres actually included within the boundaries of the pooled unit covered by this Agreement.

(e) A shut-in oil or gas well located upon any land or lease included within said unit shall be considered as a shut-in oil or gas well located upon each land or lease included within said unit; provided, however, that shut-in oil or gas well royalty shall be paid to the State on each State lease wholly or partially within the unit, according to the terms of such lease as though such shut-in oil or gas well were located on said lease, it being agreed that shut-in royalties provided in each State lease shall not be shared with other royalty owners.

(f) Notwithstanding any other provision hereof, it is expressly agreed that each State lease may be maintained in force as to areas lying outside the unitized area described in Exhibit "B" only as provided in each such lease without regard to unit operations or unit production. Neither production of the pooled mineral, nor unit operations with respect thereto, nor the payment of shut-in royalties from a unit well, shall serve to hold any State lease in force as to any area outside the unitized area described in Exhibit "B" regardless of whether the production or operations on the unit are actually located on the State lease or not. "Area" as used in this paragraph shall be based upon surface acres to the end that, except as may otherwise be provided in each State Lease, the area inside the surface boundaries of the pooled unit, if held, will be held as to all depths and horizons.

(g) If the Railroad Commission of Texas (or any other Texas regulatory body having jurisdiction) shall adopt special field rules providing for oil and/or gas proration units of less than 345 acres, then Lessee agrees to either (1) drill to the density permitted by the Railroad Commission, (2) make application to the School Land Board of the State of Texas to reform the unit to comply with Railroad Commission unit rules, or (3) make application to the School Land Board of the State of Texas for such remedy as may be agreeable to the Board.

(h) This Agreement shall not relieve Lessee from the duty of protecting the State leases described in Exhibit "A" and the State lands within the boundaries of the pooled unit described in Exhibit "B" from drainage from any well situated on privately owned land, lying outside the unitized area described in Exhibit "B", but, subject to such obligation, Lessee may produce the allowable for the entire unit as fixed by the Railroad Commission of Texas or other lawful authority, from any one or more wells completed thereon.

(i) There shall be no obligation to drill internal offsets to any other well on separate tracts within the pooled unit, nor to develop the lands within the boundaries thereof separately, as to the pooled mineral.

(j) Should this Agreement terminate for any cause, in whole or in part, the leases and other contracts affecting the lands within the unit, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under said lease or contract and the same had ceased on the date of the termination of this Agreement.

ALLOCATION OF PRODUCTION: 5.

For the purpose of computing the share of production of the pooled mineral to which each interest owner shall be entitled from the pooled unit, there shall be allocated to each tract committed to said unit that pro rata portion of the pooled mineral produced from the pooled unit which the number of surface acres covered by each such tract and included in the unit bears to the total number of surface acres included in said unit, and the share of production to which each interest owner is entitled shall be computed on the basis of such owner's interest in the production so allocated to each tract.

TAKING ROYALTY IN KIND: 6.

Notwithstanding anything contained herein to the contrary, the State may, at its option, upon not less than sixty (60) days notice to Lessee, require that payment of all or any royalties accruing to the State under this pooling or unitization agreement be made in kind, without deduction for the cost of producing, gathering, storing, separating, treating, dehydrating, compressing, processing, transporting and otherwise making the oil, gas and other products produced hereunder ready for sale or use.

EFFECTIVE DATE: 7.

Upon execution by the Commissioner of the General Land Office of the State of Texas this Agreement shall become effective as of November 3, 2015.

TERM: 8.

This Agreement shall remain in effect so long as the pooled mineral is being produced from said unit, or so long as all leases included in the pooled unit are maintained in force by payment of delay rentals or shut-in oil or gas well royalties, by drilling or rework, or by other means, in accordance with the terms of said leases. Nothing herein shall amend or modify Section 52.031 of the Natural Resources Code, or any of the provisions thereof, which are contained in any State lease covered by this Agreement.

STATE LAND: 9.

Insofar as the royalty interest of the State of Texas in and under any State tract committed to the unit is concerned, this Agreement is entered into, made and executed by the undersigned Commissioner of the General Land Office by virtue of the authority and pursuant to the provisions of Subchapter E, Chapter 52, of the Natural

Resources Code, authorizing the same, after the prerequisites, findings and approval hereof, as provided in said Code having been duly considered, made and obtained.

DISSOLUTION: 10.

The unit covered by this Agreement may be dissolved by Lessee, his heirs, successors or assigns, by an instrument filed for record in Culberson County, Texas, and a certified copy thereof filed in the General Land Office at any time after the cessation of production on said unit or the completion of a dry hole thereon prior to production or upon such other date as may be approved by the School Land Board and mutually agreed to by the undersigned parties, their successors or assigns.

RATIFICATION/WAIVER: 11.

Nothing in this Agreement, nor the approval of this Agreement by the School Land Board, nor the execution of this Agreement by the Commissioner shall: (1) operate as a ratification or revivor of any State lease that has expired, terminated, or has been released in whole or in part or terminated under the terms of such State lease or the laws applicable thereto; (2) constitute a waiver or release of any claim for money, oil, gas or other hydrocarbons, or other thing due to the State by reason of the existence or failure of such lease; (3) constitute a waiver or release of any claim by the State that such lease is void or voidable for any reason, including, without limitation, violations of the laws of the State with respect to such lease or failure of consideration; (4) constitute a confirmation or recognition of any boundary or acreage of any tract or parcel of land in which the State has or claims an interest; or (5) constitute a ratification of, or a waiver or release of any claim by the State with respect to any violation of a statute, regulation, or any of the common laws of this State, or any breach of any contract, duty, or other obligation owed to the State.

COUNTERPARTS: 12.

This Agreement may be executed in counterparts and if so executed shall be valid, binding and have the same effect as if all the parties hereto actually joined in and executed one and the same document. For recording purposes and in the event counterparts of this Agreement are executed, the executed pages, together with the pages necessary to show acknowledgments, may be combined with the other pages of this Agreement so as to form what shall be deemed and treated as a single original instrument showing execution by all parties hereto.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement upon the respective dates indicated below.

EXHIBIT "A"

Attached to Pooling Agreement for the DR State Central 2501H Unit, dated effective November 3, 2015, between the Commissioner of the General Land Office, on behalf of the State of Texas, as Lessor and COG Operating, as Lessee

I. GENERAL LAND OFFICE OIL AND GAS LEASES:

1. **Oil and Gas Lease MF-114883**

Date:	March 28, 2013
Recorded:	Volume 109, Page 366, OPR of Culberson County, Texas
Lessor:	The State of Texas, acting by and through its agent, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd.
Lessee:	COG Operating LLC
Lands:	E/2 E/2 Section 36, Block 61, Township 1 South, T&P RR Co. Survey
Primary Term:	3 years

II. THE INTERESTS IN THE MINERAL ESTATE SUBJECT TO THIS AGREEMENT:

1. E/2 E/2 of Section 25, Block 61, Township 1 South, T&P RR Co. Survey

III. THE NON-PARTICIPATING ROYALTY INTEREST SUBJECT TO THIS AGREEMENT:

1. E/2 E/2 of Section 25, Block 61, Township 1 South, T&P RR Co. Survey owned by Wise Asset No. 10, Ltd.

EXHIBIT "B"

Attached to Pooling Agreement for the DR State Central 2501H Unit, dated effective November 3, 2015, between the Commissioner of the General Land Office, on behalf of the State of Texas, as Lessor and COG Operating, as Lessee

Description of Lands

Tract 1: E/2 E/2 of Section 25, Block 61, Township 1 South, T&P Ry. Co. Survey, Culberson County, Texas, containing 172.75 gross acres, more or less.

Tract 2: E/2 E/2 of Section 36, Block 61, Township 1 South, T&P RR Co. Survey, Culberson County, Texas, containing 173 gross acres, more or less.

Depth Limitation

The Unit Area shall be limited in depth to the Bone Spring Formation being defined as the correlative equivalent of the stratigraphic interval occurring from 4,950 feet TVD to 7,950 feet TVD as seen on the Resistivity Log of the DR State East #3003H.

Certified Mail service provides the following benefits:

- A receipt (this portion of the Certified Mail label).
- A unique identifier for your mailpiece.
- Electronic verification of delivery or attempted delivery.
- A record of delivery (including the recipient's signature) that is retained by the Postal Service™ for a specified period.

Important Reminders:

- You may purchase Certified Mail service with First-Class Mail®, First-Class Package Service®, or Priority Mail® service.
- Certified Mail service is *not* available for international mail.
- Insurance coverage is *not* available for purchase with Certified Mail service. However, the purchase of Certified Mail service does not change the insurance coverage automatically included with certain Priority Mail items.
- For an additional fee, and with a proper endorsement on the mailpiece, you may request the following services:
  - Return receipt service, which provides a record of delivery (including the recipient's signature). You can request a hardcopy return receipt or an electronic version. For a hardcopy return receipt, complete PS Form 3811, *Domestic Return Receipt;* attach PS Form 3811 to your mailpiece; for an electronic return receipt, see a retail associate for assistance. To receive a duplicate return receipt for no additional fee, present this USPS®-postmarked Certified Mail receipt to the retail associate.
  - Restricted delivery service, which provides delivery to the addressee specified by name, or to the addressee's authorized agent.
  - Adult signature service, which requires the signee to be at least 21 years of age (not available at retail).
  - Adult signature restricted delivery service, which requires the signee to be at least 21 years of age and provides delivery to the addressee specified by name, or to the addressee's authorized agent (not available at retail).
- To ensure that your Certified Mail receipt is accepted as legal proof of mailing, it should bear a USPS postmark. If you would like a postmark on this Certified Mail receipt, please present your Certified Mail item at a Post Office™ for postmarking. If you don't need a postmark on this Certified Mail receipt, detach the barcoded portion of this label, affix it to the mailpiece, apply appropriate postage, and deposit the mailpiece.

IMPORTANT: Save this receipt for your records.

Certified Mail service provides the following benefits:

- A receipt (this portion of the Certified Mail label).
- A unique identifier for your mailpiece.
- Electronic verification of delivery or attempted delivery.
- A record of delivery (including the recipient's signature) that is retained by the Postal Service™ for a specified period.

Important Reminders:

- You may purchase Certified Mail service with First-Class Mail®, First-Class Package Service®, or Priority Mail® service.
- Certified Mail service is *not* available for international mail.
- Insurance coverage is *not* available for purchase with Certified Mail service. However, the purchase of Certified Mail service does not change the insurance coverage automatically included with certain Priority Mail items.
- For an additional fee, and with a proper endorsement on the mailpiece, you may request the following services:
  - Return receipt service, which provides a record of delivery (including the recipient's signature). You can request a hardcopy return receipt or an electronic version. For a hardcopy return receipt, complete PS Form 3811, *Domestic Return Receipt;* attach PS Form 3811 to your mailpiece; for an electronic return receipt, see a retail associate for assistance. To receive a duplicate return receipt for no additional fee, present this USPS®-postmarked Certified Mail receipt to the retail associate.
  - Restricted delivery service, which provides delivery to the addressee specified by name, or to the addressee's authorized agent.
  - Adult signature service, which requires the signee to be at least 21 years of age (not available at retail).
  - Adult signature restricted delivery service, which requires the signee to be at least 21 years of age and provides delivery to the addressee specified by name, or to the addressee's authorized agent (not available at retail).
- To ensure that your Certified Mail receipt is accepted as legal proof of mailing, it should bear a USPS postmark. If you would like a postmark on this Certified Mail receipt, please present your Certified Mail item at a Post Office™ for postmarking. If you don't need a postmark on this Certified Mail receipt, detach the barcoded portion of this label, affix it to the mailpiece, apply appropriate postage, and deposit the mailpiece.

IMPORTANT: Save this receipt for your records.

PS Form **3800,** April 2015 *(Reverse)* PSN 7530-02-000-9047

Subject: [External] Delaware Ranch

**** External email. Use caution. ****

Gentlemen,

The State and Wise Assets have discussed your request to split the delay rental payment for years four (4) and five (5) into two payments and to reduce the royalty rate. The State and Wise Asset have agreed to the following for the delay rental and royalty.

1.) We will except a total payment in 2016 of $7,103,744.00, being $3,551,872.00 to the State and Wise Assets and a total
payment in 2017 of $7,103,744.00, being $3,551,872 to the State and Wise Assets. These payments must be made timely
and if not made the lease will terminate as to all acreage except what is in a producing proration unit.

2.) We will drop the royalty rate to 22% for the life of any well drilled and completed between 3-28-16 and 3-28-18 on the Delaware Ranch. The royalty rate will go back to 25% for all wells drilled after 3-28-18.

Please acknowledge receipt of this email and let me know how you plan to move forward.

Thank you,

Drew Reid

MF-114883

SECOND AMENDMENT OF OIL AND GAS LEASE

STATE OF TEXAS §
§
COUNTY OF CULBERSON §

This Second Amendment of Oil and Gas Lease ("Amendment") dated effective as of September 1, 2017 ("Effective Date"), is made and entered into by and among **Wise Asset No. 8, LTD.,** a Texas limited partnership, individually and as agent for the State of Texas, acting through its General Land Office ("State of Texas"), and **Wise Asset No. 10, LTD.,** a Texas limited partnership, individually and as agent for the State of Texas, (Wise Asset No. 8, LTD., Wise Asset No. 10, LTD, and the State of Texas hereinafter collectively "Lessor") and **COG Operating LLC,** a Delaware limited liability company ("Lessee"). Lessor and Lessee may hereinafter be referred to collectively as the "Parties" and individually as a "Party". Capitalized terms used but not defined in this Amendment shall have the meaning ascribed to such terms(s) in the Lease (hereinafter defined).

WHEREAS, Lessor executed and delivered to Lessee that certain Oil and Gas Lease, including Addendum 1 attached thereto and made a part thereof, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease ("Lands"), and which lease is recorded in Volume 109, Page 366, of the Oil and Gas Lease Records of Culberson County, Texas ("Original Lease");

WHEREAS, the Original Lease was amended by that certain unrecorded Amendment of Oil and Gas Lease dated effective March 1, 2016 ("First Amendment"), a copy of which is in the possession of Lessor and Lessee (the Original Lease, the First Amendment, and all other previous duly executed amendments and extensions of said lease hereinafter, the "Lease");

WHEREAS, Lessee remains the owner and operator of the Lease; and

WHEREAS, the Parties wish to amend, modify, delete, or replace certain provisions of the Lease in order to promote efficient development and maximum recovery of hydrocarbons from the Lease, as more particularly described below.

NOW THEREFORE, in consideration of the above premises, ten dollars ($10), and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged and confessed by Lessor, the Parties do hereby agree as follows:

1. Effective as of the Effective Date, "Addendum 1" attached to the Lease shall be replaced and superseded for all purposes by the "Addendum 1" attached hereto and made a part hereof.

2. Notwithstanding any prior written agreements or electronic mail communications between the Parties to the contrary, on and after January 1, 2018, the royalty for all production of oil and/or gas from, or attributable to, the Lands shall be as provided in the Lease, including, without limitation, Paragraph 4 thereof.

For and in consideration of the above-described premises and consideration, Lessor does hereby ADOPT, RATIFY, and CONFIRM the Lease, as amended hereby, unto Lessee, and hereby agrees that the Lease, as amended hereby, is a valid and subsisting oil and gas lease in full force and effect as to all of the Lands, in accordance with its terms, as amended hereby. In the event of a conflict between the terms of this Amendment and the terms of the Lease, the terms of this Amendment shall control and prevail.

This Amendment may be executed in any number of counterparts, each of which may be combined and shall be considered an original for all purposes.

EXECUTED as of the date of the Parties' respective acknowledgements below, to be effective for all purposes, however, as of the Effective Date.

ADDENDUM 1

Attached to and Made a Part of Oil and Gas Lease dated March 28, 2013, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as the Lessor, to COG Operating LLC, as the Lessee

---

40. **Lease; Conflicting Provisions.** The terms set forth in the lease agreement to which this addendum is attached (i.e., the main body of the lease), including, but not limited to Paragraphs 1-39, together with the terms set forth in this addendum, including Paragraphs 40-48, comprise the lease. All references in the main body of the lease and this addendum to "this lease" or "the lease" refer to the main body of this lease, as amended, supplemented or otherwise modified by this addendum. In the event of a conflict between a term set forth in the main body of the lease and a term set forth in this addendum, then, except as otherwise expressly provided in this addendum, the conflicting provision of this addendum shall control.

41. **Definitions.** Except as otherwise expressly stated in this lease, the terms set forth below shall have the meanings ascribed thereto. A term defined in this lease, whether in this paragraph or elsewhere in this lease, shall include both the singular and the plural. RRC rules referenced herein are codified, as of the date of this lease, in Title 16, Part 1, Chapter 3 of the Texas Administrative Code.

(a) [Intentionally Omitted]

(b) "Actual Drilling" (or "actual drilling") means the penetration of the earth with a rotary rig capable of drilling, and intended to drill, to the objective depth.

(c) "Completed," when used to described the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil and/or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged.

(d) "Continuous Development" shall have the meaning ascribed thereto in Paragraph 46.a.

(e) "Development Obligation" shall have the meaning ascribed thereto in Paragraph 46.

(f) "Gas well" shall have the meaning ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

(g) "Horizon" shall have the meaning ascribed thereto in Paragraph 46.

(h) "Horizontal Drainhole Well" shall have the meaning ascribed thereto in RRC Rule 86 (Title 16, Part 1, Chapter 3, Rule §86, Texas Administrative Code), as amended by applicable field rules, if any.

(i) "Oil well" shall have the definition ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

(j) "Owner" means the owner of the soil.

(k) "Producing Unit" shall have the meaning ascribed thereto in Paragraph 47.

(l) "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

(m) 'Vertical Well" means a well (defined below) other than a Horizontal Well.

(n) "Well" (or "well"), unless otherwise expressly provided in this lease, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

42. **Leased Premises.** This lease covers the following described lands located in T&P RR. Co. Survey, Culberson County, Texas:

Section	Block	Township	Gross Acres (more or less)
6	60	1	661.00
8	60	1	675.60
14	60	1	673.00
16	60	1	675.50
18	60	1	678.02
20	60	1	675.60
28	60	1	675.00
30	60	1	678.00
32	60	1	675.40
34	60	1	676.00
2	61	1	677.00
4	61	1	668.00
6	61	1	657.00
8	61	1	692.00
10	61	1	689.00
12	61	1	691.00
14	61	1	697.50
16	61	1	691.00

Section	Block	Township	Gross Acres (more or less)
18	61	1	683.00
20	61	1	692.00
22	61	1	688.70
24	61	1	690.90
26	61	1	697.50
28	61	1	691.00
30	61	1	681.90
32	61	1	693.00
34	61	1	690.00
36	61	1	692.00
38	61	1	698.60
40	61	1	692.00
42	61	1	684.00
44	61	1	699.00
46	61	1	696.60
48	61	1	698.00
12	62	1	689.00
24	62	1	693.70
36	62	1	674.00
4	61	2	697.00
6	61	2	689.50
8	61	2	698.00
N/2 of 10	61	2	347.50
12	61	2	697.60
20	61	2	696.60
28	61	2	685.00
30	61	2	677.00
		Total Gross Acres:	30,518.72

43. **Owner's Representation Regarding Ownership; Negation of Warranty.** Owner represents, but does not warrant (all warranties, express or implied, being hereby negated) that it owns the following interests in the leased premises (the "Surface Interests"):

(i) an undivided 75% of the surface estate in Section 30 and the S/2 SE/4 of Section 32, Block 60, Township 1, Culberson County, Texas; and

(ii) 100% of the surface estate in the remainder of the leased premises.

44. **Standards of Lessee's Conduct; Drilling and Completion of Wells.** At all times while this lease is in force, either in whole or in part, Lessee shall conduct its operations and activities, and otherwise fulfill its obligations, under this lease as would a reasonably prudent operator, in a good and workman like manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations and orders. Without limiting the foregoing, and except as otherwise agreed in writing by Owner, the State of Texas and Lessee, each well commenced by Lessee pursuant to this lease shall be drilled:

(i) in a bona fide attempt to produce oil and/or gas;

(ii) at a legal location (or locations) of Lessee's choice on the leased premises; and

(iii) with reasonable diligence through completion.

45. **Primary Term.** Notwithstanding Paragraph 2 or any other provision of this lease to the contrary, the primary term of this lease shall run from March 28, 2013, through December 31, 2017. During the primary term, the anniversary (or anniversary date) of this lease shall be deemed to have been March 28. After the primary term (including, but not limited to, January 1, 2018), the anniversary (or anniversary date) of this lease shall be deemed to be January 1.

46. **Continuous Development; Partial Expiration in Absence of Continuous Development.**

This Paragraph 46 supersedes and replaces Paragraphs 16(A) and (B) of the lease.

a. **Continuous Development.** Subject to the lease savings provisions of Paragraphs 12, 13, 14 (as amended in this addendum), 15 and 18, if at the expiration of the primary term there are at least eleven (11) well producing or capable of producing oil and/or gas from the leased premises in paying quantities, this lease shall not terminate as to any of the leased premises but will continue in force and effect as to all of the leased premises for as long as Lessee has the right hereunder to conduct, and is actually conducting, Continuous Development. "Continuous Development" means:

(1) during 2018 only, the drilling of a minimum of eighteen (18) wells on the leased premises; and

(2) during every calendar year thereafter, the drilling of a minimum of twenty-four (24) wells on the leased premises.

For purposes of Continuous Development only, if actual drilling of a well is commenced during 2018 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Paragraph 44, it shall be deemed that the well has been "drilled" during such calendar year, even if the well is actually drilled, in part, and/or completed, in whole or part, during the next succeeding calendar year.

A well drilled in the prosecution of Continuous Development shall be referred to herein as a "Continuous Development Well."

With respect to 2018 or any subsequent calendar year, "Development Obligation" means the number of Continuous Development Wells required to be drilled during that year, as provided above.

b. **Partial Expiration in Absence, or Upon Cessation, of Continuous Development.** If during 2018 or any subsequent calendar year Lessee fails to meet its Development Obligation for the year, then, effective as of the end of such year, this lease shall automatically terminate insofar as it covers the entire leased premises, save and except any Held Producing Unit. A "Held Producing Unit" means:

(1) a well producing or capable of producing oil and/or gas in paying quantities; and

(2) that portion of the leased premises situated within the geographic boundaries of the Producing Unit designated for such well, limited to those depths situated between the top of the Bell Canyon formation and the base of the deepest formation from which such well is then producing oil and/or gas, whether or not in paying quantities.

Further, if at such time there exists more than one Held Producing Unit, then this lease shall be automatically segregated into separate and distinct leases, each of which shall cover a single Held Producing Unit (a "Producing Unit Lease"). Each Producing Unit Lease shall be deemed to contain the same terms and provisions as those set forth in this lease, except that the leased premises subject to such Producing Unit Lease shall consist solely of the single Held Producing Unit covered thereby. Operations on and/or production from (or attributable to) one Producing Unit Lease shall not serve to maintain or otherwise affect the status of any other Producing Unit Lease.

c. **Credits Against Development Obligation.**

(1) **Credit for Excess Drilling.** If during 2018 or any subsequent calendar year the number of wells Lessee drills on the leased premises exceeds Lessee's Development Obligation for the year, Lessee shall have the right to apply the number of wells by which it exceeded such obligation as a

credit against its Development Obligation for the next succeeding calendar year.

(2) **Credit for Density Drilling.** For purposes of this provision, "Horizon" means a stratum of earth thought to contain a common accumulation of oil or gas separately producible from any other common accumulation of oil or gas. A Horizon may comprise one of several stratigraphic intervals or zones within a geologic formation or an entire formation. By way of illustration and not limitation, the Wolfcamp formation may consist of four (or more) Horizons known as the Wolfcamp A, Wolfcamp B, Wolfcamp C and Wolfcamp D, and the Bone Spring formation may consist of eight (or more) Horizons known as the Avalon (or Avalon formation), Charkey (or Charkey formation), the 1st, 2nd and 3rd Bone Spring Carbonates and the 1st, 2nd and 3rd Bone Spring Sands. A "Half Section" means a single legal subdivision of a section of land comprising one-half of the section.

If during 2018 Lessee completes four (4) Continuous Development Wells in the same Horizon in any Half Section, then Lessee shall be deemed for purposes of meeting its Development Obligation for such year to have drilled five (5) Continuous Development Wells rather than four (4). If during any subsequent calendar year Lessee completes eight (8) Continuous Development Wells in the same Horizon in any single section of land or four (4) Continuous Development Wells in the same Horizon in each of any two (2) adjacent Half Sections, then Lessee shall be deemed for purposes of meeting its Development Obligation for such year to have drilled a total of ten (10) Continuous Development Wells rather than eight (8). Two Half Sections shall be considered to be adjacent if they share a common border.

47. **Producing Units; Additional Lease Termination Events.**

a. **Producing Units.** Upon completion of any well as a producer of oil and/or gas, Lessee shall designate a geographic area surrounding such well (a "Producing Unit") by written instrument suitable for recording, and furnish the written designation to Owner and the State of Texas, in accordance with the further provisions hereof. The written designation may be filed by any party hereto in the county or counties in which all or part of the lands within such Producing Unit are located. Each Producing Unit shall be effective as of the date of first production of oil and/or gas from the well for which such Producing Unit has been designated. Each Producing Unit shall conform to the spacing, density and proration provisions for such well, as permitted or prescribed in applicable RRC rules and/or orders; provided, however, no Producing Unit shall contain more than the maximum amount of acreage specified in the following tables, plus a tolerance of ten percent (10%):

VERTICAL WELLS		
Depth of Deepest Producing Formation		**Maximum Size of Producing Unit (in acres)**
Top of Bell Canyon to Base of Brushy Canyon		40
Top of Bone Spring to Base of Wolfcamp		80
Base of Wolfcamp to Base of Morrow	Oil Well	80
	Gas Well	160
Below Base of Morrow	Oil Well	160
	Gas Well	320

HORIZONTAL DRAINHOLE WELLS		
Depth of Deepest Producing Formation	**Length of Horizontal Drainhole, measured from first take point to last take point (in feet)**	**Maximum Size of Producing Unit (in acres)**
Top of Bell Canyon to Base of Wolfcamp	100 * – 871	40
	872 – 2,674	80
	2,675 – 4,012	120
	4,013 – 5,350	160
	5,351 – 6,688	200
	6,689 – 8,027	240
	8,028 – 9,366	280
	greater than 9,366	320
Below Base of Wolfcamp	100 * – 871	80
	872 – 2,674	160
	2,675 – 4,012	240
	4,013 – 5,350	320
	5,351 – 6,688	400
	6,689 – 8,027	480
	8,028 – 9,366	560

	greater than 9,366	640

* If the distance from the first take point to the last take point is less than 100', then, for purposes of computing the maximum amount of acreage that may be included in the Producing Unit designated for such well, the well shall be deemed to be a Vertical Well.

Each Producing Unit shall also be as nearly in the form of a square or rectangle as is reasonably practicable, and the surface location, bottom hole, penetration point, terminus, and take point locations of the well for which such Producing Unit has been designated shall be at legal locations in, on or under such unit.

Nothing herein shall be construed as prohibiting Lessee from revising an existing Producing Unit as to the amount or configuration of acreage included therein, or other matters, provided, however, the revised Producing Unit must comply with the requirements of this provision. Lessee may revise a Producing Unit as provided herein by furnishing the State of Texas and owner of the soil with a written instrument, suitable for recording, referencing or describing the existing Producing Unit and designating the revised Producing Unit. The effective date of the revised Producing Unit shall be the date such instrument is received by the State of Texas and owner of the soil, or as otherwise agreed by the parties. Such instrument may be recorded by the State of Texas, owner of the soil or Lessee in the county or counties in which the lands comprising the revised Producing Unit are located.

Except as otherwise expressly provided in this lease or agreed in writing by the State of Texas and owner of the soil, in advance, a Producing Unit formed or revised pursuant to this provision shall never contain lands other than lands then subject to this lease. For purposes of this provision, "penetration point," "take point," "first take point," "last take point," and "terminus" shall have the meanings ascribed thereto in RRC Rule 86.

b. **Additional Lease Termination Events.** Notwithstanding any other provision of this lease to the contrary:

(1) If, after the expiration of the primary term, production of oil or gas from a Producing Unit, after once obtained, should cease from any cause, the lease shall not terminate as to such Producing Unit if Lessee commences additional drilling or reworking operations on such unit within ninety (90) days after such cessation, and this lease shall remain in full force and effect as to the Producing Unit for so long as such operations continue in good faith and in workmanlike manner without interruptions totaling more than ninety (90) days. If such drilling or reworking operations result in

the production of oil or gas, the lease shall remain in full force and effect as to such Producing Unit for so long as oil or gas is produced therefrom in paying quantities or payment of shut-in oil or gas well royalties or payment of compensatory royalties is made with respect to such unit as provided herein or as provided by law. If the drilling or reworking operations result in the completion of a well as a dry hole, the lease will not terminate as to such Producing Unit if Lessee commences additional drilling or reworking operations on such unit within ninety (90) days after the completion of the well as a dry hole, and this lease shall remain in effect as to such unit so long as Lessee continues drilling or reworking operations in good faith and In a workmanlike manner without interruptions totaling more than ninety (90) days. Lessee shall give written notice to the General Land Office within thirty (30) days of any cessation of production.

(2) Upon the expiration of five (5) years following the cessation of Continuous Development, if any, or the expiration of fifteen (15) years from the date of this lease, whichever is the later to occur, this lease shall automatically expire as to all of the:

(i) lands within the geographic boundaries of the Producing Unit then covered by this Lease, save and except the minimum amount of acreage then necessary under RRC rules for the well to which such Producing Unit is dedicated to be produced at maximum allowables; and

(ii) depths in and under such Producing Unit, save and except the depths situated between the top of the shallowest formation from which oil and/or gas is then being produced (whether in paying quantities or not) and the base of the deepest formation from which oil and/or gas is then being produced (whether in paying quantities or not).

(3) Upon the expiration of ten (10) years following the cessation of Continuous Development, if any, or the expiration of twenty-five (25) years from the date of this lease, whichever is the later to occur, this lease shall automatically expire as to all of the:

(i) lands within the geographic boundaries of the Producing Unit then covered by this Lease, save and except the minimum amount of acreage then necessary under RRC rules for the well to which such Producing Unit is dedicated to be produced at maximum allowables; and

(ii) depths in and under such Producing Unit, save and except each formation within such Producing Unit from which oil and/or gas is then being produced (whether in paying quantities or not).

48. **Miscellaneous Provisions.**

a. **Duty to Develop.** After December 31, 2018, or the cessation of Continuous Development, if any, whichever is the later to occur, Lessee shall drill such additional well or wells in the Horizon from which oil and/or gas is being produced, or capable of being produced, in paying quantities, as would a reasonably prudent operator acting under or encountering the same or similar circumstances. Nothing in this provision shall be construed as limiting Lessee's implied duty to develop lands covered by this lease.

b. **Meetings.** Within a reasonable time following request by Owner and/or the State of Texas, Lessee agrees to meet with Owner and the State of Texas at the Texas General Land Office, or another mutually agreeable location, to discuss its operations and activities relating to this lease, including, but not limited to, past, present and planned (or anticipated) future operations affecting the surface and/or subsurface of the lands covered by this lease, and the results (or anticipated results) of those operations. Owner may disclose information obtained from Lessee during any such meeting with its partners, employees, contractors and consultants, but Owner shall be prohibited from disclosing, or allowing its partners, employees, contractors or consultants to disclose, Lessee's proprietary information to any other person or entity. Notwithstanding anything in this provision to the contrary, Lessee shall have no obligation to provide Owner its reserve data, geologic interpretations or other proprietary data, and Lessee shall not be required to meet with Owner more than twice per year pursuant to this provision.

c. **No Pooling Without Consent.** Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas Natural Resources Code§§ 52.151 - 52.154, the conflicting provision of said statutes shall control. In the event pooling is allowed, Lessee shall have the right, subject to the provisions of Paragraph 47, to designate the entire pooled unit as a Producing Unit.

d. **Information Requirements; Seismic.** Lessee agrees to promptly furnish Owner with the same information, reports and other documentation pertaining to its operations and activities under this lease that an operator is required to furnish a participating nonoperator under the terms of the A.A.P.L. Form 610-1989 Model Form Operating Agreement ("Operations Information"). All Operations Information furnished to Owner will be kept strictly confidential until and unless it has been made available to the general public; provided, Owner shall have the right to share the Operations Information with its partners, owners, managers, contractors and consultants to the extent, and only to the extent, necessary or convenient to analyze and file same. In the event Lessee acquires proprietary seismic data covering all or part of the leased premises, Lessee agrees to grant Owner a free license to such data (including, but not limited to, field records, and processed and reprocessed data, to the extent its license allows it to do so without charge) over the portion or portions of the leased premises covered by such data, but shall not be required to furnish Owner its interpretations of any such data. Without limiting the foregoing, Lessee further agrees as follows:

(1) Lessee shall allow Lessor and its representatives full access to all wells drilled pursuant to this lease, including, but not limited to, access to the records and reports pertaining thereto and to the derrick floor, at Lessor's sole risk and expense, and Lessor shall be furnished with samples or copies of all cores, cuttings, logs, drilling data, testing and completing data, and all other information obtained by Lessee pertaining to any well drilled hereunder. Upon request at any time, and from time to time, Lessee shall furnish Owner a current statement showing all wells that have been drilled and/or completed, or are being drilled or completed pursuant to this lease, the status of such wells, and current production information for such wells, if any, including, but not limited to, volumes, pricing and purchases.

(2) Unless and until Lessee is instructed otherwise, Lessee shall transmit all information required to be delivered to Owner pursuant to this provision or any other provision of the lease, using the contract person and information provided below.

Owner: Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd.
Owner's Designee: William D. Patterson
Physical and Mailing Address of Owner:
6851 NE Loop 820, Suite 200
North Richland Hills, TX 76180
Telephone and Fax:
(817) 577-1131 ext. 206 (Work)
(817) 228-9184 (Mobile)
(817) 503-8985 (Fax)
Email: billpatterson@petroleumlegal.com

(3) Without limiting the foregoing, Lessee agrees to deliver to Owner (or otherwise comply with) the following information and reports for each well drilled by Lessee pursuant to this lease:

(i) Notice by telephone of all proposed coring, drillstem testing, and logging in sufficient time for Owner to have a representative present.

(ii) Daily drilling, completion and initial potential test reports, and production reports for a period of at least three (3) months from the date of first production.

(iii) Daily mud logs (by email), and a print of the composite mud log.

(iv) Two field prints or preliminary prints, and two final prints of all logs run.

(v) Samples of any and all cores, if requested.

(vi) At or prior to the time actual drilling is commenced, Lessee's geologist in charge will contact Owner's designee to discuss any

potential modification of the requirements under this paragraph and the necessary time requirements for notification of coring, logging, testing, etc.

(vii) Two copies of complete details of all drillstem tests taken, together with two copies of charts in bottom hole bomb.

(viii) One copy of the potential test.

(ix) One copy of completion and/or plugging report.

(x) One copy each of all other forms filed with the RRC and/or any other agency (whether state or federal).

Notwithstanding anything to the contrary above, Lessee shall never be obligated to provide reserve data, geologic interpretations or other proprietary or interpretive information. Any and all data and reports provided to Owner shall be without warranty of any kind or nature so that Lessee shall have absolutely no liability to Owner under any theory or remedy arising, directly or indirectly, from providing same and Owner stipulates and agrees that it relies upon any such data and/or records at its own risk. LESSOR SHALL FULLY INDEMNIFY AND HOLD HARMLESS LESSEE, ITS AGENTS, EMPLOYEES, CONTRACTORS, AND SUBCONTRACTORS, AND THEIR AGENTS, EMPLOYEES AND CONTRACTORS, FROM ANY AND ALL CLAIMS AND CAUSES OF ACTION, INCLUDING CONTRACTUAL CAUSES OF ACTION, ARISING FROM OR ASSERTED BY, THROUGH OR UNDER ANY PERSON ON WELL SITES, RIG FLOORS OR OTHER LESSEE OPERATIONAL AREAS AS INVITEES OF LESSOR, INCLUDING FOR ACTS OF A DIRECT OR INDIRECT INDEMNITEE'S ORDINARY NEGLIGENCE.

e. **Shut-in Wells.** Notwithstanding anything herein to the contrary, acreage held by shut-in royalties may not be maintained under this lease solely by the payment of shut-in royalties for any single period in excess of twelve (12) consecutive months or for more than three (3) years in the aggregate. For the sole purpose of computing the amount of shut-in royalties payable under Paragraph 14, it shall be deemed that the rental amount stipulated in Paragraph 3 is $5.00 per acre.

f. **Assignments.** Notwithstanding any other provision of this lease to the contrary, this lease may not be assigned absent the advance written consent of Owner and the State of Texas, which consent shall not be unreasonably withheld; provided, however, this condition to assignment shall not apply to Lessee's mortgage of all or part of its interest in the lease, or to its disposition of all, or substantially all, of its assets in the Permian Basin through merger, reorganization and/or consolidation.

g. **Releases.** If this lease expires or terminates for any cause, whether in whole or in part, Lessee shall immediately release this lease in writing as to the lands and/or depths that are no longer subject hereto; provided, however, the release of this lease, in whole or in part, shall not operate to

lessen or relieve Lessee of any obligation or liability under or relating to this lease accruing prior to such expiration or termination. Lessee shall record all releases executed by it pursuant to this provision, and furnish copies thereof to Owner and the State of Texas.

h. **Binding Effect.** The provisions of this lease shall be covenants running with the lands, and shall inure to the benefit of and be binding upon Owner, the State of Texas and Lessee, and their respective heirs, successors, assigns, representatives, directors, principals, agents, employees, contractors and subcontractors.

i. **Surface Rights and Damages.** Simultaneously with the execution and delivery of this lease, Owner and Lessee have entered into a separate surface use and damages agreement which governing their respective rights and obligations in regard to the surface rights granted to Lessee, expressly or impliedly, herein.

Drew, below is what I got from Bill. It should have bullet points of the lease changes. Austin will call you in tomorrow before he gets there. Talk to you soon.

Subject: Second Amendment to Concho OGL

Drew:

We have come to terms with Concho on amending the Delaware Ranch lease. We are replacing the original addendum with a revised one. The amendment and new addendum are attached. Wise has executed.

These are the highlights of the agreed changes:

1. The primary term will be expiring early, on December 31, 2017. It was supposed to expire March 27, 2018. So, after December 31, the new anniversary date of the lease for purposes of continuous development obligations, etc., is now January 1 (rather than March 28).

2. As you recall, we allowed Concho to lower the royalty rate on the 4 Wolfcamp wells (and only those wells) they drilled this year to 22% (in return for their agreement to drill those wells...since they weren't obligated to). The royalty rate is going to increase back to 25%, effective January 1, 2018.

3. The size of the "Producing Units" for Wolfcamp horizontal wells has been decreased to 160's – they were 320's when we originally granted the lease. So now they are the same for the Wolfcamp and Bone Spring.

4. We did away with the concept of separate acreage blocks...the lease is now a single lease, covering all 30K acres. It won't be break up into separate leases at the end of the primary term.

5. Continuous Development: originally 22 wells per year; now it will be 18 wells in 2018 and 24 wells each year thereafter (and it makes no difference how long the laterals are).

6. Credit for Denser Drilling: In 2018, if Concho drills 4 wells in the same Horizon (which is a defined term – and, by way of example, would be the Wolfcamp A or B or C or D, or 2nd Bone Spring Sand, or 3rd Bone Spring Carbonate, etc.) on any half-section, they get credit against their continuous development obligation ("CDO") for having drilled 5 wells. In 2019 and each subsequent calendar year, if they drill 8 wells in the same Horizon in any single section or 4 wells in the same Horizon in each of two adjacent half-sections (e.g., four wells in the Wolfcamp A in the W/2 of Section 4 and four wells in the Wolfcamp A in the E/2 of Section 5), they get credit against their CDO for a total of 10 wells, rather than just 8 wells. Note that the only way they could possibly get the credit for drilling in two adjacent half-sections is if they make a trade with Chevron. Also, if they do drill to this kind of density, then even with the credit, in 2018, they'd still have to drill a minimum of 16 wells and, in 2019 and after, a minimum of 20 wells (think out the math on that). They don't get any additional credit for drilling 2 mile laterals vs. 1 mile laterals.

There are a number of other revisions that were necessary to make sure all provisions of the addendum mesh with each other – to keep the legal mumbo-jumbo consistent. And, we have done away with provisions relating to the primary term (such as primary term drilling obligations, which they've complied with). This streamlined things a bit. The old addendum will still be considered effective, but will only apply to the time period up to January 1, 2018.

Concho will be sending you the amendment/addendum to execute. You'll probably receive it tomorrow or Friday.

If you have any questions, please don't hesitate to call me.

Thanks.

Bill

Subject: RE: [External] Executed Second Amendment

Drew,

Thanks for the quick reply. I understand that you only require approval and acceptance by the GLO. The fact that this is such a large lease and that the GLO executed the first amendment I would really appreciate it if we could get this one executed as well. It would be more prudent on my part if I can get the amendment fully executed by all parties. Regardless, Austin Frye with Concho will be in Austin on Friday and can hand deliver the executed version with Concho and the Cocanougher's signatures to you for approval and acceptance. Thank you for your time, and if you have any questions about the Amendment Bill Paterson and I are available to go over it.

Subject: FW: [External] Executed Second Amendment

Drew,

I believe Bill Paterson has been in contact and discussion with you about this amendment to our Delaware Ranch lease. We have worked on them for quite some and believe this is in the benefit to all parties to allow more efficient development of the Oil and Gas. Do you have time for a 10 minute phone call after lunch today to discuss getting them executed by the GLO. I have triplicate originals in hand and Austin Frye at Concho will be in Austin tomorrow and can hand deliver.

Thanks for your time.

Re: Second Amendment to Delaware Ranch Lease
Executed by Wise

Dear Ryan:

Enclosed herewith are three originals of the referenced amendment, executed by Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd. Thank you for working with us. I agree with your comment Tuesday that this is a win/win deal. You, and of course David McElyea and the others, have been a delight to work with.

If you have any questions or concerns, please don't hesitate to call.

Thank you.

Sincerely,

Bill Patterson

Subject: Proposed Amendment of Delaware Ranch OGL - Concho/Wise Asset
Attachments: Scanned from a Xerox multifunction device001 (3).pdf

Hello Drew.

I left you a voicemail concerning this email. As you know from our last visit, Concho wants to amend the Delaware Ranch (DR) lease. Currently, the primary term is set to expire on March 28, 2018. When it does, the lease will split up into 11 separate leases and continuous development (CD) will kick in on each. Under CD, Concho is currently required to commence 2 wells per year per lease, for a total of 22 wells per year (a "year" being March 28 to March 28). Concho has made it clear on several occasions during our discussions that they want to begin developing the Wolfcamp A (and the Wolfcamp D may come later, or at the same time) by drilling as many as 8 wells per section – and I just learned a few minutes ago, they've been experimenting with spacing wells in Lea County 400' apart (i.e., approximately 12 wells per geologic zone per section) and think they are seeing some success...the jury is still out because they don't have quite enough production data yet. But, if they have success with that, they could developing on 400' spacing on the Delaware Ranch. Currently, the lease allows them to hold 320 acres for each Wolfcamp well and 160 acres for each Bone Spring and Delaware well (assuming a 1-mile lateral) , so tighter spacing, whether 8 or 12 wells per zone per section, would be awesome. But, clearly, they need to drill 2-mile laterals to have the best chance of economic success. Chevron has expressed some interest in making a trade with Concho with their checkerboard minerals, but only if Concho trades acreage for acreage. Chevron does not want to be a 50-50 partner with Concho.

Attached is the latest Concho proposal for amending the DR lease. We've had it a while, but have been having discussions with Concho about it. Here are highlights of Concho's proposal:

1. We waive their obligation to drill a well on the 11th lease block: During the primary term, they drilled a total of 15 wells, including one 2-mile lateral. All 15 were drilled on 10 out of the 11 lease blocks – to date they haven't drilled on the 11th lease block. Under the lease as written, they'll lose the 11th lease block when the primary term expires if they don't drill on it. Since they've drilled 15 wells during the primary term, we have no problem waiving their obligation to drill on the 11th lease block.

2. Change the anniversary date of the lease from March 28 to January 1, beginning on January 1, 2018. This would essentially shorten the primary term by about 3 months. Helps them in budgeting to have a January 1 to January 1 anniversary date.

3. Remove the lease segregation clause, i.e. the lease would not split up when the primary term expires, but would stay together as a single lease.

4. Continuous development would change to a total of 16 wells in 2018, then 22 wells in 2019 and each subsequent year. Their reasoning for the 16 wells is that they really only have to commence drilling of 11 wells in 2018 under the lease the way it is currently (since the primary term is currently going to expire on March 28), so they're actually commencing more wells in 2018 under their proposal.

5. Each 2-mile lateral they drill would count as 2 continuous development wells. For example, if they drill 8 two-mile laterals in 2018, they would satisfy their 16-well continuous development obligation.

6. Banking – starting in 2019, each additional well they drill in excess of their continuous development obligation is credited to the following year. (I think they already are allowed to bank, but only for 360 days.)

We are okay with their proposal, except, listening to what they are telling us, we want them to agree to this:

In 2018, they must commence 18, not 16 wells. Beginning in 2019, the obligation increases to 24 wells per year (not 22). And, they will not get a credit of 2 obligation wells for each 2-mile lateral they drill. There's not that much benefit to the State or Wise from drilling two-mile laterals aside from the promise of increased drilling due to better economics – we think that, over time, they will probably only drill as many wells as they have to anyway because of their good success elsewhere in the Permian/Delaware Basins.

But, we are willing to give them additional credit against their continuous development obligation if they develop the ranch on tighter spacing than what the lease currently calls for: In 2018, if Concho drills at least 4 wells per zone (4 well in the Wolfcamp A, for example) per half-section, we propose that they would get a credit of 1.5 for each well drilled in the half-section against their obligation wells...and it doesn't matter whether the well is a 1-mile lateral or 2-mile lateral. For example, if they drill 4 one-mile laterals (or 4 two-mile laterals...it doesn't matter) in the Wolfcamp A wells in the W/2 of Section 2 in 2018, they get credited for 6 wells against their continuous development obligation. This means they could drill 4 wells in each of three half-sections (12 wells total) and meet their 2018 obligation of 18 wells. In 2019, and each subsequent year, they would have to drill at least 8 wells per section (or adjacent half-sections) in order to get the 1.5 to 1 credit. We are trying to reward them for developing on tighter spacing.

We'd like to take out the banking altogether. I remember you told me one time the GLO doesn't really like to agree to banking clauses.

Back in 2016, after Concho had already drilled a total of 11 wells, which met their obligation to drill during the primary term, we agreed that if Concho would drill four additional wells during the primary term, which they did, then we would allow them to pay us a reduced royalty of 22% on the production from the 4 additional wells. They represented that in order to get the budget to drill those four wells, they had to get a concession from us on the royalty rate. We want them to start paying a 25% royalty on the four additional wells effective January 1, 2018. The wells are all economic and performing well enough to justify going into development of the Wolfcamp at a minimum of 8 wells per section, so the reason for the reduced royalty rate doesn't really exist anymore.

We think we are being pretty fair with our counter proposal...and, if we don't agree to amend, then the lease will bust up into 11 separate leases on March 28, and Concho will be in a world of hurt.

Please call to discuss. They are needing us to get them a response to the attached proposal this week if possible. They just started their budgeting process for next year.

Thanks.

Bill

Wise Assets No. 8, Ltd. and
Wise Assets No. 10, Ltd.
Attention: William D. Patterson
6851 NE Loop 820, Suite 200
North Richland Hills, TX 76180

Re: Revised 7/5/17
Non-Binding Proposal Regarding Amendment of Oil and Gas Lease dated March 28, 2013

Dear Mr. Patterson:

COG Operating LLC ("***COG***"), is pleased to submit this Revised Non-Binding Proposal (the "***Proposal***") as COG's preliminary Proposal regarding the Amendment of that certain Oil and Gas Lease dated March 28, 2013 (together with all duly-executed amendments of the lease, hereinafter the "***Lease***") by and between COG and Wise Assets No. 8, Ltd. and Wise Assets No. 10, Ltd. (collectively, "***Wise Assets***"). This Proposal is intended to provide the basic framework for proceeding to negotiate a definitive agreement amending several provisions and obligations of the Lease and, therefore this Proposal shall not be binding on either Wise Assets or COG. Capitalized terms used but not defined in this Proposal are intended to have their Lease definitions.

COG herby proposes the following amendments to the Lease:

1. Lease Segregation and Earned Acreage Blocks. Currently, in accordance with the provisions of the Lease, COG has met all initial drilling obligations to maintain the Lease in full force and effect and to further develop in accordance with provision 46 of the Lease. COG is obligated to commence one additional well located in Acreage Block XI as described in paragraph 42 of the Lease, on or before March 28, 2018, in order to establish production in each of the eleven Acreage Blocks in accordance with provision 45.c. of the Lease. COG is further obligated to commence actual drilling operations of 11 additional Continuous Development wells, one on each Acreage Block, prior to September 24th 2018. COG proposes the following to address the issues described in this paragraph:

(a) waiver of COG's obligation to drill the required well to earn Acreage Block XI,

(b) removal of Acreage Blocks entirely as defined in paragraph 42, and

(c) removal of the lease segregation provision as defined in paragraph 45.c.(2).

2. Continuous Development; Yearly Well Commitment. Currently, subsequent to the 11 CDC wells required prior to September 24, 2018, pursuant to paragraph 46.a, COG is required to commence two wells per Lease Year on each Acreage Block with no more than 210 days elapsing between completion of one well and commencement of the next to maintain all of the Lease acreage, being 22 wells per year in total. To better accommodate pad drilling and full section development, COG proposes the removal of this provision 46.a entirely, to be replaced with the following yearly well commitment:

(a) Removal of the 210 days between Completion of one well and commencement of the next as required in provision 46.a; and

(b) A new yearly well commitment, as follows:

(i) Commencement of 16 obligation wells would be required in 2018.

(ii) Commencement of 22 obligation wells would be required in 2019 and each year thereafter, until the Lease is fully developed or COG along with its affiliates, successors, or assigns, decide to stop drilling in accordance with the provisions of Lease.

3. Lease Year. In order to accommodate COG and to comply with the Yearly Well Commitment as provided for in the previous provision of this letter, COG proposes to amend the Lease year to be the calendar year of January 1- December 31.

4. Extended Lateral Wells. Both COG and Wise Assets have discussed the many benefits of extended lateral wells. COG continues to negotiate with Chevron regarding the development of acreage with extended reach laterals. COG proposes that starting in 2019 any well with a horizontal displacement in excess of 9,600' measured from the first and last take point count as two obligations wells.

5. Banking of Yearly Obligation Wells. As provided for in in paragraph 46.a, the Lease currently allows COG to bank Continuous Development days. COG requests to amend this provision in accordance with the other changes in this Proposal so that, beginning in 2019, if COG completes any additional wells in excess of the required obligation wells, each additional well will be credited to the next years' required number of obligation wells.

6. Amendment and Execution by GLO. If agreeable to amend the current Lease as requested by this Proposal, Wise Assets agrees to accompany COG to the GLO in Austin and fully support the agreed-to changes and execution of a mutually agreeable Amendment of Oil and Gas Lease, which Amendment would fully restate the current Addendum portion of the Lease, so that all parties would have the full, current Addendum in one easily-accessible document.

This Proposal is only for discussion purposes and is intended only to facilitate further discussions between the parties. This Proposal is not an offer by COG that can be accepted by Wise Assets, or a binding commitment of either party. Neither this Proposal nor any discussions between the parties may create or imply a binding obligation on any party unless and until a written definitive agreement is executed by authorized representatives of COG and Wise Assets ("***Definitive Agreement***"). This Proposal is not a final or all-inclusive statement of the terms of any Definitive Agreement, and the parties acknowledge that the drafting and execution of a Definitive Agreement, if any, will require additional negotiation and deliberation. Further, the parties reserve the right to take positions of Lease interpretation inconsistent with the terms of this Proposal unless and until a Definitive Agreement is executed. As such, any description of Lease obligations in this Proposal are for discussion purposes only, and the parties agree this Proposal is a confidential and privileged compromise and settlement communication between the parties under applicable legal rules.

Wise Assets may reach COG by contacting David McElyea at 432-221-0447 to discuss in greater detail any aspect of COG's Proposal or other questions.

Best regards,

COG OPERATING LLC

MEMORANDUM

TEXAS GENERAL LAND OFFICE • GEORGE P. BUSH • COMMISSIONER

TIME SENSITIVE: Action Required by: (March 22, 2018)

DATE: **March 15, 2018**

TO: **Commissioner Bush**

FROM: **J. Daryl Morgan**

SUBJECT: **Amendment of Oil & Gas Lease for signature**

.....

SUMMARY: Attached for your signature are four originals of a Third Amendment of Oil and Gas Lease that amends the addendum to a Relinquishment Act Lease.

DETAILS: State Lease No. M-114883 ("Lease") covers 30,518.72 acres (Delaware Ranch) of Relinquishment Act Land in Culberson County, Texas. The Lease was issued March 28, 2013, by the Wise Asset Group ("Wise") as agent for the State and was recently acquired by Chevron U.S.A., Inc. ("Chevron"). The Lease is currently held by production and includes an addendum with a Continuous Development Program that has been in effect since the end of the three-year primary term. The addendum has been amended twice before. Chevron has been working with Wise and the GLO to implement a plan for development of the Delaware Ranch area, which is checker boarded with Chevron minerals. The parties have reached an agreement for pooling the area, which pooling is docketed for the April 3rd SLB meeting and this lease amendment is necessary to facilitate the pooling. Minerals leasing staff and the legal services division have reviewed the Amendment and staff recommends approval and signature by the Commissioner.

Recommendation: Please sign and return to Daryl Morgan in Energy Resources (5-9106).

THIRD AMENDMENT OF OIL AND GAS LEASE

STATE OF TEXAS §
§
COUNTY OF CULBERSON §

This Third Amendment of Oil and Gas Lease ("Amendment") dated effective as of February 6, 2018 ("Effective Date"), is made and entered into by and among **Wise Asset No. 8, Ltd.**, a Texas limited partnership, individually and as agent for the State of Texas, acting through its General Land Office ("State of Texas"), and **Wise Asset No. 10, Ltd.**, a Texas limited partnership, individually and as agent for the State of Texas, (Wise Asset No. 8, Ltd., Wise Asset No. 10, Ltd., and the State of Texas hereinafter collectively "Lessor") and **Chevron U.S.A. Inc.**, a Pennsylvania Corporation ("Lessee"). Lessor and Lessee may hereinafter be referred to collectively as the "Parties" and individually as a "Party". Capitalized terms used but not defined in this Amendment shall have the meaning ascribed to such terms(s) in the Lease (hereinafter defined).

WHEREAS, Lessor executed and delivered to COG Operating LLC, a Delaware limited liability company ("COG") that certain Oil and Gas Lease, including Addendum 1 attached thereto and made a part thereof, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease ("Lands"), and which lease is recorded in Volume 109, Page 366, of the Oil and Gas Lease Records of Culberson County, Texas ("Original Lease");

WHEREAS, the Original Lease was amended by that certain unrecorded Amendment of Oil and Gas Lease dated effective March 1, 2016 ("First Amendment") and that certain unrecorded Amendment of Oil and Gas Lease dated effective September 1, 2017 ("Second Amendment"), copies of which are in the possession of Lessor and Lessee (the Original Lease, the First Amendment, Second Amendment, and all other previous duly executed amendments and extensions of said lease hereinafter, the "Lease");

WHEREAS, the Lessee acquired the leasehold interest under the Lease from COG through a certain Asset Exchange Agreement, dated February 7, 2018, by and between COG and Lessee; and

WHEREAS, the Parties wish to amend, modify, delete, or replace certain provisions of the Lease in order to promote efficient development and maximum recovery of hydrocarbons from the Lease, as more particularly described below.

NOW THEREFORE, in consideration of the above premises, ten dollars ($10), and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged and confessed by Lessor, the Parties do hereby agree as follows:

1. Effective as of the Effective Date, "Addendum 1" attached to the Lease shall be replaced and superseded for all purposes by the "Addendum 1" attached hereto and made a part hereof.

For and in consideration of the above-described premises and consideration, Lessor does hereby ADOPT, RATIFY, and CONFIRM the Lease, as amended hereby, unto Lessee, and hereby agrees that the Lease, as amended hereby, is a valid and subsisting oil and gas lease in full force and effect as to all of the Lands, in accordance with its terms, as amended hereby. In the event of a conflict between the terms of this Amendment and the terms of the Lease, the terms of this Amendment shall control and prevail.

This Amendment may be executed in any number of counterparts, each of which may be combined and shall be considered an original for all purposes.

EXECUTED as of the date of the Parties' respective acknowledgements below, to be effective for all purposes, however, as of the Effective Date.

Expires February 28, 2022

L Bowman
Notary Public in and for the State of Texas

ADDENDUM 1

Attached to and Made a Part of Oil and Gas Lease dated March 28, 2013, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as the Lessor, to COG Operating LLC, as the Lessee

---

40. **Lease; Conflicting Provisions.** The terms set forth in the lease agreement to which this addendum is attached (i.e., the main body of the lease), including, but not limited to Paragraphs 1-39, together with the terms set forth in this addendum, including Paragraphs 40-48, comprise the lease. All references in the main body of the lease and this addendum to "this lease" or "the lease" refer to the main body of this lease, as amended, supplemented or otherwise modified by this addendum. In the event of a conflict between a term set forth in the main body of the lease and a term set forth in this addendum, then, except as otherwise expressly provided in this addendum, the conflicting provision of this addendum shall control.

41. **Definitions.** Except as otherwise expressly stated in this lease, the terms set forth below shall have the meanings ascribed thereto. A term defined in this lease, whether in this paragraph or elsewhere in this lease, shall include both the singular and the plural. RRC rules referenced herein are codified, as of the date of this lease, in Title 16, Part 1, Chapter 3 of the Texas Administrative Code.

(a) [Intentionally Omitted]

(b) "Actually Drilling" (or "actual drilling") means the penetration of the earth with a rotary rig capable of drilling, and intended to drill, to the objective depth.

(c) "Completed," when used to describe the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil and/or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged.

(d) "Continuous Development" shall have the meaning ascribed thereto in Paragraph 46.a.

(e) "Development Obligation" shall have the meaning ascribed thereto in Paragraph 46.

(f) "Gas well" shall have the meaning ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

(g) "Horizon" shall have the meaning ascribed thereto in Paragraph 46.

(h) "Horizontal Drainhole Displacement" shall have the meaning ascribed thereto as of January 1, 2018, in RRC Rule 86.

(i) "Horizontal Drainhole Well" shall have the meaning ascribed thereto in RRC Rule 86 (Title 16, Part 1, Chapter 3, Rule §86, Texas Administrative Code), as amended by applicable field rules, if any.

(j) "Oil well" shall have the definition ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

(k) "Owner" means the owner of the soil.

(l) "Producing Unit" shall have the meaning ascribed thereto in Paragraph 47.

(m) "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

(n) "RRC Rule 86" means Title 16, Part 1, Chapter 3, Section 86 of the Texas Administrative Code, as amended.

(o) "Vertical Well" means a well (defined below) other than a Horizontal Well.

(p) "Well" (or "well"), unless otherwise expressly provided in this lease, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

42. **Leased Premises.** This lease covers the following described lands located in T&P RR. Co. Survey, Culberson County, Texas:

Section	Block	Township	Gross Acres (more or less)
6	60	1	661.00
8	60	1	675.60
14	60	1	673.00
16	60	1	675.50
18	60	1	678.02
20	60	1	675.60
28	60	1	675.00
30	60	1	678.00
32	60	1	675.40
34	60	1	676.00
2	61	1	677.00
4	61	1	668.00
6	61	1	657.00

Section	Block	Township	Gross Acres (more or less)
8	61	1	692.00
10	61	1	689.00
12	61	1	691.00
14	61	1	697.50
16	61	1	691.00
18	61	1	683.00
20	61	1	692.00
22	61	1	688.70
24	61	1	690.90
26	61	1	697.50
28	61	1	691.00
30	61	1	681.90
32	61	1	693.00
34	61	1	690.00
36	61	1	692.00

8	61	2	698.00
N/2 of 10	61	2	347.50
12	61	2	697.60
20	61	2	696.60
28	61	2	685.00
30	61	2	677.00
		Total Gross Acres:	30,518.72

43. **Owner's Representation Regarding Ownership; Negation of Warranty.** Owner represents, but does not warrant (all warranties, express or implied, being hereby negated) that it owns the following interests in the leased premises (the "Surface Interests"):

(i) an undivided 75% of the surface estate in Section 30 and the S/2 SE/4 of Section 32, Block 60, Township 1, Culberson County, Texas; and

(ii) 100% of the surface estate in the remainder of the leased premises.

44. **Standards of Lessee's Conduct; Drilling and Completion of Wells.** At all times while this lease is in force, either in whole or in part, Lessee shall conduct its operations and activities, and otherwise fulfill its obligations, under this lease as would a reasonably prudent operator, in a good and workman like manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations and orders. Without limiting the foregoing, and except as otherwise agreed in writing by Owner, the State of Texas and Lessee, each well commenced by Lessee pursuant to this lease shall be drilled:

(i) in a bona fide attempt to produce oil and/or gas;

(ii) at a legal location (or locations) of Lessee's choice on the leased premises; and

(iii) with reasonable diligence through completion.

45. **Primary Term.** Notwithstanding Paragraph 2 or any other provision of this lease to the contrary, the primary term of this lease shall run from March 28, 2013, through December 31, 2017. During the primary term, the anniversary (or anniversary date) of this lease shall be deemed to have been March 28. After the primary term (including, but not limited to, January 1, 2018), the anniversary (or anniversary date) of this lease shall be deemed to be January 1.

46. **Continuous Development; Partial Expiration in Absence of Continuous Development.**

This Paragraph 46 supersedes and replaces Paragraphs 16(A) and (B) of the lease.

a. **Continuous Development.** Subject to the lease savings provisions of Paragraphs 12, 14 (as amended in this addendum), 15 and 18, if at the expiration of the primary term there are at least eleven (11) well producing or capable of producing oil and/or gas from the leased premises in paying quantities, this lease shall not terminate as to any of the leased premises but will continue in force and effect as to all of the leased premises for as long as Lessee has the right hereunder to conduct, and is actually conducting, Continuous Development. "Continuous Development" means:

(1) during 2018 only, the drilling and completion on the leased premises, on land validly pooled or unitized therewith, or on both the leased premises and land validly pooled or unitized therewith, of Horizontal Drainhole Wells having an aggregate Horizontal Drainhole Displacement of a minimum of 176,400 feet; and

(2) during 2019 and every calendar year thereafter, the drilling and completion on the leased premises, on land validly pooled or unitized therewith, or on both the leased premises and land validly pooled or unitized therewith, of Horizontal Drainhole Wells having an aggregate Horizontal Drainhole Displacement of a minimum of 294,000 feet.

The minimum aggregate Horizontal Drainhole Displacement that must be drilled and completed in 2018 or any subsequent calendar year in order to constitute Continuous Development, as provided above, is the "Development Obligation" for such year.

For purposes of Paragraphs 46.a. and 46.c.(1) only, if actual drilling of a Horizontal Drainhole Well is commenced during 2018 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Paragraph 44, it shall be deemed that the well has been drilled and completed during such calendar year, even if the well was actually drilled, in part, and/or completed, in whole or part, during the next succeeding calendar year.

Further, if:

(1) Lessee commences actual drilling of one or more Horizontal Drainhole Wells during any calendar year (the "Obligation Year") and completes such well(s) in accordance with Paragraph 44 during the next succeeding calendar year;

(2) the Horizontal Drainhole Displacement of such well(s), if completed as planned, when taken together with any other credits earned by Lessee toward its Development Obligation for the Obligation Year under Paragraphs 46.a., 46.c.(1) and 46.c.(2), would allow Lessee to achieve its Development Obligation for the Obligation Year; and

(3) due to causes not reasonably within Lessee's control (excluding economics), such wells are not completed as planned and the aggregate Horizontal Drainhole Displacement of the wells is insufficient to allow Lessee to meet its Development Obligation for the Obligation Year;

then, notwithstanding any other provision in Paragraph 46 to the contrary, this lease will not expire because Lessee failed to meet its Development Obligation for the Obligation Year due to such causes alone, and Lessee's Development Obligation for the calendar year next succeeding the Obligation Year will automatically increase by the number of feet equal to the positive difference between Lessee's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Lessee actually earned (or for which Lessee was credited) toward its Development Obligation for the Obligation Year; provided, however, the provisions of this subparagraph (beginning with the phrase "Further, if:") will not apply if the number of feet that is the positive difference between Lessee's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Lessee actually earned (or for which Lessee was credited) toward its Development Obligation for the Obligation Year is greater than 9,800 feet.

b. **Partial Expiration in Absence, or Upon Cessation, of Continuous Development.** If during 2018 or any subsequent calendar year Lessee fails to meet its Development Obligation for the year, then, effective as of the end of such year, this lease shall automatically terminate insofar as it covers the entire leased premises, save and except any Held Producing Unit. A "Held Producing Unit" means:

(1) a well producing or capable of producing oil and/or gas in paying quantities; and

(2) that portion of the leased premises situated within the geographic boundaries of the Producing Unit designated for such well, limited to those depths situated between the top of the Bell Canyon formation and the base of the deepest formation from which such well is then producing oil and/or gas, whether or not in paying quantities.

Subject to the agreements and requirements stated in subparagraphs (a) and (b) immediately below, if at such time there exists more than one Held Producing Unit, then this lease shall be automatically segregated into separate and distinct leases, each of which shall cover a single Held Producing Unit (a "Producing Unit Lease"). Each Producing Unit Lease shall be deemed to contain the same terms and provisions as those set forth in this lease, except that the leased premises subject to such Producing Unit Lease shall consist solely of the single Held Producing Unit covered thereby. Operations on and/or production from (or attributable to) one Producing Unit Lease shall not serve to maintain or otherwise affect the status of any other Producing Unit Lease.

(a) The segregation of this lease into separate Producing Unit Leases shall not create lease lines or boundary lines for purposes of the permitting of any well or take point in a Producing Unit Lease under the rules of the RRC, and the parties agree that no well or take point in a Producing Unit Lease shall be required to be permitted or re-permitted because of such segregation. However, if the permitting or re-permitting of a well or take point in a Producing Unit Lease is required because the well or take point will be nearer to a boundary of that Producing Unit Lease than the minimum lease line spacing distance under then applicable RRC rules, the parties agree to waive notice, hearing, and objection to a spacing exception permit for that well or take point with regard to that boundary.

(b) The provisions of the immediately preceding subparagraph (a) shall be binding upon the parties to this lease and their respective successors and assigns, as well

as each owner of any interest in any subsequent oil or gas lease covering all or part of the leased premises, and shall be a covenant running with the land.

c. **Credits Against Development Obligation.**

(1) **Credit for Excess Drilling.** Subject to the further provisions of this Paragraph 46.c.(1), if the aggregate Horizontal Drainhole Displacement of the Horizontal Drainhole Wells Lessee drills and completes during 2018 or any subsequent calendar year exceeds Lessee's Development Obligation for the year, Lessee shall have the right to apply the excess (i.e., the positive difference between the aggregate Horizontal Drainhole Displacement Lessee actually drilled and completed during such year and Lessee's Development Obligation for the year) as a credit toward its Development Obligation for the next succeeding calendar year ("Displacement Credit"). The aggregate Horizontal Drainhole Displacement drilled and completed by Lessee during any given calendar year shall be computed as the Horizontal Drainhole Displacement actually drilled and completed by Lessee during such year plus any Displacement Credit Lessee has the right to apply toward its Development Obligation for the year; provided, however, the maximum Displacement Credit that may be earned during any given calendar year and applied as a credit toward Lessee's Development Obligation during the next succeeding calendar year is 176,400 feet, if the credit is earned during 2018, and 294,000 feet, if the credit is earned during any subsequent calendar year.

(2) **Credit for Density Drilling.** For purposes of this lease, "Horizon" means a stratum of earth thought to contain a common accumulation of oil or gas separately producible from any other common accumulation of oil or gas. A Horizon may comprise one of several stratigraphic intervals or zones within a geologic formation or an entire formation. By way of illustration and not limitation, the Wolfcamp formation or interval may consist of four (or more) Horizons known as the Wolfcamp A, Wolfcamp B, Wolfcamp C and Wolfcamp D, and the Bone Spring formation or interval may consist of eight (or more) Horizons known as the Avalon (or Avalon formation), Charkey (or Charkey formation), the 1st, 2nd and 3rd Bone Spring Carbonates and the 1st, 2nd and 3rd Bone Spring Sands. A "Half Section" means a single legal subdivision of a section of land comprising one-half of the section.

If during any rolling 365-day time period Lessee completes Horizontal Drainhole Wells on the leased premises (or, in the event of pooling or unitization, on the leased premises and lands validly pooled or unitized therewith), having an aggregate Horizontal Drainhole Displacement within the same Horizon in any two adjacent Half Sections equal to at least 78,400 feet, then Lessee shall receive credit toward its Development Obligation equal to 25% of the aggregate Horizontal Drainhole Displacement of such wells situated within such Half Sections for the calendar year in which the completion of the last of such wells occurs. For purposes of the immediately preceding sentence, the last of such wells is the well which when completed in accordance this paragraph causes the aggregate Horizontal Drainhole Displacement for such 365-day time period to meet or exceed 78,400 feet. Two Half Sections shall be considered to be adjacent if:

(i) the wells for which credit is being given are oriented in generally a north-south direction and the eastern boundary line of one of the Half Sections is common with the western boundary line of the other Half Section; or

(ii) the wells for which credit is being given are oriented in generally an east-west direction and the northern boundary line of one of the Half Sections is common with the southern boundary line of the other Half Section.

Credit earned under this Paragraph 46.c.(2) shall be in addition to any Continuous Development credited earned under Paragraph 46.a. and any Displacement Credit earned under Paragraph 46.c.(1).

47. **Producing Units: Additional Lease Termination Events.**

a. **Producing Units.** Upon completion of any well on the leased premises as a producer of, or as a well capable of producing, oil and/or gas in paying quantities, Lessee shall dedicate to such well, in accordance with the further provisions of this Paragraph 47, a geographic area encompassing and surrounding such well (a "Producing Unit"); provided, however;

i. if the well is completed in an existing Producing Unit and under the further provisions of this Paragraph 47 the Producing Unit for such well can be the same in size and location as the existing Producing Unit, then Lessee may, but shall not be required, to dedicate the existing Producing Unit as the Producing Unit for such well; or

ii. if the well is completed in an existing Producing Unit, but under the further provisions of this Paragraph 47 the Producing Unit for such well is required or allowed to be different in size or location as the existing Producing Unit, then Lessee shall dedicate a new Producing Unit to such well in accordance with the further provisions of this paragraph.

It is understood and agreed that a Producing Unit dedicated to one well or wells may overlap with the Producing Unit dedicated to another well or wells; and in the event two or more Producing Units do overlap, each of such Producing Units shall, for all purposes of this lease, be treated as a separate and distinct Producing Unit.

On or before January 31 of each calendar year beginning in 2019, but in no event later than 45 days following the termination or partial termination of this lease, Lessee shall designate for each of the wells completed during the preceding calendar year the Producing Unit dedicated thereto by one or more written instruments, record the instruments in Culberson County, Texas, and furnish copies of the recorded instruments, with the recording information prominently displayed thereon, to Owner and the State of Texas. Each Producing Unit shall be effective as of the date of first production of oil and/or gas from the first well to which such Producing Unit was dedicated. Each Producing Unit shall conform to the spacing, density and proration provisions for such well, as permitted or prescribed in applicable RRC rules and/or orders; provided, however, no Producing Unit shall contain more than the maximum amount of acreage specified in the following tables, plus a tolerance of ten percent (10%):

VERTICAL WELLS		
Deepest Producing Formation in Producing Unit		**Maximum Size of Producing Unit (in acres)**
Top of Bell Canyon through Base of Brushy Canyon		40
Top of Bone Spring through Base of Wolfcamp		80
Top of Cisco Through Base of Morrow	If Oil Well	80
	If Gas Well	160
Below Base of Morrow	If Oil Well	160
	If Gas Well	320

HORIZONTAL DRAINHOLE WELLS		
Deepest Producing Formation in Producing Unit	**Horizontal Drainhole Displacement**	**Maximum Size of Producing Unit (in acres)**
All Formations from Top of Bell Canyon Through Base of Wolfcamp	100* – 871	40
	872 – 2,674	80
	2,675 – 4,012	120
	4,013 – 5,350	160
	5,351 – 6,688	200
	6,689 – 8,026	240
	8,027 – 9,364	280
	9,365 – 10,702	320
	10,703 – 12,040	360
	12,041 – 13,378	400
	13,379 – 14,716	440
	14,717 – 16,054	480
	for each additional 1,337-foot increment	an additional 40 acres
All Formations Below Base of Wolfcamp	100* – 871	80
	872 – 2,674	160
	2,675 – 4,012	240
	4,013 – 5,350	320
	5,351 – 6,688	400
	6,689 – 8,026	480
	8,027 – 9,364	560
	9,365 – 10,702	640

	10,703 – 12,040	720
	12,041 – 13,378	800
	13,379 – 14,716	880
	14,717 – 16,054	960
	for each additional 1,337-foot increment	an additional 80 acres
** If the distance from the first take point to the last take point is less than 100', then, for purposes of computing the maximum amount of acreage that may be included in the Producing Unit designated for such well, the well shall be deemed to be a Vertical Well.*		

Each Producing Unit shall also be as nearly in the form of a square or rectangle as is reasonably practicable, and the surface location, bottom hole, penetration point, terminus, and take point locations of the well for which such Producing Unit has been designated shall be at legal locations in, on or under such unit.

Nothing herein shall be construed as prohibiting Lessee from revising an existing Producing Unit as to the amount or configuration of acreage included therein, or other matters, provided, however, the revised Producing Unit must comply with the requirements of this provision. Lessee may revise a Producing Unit as provided herein by furnishing the State of Texas and owner of the soil with a written instrument, suitable for recording, referencing or describing the existing Producing Unit and designating the revised Producing Unit. The effective date of the revised Producing Unit shall be the date such instrument is received by the State of Texas and owner of the soil, or as otherwise agreed by the parties. Such instrument may be recorded by the State of Texas, owner of the soil or Lessee in the county or counties in which the lands comprising the revised Producing Unit are located.

Except as otherwise expressly provided in this lease or agreed in writing by the State of Texas and owner of the soil, in advance, a Producing Unit formed or revised pursuant to this provision shall never contain lands other than lands then subject to this lease. For purposes of this provision, "penetration point," "take point," "first take point," "last take point," and "terminus" shall have the meanings ascribed thereto in RRC Rule 86.

b. **Additional Lease Termination Events.** Notwithstanding any other provision of this lease to the contrary:

(1) If, after the expiration of the primary term, production of oil or gas in paying quantities from any Producing Unit, after once obtained, should cease from any cause, then, subject to the further provisions of this subparagraph b(1), the lease shall terminate insofar as it covers such Producing Unit; provided, however, the lease shall not terminate as to such Producing Unit if Lessee commences additional drilling or reworking operations on such unit within ninety (90) days after such cessation, and this lease shall remain in full force and effect as to the Producing Unit for so long as such operations continue in good faith and in workmanlike

manner without interruptions totaling more than ninety (90) days. If such drilling or reworking operations result in the production of oil or gas, the lease shall remain in full force and effect as to such Producing Unit for so long as oil or gas is produced therefrom in paying quantities or payment of shut-in oil or gas well royalties or payment of compensatory royalties is made with respect to such unit as provided herein or as provided by law. If the drilling or reworking operations result in the completion of a well as a dry hole, the lease will not terminate as to such Producing Unit if Lessee commences additional drilling or reworking operations on such unit within ninety (90) days after the completion of the well as a dry hole, and this lease shall remain in effect as to such unit so long as Lessee continues drilling or reworking operations in good faith and in a workmanlike manner without interruptions totaling more than ninety (90) days. Lessee shall give written notice to the General Land Office of any cessation of production lasting more than the applicable time period specified in this Paragraph 47.b.(1) within thirty (30) days after the expiration of such time period. In the event Lessee has drilled and completed 100 or more Horizontal Drainhole Wells on the leased premises, on lands validly pooled or unitized with the leased premises, or on both the leased premises and on lands validly pooled or unitized with the leased premises, that are producing or capable of producing oil and/or gas in paying quantities at the time this Paragraph 47.b.(1) is invoked, all references to "ninety (90) days" in this Paragraph 47.b.(1) will be replaced with "one hundred twenty (120) days". In the event Lessee has drilled and completed 200 or more Horizontal Drainhole Wells on the leased premises, on lands validly pooled or unitized with the leased premises, or on both the leased premises and on lands validly pooled or unitized with the leased premises, that are producing or capable of producing oil and/or gas in paying quantities at the time this Paragraph 47.b.(1) is invoked, all references to "ninety (90) days" in this Paragraph 47.b.(1) will be replaced with "one hundred fifty (150) days".

(2) Upon the expiration of five (5) years following the cessation of Continuous Development, if any, or January 1, 2028, whichever is the later to occur, this lease shall automatically expire as to all of the:

(i) lands within the geographic boundaries of the Held Producing Unit then covered by this lease, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Held Producing Unit is dedicated to be produced at maximum allowables; and

(ii) depths in and under such Producing Unit, save and except the depths situated between the top of the shallowest formation within such Held Producing Unit from which oil and/or gas is then being produced (whether in paying quantities or not) and the base of the deepest formation within such Held Producing Unit from which oil and/or gas is then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration oil and/or gas is not being produced, or capable of being produced, in paying quantities from such Held Producing Unit, and this lease is not being maintained in force with respect to such Held Producing Unit under another provision hereof, then this lease shall automatically terminate insofar as it covers such Held Producing Unit.

(3) Upon the expiration of ten (10) years following the cessation of Continuous Development, if any, or January 1, 2038, whichever is the later to occur, this lease shall automatically expire as to all of the:

(i) lands within the geographic boundaries of the Held Producing Unit then covered by this lease, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Held Producing Unit is dedicated to be produced at maximum allowables; and

(ii) depths in and under such Held Producing Unit, save and except each formation within such Held Producing Unit from which oil and/or gas is then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration oil and/or gas is not being produced, or capable of being produced, in paying quantities from such Held Producing Unit, and this lease is not being maintained in force with respect to such Held Producing Unit under another provision hereof, then this lease shall automatically terminate insofar as it covers such Held Producing Unit.

(4) Upon the expiration of twenty (20) years following the cessation of Continuous Development, if any, or January 1, 2048, whichever is the later to occur, this lease shall automatically expire as to all of the:

(i) lands within the geographic boundaries of the Held Producing Unit then covered by this lease, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Held Producing Unit is dedicated to be produced at maximum allowables; and

(ii) depths in and under such Held Producing Unit, save and except each Horizon within such Held Producing Unit from which oil and/or gas is then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration oil and/or gas is not being produced, or capable of being produced, in paying quantities from such Held Producing Unit, and this lease is not being maintained in force with respect to such Held Producing Unit under another provision hereof, then this lease shall automatically terminate insofar as it covers such Held Producing Unit.

48. **Miscellaneous Provisions.**

(a) **Duty to Develop.** After December 31, 2018, or the cessation of Continuous Development, if any, whichever is the later to occur, Lessee shall drill such additional well or wells in the Horizon from which oil and/or gas is being produced, or capable of being produced, in paying quantities, as would a reasonably prudent operator acting under or encountering the same or similar circumstances. Nothing in this provision shall be construed as limiting Lessee's implied duty to develop lands covered by this lease.

(b) **Meetings.** Within a reasonable time following request by Owner and/or the State of Texas, Lessee agrees to meet with Owner and the State of Texas at the Texas General Land Office, or another mutually agreeable location, to discuss its operations and activities relating to this lease, including, but not limited to, past, present and planned (or anticipated) future

operations affecting the surface and/or subsurface of the lands covered by this lease, and the results (or anticipated results) of those operations. Owner may disclose information obtained from Lessee during any such meeting with its partners, employees, contractors and consultants, but Owner shall be prohibited from disclosing, or allowing its partners, employees, contractors or consultants to disclose, Lessee's proprietary information to any other person or entity. Notwithstanding anything in this provision to the contrary, Lessee shall have no obligation to provide Owner its reserve data, geologic interpretations or other proprietary data, and Lessee shall not be required to meet with Owner more than twice per year pursuant to this provision.

(c) **No Pooling Without Consent.** Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas Natural Resources Code§§ 52.151 - 52.154, the conflicting provision of said statutes shall control. In the event pooling is allowed, Lessee shall have the right, subject to the provisions of Paragraph 47, to designate the entire pooled unit as a Producing Unit.

(d) **Information Requirements; Seismic.** Lessee agrees to promptly furnish Owner with the same information, reports and other documentation pertaining to its operations and activities under this lease that an operator is required to furnish a participating nonoperator under the terms of the A.A.PL Form 610-1989 Model Form Operating Agreement ("Operations Information"). All Operations Information furnished to Owner will be kept strictly confidential until and unless it has been made available to the general public; provided, Owner shall have the right to share the Operations Information with its partners, owners, managers, contractors and consultants to the extent, and only to the extent, necessary or convenient to analyze and file same. In the event Lessee acquires proprietary seismic data covering all or part of the leased premises, Lessee agrees to grant Owner a free license to such data (including, but not limited to, field records, and processed and reprocessed data, to the extent its license allows it to do so without charge) over the portion or portions of the leased premises covered by such data, but shall not be required to furnish Owner its interpretations of any such data. Without limiting the foregoing, Lessee further agrees as follows:

(1) Lessee shall allow Lessor and its representatives full access to all wells drilled pursuant to this lease, including, but not limited to, access to the records and reports pertaining thereto and to the derrick floor, at Lessor's sole risk and expense, and Lessor shall be furnished with samples or copies of all cores, cuttings, logs, drilling data, testing and completing data, and all other information obtained by Lessee pertaining to any well drilled hereunder. Upon request at any time, and from time to time, Lessee shall furnish Owner a current statement showing all wells that have been drilled and/or completed, or are being drilled or completed pursuant to this lease, the status of such wells, and current production information for such wells, if any, including, but not limited to, volumes, pricing and purchases.

(2) Unless and until Lessee is instructed otherwise, Lessee shall transmit all information required to be delivered to Owner pursuant to this provision or any other provision of the lease, using the contract person and information provided below.

Owner: Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd.
Owner's Designee: William D. Patterson
Physical and Mailing Address of Owner:
6851 NE Loop 820, Suite 200
North Richland Hills, TX 76180
Telephone and Fax:
(817) 577-1131 ext. 206 (Work)
(817) 228-9184 (Mobile)
(817) 503-8985 (Fax)
Email: billpatterson@petroleumlegal.com

(3) Without limiting the foregoing, Lessee agrees to deliver to Owner (or otherwise comply with) the following information and reports for each well drilled by Lessee pursuant to this lease:

(i) Notice by telephone of all proposed coring, drillstem testing, and logging in sufficient time for Owner to have a representative present.

(ii) Daily drilling, completion and initial potential test reports, and production reports for a period of at least three (3) months from the date of first production.

(iii) Daily mud logs (by email), and a print of the composite mud log.

(iv) Two field prints or preliminary prints, and two final prints of all logs run.

(v) Samples of any and all cores, if requested.

(vi) At or prior to the time actual drilling is commenced, Lessee's geologist in charge will contact Owner's designee to discuss any potential modification of the requirements under this paragraph and the necessary time requirements for notification of coring, logging, testing, etc.

(vii) Two copies of complete details of all drillstem tests taken, together with two copies of charts in bottom hole bomb.

(viii) One copy of the potential test.

(ix) One copy of completion and/or plugging report.

(x) One copy each of all other forms filed with the RRC and/or any other agency (whether state or federal).

Notwithstanding anything to the contrary above, Lessee shall never be obligated to provide reserve data, geologic interpretations or other proprietary or interpretive information. Any and all data and reports provided to Owner shall be without warranty of any kind or nature so that Lessee shall have absolutely no liability to Owner under any theory or remedy arising, directly or indirectly, from providing same and Owner stipulates and agrees that it relies upon any such data and/or records at its own risk. LESSOR SHALL FULLY INDEMNIFY AND HOLD HARMLESS LESSEE, ITS AGENTS, EMPLOYEES, CONTRACTORS, AND

SUBCONTRACTORS, AND THEIR AGENTS, EMPLOYEES AND CONTRACTORS, FROM ANY AND ALL CLAIMS AND CAUSES OF ACTION, INCLUDING CONTRACTUAL CAUSES OF ACTION, ARISING FROM OR ASSERTED BY, THROUGH OR UNDER ANY PERSON ON WELL SITES, RIG FLOORS OR OTHER LESSEE OPERATIONAL AREAS AS INVITEES OF LESSOR, INCLUDING FOR ACTS OF A DIRECT OR INDIRECT INDEMNITEE'S ORDINARY NEGLIGENCE.

(e) **Shut-in Wells.** Notwithstanding anything herein to the contrary, acreage held by shut-in royalties may not be maintained under this lease solely by the payment of shut-in royalties for any single period in excess of twelve (12) consecutive months or for more than three (3) years in the aggregate. For the sole purpose of computing the amount of shut-in royalties payable under Paragraph 14, it shall be deemed that the rental amount stipulated in Paragraph 3 is $5.00 per acre.

(f) **Assignments.** Notwithstanding any other provision of this lease to the contrary, this lease may not be assigned absent the advance written consent of Owner and the State of Texas, which consent shall not be unreasonably withheld; provided, however, this condition to assignment shall not apply to Lessee's mortgage of all or part of its interest in the lease, or to its disposition of all, or substantially all, of its assets in the Permian Basin through merger, reorganization and/or consolidation.

(g) **Releases.** If this lease expires or terminates for any cause, whether in whole or in part, Lessee shall immediately release this lease in writing as to the lands and/or depths that are no longer subject hereto; provided, however, the release of this lease, in whole or in part, shall not operate to lessen or relieve Lessee of any obligation or liability under or relating to this lease accruing prior to such expiration or termination. Lessee shall record all releases executed by it pursuant to this provision, and furnish copies thereof to Owner and the State of Texas.

(h) **Binding Effect.** The provisions of this lease shall be covenants running with the lands, and shall inure to the benefit of and be binding upon Owner, the State of Texas and Lessee, and their respective heirs, successors, assigns, representatives, directors, principals, agents, employees, contractors and subcontractors.

(i) **Surface Rights and Damages.** Simultaneously with the execution and delivery of this lease, Owner and Lessee have entered into a separate surface use and damages agreement which governing their respective rights and obligations in regard to the surface rights granted to Lessee, expressly or impliedly, herein.

Re: Unit Agreements

Dear Mr. Morgan:

Enclosed you will find the following 2 Unit Agreements:

1. Unit Agreement for the Development and operation of the Delaware Ranch, Wise Unit No. 1 – State Unit (3 Originals)
2. Unit Agreement for the Development and operation of the Delaware Ranch, Wise Unit No. 2 – State Unit (3 Originals).

Please provide 2 fully executed originals for each unit to my attention at the address below.

If there is anything further that you should require, please do not hesitate to contact Robert Endicott. Thank you very much.

Sincerely,

Brenda Guerra

Delaware Ranch, Wise Unit No. 1 - GLO Unit No. 8954
Delaware Ranch, Wise Unit No. 2 - GLO Unit No. 8956
Culberson County, Texas

Dear Ms. Guerra:

Enclosed are two originals each of the above referenced Unit Agreements that have been executed by George P. Bush, Commissioner of the Texas General Land Office ("GLO"). We have retained the other original of each Unit Agreement for our files. Please refer to the referenced GLO Unit Nos. for each Unit when filing Royalty Reports with the GLO.

Thank you for your assistance with this matter, if you have any questions or need anything further, please do not hesitate to contact me.

Sincerely,

J. Daryl Morgan, CPL

Yes	1,820 acres for a 10,000 foot lateral (FTP to LTP).

Working File Number: UPA180048

REMARKS:

- Chevron U.S.A. Inc. is requesting permanent oil and gas pooling of all depths in order to test the Wolfcamp formation.
- With Board approval of the unit the State's unit royalty participation will be 6.25%.
- The State will participate on a unitized basis from the date of first production.
- The applicant agrees to drill a total of 176,400 feet of lateral in 2018 and 294,000 feet of lateral every year thereafter or the unit will reduce in size based on the length of lateral for each well drilled.

POOLING COMMITTEE RECOMMENDATION:

The Pooling Committee recommends Board approval of a permanent oil and gas unit under the above-stated provisions.

UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 1 - STATE UNIT CULBERSON COUNTY, TEXAS

This AGREEMENT (herein "Agreement"), approved and executed by the Commissioner of the General Land Office and entered into as of the 3rd day of April, 2018, by and between the parties executing, ratifying, or consenting hereto, hereinafter the "Parties," but to be effective as of April 3, 2018 (the "Effective Date").

I. **DEFINITIONS:**

A. "Actual Drilling" (or "actual drilling") means the penetration of the earth with a rotary rig capable of drilling, and intended to drill, to the objective depth.

B. "CHEVRON" shall mean Chevron U.S.A. Inc.

C. "Commissioner" shall mean the Commissioner of the General Land Office of the State of Texas, his designee or authorized representative.

D. "Completed," when used to describe the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil and/or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged in accordance with applicable rules and regulations.

E. "Continuous Development" shall have the meaning ascribed thereto in Article V.C.1.a.

F. "Delaware Ranch Lease" means the first Lease listed in the Schedule of Leases in Exhibit A and described as that certain Oil and Gas Lease dated March 28, 2013, recorded in Volume 101, page 366, Oil and Gas Records of Culberson County, Texas, as amended, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as lessors, and COG Operating LLC, as lessee, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease, as amended by that certain Amendment of Oil and Gas Lease dated effective March 1, 2016, and that certain Second Amendment of Oil and Gas Lease dated effective September 1, 2017.

G. "Development Obligation" shall have the meaning ascribed thereto in Article V.C.1.a.

H. "Excluded Wells" shall have the meaning ascribed thereto in Article III.A.

I. "Gas well" shall have the meaning ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

J. "GLO" shall mean the General Land Office of the State of Texas.

K. "Half Section" shall have the meaning ascribed thereto in Article V.C.3.b.i.

L. "Horizon" shall have the meaning ascribed thereto in Article V.C.3.b.i.

M. "Horizontal Drainhole Well" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

N. "Horizontal Drainhole Displacement" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

O. "Leases" shall mean those oil and gas leases identified on the Schedule of Leases in Exhibit "A."

P. "Oil well" shall have the definition ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

Q. "Owner" means the owner of the soil.

R. "Participation Unit" shall have the meaning ascribed thereto in Article V.D.1.a.

S. "Plan" shall have the meaning ascribed thereto in Article 0.

T. "Retained Participation Unit" shall have the meaning ascribed thereto in Article 0.

U. "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

V. "RRC Rule 86" means Title 16, Part 1, Chapter 3, Section 86 of the Texas Administrative Code, as amended.

W. "Termination of Continuous Development" shall have the meaning ascribed thereto in Article V.C.2.a

X. "Unit Area" has the meaning ascribed thereto in Article III.A.

Y. "Unitized Substances" shall have the meaning ascribed thereto in Article III.A.

Z. "Well" (or "well"), unless otherwise expressly provided in this Agreement, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

AA. "WISE" (or "Wise") shall mean collectively Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., the Owners of the lands covered by Delaware Ranch Lease.

BB. "Wise Unit No. 2 Unit Agreement" has the meaning ascribed thereto in Article III.C.

CC. "Wise Unit No. 2 Unit Area" has the meaning ascribed thereto in Article III.C.

DD. "Working interest" means the cost-bearing interest in an oil and gas lease.

EE. "Working Interest Owners" shall mean the party or parties owning the cost-bearing portion of the leasehold estate created by each Lease and the mineral fee estate committed to this Agreement; and currently being CHEVRON.

II. AUTHORITY:

A. The Commissioner is authorized by Texas Natural Resources Code §52.151, to enter into agreements that provide for operating areas as a unit for the exploration, development and

production of oil or gas and to commit the interests of the State to same, and to take all actions set forth below in this Agreement.

B. CHEVRON is the current owner of all of the working interest in the Leases, and no other consent by a Working Interest Owner is required to commit to this Agreement all of the working interest in the Leases and lands lying within the Unit Area. CHEVRON is the current owner of all of the minerals under the land identified in Exhibit B as "Chevron Mineral Fee Tract", subject to non-participating royalty interests owned by Wise Asset No. 10, Ltd. under some or all of those tracts, as described in Exhibit B. No consent by a non-participating royalty interest owner is required to commit to this Agreement all of the non-participating royalty interests in the Chevron Mineral Fee Tracts lying within the Unit Area.

C. Each of the Leases that is a Relinquishment Act Lease, except the Delaware Ranch Lease, contains a provision that grants to CHEVRON as Lessee, or as successor Lessee, the right to pool or unitize the interest of the "Owner of the Soil" on the same terms as shall be approved by the School Land Board and Commissioner for pooling or unitizing the interests of the State in such Leases pursuant to Texas Natural Resources Code §§52.151-154, and which satisfies the requirements of §52.152. Paragraph 48.a. of the Delaware Ranch Lease provides: "Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas Natural Resources Code §§ 52.151 -52.154, the conflicting provision of said statutes shall control."

D. Execution of this Agreement is in the best interest of the State of Texas, will assure the orderly and efficient development of the Unit Area, and will prevent waste and protect the correlative rights of all affected parties.

III. UNIT AREA AND UNITIZED SUBSTANCES:

A. All of the lands described on the attached Exhibit "B" and depicted as the Wise Unit No. 1 on the plat attached as Exhibit "A-1" are hereby designated as the "Unit Area." Subject to all of the terms and conditions contained in this Agreement, all of said lands and Leases, insofar as same lie or cover lands within the Unit Area, together with all of the oil and gas in, under or that may be produced from the Unit Area (the "Unitized Substances"), are hereby consolidated and unitized.

Notwithstanding the above or any other provision of this Agreement to the contrary, the fifteen wells identified in the attached Exhibit "C," all of which were drilled and completed under the terms of the Delaware Ranch Lease before the Effective Date (the "Excluded Wells"), and the oil and gas produced from such wells, shall continue to be covered by and subject to the Delaware Ranch Lease and shall not be covered by, subject to or otherwise affected by this Agreement. The Parties agree that the exclusion of the Excluded Wells, and the production from such wells, from this Agreement does not create a lease line or property line for purposes of RRC spacing, density, or acreage assignment rules or regulation.

B. GLO and WISE hereby grant to the Unit Operator the authority to surface commingle the oil produced from the Excluded Wells or from Wise Unit No. 2 with oil produced from the Unit Area (including without limitation any Participation Unit or Retained Participation

91.014

Unit), and to surface commingle the gas produced from the Excluded Wells or from Wise Unit No. 2 with gas produced from the Unit Area (including without limitation any Participation Unit or Retained Participation Unit); provided, however, such authority shall be subject to Unit Operator's duty to allocate, for royalty purposes, the quantities of oil and gas produced from the Excluded Wells or from Wise Unit No. 2 based on monthly production tests of each of the Excluded Wells or each of the wells located on Wise Unit No. 2. GLO and WISE each agree that such authority, if exercised by Unit Operator as provided herein, satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3) and any successor rule, regulation or law.

C. This Agreement is being entered into by the Parties simultaneously and in conjunction with that certain Unit Agreement for the Development and Operation of the Delaware Ranch, Wise Unit No. 2 – State Unit, by and among the Parties and of even date herewith (the "Wise Unit No. 2 Unit Agreement"). This Agreement covers the development and operation of the Unit Area, also known as the Wise Unit No. 1, which is a portion of the Delaware Ranch Lease. The Wise Unit No. 2 Unit Agreement covers the development and operation of a certain other portion of the Delaware Ranch Lease, as described in the Wise Unit No. 2 Unit Agreement, which portion is described herein as the "Wise Unit No. 2 Unit Area". This Agreement and the Wise Unit No. 2 Unit Agreement, together, will assure the orderly and efficient development of the Delaware Ranch Lease, prevent waste, and protect the correlative rights of all affected parties.

D. The Parties agree that the separation of the Delaware Ranch Lease into the Wise Unit No. 1 and the Wise Unit No. 2 does not create a lease line or property line for purposes of RRC spacing, density, or acreage assignment rules or regulation. Notwithstanding the foregoing, with regard to any Horizontal Drainhole Well drilled on the Unit Area whose orientation runs parallel to a boundary line between the Unit Area and the Wise Unit No. 2 Unit Area (a "Parallel Well"), the Unit Operator agrees that the Parallel Well will be permitted, drilled, and completed at a location that is at least as far away from the boundary line between the Unit Area and Wise Unit No. 2 as the standard minimum perpendicular distance to lease lines specified by applicable RRC rules.

IV. UNIT OPERATOR:

A. CHEVRON is hereby designated as Unit Operator and agrees to accept the duties and obligations as Unit Operator for the exploration, development and production of Unitized Substances as herein provided, and shall have the exclusive right, privilege and duty of exercising any and all rights of the Working Interest Owners necessary or convenient for prospecting for, exploring for, producing, storing, allocating, and distributing Unitized Substances.

B. Unit Operator shall have the right to resign at any time, but such resignation shall not become effective so as to release Unit Operator from any duties or obligations of Unit Operator or terminate Unit Operator's rights hereunder occurring or accruing prior to the effective date of its resignation. Any such resignation shall not become effective until ninety (90) days after such time as notice of Unit Operator's resignation has been served upon all other Working Interest Owners, the Commissioner and Owner unless a successor Unit Operator has been selected and is qualified to act as Unit Operator. Unit Operator, upon default or failure to perform its duties, may be removed by the Working Interest Owners, and a successor Unit Operator may be selected, in the manner provided in any Unit Operating Agreement covering the Unit Area.

91.014

C. Resignation or removal of Unit Operator under this Agreement shall not terminate its right, title or interest as a Working Interest Owner or as the owner of another interest in Unitized Substances.

D. If the Unit Operator is not the sole Working Interest Owner in the Unit Area, the costs and expenses incurred by the Unit Operator in conducting Unit operations shall be paid and apportioned among and borne by the Working Interest Owners in accordance with the Unit Operating Agreement and Accounting Procedure, or other applicable agreements, covering the Unit Area, if any, among the Working Interest Owners.

V. PLAN OF DEVELOPMENT AND OPERATIONS:

A. Plan of Development. Commencing as of the Effective Date, Unit Operator will develop the Unit Area in accordance with the terms and provisions of this Article V, generally referred to as the "Plan".

B. Standards of Unit Operator's Conduct; Drilling and Completion of Wells. At all times while this Agreement is in force, either in whole or in part, Unit Operator shall conduct its operations and activities, and otherwise fulfill its obligations, under this Agreement as would a reasonably prudent operator, in a good and workmanlike manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations and orders. Without limiting the foregoing, and except as otherwise agreed in writing by WISE, GLO, and Unit Operator, each well commenced by Unit Operator pursuant to this Agreement shall be drilled:

1. in a bona fide attempt to produce oil and/or gas;

2. at a legal location (or locations) of Unit Operator's choice on the Unit Area; and

3. with reasonable diligence through completion.

C. Continuous Development; Partial Expiration in Absence of Continuous Development.

1. Continuous Development.

a. This Agreement shall continue in force and effect as to the entire Unit Area for as long as Unit Operator has the right to conduct, and is conducting, Continuous Development. "Continuous Development" means:

i. during 2018 only, the drilling and completion, subject to Article V.C.1.b, of Horizontal Drainhole Wells on the Unit Area or on the Wise Unit No. 2 Unit Area, or on both of said unit areas, having an aggregate Horizontal Drainhole Displacement of a minimum of 176,400 feet; and

ii. during every calendar year thereafter, the drilling and completion, subject to Article V.C.1.b, of Horizontal Drainhole Wells on the Unit Area or on the Wise Unit No. 2 Unit Area, or on both of said unit areas, having an aggregate Horizontal Drainhole Displacement of a minimum of 294,000 feet.

The minimum aggregate Horizontal Drainhole Displacement that must be drilled and completed in 2018 or any subsequent calendar year in order to constitute Continuous Development, as provided above, is the "Development Obligation" for such year.

b. For purposes of Articles V.C.1 and V.C.3.a only, if actual drilling of a Horizontal Drainhole Well is commenced during 2018 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Article V.B herein, it shall be deemed that the well has been drilled and completed during such calendar year, even if the well was actually drilled, in part, and/or completed, in whole or part, during the next succeeding calendar year.

Further, if:

(a) Unit Operator commences actual drilling of one or more Horizontal Drainhole Wells during any calendar year (the "Obligation Year") and completes such well(s) in accordance with Article V.B during the next succeeding calendar year;

(b) the Horizontal Drainhole Displacement of such well(s), if completed as planned, when taken together with any other credits earned by Unit Operator toward its Development Obligation for the Obligation Year under Articles V.C.1, V.C.3.a and V.C.3.b, would allow Unit Operator to achieve its Development Obligation for the Obligation Year; and

(c) due to causes not reasonably within Unit Operator's control (excluding economics), such wells are not completed as planned and the aggregate Horizontal Drainhole Displacement of the wells is insufficient to allow Unit Operator to meet its Development Obligation for the Obligation Year;

then, notwithstanding any other provision in Article V.C to the contrary, this Agreement will not terminate because Unit Operator failed to meet its Development Obligation for the Obligation Year due to such causes alone and Unit Operator's Development Obligation for the calendar year next succeeding the Obligation Year will automatically increase by the number of feet equal to the positive difference between Unit Operator's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Unit Operator actually earned (or for which Unit Operator was credited) toward its Development Obligation for the Obligation Year; provided, however, the provisions of this paragraph (beginning with the phrase "Further, if:") will not apply if the number of feet that is the positive difference between Unit Operator's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Unit Operator actually earned (or for which Unit Operator was credited) toward its Development Obligation for the Obligation Year is greater than 9,800 feet.

2. Partial Expiration in Absence or Upon Cessation of Continuous Development.

21.014

a. If during 2018 or any subsequent calendar year Unit Operator fails to meet its Development Obligation for the year, then, effective as of the end of such year (the "Termination of Continuous Development"), this Agreement shall automatically terminate insofar as it covers the entire Unit Area, save and except any Retained Participation Unit. A "Retained Participation Unit" means:

i. a well producing or capable of producing Unitized Substances in paying quantities; and

ii. that portion of the Unit Area situated within the geographic boundaries of the Participation Unit designated for such well, limited to those depths situated between the top of the Bell Canyon formation and the base of the deepest formation from which such well is then producing Unitized Substances, whether or not in paying quantities.

b. Subject to the agreements and requirements stated in subparagraphs i. and ii. immediately below, if at such time there exists more than one Retained Participation Unit, then this Agreement shall automatically be segregated into separate and distinct agreements, each of which shall cover a single Retained Participation Unit (a "Participation Unit Agreement"). Each such Participation Unit Agreement shall be deemed to contain the same terms and provisions as those set forth in this Agreement, except that the Unit Area subject to such Participation Unit Agreement shall consist solely of the single Retained Participation Unit covered thereby. Operations on and/or production from (or attributable to) the lands covered by one Participation Unit Agreement shall not serve to maintain or otherwise affect the status of any other Participation Unit Agreement. For operations on each Retained Participation Unit, Unit Operator shall retain surface and subsurface easements across or under, and rights of ingress and egress across or under, that portion of the Unit Area not included in the Retained Participation Unit for wells, production facilities, roads, pipelines, power lines, communications facilities, and otherwise necessary or useful for the purpose of producing, operating, drilling, reworking, storing, transporting, marketing, plugging and abandoning wells for oil or gas situated on the Retained Participation Unit.

i. The segregation of this Agreement into separate Participation Unit Agreements shall not create lease lines or boundary lines for purposes of the permitting of any well or take point in a Participation Unit Agreement under the rules of the RRC, and the Parties agree that no well or take point in a Participation Unit Agreement shall be required to be permitted or re-permitted because of such segregation. However, if the permitting or re-permitting of a well or take point in a Participation Unit Agreement is required because the well or take point will be nearer to a boundary of that Participation Unit Agreement than the minimum lease line spacing distance under then applicable RRC rules, the Parties agree to waive notice, hearing, and objection to

a spacing exception permit for that well or take point with regard to that boundary.

ii. The provisions of the immediately preceding subparagraph i. shall be binding upon the Parties to this Agreement and their respective successors and assigns, as well as each owner of any interest in any subsequent oil or gas lease covering all or part of the Unit Area, and shall be a covenant running with the land.

3. Credits Toward Development Obligation.

a. Credit for Excess Drilling. Subject to the further provisions of this Article 5.C.3.a., if the aggregate Horizontal Drainhole Displacement of the Horizontal Drainhole Wells Unit Operator drills and completes during 2018 or any subsequent calendar year exceeds Unit Operator's Development Obligation for the year, Unit Operator shall have the right to apply the excess (i.e., the positive difference between the aggregate Horizontal Drainhole Displacement Unit Operator actually drilled and completed during such year and Unit Operator's Development Obligation for the year) as a credit toward its Development Obligation for the next succeeding calendar year ("Displacement Credit"). The aggregate Horizontal Drainhole Displacement drilled and completed by Unit Operator during any given calendar year shall be computed as the Horizontal Drainhole Displacement actually drilled and completed by Unit Operator during such year plus any Displacement Credit Unit Operator has the right to apply toward its Development Obligation for the year; provided, however, the maximum Displacement Credit that may be earned during any given calendar year and applied as a credit toward Unit Operator's Development Obligation during the next succeeding calendar year is 176,400 feet, if the credit is earned during 2018, or 294,000 feet, if the credit is earned during any subsequent calendar year.

b. Credit for Density Drilling.

i. For purposes of this Agreement, "Horizon" means a stratum of earth thought to contain a common accumulation of oil or gas separately producible from any other common accumulation of oil or gas. A Horizon may comprise one of several stratigraphic intervals or zones within a geologic formation or an entire formation. By way of illustration and not limitation, the Wolfcamp formation or interval may consist of four (or more) Horizons known as the Wolfcamp A, Wolfcamp B, Wolfcamp C and Wolfcamp D, and the Bone Spring formation or interval may consist of eight (or more) Horizons known as the Avalon (or Avalon formation), Charkey (or Charkey formation), the 1st, 2nd and 3rd Bone Spring Carbonates and the 1st, 2nd and 3rd Bone Spring Sands. A "Half Section" means a single legal subdivision of a section of land comprising one-half of the section.

ii. If during any rolling 365-day time period Unit Operator completes Horizontal Drainhole Wells on the Unit Area having an aggregate

91.014

Horizontal Drainhole Displacement within the same Horizon in any two adjacent Half Sections equal to at least 78,400 feet, then Lessee shall receive credit toward its Development Obligation equal to 25% of the aggregate Horizontal Drainhole Displacement of such wells situated within such Half Sections for the calendar year in which the completion of the last of such wells occurs. For purposes of the immediately preceding sentence, the last of such wells is the well which when completed in accordance this paragraph causes the aggregate Horizontal Drainhole Displacement for such 365-day time period to meet or exceed 78,400 feet. Two Half Sections shall be considered to be adjacent if:

(a) the wells for which credit is being given are oriented in generally a north-south direction and the eastern boundary line of one of the Half Sections is common with the western boundary line of the other Half Section; or

(b) the wells for which credit is being given are oriented in generally an east-west direction and the northern boundary line of one of the Half Sections is common with the southern boundary line of the other Half Section.

Any credit earned under this Article V.C.3.b. shall be in addition to any Continuous Development credited earned under Section V.C.1 and any Displacement Credit earned under Article V.C.3.a.

D. Participation Units: Additional Participation Unit Termination Events.

1. Participation Units.

a. Upon completion of any well on the Unit Area as a producer of, or as a well capable of producing, Unitized Substances in paying quantities, Unit Operator shall dedicate to such well, in accordance with the further provisions of this Article V.D., a geographic area encompassing and surrounding such well (a "Participation Unit"); provided, however:

i. if the well is completed in an existing Participation Unit and under the further provisions of this Article V.D. the Participation Unit for such well can be the same in size and location as the existing Participation Unit, then Unit Operator may, but shall not be required, to dedicate the existing Participation Unit as the Participation Unit for such well; or

ii. if the well is completed in an existing Participation Unit, but under the further provisions of this Article V.D. the Participation Unit for such well is required or allowed to be different in size or location as the existing Participation Unit, then Unit Operator shall dedicate a new Participation Unit to such well in accordance with the further provisions of this Article V.D.

It is understood and agreed that a Participation Unit dedicated to one well or wells may overlap with the Participation Unit dedicated to another well or wells; and in the event two or more Participation Units do overlap, each of such Participation Units shall, for all purposes of this lease, be treated as a separate and distinct Participation Unit.

On or before January 31 of each calendar year beginning in 2019, but in no event later than 45 days following the Termination of Continuous Development or any other termination or partial termination of this Agreement, Unit Operator shall designate for each of the wells completed during the preceding calendar year the Participation Unit dedicated thereto by one or more written instruments, record the instruments in Culberson County, Texas, and furnish copies of the recorded instruments, with the recording information prominently displayed thereon, to Owner and the State of Texas.

Each Participation Unit shall be effective as of the date of first production of Unitized Substances from the first well to which such Participation Unit was dedicated. Each Participation Unit shall conform to the spacing, density and proration provisions for such well, as permitted or prescribed in applicable RRC rules and/or orders; provided, however, no Participation Unit shall contain more than the maximum amount of acreage specified in the following tables, plus a tolerance of ten percent (10%):

VERTICAL WELLS		
Deepest Producing Formation in Participation Unit		**Maximum Size of Participation Unit (in acres)**
Top of Bell Canyon through Base of Brushy Canyon		40
Top of Bone Spring through Base of Wolfcamp		80
Top of Cisco Through Base of Morrow	If Oil Well	80
	If Gas Well	160
Below Base of Morrow	If Oil Well	160
	If Gas Well	320

HORIZONTAL DRAINHOLE WELLS		
Deepest Producing Formation in Participation Unit	**Horizontal Drainhole Displacement**	**Maximum Size of Participation Unit (in acres)**
All Formations from Top of Bell Canyon Through Base of Wolfcamp	100* – 871	40
	872 – 2,674	80
	2,675 – 4,012	120

91.01.4

	4,013 – 5,350	160
	5,351 – 6,688	200
	6,689 – 8,026	240
	8,027 – 9,364	280
	9,365 – 10,702	320
	10,703 – 12,040	360
	12,041 – 13,378	400
	13,379 – 14,716	440
	14,717 – 16,054	480
	for each additional 1,337-foot increment	an additional 40 acres
All Formations Below Base of Wolfcamp	100* – 871	80
	872 – 2,674	160
	2,675 – 4,012	240
	4,013 – 5,350	320
	5,351 – 6,688	400
	6,689 – 8,026	480
	8,027 – 9,364	560
	9,365 – 10,702	640
	10,703 – 12,040	720
	12,041 – 13,378	800
	13,379 – 14,716	880
	14,717 – 16,054	960
	for each additional 1,337-foot increment	an additional 80 acres
** If the distance from the first take point to the last take point is less than 100', then, for purposes of computing the maximum amount of acreage that may be included in the Participation Unit designated for such well, the well shall be deemed to be a Vertical Well.*		

b. Each Participation Unit shall also be as nearly in the form of a square or rectangle as is reasonably practicable, and the take point locations of the well or wells to which such Participation Unit has been dedicated shall be at legal locations in, on or under such Participation Unit. GLO, any Parties ratifying this Agreement and, subject to that certain Surface Use Agreement dated effective June 20, 2013, between CHEVRON and Wise, as amended (the "Chevron/Wise SUA"), WISE authorize and consent to

the development of the Unit Area utilizing Horizontal Drainhole Wells, offsite tract surface locations and offsite tract penetration points for wells on any Participation Unit or Retained Participation Unit, as permitted by Ford, West (Wolfcamp) Field Rule No. 2 issued in Texas Railroad Commission Oil and Gas Docket No. 08-0297138 on January 12, 2016, by RRC Rule 86, subsection (g), by other applicable field rules or laws, or by any successor rule, regulation or law. "Penetration point" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

c. Nothing herein shall be construed as prohibiting Unit Operator from revising an existing Participation Unit as to the amount or configuration of acreage included therein, or other matters; provided, however, the revised Participation Unit must comply with the requirements of this Article V.D. Unit Operator may revise a Participation Unit as provided herein by recording in Culberson County, Texas, a written instrument referencing or describing the existing Participation Unit, and the well or wells to which such Participation Unit is dedicated, and describing the revised Participation Unit, and furnishing the GLO and Wise with a copy of the recorded instrument, with the recording information prominently displayed thereon. The effective date of the revised Participation Unit shall be the date such instrument is received by the GLO and Wise, or as otherwise agreed by the Parties. The provisions of this paragraph apply also to Retained Participation Units after Termination of Continuous Development.

d. Except as otherwise expressly provided in this Agreement or agreed in writing by the GLO and Wise, in advance, a Participation Unit or Retained Participation Unit formed or revised pursuant to this provision shall never contain lands other than lands in the Unit Area; provided, however, at Unit Operator's option, which must be exercised reasonably and in good faith, a Participation Unit may consist of lands situated partially in the Unit Area and partially in the Wise Unit No. 2 Unit Area.

2. Retained Participation Unit Termination Events. Notwithstanding any other provision of this Agreement to the contrary:

a. If at any time after the Termination of Continuous Development production of Unitized Substances in paying quantities from any Retained Participation Unit, after once obtained, should cease from any cause, then, subject to the further provisions of this Article V.D.2.a., this Agreement shall automatically terminate insofar as it covers such Participation Unit; provided, however, this Agreement shall not terminate as to such unit if Unit Operator commences additional drilling or reworking operations on the Retained Participation Unit within ninety (90) days after such cessation, and this Agreement shall remain in full force and effect as to the Retained Participation Unit for so long as Unit Operator conducts such operations in accordance with the standards contained in Article V.B without interruptions totaling more than ninety (90) days. If such drilling or reworking operations result in the production of oil or gas in paying quantities, then this Agreement shall remain in full force and effect as to such Retained Participation Unit for so long as oil or gas is produced

therefrom in paying quantities or payment of shut-in oil or gas well royalties or payment of compensatory royalties is made with respect to such Retained Participation Unit as provided in the Delaware Ranch Lease or as provided by law. If the drilling or reworking operations result in the completion of a well as a dry hole, this Agreement will not terminate as to such Retained Participation Unit if Unit Operator commences additional drilling or reworking operations on such unit within ninety (90) days after the completion of the well as a dry hole, and this Agreement shall remain in effect as to such Retained Participation Unit for as long as Unit Operator continues drilling or reworking operations in accordance with the standards contained in Article V.B without interruptions totaling more than ninety (90) days. Unit Operator shall give written notice to the GLO and Wise within thirty (30) days of any cessation of production lasting more than the applicable time period specified in this Article V.B.2.a. within thirty (30) days after the expiration of such time period. In the event Unit Operator has drilled and completed 100 or more Horizontal Drainhole Wells on the Unit Area or Wise Unit No. 2 Unit Area, or on both of said unit areas, that are producing or capable of producing Unitized Substances in paying quantities at the time this Article V.B.2.a. is invoked, all references to "ninety (90) days" in this Article V.B.2.a. will be replaced with "one hundred twenty (120) days". In the event Unit Operator has drilled and completed 200 or more Horizontal Drainhole Wells on the Unit Area or Wise Unit No. 2 Unit Area, or on both of said unit areas, that are producing or capable of producing Unitized Substances in paying quantities at the time this Article V.B.2.a. is invoked, all references to "ninety (90) days" in this Article V.B.2.a. will be replaced with "one hundred fifty (150) days".

b. Upon the expiration of five (5) years following the Termination of Continuous Development, if any, or January 1, 2028, whichever is later to occur, this Agreement shall automatically expire as to all of the:

   i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Retained Participation Unit is dedicated to be produced at maximum allowables; and

   ii. depths in and under such Retained Participation Unit, save and except the depths situated between the top of the shallowest formation within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not) and the base of the deepest formation within such Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically

91.014

terminate insofar as it covers such Retained Participation Unit.

c. Upon the expiration of ten (10) years following the Termination of Continuous Development, if any, or January 1, 2038, whichever is later to occur, this Agreement shall automatically expire as to all of the:

i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except each formation within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

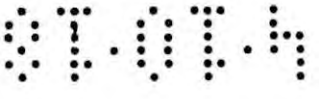
d. Upon the expiration of twenty (20) years following the Termination of Continuous Development, if any, or January 1, 2048, whichever is later to occur, this Agreement shall automatically expire as to all of the:

i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Retained Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except each Horizon within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

E. Pursuant to the consolidation and unitization of the lands and Leases in Article III of this Agreement and the creation of the Wise Unit No. 2, and subject to the provisions of the Chevron/Wise SUA, Unit Operator may develop the Unit Area utilizing Horizontal Drainhole Wells, offsite tract surface locations, or offsite tract penetration points drilled in,



under, or between the lands and Leases identified in Exhibits "A" and "B" or drilled in, under, or between the lands and Leases located in the Unit Area or in the Wise Unit No. 2, as permitted by Ford, West (Wolfcamp) Field Rule No. 2 issued in Texas Railroad Commission Oil and Gas Docket No. 08-0297138 on January 12, 2016, by 16 Tex. Admin. Code §3.86(g), by other applicable field rules, or by any successor rule, regulation or law.

F. Unit Operator shall conduct all of its activities hereunder as would a reasonable prudent operator under all of the relevant facts and circumstances to the end that the Unit Area shall be fully developed in accordance with all of the terms and conditions of this Agreement.

VI. TERM AND TERMINATION:

A. Subject to the Commissioner's approval, this Agreement shall be effective upon the Effective Date, and shall continue in force and effect as provided above. Unit Operator, together with Working Interest Owners owning not less than 75% of the working interest in the Unit Area on an acreage basis, may voluntarily terminate this Agreement as to all or any portion of the Unit Area, save and except any lands and depths comprising a Participation Unit or Retained Participation Unit that is dedicated to a well from which oil and/or gas is then being produced, or capable of being produced, in paying quantities, upon sixty (60) days advance written notice to the Commissioner. Termination of this Agreement, in whole or part, shall not relieve Unit Operator or the non-operating Working Interest Owners of any obligations, including without limitation plugging any well in accordance with the requirements of the Lease or applicable law, that may have accrued prior to the date of such termination.

B. Should this Agreement terminate in whole or part for any cause, the Leases and any other contracts affecting the lands within the Unit Area, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under such Leases or contracts and such production had ceased on the date of such termination or partial termination of this Agreement.

VII. ALLOCATION OF PRODUCTION:

A. Unit Area Wells. Subject to Article VII.B below, all unitized substances produced from the Unit Area, and from any Retained Participation Units subsequent to Termination of Continuous Development, shall be allocated to the below-listed owners, and all proceeds of such production and the royalties thereon shall be paid to the owners in the following proportions:

CHEVRON	86.052567%
GLO	06.251856%
WISE ASSET NO. 8, LTD.	06.013533%
WISE ASSET NO. 10, LTD.	01.630843%
Stephen Neil Prewitt	00.025601%
John Collins Prewitt	00.025601%

In addition to the surface commingling authorized under Article III.B, the GLO and WISE hereby grant Unit Operator the authority to surface commingle Unitized Substances produced solely from the Unit Area, including any Retained Participation Unit, or any

Participation Unit, and GLO and WISE agree that such authorization satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3), and any successor rule, regulation or law.

B. Unit Crossing Wells. The Unit Operator is hereby authorized to drill Horizontal Drainhole Wells across the boundary lines between the Unit Area and the Wise Unit No. 2 Unit Area ("Unit-Crossing Wells"). Each such unit area will be deemed to have produced a portion of the oil and gas produced from a Unit-Crossing Well on the basis of an allocation factor. For the Unit Area, the allocation factor is a fraction, the numerator of which is equal to the length of the Horizontal Drainhole Displacement of the Unit-Crossing Well that lies under the Unit Area and the denominator of which is equal to the total length of the Horizontal Drainhole Displacement of the Unit-Crossing Well. Likewise, for the Wise Unit No. 2 Unit Area, the allocation factor is a fraction, the numerator of which is equal to the length of the Horizontal Drainhole Displacement of the Unit-Crossing Well that lies under the Wise Unit No. 2 Unit Area and the denominator of which is the total length of the Horizontal Drainhole Displacement of the Unit-Crossing Well. Each owner in the Unit Area and the Wise Unit No. 2 Unit Area will receive its proportionate share, as described in the respective Agreement or Wise Unit No. 2 Unit Agreement, of the production or proceeds from a Unit-Crossing Well based upon the applicable allocation formula, as provided above.

C. Production in Kind. Nothing contained in this Agreement shall be construed to alter any person's or Party's right to take its allocated share of oil or gas production in kind. Royalties payable to the State of Texas and Owners on allocated production shall be computed and paid in the time and manner provided for in the Leases.

VIII. MINIMUM ROYALTY, COMPENSATORY ROYALTY AND DUTY TO PROTECT FROM DRAINAGE:

A. Any minimum royalties that become due under any of the Leases shall be computed and paid in accordance with the terms of such Lease, and nothing in this Agreement shall operate to relieve the lessee or lessees under such Lease from the obligation to pay such minimum royalty as provided therein.

B. The drilling and completion of a well within the Unit Area pursuant to this Agreement, or on both the Unit Area and the Wise Unit No. 2 Unit Area pursuant to this Agreement and the Wise Unit No. 2 Unit Agreement, shall not obligate the lessee under any express or implied provision of any of the Leases to drill an offset well, pay compensatory royalty or otherwise protect the lands covered by such Lease from drainage; however, nothing in this Agreement shall relieve Operator from protecting lands within the Unit Area, as would a reasonably prudent operator, from drainage occurring from wells on lands, other than lands then subject to the Wise Unit No. 2 Unit Agreement, situated outside the Unit Area.

IX. LEASES EXTENDED AND CONFORMED:

A. The terms and provisions of all Leases and any other contracts relating to exploration, drilling, development or operation for Unitized Substances on lands committed to this Agreement are hereby expressly modified and amended to the extent, and only to the extent, necessary to make them conform to the provisions hereof, but such Leases and contracts, if any, shall otherwise remain in force and effect subject to and in accordance with their terms; and the Commissioner by his approval hereof does hereby establish, alter,

or change the drilling, producing and royalty requirements of the Leases committed hereto to the extent, and only to the extent, necessary to conform said requirements to the provisions of this Agreement. Notwithstanding the provisions of this Article IX.A, the termination or partial termination of this Agreement alone will not in any way effect a similar, or any, termination or partial termination of any of the Leases, and the Leases are not modified or amended to effect such a termination or partial termination. Despite the termination or partial termination of this Agreement, the Leases will continue in full force and effect, or expire or terminate in whole or part, subject to and in accordance with their respective terms and in accordance with Article VI.B.

B. Prior to the Termination of Continuous Development, drilling operations on and/or production of Unitized Substances from any tract of land covered by this Agreement will be deemed to be drilling operations on and/or production of Unitized Substances from all of the tracts comprising the Unit Area, and no Lease shall be deemed to have expired by reason of the lessee's failure to conduct any such operations on, or produce Unitized Substances from, any of the lands covered by such Lease.

C. From and after the Termination of Continuous Development or any other partial termination of this Agreement, and notwithstanding any other provision of this Agreement to the contrary, each of the Leases may be maintained in force as to lands and depths that are not subject to this Agreement only as provided in such Leases without regard to operations on or production pursuant to this Agreement; and neither operations on nor production from the lands and depths subject to this Agreement, nor the payment of shut-in royalties from a well drilled pursuant to this Agreement, shall serve to maintain any of the Leases in force as to any lands or depths that are not subject to this Agreement, regardless of whether the production or operations on the Unit Area, or the well for which shut-in royalties are being paid, are actually located on such Lease or not.

X. GENERAL:

A. Notices. All notices, demands, or communications required hereunder shall be in writing and shall be delivered by certified mail, commercial courier, personal delivery, or facsimile, to the receiving party at its address listed under its signature line below. Parties may change their address of record on thirty (30) days advance written notice.

B. Force Majeure. If, after good faith effort and the exercise of due care and diligence Unit Operator is prevented from complying with any covenant or obligation to conduct drilling operations on or produce Unitized Substances from the lands covered by this Agreement by reason of war, rebellion, riots, strikes, acts of God, or any valid order, rule or regulation of government authority, then while so prevented, Unit Operator's obligation to comply with such covenant or obligation shall be suspended and Unit Operator shall not be liable for damages for failure to comply therewith; provided, however, nothing in this provision shall suspend any financial obligations.

C. Covenants run with the land. The covenants herein shall be construed to be covenants running with the land with respect to the interests of the Parties, their successors or assigns, and any grant, transfer or conveyance of an interest in any land or Lease subject to this Agreement shall be and is hereby conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, assignee, or other successor in interest.

D. Counterparts. This Agreement may be executed in any number of counterparties, none of which

need be executed by all Parties, or may be ratified or consented to by separate written instrument specifically referring hereto, and shall be binding upon all parties who have executed a counterpart, ratification or consent to this Agreement, with the same force and effect as if all such parties had signed the same document.

E. Wise execution. Wise, as Owner under the Delaware Ranch Lease, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

F. Exhibits. All exhibits attached to this Agreement are made a part hereof.

[Remainder of page intentionally left blank]

XI. EXECUTION:

IN WITNESS WHEREOF, this Agreement is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

Yes	1,820 acres for a 10,000 foot lateral (FTP to LTP).

Working File Number: UPA180050

REMARKS:

- Chevron U.S.A. Inc. is requesting permanent oil and gas pooling of all depths in order to test the Wolfcamp formation.
- With Board approval of the unit the State's unit royalty participation will be 6.25%.
- The State will participate on a unitized basis from the date of first production.
- The applicant agrees to drill a total of 176,400 feet of lateral in 2018 and 294,000 feet of lateral every year thereafter or the unit will reduce in size based on the length of lateral for each well drilled.

POOLING COMMITTEE RECOMMENDATION:

The Pooling Committee recommends Board approval of a permanent oil and gas unit under the above-stated provisions.

UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 2 - STATE UNIT CULBERSON COUNTY, TEXAS

This AGREEMENT (herein "Agreement"), approved and executed by the Commissioner of the General Land Office and entered into as of the 3rd day of April, 2018, by and between the parties executing, ratifying, or consenting hereto, hereinafter the "Parties," but to be effective as of April 3, 2018 (the "Effective Date").

I. **DEFINITIONS:**

A. "Actual Drilling" (or "actual drilling") means the penetration of the earth with a rotary rig capable of drilling, and intended to drill, to the objective depth.

B. "CHEVRON" shall mean Chevron U.S.A. Inc.

C. "Commissioner" shall mean the Commissioner of the General Land Office of the State of Texas, his designee or authorized representative.

D. "Completed," when used to describe the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil and/or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged in accordance with applicable rules and regulations.

E. "Continuous Development" shall have the meaning ascribed thereto in Article V.C.1.a.

F. "Delaware Ranch Lease" means the first Lease listed in the Schedule of Leases in Exhibit A and described as that certain Oil and Gas Lease dated March 28, 2013, recorded in Volume 101, page 366, Oil and Gas Records of Culberson County, Texas, as amended, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as lessors, and COG Operating LLC, as lessee, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease, as amended by that certain Amendment of Oil and Gas Lease dated effective March 1, 2016, and that certain Second Amendment of Oil and Gas Lease dated effective September 1, 2017.

G. "Development Obligation" shall have the meaning ascribed thereto in Article V.C.1.a.

H. "Gas well" shall have the meaning ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

I. "GLO" shall mean the General Land Office of the State of Texas.

J. "Half Section" shall have the meaning ascribed thereto in Article V.C.3.b.i.

K. "Horizon" shall have the meaning ascribed thereto in Article V.C.3.b.i.

L. "Horizontal Drainhole Well" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

M. "Horizontal Drainhole Displacement" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

N. "Leases" shall mean those oil and gas leases identified on the Schedule of Leases in Exhibit "A."

O. "Oil well" shall have the definition ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

P. "Owner" means the owner of the soil.

Q. "Participation Unit" shall have the meaning ascribed thereto in Article V.D.1.a.

R. "Plan" shall have the meaning ascribed thereto in Article 0.

S. "Retained Participation Unit" shall have the meaning ascribed thereto in Article 0.

T. "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

U. "RRC Rule 86" means Title 16, Part 1, Chapter 3, Section 86 of the Texas Administrative Code, as amended.

V. "Termination of Continuous Development" shall have the meaning ascribed thereto in Article V.C.2.a

W. "Unit Area" has the meaning ascribed thereto in Article III.A.

X. "Unitized Substances" shall have the meaning ascribed thereto in Article III.A.

Y. "Well" (or "well"), unless otherwise expressly provided in this Agreement, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

Z. "WISE" (or "Wise") shall mean collectively Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., the Owners of the lands covered by Delaware Ranch Lease.

AA. "Wise Unit No. 1 Unit Agreement" has the meaning ascribed thereto in Article III.C.

BB. "Wise Unit No. 1 Unit Area" has the meaning ascribed thereto in Article III.C.

CC. "Working interest" means the cost-bearing interest in an oil and gas lease.

DD. "Working Interest Owners" shall mean the party or parties owning the cost-bearing portion of the leasehold estate created by each Lease and the mineral fee estate committed to this Agreement; and currently being CHEVRON.

II. AUTHORITY:

A. The Commissioner is authorized by Texas Natural Resources Code §52.151, to enter into agreements that provide for operating areas as a unit for the exploration, development and production of oil or gas and to commit the interests of the State to same, and to take all actions set forth below in this Agreement.

B. CHEVRON is the current owner of all of the working interest in the Leases, and no other consent by a Working Interest Owner is required to commit to this Agreement all of the working interest in the Leases and lands lying within the Unit Area. CHEVRON is the current owner of all of the minerals under the land identified in Exhibit B as "Chevron Mineral Fee Tract", subject to non-participating royalty interests owned by Wise Asset No. 10, Ltd. under some or all of those tracts, as described in Exhibit B. No consent by a non-participating royalty interest owner is required to commit to this Agreement all of the non-participating royalty interests in the Chevron Mineral Fee Tracts lying within the Unit Area.

C. Each of the Leases that is a Relinquishment Act Lease, except the Delaware Ranch Lease, contains a provision that grants to CHEVRON as Lessee, or as successor Lessee, the right to pool or unitize the interest of the "Owner of the Soil" on the same terms as shall be approved by the School Land Board and Commissioner for pooling or unitizing the interests of the State in such Leases pursuant to Texas Natural Resources Code §§52.151-154, and which satisfies the requirements of §52.152. Paragraph 48.a. of the Delaware Ranch Lease provides: "Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas Natural Resources Code §§ 52.151 -52.154, the conflicting provision of said statutes shall control."

D. Execution of this Agreement is in the best interest of the State of Texas, will assure the orderly and efficient development of the Unit Area, and will prevent waste and protect the correlative rights of all affected parties.

III. UNIT AREA AND UNITIZED SUBSTANCES:

A. All of the lands described on the attached Exhibit "B" and depicted as the Wise Unit No. 2 on the plat attached as Exhibit "A-1" are hereby designated as the "Unit Area." Subject to all of the terms and conditions contained in this Agreement, all of said lands and Leases, insofar as same lie or cover lands within the Unit Area, together with all of the oil and gas in, under or that may be produced from the Unit Area (the "Unitized Substances"), are hereby consolidated and unitized.

B. GLO and WISE hereby grant to the Unit Operator the authority to surface commingle the oil produced from Wise Unit No. 1 or any oil that has been validly surface commingled with oil produced from Wise Unit No. 1 with oil produced from the Unit Area (including without limitation any Participation Unit or Retained Participation Unit), and to surface commingle the gas produced from Wise Unit No. 1 or any gas that has been validly surface commingled with gas produced from Wise Unit No. 1 with gas produced from the Unit Area (including without limitation any Participation Unit or Retained Participation Unit); provided, however, such authority shall be subject to Unit Operator's duty to allocate, for royalty purposes, the quantities of oil and gas produced from Wise Unit No. 1 or oil and gas that has been validly surface commingled with oil and gas produced from Wise Unit No. 1 based on monthly production tests of each of the wells located on Wise Unit No. 1 or the wells from which oil and gas has been validly surface commingled with oil and gas produced from Wise Unit No. 1. GLO and WISE each agree that such authority, if exercised by Unit Operator as provided herein, satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3) and any successor rule, regulation or law.

91.014

C. This Agreement is being entered into by the Parties simultaneously and in conjunction with that certain Unit Agreement for the Development and Operation of the Delaware Ranch, Wise Unit No. 1 – State Unit, by and among the Parties and of even date herewith (the "Wise Unit No. 1 Unit Agreement"). This Agreement covers the development and operation of the Unit Area, also known as the Wise Unit No. 2, which is a portion of the Delaware Ranch Lease. The Wise Unit No. 1 Unit Agreement covers the development and operation of a certain other portion of the Delaware Ranch Lease, as described in the Wise Unit No. 1 Unit Agreement, which portion is described herein as the "Wise Unit No. 1 Unit Area". This Agreement and the Wise Unit No. 1 Unit Agreement, together, will assure the orderly and efficient development of the Delaware Ranch Lease, prevent waste, and protect the correlative rights of all affected parties.

D. The Parties agree that the separation of the Delaware Ranch Lease into the Wise Unit No. 1 and the Wise Unit No. 2 does not create a lease line or property line for purposes of RRC spacing, density, or acreage assignment rules or regulation. Notwithstanding the foregoing, with regard to any Horizontal Drainhole Well drilled on the Unit Area whose orientation runs parallel to a boundary line between the Unit Area and the Wise Unit No. 1 Unit Area (a "Parallel Well"), the Unit Operator agrees that the Parallel Well will be permitted, drilled, and completed at a location that is at least as far away from the boundary line between the Unit Area and Wise Unit No. 1 as the standard minimum perpendicular distance to lease lines specified by applicable RRC rules.

IV. UNIT OPERATOR:

A. CHEVRON is hereby designated as Unit Operator and agrees to accept the duties and obligations as Unit Operator for the exploration, development and production of Unitized Substances as herein provided, and shall have the exclusive right, privilege and duty of exercising any and all rights of the Working Interest Owners necessary or convenient for prospecting for, exploring for, producing, storing, allocating, and distributing Unitized Substances.

B. Unit Operator shall have the right to resign at any time, but such resignation shall not become effective so as to release Unit Operator from any duties or obligations of Unit Operator or terminate Unit Operator's rights hereunder occurring or accruing prior to the effective date of its resignation. Any such resignation shall not become effective until ninety (90) days after such time as notice of Unit Operator's resignation has been served upon all other Working Interest Owners, the Commissioner and Owner unless a successor Unit Operator has been selected and is qualified to act as Unit Operator. Unit Operator, upon default or failure to perform its duties, may be removed by the Working Interest Owners, and a successor Unit Operator may be selected, in the manner provided in any Unit Operating Agreement covering the Unit Area.

C. Resignation or removal of Unit Operator under this Agreement shall not terminate its right, title or interest as a Working Interest Owner or as the owner of another interest in Unitized Substances.

D. If the Unit Operator is not the sole Working Interest Owner in the Unit Area, the costs and expenses incurred by the Unit Operator in conducting Unit operations shall be paid and apportioned among and borne by the Working Interest Owners in accordance with the Unit Operating Agreement and Accounting Procedure, or other applicable agreements, covering the Unit Area, if any, among the Working Interest Owners.

V. PLAN OF DEVELOPMENT AND OPERATIONS:

A. Plan of Development. Commencing as of the Effective Date, Unit Operator will develop the Unit Area in accordance with the terms and provisions of this Article V, generally referred to as the "Plan".

B. Standards of Unit Operator's Conduct; Drilling and Completion of Wells. At all times while this Agreement is in force, either in whole or in part, Unit Operator shall conduct its operations and activities, and otherwise fulfill its obligations, under this Agreement as would a reasonably prudent operator, in a good and workmanlike manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations and orders. Without limiting the foregoing, and except as otherwise agreed in writing by WISE, GLO, and Unit Operator, each well commenced by Unit Operator pursuant to this Agreement shall be drilled:

1. in a bona fide attempt to produce oil and/or gas;

2. at a legal location (or locations) of Unit Operator's choice on the Unit Area; and

3. with reasonable diligence through completion.

C. Continuous Development; Partial Expiration in Absence of Continuous Development.

1. Continuous Development.

a. This Agreement shall continue in force and effect as to the entire Unit Area for as long as Unit Operator has the right to conduct, and is conducting, Continuous Development. "Continuous Development" means:

i. during 2018 only, the drilling and completion, subject to Article V.C.1.b, of Horizontal Drainhole Wells on the Unit Area or on the Wise Unit No. 1 Unit Area, or on both of said unit areas, having an aggregate Horizontal Drainhole Displacement of a minimum of 176,400 feet; and

ii. during every calendar year thereafter, the drilling and completion, subject to Article V.C.1.b, of Horizontal Drainhole Wells on the Unit Area or on the Wise Unit No. 1 Unit Area, or on both of said unit areas, having an aggregate Horizontal Drainhole Displacement of a minimum of 294,000 feet.

The minimum aggregate Horizontal Drainhole Displacement that must be drilled and completed in 2018 or any subsequent calendar year in order to constitute Continuous Development, as provided above, is the "Development Obligation" for such year.

b. For purposes of Articles V.C.1 and V.C.3.a only, if actual drilling of a Horizontal Drainhole Well is commenced during 2018 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Article V.B herein, it shall be deemed that the well has

been drilled and completed during such calendar year, even if the well was actually drilled, in part, and/or completed, in whole or part, during the next succeeding calendar year.

Further, if:

(a) Unit Operator commences actual drilling of one or more Horizontal Drainhole Wells during any calendar year (the "Obligation Year") and completes such well(s) in accordance with Article V.B during the next succeeding calendar year;

(b) the Horizontal Drainhole Displacement of such well(s), if completed as planned, when taken together with any other credits earned by Unit Operator toward its Development Obligation for the Obligation Year under Articles V.C.1, V.C.3.a and V.C.3.b, would allow Unit Operator to achieve its Development Obligation for the Obligation Year; and

(c) due to causes not reasonably within Unit Operator's control (excluding economics), such wells are not completed as planned and the aggregate Horizontal Drainhole Displacement of the wells is insufficient to allow Unit Operator to meet its Development Obligation for the Obligation Year;

then, notwithstanding any other provision in Article V.C to the contrary, this Agreement will not terminate because Unit Operator failed to meet its Development Obligation for the Obligation Year due to such causes alone and Unit Operator's Development Obligation for the calendar year next succeeding the Obligation Year will automatically increase by the number of feet equal to the positive difference between Unit Operator's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Unit Operator actually earned (or for which Unit Operator was credited) toward its Development Obligation for the Obligation Year; provided, however, the provisions of this paragraph (beginning with the phrase "Further, if:") will not apply if the number of feet that is the positive difference between Unit Operator's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Unit Operator actually earned (or for which Unit Operator was credited) toward its Development Obligation for the Obligation Year is greater than 9,800 feet.

2. Partial Expiration in Absence or Upon Cessation of Continuous Development.

a. If during 2018 or any subsequent calendar year Unit Operator fails to meet its Development Obligation for the year, then, effective as of the end of such year (the "Termination of Continuous Development"), this Agreement shall automatically terminate insofar as it covers the entire Unit Area, save and except any Retained Participation Unit. A "Retained Participation Unit" means:

i. a well producing or capable of producing Unitized Substances in

paying quantities; and

ii. that portion of the Unit Area situated within the geographic boundaries of the Participation Unit designated for such well, limited to those depths situated between the top of the Bell Canyon formation and the base of the deepest formation from which such well is then producing Unitized Substances, whether or not in paying quantities.

b. Subject to the agreements and requirements stated in subparagraphs i. and ii. immediately below, if at such time there exists more than one Retained Participation Unit, then this Agreement shall automatically be segregated into separate and distinct agreements, each of which shall cover a single Retained Participation Unit (a "Participation Unit Agreement"). Each such Participation Unit Agreement shall be deemed to contain the same terms and provisions as those set forth in this Agreement, except that the Unit Area subject to such Participation Unit Agreement shall consist solely of the single Retained Participation Unit covered thereby. Operations on and/or production from (or attributable to) the lands covered by one Participation Unit Agreement shall not serve to maintain or otherwise affect the status of any other Participation Unit Agreement. For operations on each Retained Participation Unit, Unit Operator shall retain surface and subsurface easements across or under, and rights of ingress and egress across or under, that portion of the Unit Area not included in the Retained Participation Unit for wells, production facilities, roads, pipelines, power lines, communications facilities, and otherwise necessary or useful for the purpose of producing, operating, drilling, reworking, storing, transporting, marketing, plugging and abandoning wells for oil or gas situated on the Retained Participation Unit.

i. The segregation of this Agreement into separate Participation Unit Agreements shall not create lease lines or boundary lines for purposes of the permitting of any well or take point in a Participation Unit Agreement under the rules of the RRC, and the Parties agree that no well or take point in a Participation Unit Agreement shall be required to be permitted or re-permitted because of such segregation. However, if the permitting or re-permitting of a well or take point in a Participation Unit Agreement is required because the well or take point will be nearer to a boundary of that Participation Unit Agreement than the minimum lease line spacing distance under then applicable RRC rules, the Parties agree to waive notice, hearing, and objection to a spacing exception permit for that well or take point with regard to that boundary.

ii. The provisions of the immediately preceding subparagraph i. shall be binding upon the Parties to this Agreement and their respective successors and assigns, as well as each owner of any interest in any subsequent oil or gas lease covering all or part of the Unit Area, and shall be a covenant running with the land.

9.10.4

3. Credits Toward Development Obligation.

a. Credit for Excess Drilling. Subject to the further provisions of this Article 5.C.3.a., if the aggregate Horizontal Drainhole Displacement of the Horizontal Drainhole Wells Unit Operator drills and completes during 2018 or any subsequent calendar year exceeds Unit Operator's Development Obligation for the year, Unit Operator shall have the right to apply the excess (i.e., the positive difference between the aggregate Horizontal Drainhole Displacement Unit Operator actually drilled and completed during such year and Unit Operator's Development Obligation for the year) as a credit toward its Development Obligation for the next succeeding calendar year ("Displacement Credit"). The aggregate Horizontal Drainhole Displacement drilled and completed by Unit Operator during any given calendar year shall be computed as the Horizontal Drainhole Displacement actually drilled and completed by Unit Operator during such year plus any Displacement Credit Unit Operator has the right to apply toward its Development Obligation for the year; provided, however, the maximum Displacement Credit that may be earned during any given calendar year and applied as a credit toward Unit Operator's Development Obligation during the next succeeding calendar year is 176,400 feet, if the credit is earned during 2018, or 294,000 feet, if the credit is earned during any subsequent calendar year.

b. Credit for Density Drilling.

i. For purposes of this Agreement, "Horizon" means a stratum of earth thought to contain a common accumulation of oil or gas separately producible from any other common accumulation of oil or gas. A Horizon may comprise one of several stratigraphic intervals or zones within a geologic formation or an entire formation. By way of illustration and not limitation, the Wolfcamp formation or interval may consist of four (or more) Horizons known as the Wolfcamp A, Wolfcamp B, Wolfcamp C and Wolfcamp D, and the Bone Spring formation or interval may consist of eight (or more) Horizons known as the Avalon (or Avalon formation), Charkey (or Charkey formation), the 1st, 2nd and 3rd Bone Spring Carbonates and the 1st, 2nd and 3rd Bone Spring Sands. A "Half Section" means a single legal subdivision of a section of land comprising one-half of the section.

ii. If during any rolling 365-day time period Unit Operator completes Horizontal Drainhole Wells on the Unit Area having an aggregate Horizontal Drainhole Displacement within the same Horizon in any two adjacent Half Sections equal to at least 78,400 feet, then Lessee shall receive credit toward its Development Obligation equal to 25% of the aggregate Horizontal Drainhole Displacement of such wells situated within such Half Sections for the calendar year in which the completion of the last of such wells occurs. For purposes of the immediately preceding sentence, the last of such wells is the well which when completed in accordance this paragraph causes the aggregate Horizontal Drainhole

21.014

Displacement for such 365-day time period to meet or exceed 78,400 feet. Two Half Sections shall be considered to be adjacent if:

(a) the wells for which credit is being given are oriented in generally a north-south direction and the eastern boundary line of one of the Half Sections is common with the western boundary line of the other Half Section; or

(b) the wells for which credit is being given are oriented in generally an east-west direction and the northern boundary line of one of the Half Sections is common with the southern boundary line of the other Half Section.

Any credit earned under this Article V.C.3.b. shall be in addition to any Continuous Development credited earned under Section V.C.1 and any Displacement Credit earned under Article V.C.3.a.

D. Participation Units: Additional Participation Unit Termination Events.

1. Participation Units.

a. Upon completion of any well on the Unit Area as a producer of, or as a well capable of producing, Unitized Substances in paying quantities, Unit Operator shall dedicate to such well, in accordance with the further provisions of this Article V.D., a geographic area encompassing and surrounding such well (a "Participation Unit"); provided, however:

i. if the well is completed in an existing Participation Unit and under the further provisions of this Article V.D. the Participation Unit for such well can be the same in size and location as the existing Participation Unit, then Unit Operator may, but shall not be required, to dedicate the existing Participation Unit as the Participation Unit for such well; or

ii. if the well is completed in an existing Participation Unit, but under the further provisions of this Article V.D. the Participation Unit for such well is required or allowed to be different in size or location as the existing Participation Unit, then Unit Operator shall dedicate a new Participation Unit to such well in accordance with the further provisions of this Article V.D.

It is understood and agreed that a Participation Unit dedicated to one well or wells may overlap with the Participation Unit dedicated to another well or wells; and in the event two or more Participation Units do overlap, each of such Participation Units shall, for all purposes of this lease, be treated as a separate and distinct Participation Unit.

On or before January 31 of each calendar year beginning in 2019, but in

no event later than 45 days following the Termination of Continuous Development or any other termination or partial termination of this Agreement, Unit Operator shall designate for each of the wells completed during the preceding calendar year the Participation Unit dedicated thereto by one or more written instruments, record the instruments in Culberson County, Texas, and furnish copies of the recorded instruments, with the recording information prominently displayed thereon, to Owner and the State of Texas.

Each Participation Unit shall be effective as of the date of first production of Unitized Substances from the first well to which such Participation Unit was dedicated. Each Participation Unit shall conform to the spacing, density and proration provisions for such well, as permitted or prescribed in applicable RRC rules and/or orders; provided, however, no Participation Unit shall contain more than the maximum amount of acreage specified in the following tables, plus a tolerance of ten percent (10%):

VERTICAL WELLS		
Deepest Producing Formation in Participation Unit		**Maximum Size of Participation Unit (in acres)**
Top of Bell Canyon through Base of Brushy Canyon		40
Top of Bone Spring through Base of Wolfcamp		80
Top of Cisco Through Base of Morrow	If Oil Well	80
	If Gas Well	160
Below Base of Morrow	If Oil Well	160
	If Gas Well	320

HORIZONTAL DRAINHOLE WELLS		
Deepest Producing Formation in Participation Unit	**Horizontal Drainhole Displacement**	**Maximum Size of Participation Unit (in acres)**
All Formations from Top of Bell Canyon Through Base of Wolfcamp	100* – 871	40
	872 – 2,674	80
	2,675 – 4,012	120
	4,013 – 5,350	160
	5,351 – 6,688	200
	6,689 – 8,026	240
	8,027 – 9,364	280
	9,365 – 10,702	320
	10,703 – 12,040	360

	12,041 – 13,378	400

	for each additional 1,337-foot increment	an additional 80 acres
** If the distance from the first take point to the last take point is less than 100', then, for purposes of computing the maximum amount of acreage that may be included in the Participation Unit designated for such well, the well shall be deemed to be a Vertical Well.*		

b. Each Participation Unit shall also be as nearly in the form of a square or rectangle as is reasonably practicable, and the take point locations of the well or wells to which such Participation Unit has been dedicated shall be at legal locations in, on or under such Participation Unit. GLO, any Parties ratifying this Agreement and, subject to that certain Surface Use Agreement dated effective June 20, 2013, between CHEVRON and Wise, as amended (the "Chevron/Wise SUA"), WISE authorize and consent to the development of the Unit Area utilizing Horizontal Drainhole Wells, offsite tract surface locations and offsite tract penetration points for wells on any Participation Unit or Retained Participation Unit, as permitted by Ford, West (Wolfcamp) Field Rule No. 2 issued in Texas Railroad Commission Oil and Gas Docket No. 08-0297138 on January 12, 2016, by RRC Rule 86, subsection (g), by other applicable field rules or laws, or by any successor rule, regulation or law. "Penetration point" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

91.01.4

c. Nothing herein shall be construed as prohibiting Unit Operator from revising an existing Participation Unit as to the amount or configuration of acreage included therein, or other matters; provided, however, the revised Participation Unit must comply with the requirements of this Article V.D. Unit Operator may revise a Participation Unit as provided herein by recording in Culberson County, Texas, a written instrument referencing or describing the existing Participation Unit, and the well or wells to which such Participation Unit is dedicated, and describing the revised Participation Unit, and furnishing the GLO and Wise with a copy of the recorded instrument, with the recording information prominently displayed thereon. The effective date of the revised Participation Unit shall be the date such instrument is received by the GLO and Wise, or as otherwise agreed by the Parties. The provisions of this paragraph apply also to Retained Participation Units after Termination of Continuous Development.

d. Except as otherwise expressly provided in this Agreement or agreed in writing by the GLO and Wise, in advance, a Participation Unit or Retained Participation Unit formed or revised pursuant to this provision shall never contain lands other than lands in the Unit Area; provided, however, at Unit Operator's option, which must be exercised reasonably and in good faith, a Participation Unit may consist of lands situated partially in the Unit Area and partially in the Wise Unit No. 1 Unit Area.

2. Retained Participation Unit Termination Events. Notwithstanding any other provision of this Agreement to the contrary:

a. If at any time after the Termination of Continuous Development production of Unitized Substances in paying quantities from any Retained Participation Unit, after once obtained, should cease from any cause, then, subject to the further provisions of this Article V.D.2.a., this Agreement shall automatically terminate insofar as it covers such unit; provided, however, this Agreement shall not terminate as to such Participation Unit if Unit Operator commences additional drilling or reworking operations on the Retained Participation Unit within ninety (90) days after such cessation, and this Agreement shall remain in full force and effect as to the Retained Participation Unit for so long as Unit Operator conducts such operations in accordance with the standards contained in Article V.B without interruptions totaling more than ninety (90) days. If such drilling or reworking operations result in the production of oil or gas in paying quantities, then this Agreement shall remain in full force and effect as to such Retained Participation Unit for so long as oil or gas is produced therefrom in paying quantities or payment of shut-in oil or gas well royalties or payment of compensatory royalties is made with respect to such Retained Participation Unit as provided in the Delaware Ranch Lease or as provided by law. If the drilling or reworking operations result in the completion of a well as a dry hole, this Agreement will not terminate as to such Retained Participation Unit if Unit Operator commences additional drilling or reworking operations on such unit within ninety (90) days after the completion of the well as a dry hole, and this Agreement shall remain

in effect as to such Retained Participation Unit for as long as Unit Operator continues drilling or reworking operations in accordance with the standards contained in Article V.B without interruptions totaling more than ninety (90) days. Unit Operator shall give written notice to the GLO and Wise within thirty (30) days of any cessation of production lasting more than the applicable time period specified in this Article V.B.2.a. within thirty (30) days after the expiration of such time period. In the event Unit Operator has drilled and completed 100 or more Horizontal Drainhole Wells on the Unit Area or Wise Unit No. 1 Unit Area, or on both of said unit areas, that are producing or capable of producing Unitized Substances in paying quantities at the time this Article V.B.2.a. is invoked, all references to "ninety (90) days" in this Article V.B.2.a. will be replaced with "one hundred twenty (120) days". In the event Unit Operator has drilled and completed 200 or more Horizontal Drainhole Wells on the Unit Area or Wise Unit No. 1 Unit Area, or on both of said unit areas, that are producing or capable of producing Unitized Substances in paying quantities at the time this Article V.B.2.a. is invoked, all references to "ninety (90) days" in this Article V.B.2.a. will be replaced with "one hundred fifty (150) days".

b. Upon the expiration of five (5) years following the Termination of Continuous Development, if any, or January 1, 2028, whichever is later to occur, this Agreement shall automatically expire as to all of the:

   i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Retained Participation Unit is dedicated to be produced at maximum allowables; and

   ii. depths in and under such Retained Participation Unit, save and except the depths situated between the top of the shallowest formation within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not) and the base of the deepest formation within such Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

c. Upon the expiration of ten (10) years following the Termination of Continuous Development, if any, or January 1, 2038, whichever is later to occur, this Agreement shall automatically expire as to all of the:

   i. lands within the geographic boundaries of the Retained

9.10.4

Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except each formation within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

d. Upon the expiration of twenty (20) years following the Termination of Continuous Development, if any, or January 1, 2048, whichever is later to occur, this Agreement shall automatically expire as to all of the:

i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Retained Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except each Horizon within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

E. Pursuant to the consolidation and unitization of the lands and Leases in Article III of this Agreement and the creation of the Wise Unit No. 1, and subject to the provisions of the Chevron/Wise SUA, Unit Operator may develop the Unit Area utilizing Horizontal Drainhole Wells, offsite tract surface locations, or offsite tract penetration points drilled in, under, or between the lands and Leases identified in Exhibits "A" and "B" or drilled in, under, or between the lands and Leases located in the Unit Area or in the Wise Unit No. 1, as permitted by Ford, West (Wolfcamp) Field Rule No. 2 issued in Texas Railroad Commission Oil and Gas Docket No. 08-0297138 on January 12, 2016, by 16 Tex. Admin. Code §3.86(g), by other applicable field rules, or by any successor rule, regulation or law.

F. Unit Operator shall conduct all of its activities hereunder as would a reasonable prudent operator under all of the relevant facts and circumstances to the end that the Unit Area

shall be fully developed in accordance with all of the terms and conditions of this Agreement.

VI. TERM AND TERMINATION:

A. Subject to the Commissioner's approval, this Agreement shall be effective upon the Effective Date, and shall continue in force and effect as provided above. Unit Operator, together with Working Interest Owners owning not less than 75% of the working interest in the Unit Area on an acreage basis, may voluntarily terminate this Agreement as to all or any portion of the Unit Area, save and except any lands and depths comprising a Participation Unit or Retained Participation Unit that is dedicated to a well from which oil and/or gas is then being produced, or capable of being produced, in paying quantities, upon sixty (60) days advance written notice to the Commissioner. Termination of this Agreement, in whole or part, shall not relieve Unit Operator or the non-operating Working Interest Owners of any obligations, including without limitation plugging any well in accordance with the requirements of the Lease or applicable law, that may have accrued prior to the date of such termination.

B. Should this Agreement terminate in whole or part for any cause, the Leases and any other contracts affecting the lands within the Unit Area, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under such Leases or contracts and such production had ceased on the date of such termination or partial termination of this Agreement.

VII. ALLOCATION OF PRODUCTION:

A. Unit Area Wells. Subject to Article VII.B below, all unitized substances produced from the Unit Area, and from any Retained Participation Units subsequent to Termination of Continuous Development, shall be allocated to the below-listed owners, and all proceeds of such production and the royalties thereon shall be paid to the owners in the following proportions:

CHEVRON	86.255559%
GLO	06.245201%
WISE ASSET NO. 8, LTD.	03.749620%
WISE ASSET NO. 10, LTD.	02.495581%
Texas Pacific Land Trust	01.254038%

In addition to the surface commingling authorized under Article III.B, the GLO and WISE hereby grant Unit Operator the authority to surface commingle Unitized Substances produced solely from the Unit Area, including any Retained Participation Unit, or any Participation Unit, and GLO and WISE agree that such authorization satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3), and any successor rule, regulation or law.

B. Unit Crossing Wells. The Unit Operator is hereby authorized to drill Horizontal Drainhole Wells across the boundary lines between the Unit Area and the Wise Unit No. 1 Unit Area ("Unit-Crossing Wells"). Each such unit area will be deemed to have produced a portion of the oil and gas produced from a Unit-Crossing Well on the basis of an allocation factor. For the Unit Area, the allocation factor is a fraction, the numerator of which is equal to the

STATE

length of the Horizontal Drainhole Displacement of the Unit-Crossing Well that lies under the Unit Area and the denominator of which is equal to the total length of the Horizontal Drainhole Displacement of the Unit-Crossing Well. Likewise, for the Wise Unit No. 1 Unit Area, the allocation factor is a fraction, the numerator of which is equal to the length of the Horizontal Drainhole Displacement of the Unit-Crossing Well that lies under the Wise Unit No. 1 Unit Area and the denominator of which is the total length of the Horizontal Drainhole Displacement of the Unit-Crossing Well. Each owner in the Unit Area and the Wise Unit No. 1 Unit Area will receive its proportionate share, as described in the respective Agreement or Wise Unit No. 1 Unit Agreement, of the production or proceeds from a Unit-Crossing Well based upon the applicable allocation formula, as provided above.

C. Production in Kind. Nothing contained in this Agreement shall be construed to alter any person's or Party's right to take its allocated share of oil or gas production in kind. Royalties payable to the State of Texas and Owners on allocated production shall be computed and paid in the time and manner provided for in the Leases.

VIII. MINIMUM ROYALTY, COMPENSATORY ROYALTY AND DUTY TO PROTECT FROM DRAINAGE:

A. Any minimum royalties that become due under any of the Leases shall be computed and paid in accordance with the terms of such Lease, and nothing in this Agreement shall operate to relieve the lessee or lessees under such Lease from the obligation to pay such minimum royalty as provided therein.

B. The drilling and completion of a well within the Unit Area pursuant to this Agreement, or on both the Unit Area and the Wise Unit No. 1 Unit Area pursuant to this Agreement and the Wise Unit No. 1 Unit Agreement, shall not obligate the lessee under any express or implied provision of any of the Leases to drill an offset well, pay compensatory royalty or otherwise protect the lands covered by such Lease from drainage; however, nothing in this Agreement shall relieve Operator from protecting lands within the Unit Area, as would a reasonably prudent operator, from drainage occurring from wells on lands, other than lands then subject to the Wise Unit No. 1 Unit Agreement, situated outside the Unit Area.

IX. LEASES EXTENDED AND CONFORMED:

A. The terms and provisions of all Leases and any other contracts relating to exploration, drilling, development or operation for Unitized Substances on lands committed to this Agreement are hereby expressly modified and amended to the extent, and only to the extent, necessary to make them conform to the provisions hereof, but such Leases and contracts, if any, shall otherwise remain in force and effect subject to and in accordance with their terms; and the Commissioner by his approval hereof does hereby establish, alter, or change the drilling, producing and royalty requirements of the Leases committed hereto to the extent, and only to the extent, necessary to conform said requirements to the provisions of this Agreement. Notwithstanding the provisions of this Article IX.A, the termination or partial termination of this Agreement alone will not in any way effect a similar, or any, termination or partial termination of any of the Leases, and the Leases are not modified or amended to effect such a termination or partial termination. Despite the termination or partial termination of this Agreement, the Leases will continue in full force and effect, or expire or terminate in whole or part, subject to and in accordance with their respective terms and in accordance with Article 0.

B. Prior to the Termination of Continuous Development, drilling operations on and/or production of Unitized Substances from any tract of land covered by this Agreement will be deemed to be drilling operations on and/or production of Unitized Substances from all of the tracts comprising the Unit Area, and no Lease shall be deemed to have expired by reason of the lessee's failure to conduct any such operations on, or produce Unitized Substances from, any of the lands covered by such Lease.

C. From and after the Termination of Continuous Development or any other partial termination of this Agreement, and notwithstanding any other provision of this Agreement to the contrary, each of the Leases may be maintained in force as to lands and depths that are not subject to this Agreement only as provided in such Leases without regard to operations on or production pursuant to this Agreement; and neither operations on nor production from the lands and depths subject to this Agreement, nor the payment of shut-in royalties from a well drilled pursuant to this Agreement, shall serve to maintain any of the Leases in force as to any lands or depths that are not subject to this Agreement, regardless of whether the production or operations on the Unit Area, or the well for which shut-in royalties are being paid, are actually located on such Lease or not.

X. GENERAL:

A. Notices. All notices, demands, or communications required hereunder shall be in writing and shall be delivered by certified mail, commercial courier, personal delivery, or facsimile, to the receiving party at its address listed under its signature line below. Parties may change their address of record on thirty (30) days advance written notice.

B. Force Majeure. If, after good faith effort and the exercise of due care and diligence Unit Operator is prevented from complying with any covenant or obligation to conduct drilling operations on or produce Unitized Substances from the lands covered by this Agreement by reason of war, rebellion, riots, strikes, acts of God, or any valid order, rule or regulation of government authority, then while so prevented, Unit Operator's obligation to comply with such covenant or obligation shall be suspended and Unit Operator shall not be liable for damages for failure to comply therewith; provided, however, nothing in this provision shall suspend any financial obligations.

C. Covenants run with the land. The covenants herein shall be construed to be covenants running with the land with respect to the interests of the Parties, their successors or assigns, and any grant, transfer or conveyance of an interest in any land or Lease subject to this Agreement shall be and is hereby conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, assignee, or other successor in interest.

D. Counterparts. This Agreement may be executed in any number of counterparties, none of which need be executed by all Parties, or may be ratified or consented to by separate written instrument specifically referring hereto, and shall be binding upon all parties who have executed a counterpart, ratification or consent to this Agreement, with the same force and effect as if all such parties had signed the same document.

E. Wise execution. Wise, as Owner under the Delaware Ranch Lease, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

F. Exhibits. All exhibits attached to this Agreement are made a part hereof.

[Remainder of page intentionally left blank]

XI. EXECUTION:

IN WITNESS WHEREOF, this Agreement is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

THIRD AMENDMENT OF OIL AND GAS LEASE

STATE OF TEXAS §
§
COUNTY OF CULBERSON §

This Third Amendment of Oil and Gas Lease ("Amendment") dated effective as of February 6, 2018 ("Effective Date"), is made and entered into by and among **Wise Asset No. 8, Ltd.**, a Texas limited partnership, individually and as agent for the State of Texas, acting through its General Land Office ("State of Texas"), and **Wise Asset No. 10, Ltd.**, a Texas limited partnership, individually and as agent for the State of Texas, (Wise Asset No. 8, Ltd., Wise Asset No. 10, Ltd., and the State of Texas hereinafter collectively "Lessor") and **Chevron U.S.A. Inc.**, a Pennsylvania Corporation ("Lessee"). Lessor and Lessee may hereinafter be referred to collectively as the "Parties" and individually as a "Party". Capitalized terms used but not defined in this Amendment shall have the meaning ascribed to such terms(s) in the Lease (hereinafter defined).

WHEREAS, Lessor executed and delivered to COG Operating LLC, a Delaware limited liability company ("COG") that certain Oil and Gas Lease, including Addendum 1 attached thereto and made a part thereof, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease ("Lands"), and which lease is recorded in Volume 109, Page 366, of the Oil and Gas Lease Records of Culberson County, Texas ("Original Lease");

WHEREAS, the Original Lease was amended by that certain unrecorded Amendment of Oil and Gas Lease dated effective March 1, 2016 ("First Amendment") and that certain unrecorded Amendment of Oil and Gas Lease dated effective September 1, 2017 ("Second Amendment"), copies of which are in the possession of Lessor and Lessee (the Original Lease, the First Amendment, Second Amendment, and all other previous duly executed amendments and extensions of said lease hereinafter, the "Lease");

WHEREAS, the Lessee acquired the leasehold interest under the Lease from COG through a certain Asset Exchange Agreement, dated February 7, 2018, by and between COG and Lessee; and

WHEREAS, the Parties wish to amend, modify, delete, or replace certain provisions of the Lease in order to promote efficient development and maximum recovery of hydrocarbons from the Lease, as more particularly described below.

NOW THEREFORE, in consideration of the above premises, ten dollars ($10), and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged and confessed by Lessor, the Parties do hereby agree as follows:

1. Effective as of the Effective Date, "Addendum 1" attached to the Lease shall be replaced and superseded for all purposes by the "Addendum 1" attached hereto and made a part hereof.

For and in consideration of the above-described premises and consideration, Lessor does hereby ADOPT, RATIFY, and CONFIRM the Lease, as amended hereby, unto Lessee, and hereby agrees that the Lease, as amended hereby, is a valid and subsisting oil and gas lease in full force and effect as to all of the Lands, in accordance with its terms, as amended hereby. In the event of a conflict between the terms of this Amendment and the terms of the Lease, the terms of this Amendment shall control and prevail.

This Amendment may be executed in any number of counterparts, each of which may be combined and shall be considered an original for all purposes.

EXECUTED as of the date of the Parties' respective acknowledgements below, to be effective for all purposes, however, as of the Effective Date.

ADDENDUM 1

Attached to and Made a Part of Oil and Gas Lease dated March 28, 2013, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as the Lessor, to COG Operating LLC, as the Lessee

---

40. **Lease; Conflicting Provisions.** The terms set forth in the lease agreement to which this addendum is attached (i.e., the main body of the lease), including, but not limited to Paragraphs 1-39, together with the terms set forth in this addendum, including Paragraphs 40-48, comprise the lease. All references in the main body of the lease and this addendum to "this lease" or "the lease" refer to the main body of this lease, as amended, supplemented or otherwise modified by this addendum. In the event of a conflict between a term set forth in the main body of the lease and a term set forth in this addendum, then, except as otherwise expressly provided in this addendum, the conflicting provision of this addendum shall control.

41. **Definitions.** Except as otherwise expressly stated in this lease, the terms set forth below shall have the meanings ascribed thereto. A term defined in this lease, whether in this paragraph or elsewhere in this lease, shall include both the singular and the plural. RRC rules referenced herein are codified, as of the date of this lease, in Title 16, Part 1, Chapter 3 of the Texas Administrative Code.

(a) [Intentionally Omitted]

(b) "Actually Drilling" (or "actual drilling") means the penetration of the earth with a rotary rig capable of drilling, and intended to drill, to the objective depth.

(c) "Completed," when used to describe the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil and/or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged.

(d) "Continuous Development" shall have the meaning ascribed thereto in Paragraph 46.a.

(e) "Development Obligation" shall have the meaning ascribed thereto in Paragraph 46.

(f) "Gas well" shall have the meaning ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

(g) "Horizon" shall have the meaning ascribed thereto in Paragraph 46.

(h) "Horizontal Drainhole Displacement" shall have the meaning ascribed thereto as of January 1, 2018, in RRC Rule 86.

(i) "Horizontal Drainhole Well" shall have the meaning ascribed thereto in RRC Rule 86 (Title 16, Part 1, Chapter 3, Rule §86, Texas Administrative Code), as amended by applicable field rules, if any.

(j) "Oil well" shall have the definition ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

(k) "Owner" means the owner of the soil.

(l) "Producing Unit" shall have the meaning ascribed thereto in Paragraph 47.

(m) "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

(n) "RRC Rule 86" means Title 16, Part 1, Chapter 3, Section 86 of the Texas Administrative Code, as amended.

(o) "Vertical Well" means a well (defined below) other than a Horizontal Well.

(p) "Well" (or "well"), unless otherwise expressly provided in this lease, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

42. **Leased Premises.** This lease covers the following described lands located in T&P RR. Co. Survey, Culberson County, Texas:

Section	Block	Township	Gross Acres (more or less)
6	60	1	661.00
8	60	1	675.60
14	60	1	673.00
16	60	1	675.50
18	60	1	678.02
20	60	1	675.60
28	60	1	675.00
30	60	1	678.00
32	60	1	675.40
34	60	1	676.00
2	61	1	677.00
4	61	1	668.00
6	61	1	657.00

Section	Block	Township	Gross Acres (more or less)
8	61	1	692.00
10	61	1	689.00
12	61	1	691.00
14	61	1	697.50
16	61	1	691.00
18	61	1	683.00
20	61	1	692.00
22	61	1	688.70
24	61	1	690.90
26	61	1	697.50

4	61	2	697.00
6	61	2	689.50
8	61	2	698.00
N/2 of 10	61	2	347.50
12	61	2	697.60
20	61	2	696.60
28	61	2	685.00
30	61	2	677.00
		Total Gross Acres:	30,518.72

43. **Owner's Representation Regarding Ownership; Negation of Warranty.** Owner represents, but does not warrant (all warranties, express or implied, being hereby negated) that it owns the following interests in the leased premises (the "Surface Interests"):

(i) an undivided 75% of the surface estate in Section 30 and the S/2 SE/4 of Section 32, Block 60, Township 1, Culberson County, Texas; and

(ii) 100% of the surface estate in the remainder of the leased premises.

44. **Standards of Lessee's Conduct; Drilling and Completion of Wells.** At all times while this lease is in force, either in whole or in part, Lessee shall conduct its operations and activities, and otherwise fulfill its obligations, under this lease as would a reasonably prudent operator, in a good and workman like manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations and orders. Without limiting the foregoing, and except as otherwise agreed in writing by Owner, the State of Texas and Lessee, each well commenced by Lessee pursuant to this lease shall be drilled:

(i) in a bona fide attempt to produce oil and/or gas;

(ii) at a legal location (or locations) of Lessee's choice on the leased premises; and

(iii) with reasonable diligence through completion.

45. **Primary Term.** Notwithstanding Paragraph 2 or any other provision of this lease to the contrary, the primary term of this lease shall run from March 28, 2013, through December 31, 2017. During the primary term, the anniversary (or anniversary date) of this lease shall be deemed to have been March 28. After the primary term (including, but not limited to, January 1, 2018), the anniversary (or anniversary date) of this lease shall be deemed to be January 1.

46. **Continuous Development; Partial Expiration in Absence of Continuous Development.**

This Paragraph 46 supersedes and replaces Paragraphs 16(A) and (B) of the lease.

a. **Continuous Development.** Subject to the lease savings provisions of Paragraphs 12, 14 (as amended in this addendum), 15 and 18, if at the expiration of the primary term there are at least eleven (11) well producing or capable of producing oil and/or gas from the leased premises in paying quantities, this lease shall not terminate as to any of the leased premises but will continue in force and effect as to all of the leased premises for as long as Lessee has the right hereunder to conduct, and is actually conducting, Continuous Development. "Continuous Development" means:

(1) during 2018 only, the drilling and completion on the leased premises, on land validly pooled or unitized therewith, or on both the leased premises and land validly pooled or unitized therewith, of Horizontal Drainhole Wells having an aggregate Horizontal Drainhole Displacement of a minimum of 176,400 feet; and

(2) during 2019 and every calendar year thereafter, the drilling and completion on the leased premises, on land validly pooled or unitized therewith, or on both the leased premises and land validly pooled or unitized therewith, of Horizontal Drainhole Wells having an aggregate Horizontal Drainhole Displacement of a minimum of 294,000 feet.

The minimum aggregate Horizontal Drainhole Displacement that must be drilled and completed in 2018 or any subsequent calendar year in order to constitute Continuous Development, as provided above, is the "Development Obligation" for such year.

For purposes of Paragraphs 46.a. and 46.c.(1) only, if actual drilling of a Horizontal Drainhole Well is commenced during 2018 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Paragraph 44, it shall be deemed that the well has been drilled and completed during such calendar year, even if the well was actually drilled, in part, and/or completed, in whole or part, during the next succeeding calendar year.

Further, if:

(1) Lessee commences actual drilling of one or more Horizontal Drainhole Wells during any calendar year (the "Obligation Year") and completes such well(s) in accordance with Paragraph 44 during the next succeeding calendar year;

(2) the Horizontal Drainhole Displacement of such well(s), if completed as planned, when taken together with any other credits earned by Lessee toward its Development Obligation for the Obligation Year under Paragraphs 46.a., 46.c.(1) and 46.c.(2), would allow Lessee to achieve its Development Obligation for the Obligation Year; and

(3) due to causes not reasonably within Lessee's control (excluding economics), such wells are not completed as planned and the aggregate Horizontal Drainhole Displacement of the wells is insufficient to allow Lessee to meet its Development Obligation for the Obligation Year;

then, notwithstanding any other provision in Paragraph 46 to the contrary, this lease will not expire because Lessee failed to meet its Development Obligation for the Obligation Year due to such causes alone, and Lessee's Development Obligation for the calendar year next succeeding the Obligation Year will automatically increase by the number of feet equal to the positive difference between Lessee's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Lessee actually earned (or for which Lessee was credited) toward its Development Obligation for the Obligation Year; provided, however, the provisions of this subparagraph (beginning with the phrase "Further, if:") will not apply if the number of feet that is the positive difference between Lessee's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Lessee actually earned (or for which Lessee was credited) toward its Development Obligation for the Obligation Year is greater than 9,800 feet.

b. **Partial Expiration in Absence, or Upon Cessation, of Continuous Development.** If during 2018 or any subsequent calendar year Lessee fails to meet its Development Obligation for the year, then, effective as of the end of such year, this lease shall automatically terminate insofar as it covers the entire leased premises, save and except any Held Producing Unit. A "Held Producing Unit" means:

(1) a well producing or capable of producing oil and/or gas in paying quantities; and

(2) that portion of the leased premises situated within the geographic boundaries of the Producing Unit designated for such well, limited to those depths situated between the top of the Bell Canyon formation and the base of the deepest formation from which such well is then producing oil and/or gas, whether or not in paying quantities.

Subject to the agreements and requirements stated in subparagraphs (a) and (b) immediately below, if at such time there exists more than one Held Producing Unit, then this lease shall be automatically segregated into separate and distinct leases, each of which shall cover a single Held Producing Unit (a "Producing Unit Lease"). Each Producing Unit Lease shall be deemed to contain the same terms and provisions as those set forth in this lease, except that the leased premises subject to such Producing Unit Lease shall consist solely of the single Held Producing Unit covered thereby. Operations on and/or production from (or attributable to) one Producing Unit Lease shall not serve to maintain or otherwise affect the status of any other Producing Unit Lease.

(a) The segregation of this lease into separate Producing Unit Leases shall not create lease lines or boundary lines for purposes of the permitting of any well or take point in a Producing Unit Lease under the rules of the RRC, and the parties agree that no well or take point in a Producing Unit Lease shall be required to be permitted or re-permitted because of such segregation. However, if the permitting or re-permitting of a well or take point in a Producing Unit Lease is required because the well or take point will be nearer to a boundary of that Producing Unit Lease than the minimum lease line spacing distance under then applicable RRC rules, the parties agree to waive notice, hearing, and objection to a spacing exception permit for that well or take point with regard to that boundary.

(b) The provisions of the immediately preceding subparagraph (a) shall be binding upon the parties to this lease and their respective successors and assigns, as well

as each owner of any interest in any subsequent oil or gas lease covering all or part of the leased premises, and shall be a covenant running with the land.

c. **Credits Against Development Obligation.**

(1) **Credit for Excess Drilling.** Subject to the further provisions of this Paragraph 46.c.(1), if the aggregate Horizontal Drainhole Displacement of the Horizontal Drainhole Wells Lessee drills and completes during 2018 or any subsequent calendar year exceeds Lessee's Development Obligation for the year, Lessee shall have the right to apply the excess (i.e., the positive difference between the aggregate Horizontal Drainhole Displacement Lessee actually drilled and completed during such year and Lessee's Development Obligation for the year) as a credit toward its Development Obligation for the next succeeding calendar year ("Displacement Credit"). The aggregate Horizontal Drainhole Displacement drilled and completed by Lessee during any given calendar year shall be computed as the Horizontal Drainhole Displacement actually drilled and completed by Lessee during such year plus any Displacement Credit Lessee has the right to apply toward its Development Obligation for the year; provided, however, the maximum Displacement Credit that may be earned during any given calendar year and applied as a credit toward Lessee's Development Obligation during the next succeeding calendar year is 176,400 feet, if the credit is earned during 2018, and 294,000 feet, if the credit is earned during any subsequent calendar year.

(2) **Credit for Density Drilling.** For purposes of this lease, "Horizon" means a stratum of earth thought to contain a common accumulation of oil or gas separately producible from any other common accumulation of oil or gas. A Horizon may comprise one of several stratigraphic intervals or zones within a geologic formation or an entire formation. By way of illustration and not limitation, the Wolfcamp formation or interval may consist of four (or more) Horizons known as the Wolfcamp A, Wolfcamp B, Wolfcamp C and Wolfcamp D, and the Bone Spring formation or interval may consist of eight (or more) Horizons known as the Avalon (or Avalon formation), Charkey (or Charkey formation), the 1st, 2nd and 3rd Bone Spring Carbonates and the 1st, 2nd and 3rd Bone Spring Sands. A "Half Section" means a single legal subdivision of a section of land comprising one-half of the section.

If during any rolling 365-day time period Lessee completes Horizontal Drainhole Wells on the leased premises (or, in the event of pooling or unitization, on the leased premises and lands validly pooled or unitized therewith), having an aggregate Horizontal Drainhole Displacement within the same Horizon in any two adjacent Half Sections equal to at least 78,400 feet, then Lessee shall receive credit toward its Development Obligation equal to 25% of the aggregate Horizontal Drainhole Displacement of such wells situated within such Half Sections for the calendar year in which the completion of the last of such wells occurs. For purposes of the immediately preceding sentence, the last of such wells is the well which when completed in accordance this paragraph causes the aggregate Horizontal Drainhole Displacement for such 365-day time period to meet or exceed 78,400 feet. Two Half Sections shall be considered to be adjacent if:

(i) the wells for which credit is being given are oriented in generally a north-south direction and the eastern boundary line of one of the Half Sections is common with the western boundary line of the other Half Section; or

(ii) the wells for which credit is being given are oriented in generally an east-west direction and the northern boundary line of one of the Half Sections is common with the southern boundary line of the other Half Section.

Credit earned under this Paragraph 46.c.(2) shall be in addition to any Continuous Development credited earned under Paragraph 46.a. and any Displacement Credit earned under Paragraph 46.c.(1).

47. **Producing Units: Additional Lease Termination Events.**

a. **Producing Units.** Upon completion of any well on the leased premises as a producer of, or as a well capable of producing, oil and/or gas in paying quantities, Lessee shall dedicate to such well, in accordance with the further provisions of this Paragraph 47, a geographic area encompassing and surrounding such well (a "Producing Unit"); provided, however;

i. if the well is completed in an existing Producing Unit and under the further provisions of this Paragraph 47 the Producing Unit for such well can be the same in size and location as the existing Producing Unit, then Lessee may, but shall not be required, to dedicate the existing Producing Unit as the Producing Unit for such well; or

ii. if the well is completed in an existing Producing Unit, but under the further provisions of this Paragraph 47 the Producing Unit for such well is required or allowed to be different in size or location as the existing Producing Unit, then Lessee shall dedicate a new Producing Unit to such well in accordance with the further provisions of this paragraph.

It is understood and agreed that a Producing Unit dedicated to one well or wells may overlap with the Producing Unit dedicated to another well or wells; and in the event two or more Producing Units do overlap, each of such Producing Units shall, for all purposes of this lease, be treated as a separate and distinct Producing Unit.

On or before January 31 of each calendar year beginning in 2019, but in no event later than 45 days following the termination or partial termination of this lease, Lessee shall designate for each of the wells completed during the preceding calendar year the Producing Unit dedicated thereto by one or more written instruments, record the instruments in Culberson County, Texas, and furnish copies of the recorded instruments, with the recording information prominently displayed thereon, to Owner and the State of Texas. Each Producing Unit shall be effective as of the date of first production of oil and/or gas from the first well to which such Producing Unit was dedicated. Each Producing Unit shall conform to the spacing, density and proration provisions for such well, as permitted or prescribed in applicable RRC rules and/or orders; provided, however, no Producing Unit shall contain more than the maximum amount of acreage specified in the following tables, plus a tolerance of ten percent (10%):

VERTICAL WELLS		
Deepest Producing Formation in Producing Unit		**Maximum Size of Producing Unit (in acres)**
Top of Bell Canyon through Base of Brushy Canyon		40
Top of Bone Spring through Base of Wolfcamp		80
Top of Cisco Through Base of Morrow	If Oil Well	80
	If Gas Well	160
Below Base of Morrow	If Oil Well	160
	If Gas Well	320

HORIZONTAL DRAINHOLE WELLS		
Deepest Producing Formation in Producing Unit	**Horizontal Drainhole Displacement**	**Maximum Size of Producing Unit (in acres)**
All Formations from Top of Bell Canyon Through Base of Wolfcamp	100* – 871	40
	872 – 2,674	80
	2,675 – 4,012	120
	4,013 – 5,350	160
	5,351 – 6,688	200
	6,689 – 8,026	240
	8,027 – 9,364	280
	9,365 – 10,702	320
	10,703 – 12,040	360
	12,041 – 13,378	400
	13,379 – 14,716	440
	14,717 – 16,054	480
	for each additional 1,337-foot increment	an additional 40 acres
All Formations Below Base of Wolfcamp	100* – 871	80
	872 – 2,674	160
	2,675 – 4,012	240
	4,013 – 5,350	320
	5,351 – 6,688	400
	6,689 – 8,026	480
	8,027 – 9,364	560
	9,365 – 10,702	640

	10,703 – 12,040	720
	12,041 – 13,378	800
	13,379 – 14,716	880
	14,717 – 16,054	960
	for each additional 1,337-foot increment	an additional 80 acres
** If the distance from the first take point to the last take point is less than 100', then, for purposes of computing the maximum amount of acreage that may be included in the Producing Unit designated for such well, the well shall be deemed to be a Vertical Well.*		

Each Producing Unit shall also be as nearly in the form of a square or rectangle as is reasonably practicable, and the surface location, bottom hole, penetration point, terminus, and take point locations of the well for which such Producing Unit has been designated shall be at legal locations in, on or under such unit.

Nothing herein shall be construed as prohibiting Lessee from revising an existing Producing Unit as to the amount or configuration of acreage included therein, or other matters, provided, however, the revised Producing Unit must comply with the requirements of this provision. Lessee may revise a Producing Unit as provided herein by furnishing the State of Texas and owner of the soil with a written instrument, suitable for recording, referencing or describing the existing Producing Unit and designating the revised Producing Unit. The effective date of the revised Producing Unit shall be the date such instrument is received by the State of Texas and owner of the soil, or as otherwise agreed by the parties. Such instrument may be recorded by the State of Texas, owner of the soil or Lessee in the county or counties in which the lands comprising the revised Producing Unit are located.

Except as otherwise expressly provided in this lease or agreed in writing by the State of Texas and owner of the soil, in advance, a Producing Unit formed or revised pursuant to this provision shall never contain lands other than lands then subject to this lease. For purposes of this provision, "penetration point," "take point," "first take point," "last take point," and "terminus" shall have the meanings ascribed thereto in RRC Rule 86.

b. **Additional Lease Termination Events.** Notwithstanding any other provision of this lease to the contrary:

(1) If, after the expiration of the primary term, production of oil or gas in paying quantities from any Producing Unit, after once obtained, should cease from any cause, then, subject to the further provisions of this subparagraph b(1), the lease shall terminate insofar as it covers such Producing Unit; provided, however, the lease shall not terminate as to such Producing Unit if Lessee commences additional drilling or reworking operations on such unit within ninety (90) days after such cessation, and this lease shall remain in full force and effect as to the Producing Unit for so long as such operations continue in good faith and in workmanlike

manner without interruptions totaling more than ninety (90) days. If such drilling or reworking operations result in the production of oil or gas, the lease shall remain in full force and effect as to such Producing Unit for so long as oil or gas is produced therefrom in paying quantities or payment of shut-in oil or gas well royalties or payment of compensatory royalties is made with respect to such unit as provided herein or as provided by law. If the drilling or reworking operations result in the completion of a well as a dry hole, the lease will not terminate as to such Producing Unit if Lessee commences additional drilling or reworking operations on such unit within ninety (90) days after the completion of the well as a dry hole, and this lease shall remain in effect as to such unit so long as Lessee continues drilling or reworking operations in good faith and in a workmanlike manner without interruptions totaling more than ninety (90) days. Lessee shall give written notice to the General Land Office of any cessation of production lasting more than the applicable time period specified in this Paragraph 47.b.(1) within thirty (30) days after the expiration of such time period. In the event Lessee has drilled and completed 100 or more Horizontal Drainhole Wells on the leased premises, on lands validly pooled or unitized with the leased premises, or on both the leased premises and on lands validly pooled or unitized with the leased premises, that are producing or capable of producing oil and/or gas in paying quantities at the time this Paragraph 47.b.(1) is invoked, all references to "ninety (90) days" in this Paragraph 47.b.(1) will be replaced with "one hundred twenty (120) days". In the event Lessee has drilled and completed 200 or more Horizontal Drainhole Wells on the leased premises, on lands validly pooled or unitized with the leased premises, or on both the leased premises and on lands validly pooled or unitized with the leased premises, that are producing or capable of producing oil and/or gas in paying quantities at the time this Paragraph 47.b.(1) is invoked, all references to "ninety (90) days" in this Paragraph 47.b.(1) will be replaced with "one hundred fifty (150) days".

(2) Upon the expiration of five (5) years following the cessation of Continuous Development, if any, or January 1, 2028, whichever is the later to occur, this lease shall automatically expire as to all of the:

(i) lands within the geographic boundaries of the Held Producing Unit then covered by this lease, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Held Producing Unit is dedicated to be produced at maximum allowables; and

(ii) depths in and under such Producing Unit, save and except the depths situated between the top of the shallowest formation within such Held Producing Unit from which oil and/or gas is then being produced (whether in paying quantities or not) and the base of the deepest formation within such Held Producing Unit from which oil and/or gas is then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration oil and/or gas is not being produced, or capable of being produced, in paying quantities from such Held Producing Unit, and this lease is not being maintained in force with respect to such Held Producing Unit under another provision hereof, then this lease shall automatically terminate insofar as it covers such Held Producing Unit.

(3) Upon the expiration of ten (10) years following the cessation of Continuous Development, if any, or January 1, 2038, whichever is the later to occur, this lease shall automatically expire as to all of the:

(i) lands within the geographic boundaries of the Held Producing Unit then covered by this lease, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Held Producing Unit is dedicated to be produced at maximum allowables; and

(ii) depths in and under such Held Producing Unit, save and except each formation within such Held Producing Unit from which oil and/or gas is then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration oil and/or gas is not being produced, or capable of being produced, in paying quantities from such Held Producing Unit, and this lease is not being maintained in force with respect to such Held Producing Unit under another provision hereof, then this lease shall automatically terminate insofar as it covers such Held Producing Unit.

(4) Upon the expiration of twenty (20) years following the cessation of Continuous Development, if any, or January 1, 2048, whichever is the later to occur, this lease shall automatically expire as to all of the:

(i) lands within the geographic boundaries of the Held Producing Unit then covered by this lease, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Held Producing Unit is dedicated to be produced at maximum allowables; and

(ii) depths in and under such Held Producing Unit, save and except each Horizon within such Held Producing Unit from which oil and/or gas is then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration oil and/or gas is not being produced, or capable of being produced, in paying quantities from such Held Producing Unit, and this lease is not being maintained in force with respect to such Held Producing Unit under another provision hereof, then this lease shall automatically terminate insofar as it covers such Held Producing Unit.

48. **Miscellaneous Provisions.**

(a) **Duty to Develop.** After December 31, 2018, or the cessation of Continuous Development, if any, whichever is the later to occur, Lessee shall drill such additional well or wells in the Horizon from which oil and/or gas is being produced, or capable of being produced, in paying quantities, as would a reasonably prudent operator acting under or encountering the same or similar circumstances. Nothing in this provision shall be construed as limiting Lessee's implied duty to develop lands covered by this lease.

(b) **Meetings.** Within a reasonable time following request by Owner and/or the State of Texas, Lessee agrees to meet with Owner and the State of Texas at the Texas General Land Office, or another mutually agreeable location, to discuss its operations and activities relating to this lease, including, but not limited to, past, present and planned (or anticipated) future

operations affecting the surface and/or subsurface of the lands covered by this lease, and the results (or anticipated results) of those operations. Owner may disclose information obtained from Lessee during any such meeting with its partners, employees, contractors and consultants, but Owner shall be prohibited from disclosing, or allowing its partners, employees, contractors or consultants to disclose, Lessee's proprietary information to any other person or entity. Notwithstanding anything in this provision to the contrary, Lessee shall have no obligation to provide Owner its reserve data, geologic interpretations or other proprietary data, and Lessee shall not be required to meet with Owner more than twice per year pursuant to this provision.

(c) **No Pooling Without Consent.** Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas Natural Resources Code§§ 52.151 - 52.154, the conflicting provision of said statutes shall control. In the event pooling is allowed, Lessee shall have the right, subject to the provisions of Paragraph 47, to designate the entire pooled unit as a Producing Unit.

(d) **Information Requirements; Seismic.** Lessee agrees to promptly furnish Owner with the same information, reports and other documentation pertaining to its operations and activities under this lease that an operator is required to furnish a participating nonoperator under the terms of the A.A.PL Form 610-1989 Model Form Operating Agreement ("Operations Information"). All Operations Information furnished to Owner will be kept strictly confidential until and unless it has been made available to the general public; provided, Owner shall have the right to share the Operations Information with its partners, owners, managers, contractors and consultants to the extent, and only to the extent, necessary or convenient to analyze and file same. In the event Lessee acquires proprietary seismic data covering all or part of the leased premises, Lessee agrees to grant Owner a free license to such data (including, but not limited to, field records, and processed and reprocessed data, to the extent its license allows it to do so without charge) over the portion or portions of the leased premises covered by such data, but shall not be required to furnish Owner its interpretations of any such data. Without limiting the foregoing, Lessee further agrees as follows:

(1) Lessee shall allow Lessor and its representatives full access to all wells drilled pursuant to this lease, including, but not limited to, access to the records and reports pertaining thereto and to the derrick floor, at Lessor's sole risk and expense, and Lessor shall be furnished with samples or copies of all cores, cuttings, logs, drilling data, testing and completing data, and all other information obtained by Lessee pertaining to any well drilled hereunder. Upon request at any time, and from time to time, Lessee shall furnish Owner a current statement showing all wells that have been drilled and/or completed, or are being drilled or completed pursuant to this lease, the status of such wells, and current production information for such wells, if any, including, but not limited to, volumes, pricing and purchases.

(2) Unless and until Lessee is instructed otherwise, Lessee shall transmit all information required to be delivered to Owner pursuant to this provision or any other provision of the lease, using the contract person and information provided below.

Owner: Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd.
Owner's Designee: William D. Patterson
Physical and Mailing Address of Owner:
6851 NE Loop 820, Suite 200
North Richland Hills, TX 76180
Telephone and Fax:
(817) 577-1131 ext. 206 (Work)
(817) 228-9184 (Mobile)
(817) 503-8985 (Fax)
Email: billpatterson@petroleumlegal.com

(3) Without limiting the foregoing, Lessee agrees to deliver to Owner (or otherwise comply with) the following information and reports for each well drilled by Lessee pursuant to this lease:

(i) Notice by telephone of all proposed coring, drillstem testing, and logging in sufficient time for Owner to have a representative present.

(ii) Daily drilling, completion and initial potential test reports, and production reports for a period of at least three (3) months from the date of first production.

(iii) Daily mud logs (by email), and a print of the composite mud log.

(iv) Two field prints or preliminary prints, and two final prints of all logs run.

(v) Samples of any and all cores, if requested.

(vi) At or prior to the time actual drilling is commenced, Lessee's geologist in charge will contact Owner's designee to discuss any potential modification of the requirements under this paragraph and the necessary time requirements for notification of coring, logging, testing, etc.

(vii) Two copies of complete details of all drillstem tests taken, together with two copies of charts in bottom hole bomb.

(viii) One copy of the potential test.

(ix) One copy of completion and/or plugging report.

(x) One copy each of all other forms filed with the RRC and/or any other agency (whether state or federal).

Notwithstanding anything to the contrary above, Lessee shall never be obligated to provide reserve data, geologic interpretations or other proprietary or interpretive information. Any and all data and reports provided to Owner shall be without warranty of any kind or nature so that Lessee shall have absolutely no liability to Owner under any theory or remedy arising, directly or indirectly, from providing same and Owner stipulates and agrees that it relies upon any such data and/or records at its own risk. LESSOR SHALL FULLY INDEMNIFY AND HOLD HARMLESS LESSEE, ITS AGENTS, EMPLOYEES, CONTRACTORS, AND

SUBCONTRACTORS, AND THEIR AGENTS, EMPLOYEES AND CONTRACTORS, FROM ANY AND ALL CLAIMS AND CAUSES OF ACTION, INCLUDING CONTRACTUAL CAUSES OF ACTION, ARISING FROM OR ASSERTED BY, THROUGH OR UNDER ANY PERSON ON WELL SITES, RIG FLOORS OR OTHER LESSEE OPERATIONAL AREAS AS INVITEES OF LESSOR, INCLUDING FOR ACTS OF A DIRECT OR INDIRECT INDEMNITEE'S ORDINARY NEGLIGENCE.

(e) **Shut-in Wells.** Notwithstanding anything herein to the contrary, acreage held by shut-in royalties may not be maintained under this lease solely by the payment of shut-in royalties for any single period in excess of twelve (12) consecutive months or for more than three (3) years in the aggregate. For the sole purpose of computing the amount of shut-in royalties payable under Paragraph 14, it shall be deemed that the rental amount stipulated in Paragraph 3 is $5.00 per acre.

(f) **Assignments.** Notwithstanding any other provision of this lease to the contrary, this lease may not be assigned absent the advance written consent of Owner and the State of Texas, which consent shall not be unreasonably withheld; provided, however, this condition to assignment shall not apply to Lessee's mortgage of all or part of its interest in the lease, or to its disposition of all, or substantially all, of its assets in the Permian Basin through merger, reorganization and/or consolidation.

(g) **Releases.** If this lease expires or terminates for any cause, whether in whole or in part, Lessee shall immediately release this lease in writing as to the lands and/or depths that are no longer subject hereto; provided, however, the release of this lease, in whole or in part, shall not operate to lessen or relieve Lessee of any obligation or liability under or relating to this lease accruing prior to such expiration or termination. Lessee shall record all releases executed by it pursuant to this provision, and furnish copies thereof to Owner and the State of Texas.

(h) **Binding Effect.** The provisions of this lease shall be covenants running with the lands, and shall inure to the benefit of and be binding upon Owner, the State of Texas and Lessee, and their respective heirs, successors, assigns, representatives, directors, principals, agents, employees, contractors and subcontractors.

(i) **Surface Rights and Damages.** Simultaneously with the execution and delivery of this lease, Owner and Lessee have entered into a separate surface use and damages agreement which governing their respective rights and obligations in regard to the surface rights granted to Lessee, expressly or impliedly, herein.

Re: Unit Agreements

Dear Mr. Morgan:

Enclosed for your records you will find the following 2 Recorded Unit Agreements:

1. Unit Agreement for the Development and operation of the Delaware Ranch, Wise Unit No. 1 – GLO Unit No. 8954
2. Unit Agreement for the Development and operation of the Delaware Ranch, Wise Unit No. 2 – GLO Unit No. 8956.

If there is anything further that you should require, please do not hesitate to contact Robert Endicott. Thank you very much.

Sincerely,

Robert Endicott

UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 1 - STATE UNIT CULBERSON COUNTY, TEXAS

This AGREEMENT (herein "Agreement"), approved and executed by the Commissioner of the General Land Office and entered into as of the 3rd day of April, 2018, by and between the parties executing, ratifying, or consenting hereto, hereinafter the "Parties," but to be effective as of April 3, 2018 (the "Effective Date").

I. DEFINITIONS:

A. "Actual Drilling" (or "actual drilling") means the penetration of the earth with a rotary rig capable of drilling, and intended to drill, to the objective depth.

B. "CHEVRON" shall mean Chevron U.S.A. Inc.

C. "Commissioner" shall mean the Commissioner of the General Land Office of the State of Texas, his designee or authorized representative.

D. "Completed," when used to describe the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil and/or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged in accordance with applicable rules and regulations.

E. "Continuous Development" shall have the meaning ascribed thereto in Article V.C.1.a.

F. "Delaware Ranch Lease" means the first Lease listed in the Schedule of Leases in Exhibit A and described as that certain Oil and Gas Lease dated March 28, 2013, recorded in Volume 101, page 366, Oil and Gas Records of Culberson County, Texas, as amended, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as lessors, and COG Operating LLC, as lessee, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease, as amended by that certain Amendment of Oil and Gas Lease dated effective March 1, 2016, and that certain Second Amendment of Oil and Gas Lease dated effective September 1, 2017.

G. "Development Obligation" shall have the meaning ascribed thereto in Article V.C.1.a.

H. "Excluded Wells" shall have the meaning ascribed thereto in Article III.A.

I. "Gas well" shall have the meaning ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

J. "GLO" shall mean the General Land Office of the State of Texas.

K. "Half Section" shall have the meaning ascribed thereto in Article V.C.3.b.i.

L. "Horizon" shall have the meaning ascribed thereto in Article V.C.3.b.i.

M. "Horizontal Drainhole Well" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

N. "Horizontal Drainhole Displacement" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

O. "Leases" shall mean those oil and gas leases identified on the Schedule of Leases in Exhibit "A."

P. "Oil well" shall have the definition ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

Q. "Owner" means the owner of the soil.

R. "Participation Unit" shall have the meaning ascribed thereto in Article V.D.1.a.

S. "Plan" shall have the meaning ascribed thereto in Article 0.

T. "Retained Participation Unit" shall have the meaning ascribed thereto in Article 0.

U. "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

V. "RRC Rule 86" means Title 16, Part 1, Chapter 3, Section 86 of the Texas Administrative Code, as amended.

W. "Termination of Continuous Development" shall have the meaning ascribed thereto in Article V.C.2.a

X. "Unit Area" has the meaning ascribed thereto in Article III.A.

Y. "Unitized Substances" shall have the meaning ascribed thereto in Article III.A.

Z. "Well" (or "well"), unless otherwise expressly provided in this Agreement, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

AA. "WISE" (or "Wise") shall mean collectively Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., the Owners of the lands covered by Delaware Ranch Lease.

BB. "Wise Unit No. 2 Unit Agreement" has the meaning ascribed thereto in Article III.C.

CC. "Wise Unit No. 2 Unit Area" has the meaning ascribed thereto in Article III.C.

DD. "Working interest" means the cost-bearing interest in an oil and gas lease.

EE. "Working Interest Owners" shall mean the party or parties owning the cost-bearing portion of the leasehold estate created by each Lease and the mineral fee estate committed to this Agreement; and currently being CHEVRON.

II. AUTHORITY:

A. The Commissioner is authorized by Texas Natural Resources Code §52.151, to enter into agreements that provide for operating areas as a unit for the exploration, development and

production of oil or gas and to commit the interests of the State to same, and to take all actions set forth below in this Agreement.

B. CHEVRON is the current owner of all of the working interest in the Leases, and no other consent by a Working Interest Owner is required to commit to this Agreement all of the working interest in the Leases and lands lying within the Unit Area. CHEVRON is the current owner of all of the minerals under the land identified in Exhibit B as "Chevron Mineral Fee Tract", subject to non-participating royalty interests owned by Wise Asset No. 10, Ltd. under some or all of those tracts, as described in Exhibit B. No consent by a non-participating royalty interest owner is required to commit to this Agreement all of the non-participating royalty interests in the Chevron Mineral Fee Tracts lying within the Unit Area.

C. Each of the Leases that is a Relinquishment Act Lease, except the Delaware Ranch Lease, contains a provision that grants to CHEVRON as Lessee, or as successor Lessee, the right to pool or unitize the interest of the "Owner of the Soil" on the same terms as shall be approved by the School Land Board and Commissioner for pooling or unitizing the interests of the State in such Leases pursuant to Texas Natural Resources Code §§52.151-154, and which satisfies the requirements of §52.152. Paragraph 48.a. of the Delaware Ranch Lease provides: "Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas Natural Resources Code §§ 52.151 -52.154, the conflicting provision of said statutes shall control."

D. Execution of this Agreement is in the best interest of the State of Texas, will assure the orderly and efficient development of the Unit Area, and will prevent waste and protect the correlative rights of all affected parties.

III. UNIT AREA AND UNITIZED SUBSTANCES:

A. All of the lands described on the attached Exhibit "B" and depicted as the Wise Unit No. 1 on the plat attached as Exhibit "A-1" are hereby designated as the "Unit Area." Subject to all of the terms and conditions contained in this Agreement, all of said lands and Leases, insofar as same lie or cover lands within the Unit Area, together with all of the oil and gas in, under or that may be produced from the Unit Area (the "Unitized Substances"), are hereby consolidated and unitized.

Notwithstanding the above or any other provision of this Agreement to the contrary, the fifteen wells identified in the attached Exhibit "C," all of which were drilled and completed under the terms of the Delaware Ranch Lease before the Effective Date (the "Excluded Wells"), and the oil and gas produced from such wells, shall continue to be covered by and subject to the Delaware Ranch Lease and shall not be covered by, subject to or otherwise affected by this Agreement. The Parties agree that the exclusion of the Excluded Wells, and the production from such wells, from this Agreement does not create a lease line or property line for purposes of RRC spacing, density, or acreage assignment rules or regulation.

B. GLO and WISE hereby grant to the Unit Operator the authority to surface commingle the oil produced from the Excluded Wells or from Wise Unit No. 2 with oil produced from the Unit Area (including without limitation any Participation Unit or Retained Participation

Unit), and to surface commingle the gas produced from the Excluded Wells or from Wise Unit No. 2 with gas produced from the Unit Area (including without limitation any Participation Unit or Retained Participation Unit); provided, however, such authority shall be subject to Unit Operator's duty to allocate, for royalty purposes, the quantities of oil and gas produced from the Excluded Wells or from Wise Unit No. 2 based on monthly production tests of each of the Excluded Wells or each of the wells located on Wise Unit No. 2. GLO and WISE each agree that such authority, if exercised by Unit Operator as provided herein, satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3) and any successor rule, regulation or law.

C. This Agreement is being entered into by the Parties simultaneously and in conjunction with that certain Unit Agreement for the Development and Operation of the Delaware Ranch, Wise Unit No. 2 – State Unit, by and among the Parties and of even date herewith (the "Wise Unit No. 2 Unit Agreement"). This Agreement covers the development and operation of the Unit Area, also known as the Wise Unit No. 1, which is a portion of the Delaware Ranch Lease. The Wise Unit No. 2 Unit Agreement covers the development and operation of a certain other portion of the Delaware Ranch Lease, as described in the Wise Unit No. 2 Unit Agreement, which portion is described herein as the "Wise Unit No. 2 Unit Area". This Agreement and the Wise Unit No. 2 Unit Agreement, together, will assure the orderly and efficient development of the Delaware Ranch Lease, prevent waste, and protect the correlative rights of all affected parties.

D. The Parties agree that the separation of the Delaware Ranch Lease into the Wise Unit No. 1 and the Wise Unit No. 2 does not create a lease line or property line for purposes of RRC spacing, density, or acreage assignment rules or regulation. Notwithstanding the foregoing, with regard to any Horizontal Drainhole Well drilled on the Unit Area whose orientation runs parallel to a boundary line between the Unit Area and the Wise Unit No. 2 Unit Area (a "Parallel Well"), the Unit Operator agrees that the Parallel Well will be permitted, drilled, and completed at a location that is at least as far away from the boundary line between the Unit Area and Wise Unit No. 2 as the standard minimum perpendicular distance to lease lines specified by applicable RRC rules.

IV. UNIT OPERATOR:

A. CHEVRON is hereby designated as Unit Operator and agrees to accept the duties and obligations as Unit Operator for the exploration, development and production of Unitized Substances as herein provided, and shall have the exclusive right, privilege and duty of exercising any and all rights of the Working Interest Owners necessary or convenient for prospecting for, exploring for, producing, storing, allocating, and distributing Unitized Substances.

B. Unit Operator shall have the right to resign at any time, but such resignation shall not become effective so as to release Unit Operator from any duties or obligations of Unit Operator or terminate Unit Operator's rights hereunder occurring or accruing prior to the effective date of its resignation. Any such resignation shall not become effective until ninety (90) days after such time as notice of Unit Operator's resignation has been served upon all other Working Interest Owners, the Commissioner and Owner unless a successor Unit Operator has been selected and is qualified to act as Unit Operator. Unit Operator, upon default or failure to perform its duties, may be removed by the Working Interest Owners, and a successor Unit Operator may be selected, in the manner provided in any Unit Operating Agreement covering the Unit Area.

C. Resignation or removal of Unit Operator under this Agreement shall not terminate its right, title or interest as a Working Interest Owner or as the owner of another interest in Unitized Substances.

D. If the Unit Operator is not the sole Working Interest Owner in the Unit Area, the costs and expenses incurred by the Unit Operator in conducting Unit operations shall be paid and apportioned among and borne by the Working Interest Owners in accordance with the Unit Operating Agreement and Accounting Procedure, or other applicable agreements, covering the Unit Area, if any, among the Working Interest Owners.

V. PLAN OF DEVELOPMENT AND OPERATIONS:

A. Plan of Development. Commencing as of the Effective Date, Unit Operator will develop the Unit Area in accordance with the terms and provisions of this Article V, generally referred to as the "Plan".

B. Standards of Unit Operator's Conduct; Drilling and Completion of Wells. At all times while this Agreement is in force, either in whole or in part, Unit Operator shall conduct its operations and activities, and otherwise fulfill its obligations, under this Agreement as would a reasonably prudent operator, in a good and workmanlike manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations and orders. Without limiting the foregoing, and except as otherwise agreed in writing by WISE, GLO, and Unit Operator, each well commenced by Unit Operator pursuant to this Agreement shall be drilled:

1. in a bona fide attempt to produce oil and/or gas;

2. at a legal location (or locations) of Unit Operator's choice on the Unit Area; and

3. with reasonable diligence through completion.

C. Continuous Development; Partial Expiration in Absence of Continuous Development.

1. Continuous Development.

a. This Agreement shall continue in force and effect as to the entire Unit Area for as long as Unit Operator has the right to conduct, and is conducting, Continuous Development. "Continuous Development" means:

i. during 2018 only, the drilling and completion, subject to Article V.C.1.b, of Horizontal Drainhole Wells on the Unit Area or on the Wise Unit No. 2 Unit Area, or on both of said unit areas, having an aggregate Horizontal Drainhole Displacement of a minimum of 176,400 feet; and

ii. during every calendar year thereafter, the drilling and completion, subject to Article V.C.1.b, of Horizontal Drainhole Wells on the Unit Area or on the Wise Unit No. 2 Unit Area, or on both of said unit areas, having an aggregate Horizontal Drainhole Displacement of a minimum of 294,000 feet.

The minimum aggregate Horizontal Drainhole Displacement that must be drilled and completed in 2018 or any subsequent calendar year in order to constitute Continuous Development, as provided above, is the "Development Obligation" for such year.

b. For purposes of Articles V.C.1 and V.C.3.a only, if actual drilling of a Horizontal Drainhole Well is commenced during 2018 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Article V.B herein, it shall be deemed that the well has been drilled and completed during such calendar year, even if the well was actually drilled, in part, and/or completed, in whole or part, during the next succeeding calendar year.

Further, if:

(a) Unit Operator commences actual drilling of one or more Horizontal Drainhole Wells during any calendar year (the "Obligation Year") and completes such well(s) in accordance with Article V.B during the next succeeding calendar year;

(b) the Horizontal Drainhole Displacement of such well(s), if completed as planned, when taken together with any other credits earned by Unit Operator toward its Development Obligation for the Obligation Year under Articles V.C.1, V.C.3.a and V.C.3.b, would allow Unit Operator to achieve its Development Obligation for the Obligation Year; and

(c) due to causes not reasonably within Unit Operator's control (excluding economics), such wells are not completed as planned and the aggregate Horizontal Drainhole Displacement of the wells is insufficient to allow Unit Operator to meet its Development Obligation for the Obligation Year;

then, notwithstanding any other provision in Article V.C to the contrary, this Agreement will not terminate because Unit Operator failed to meet its Development Obligation for the Obligation Year due to such causes alone and Unit Operator's Development Obligation for the calendar year next succeeding the Obligation Year will automatically increase by the number of feet equal to the positive difference between Unit Operator's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Unit Operator actually earned (or for which Unit Operator was credited) toward its Development Obligation for the Obligation Year; provided, however, the provisions of this paragraph (beginning with the phrase "Further, if:") will not apply if the number of feet that is the positive difference between Unit Operator's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Unit Operator actually earned (or for which Unit Operator was credited) toward its Development Obligation for the Obligation Year is greater than 9,800 feet.

2. Partial Expiration in Absence or Upon Cessation of Continuous Development.

a. If during 2018 or any subsequent calendar year Unit Operator fails to meet its Development Obligation for the year, then, effective as of the end of such year (the "Termination of Continuous Development"), this Agreement shall automatically terminate insofar as it covers the entire Unit Area, save and except any Retained Participation Unit. A "Retained Participation Unit" means:

i. a well producing or capable of producing Unitized Substances in paying quantities; and

ii. that portion of the Unit Area situated within the geographic boundaries of the Participation Unit designated for such well, limited to those depths situated between the top of the Bell Canyon formation and the base of the deepest formation from which such well is then producing Unitized Substances, whether or not in paying quantities.

b. Subject to the agreements and requirements stated in subparagraphs i. and ii. immediately below, if at such time there exists more than one Retained Participation Unit, then this Agreement shall automatically be segregated into separate and distinct agreements, each of which shall cover a single Retained Participation Unit (a "Participation Unit Agreement"). Each such Participation Unit Agreement shall be deemed to contain the same terms and provisions as those set forth in this Agreement, except that the Unit Area subject to such Participation Unit Agreement shall consist solely of the single Retained Participation Unit covered thereby. Operations on and/or production from (or attributable to) the lands covered by one Participation Unit Agreement shall not serve to maintain or otherwise affect the status of any other Participation Unit Agreement. For operations on each Retained Participation Unit, Unit Operator shall retain surface and subsurface easements across or under, and rights of ingress and egress across or under, that portion of the Unit Area not included in the Retained Participation Unit for wells, production facilities, roads, pipelines, power lines, communications facilities, and otherwise necessary or useful for the purpose of producing, operating, drilling, reworking, storing, transporting, marketing, plugging and abandoning wells for oil or gas situated on the Retained Participation Unit.

i. The segregation of this Agreement into separate Participation Unit Agreements shall not create lease lines or boundary lines for purposes of the permitting of any well or take point in a Participation Unit Agreement under the rules of the RRC, and the Parties agree that no well or take point in a Participation Unit Agreement shall be required to be permitted or re-permitted because of such segregation. However, if the permitting or re-permitting of a well or take point in a Participation Unit Agreement is required because the well or take point will be nearer to a boundary of that Participation Unit Agreement than the minimum lease line spacing distance under then applicable RRC rules, the Parties agree to waive notice, hearing, and objection to

a spacing exception permit for that well or take point with regard to that boundary.

ii. The provisions of the immediately preceding subparagraph i. shall be binding upon the Parties to this Agreement and their respective successors and assigns, as well as each owner of any interest in any subsequent oil or gas lease covering all or part of the Unit Area, and shall be a covenant running with the land.

3. Credits Toward Development Obligation.

a. Credit for Excess Drilling. Subject to the further provisions of this Article 5.C.3.a., if the aggregate Horizontal Drainhole Displacement of the Horizontal Drainhole Wells Unit Operator drills and completes during 2018 or any subsequent calendar year exceeds Unit Operator's Development Obligation for the year, Unit Operator shall have the right to apply the excess (i.e., the positive difference between the aggregate Horizontal Drainhole Displacement Unit Operator actually drilled and completed during such year and Unit Operator's Development Obligation for the year) as a credit toward its Development Obligation for the next succeeding calendar year ("Displacement Credit"). The aggregate Horizontal Drainhole Displacement drilled and completed by Unit Operator during any given calendar year shall be computed as the Horizontal Drainhole Displacement actually drilled and completed by Unit Operator during such year plus any Displacement Credit Unit Operator has the right to apply toward its Development Obligation for the year; provided, however, the maximum Displacement Credit that may be earned during any given calendar year and applied as a credit toward Unit Operator's Development Obligation during the next succeeding calendar year is 176,400 feet, if the credit is earned during 2018, or 294,000 feet, if the credit is earned during any subsequent calendar year.

b. Credit for Density Drilling.

i. For purposes of this Agreement, "Horizon" means a stratum of earth thought to contain a common accumulation of oil or gas separately producible from any other common accumulation of oil or gas. A Horizon may comprise one of several stratigraphic intervals or zones within a geologic formation or an entire formation. By way of illustration and not limitation, the Wolfcamp formation or interval may consist of four (or more) Horizons known as the Wolfcamp A, Wolfcamp B, Wolfcamp C and Wolfcamp D, and the Bone Spring formation or interval may consist of eight (or more) Horizons known as the Avalon (or Avalon formation), Charkey (or Charkey formation), the 1st, 2nd and 3rd Bone Spring Carbonates and the 1st, 2nd and 3rd Bone Spring Sands. A "Half Section" means a single legal subdivision of a section of land comprising one-half of the section.

ii. If during any rolling 365-day time period Unit Operator completes Horizontal Drainhole Wells on the Unit Area having an aggregate

Horizontal Drainhole Displacement within the same Horizon in any two adjacent Half Sections equal to at least 78,400 feet, then Lessee shall receive credit toward its Development Obligation equal to 25% of the aggregate Horizontal Drainhole Displacement of such wells situated within such Half Sections for the calendar year in which the completion of the last of such wells occurs. For purposes of the immediately preceding sentence, the last of such wells is the well which when completed in accordance this paragraph causes the aggregate Horizontal Drainhole Displacement for such 365-day time period to meet or exceed 78,400 feet. Two Half Sections shall be considered to be adjacent if:

(a) the wells for which credit is being given are oriented in generally a north-south direction and the eastern boundary line of one of the Half Sections is common with the western boundary line of the other Half Section; or

(b) the wells for which credit is being given are oriented in generally an east-west direction and the northern boundary line of one of the Half Sections is common with the southern boundary line of the other Half Section.

Any credit earned under this Article V.C.3.b. shall be in addition to any Continuous Development credited earned under Section V.C.1 and any Displacement Credit earned under Article V.C.3.a.

D. Participation Units: Additional Participation Unit Termination Events.

1. Participation Units.

a. Upon completion of any well on the Unit Area as a producer of, or as a well capable of producing, Unitized Substances in paying quantities, Unit Operator shall dedicate to such well, in accordance with the further provisions of this Article V.D., a geographic area encompassing and surrounding such well (a "Participation Unit"); provided, however:

i. if the well is completed in an existing Participation Unit and under the further provisions of this Article V.D. the Participation Unit for such well can be the same in size and location as the existing Participation Unit, then Unit Operator may, but shall not be required, to dedicate the existing Participation Unit as the Participation Unit for such well; or

ii. if the well is completed in an existing Participation Unit, but under the further provisions of this Article V.D. the Participation Unit for such well is required or allowed to be different in size or location as the existing Participation Unit, then Unit Operator shall dedicate a new Participation Unit to such well in accordance with the further provisions of this Article V.D.

It is understood and agreed that a Participation Unit dedicated to one well or wells may overlap with the Participation Unit dedicated to another well or wells; and in the event two or more Participation Units do overlap, each of such Participation Units shall, for all purposes of this lease, be treated as a separate and distinct Participation Unit.

On or before January 31 of each calendar year beginning in 2019, but in no event later than 45 days following the Termination of Continuous Development or any other termination or partial termination of this Agreement, Unit Operator shall designate for each of the wells completed during the preceding calendar year the Participation Unit dedicated thereto by one or more written instruments, record the instruments in Culberson County, Texas, and furnish copies of the recorded instruments, with the recording information prominently displayed thereon, to Owner and the State of Texas.

Each Participation Unit shall be effective as of the date of first production of Unitized Substances from the first well to which such Participation Unit was dedicated. Each Participation Unit shall conform to the spacing, density and proration provisions for such well, as permitted or prescribed in applicable RRC rules and/or orders; provided, however, no Participation Unit shall contain more than the maximum amount of acreage specified in the following tables, plus a tolerance of ten percent (10%):

VERTICAL WELLS		
Deepest Producing Formation in Participation Unit		**Maximum Size of Participation Unit (in acres)**
Top of Bell Canyon through Base of Brushy Canyon		40
Top of Bone Spring through Base of Wolfcamp		80
Top of Cisco Through Base of Morrow	If Oil Well	80
	If Gas Well	160
Below Base of Morrow	If Oil Well	160
	If Gas Well	320

HORIZONTAL DRAINHOLE WELLS		
Deepest Producing Formation in Participation Unit	**Horizontal Drainhole Displacement**	**Maximum Size of Participation Unit (in acres)**
All Formations from Top of Bell Canyon Through Base of Wolfcamp	100* – 871	40
	872 – 2,674	80
	2,675 – 4,012	120

	4,013 – 5,350	160
	5,351 – 6,688	200
	6,689 – 8,026	240
	8,027 – 9,364	280
	9,365 – 10,702	320
	10,703 – 12,040	360
	12,041 – 13,378	400
	13,379 – 14,716	440
	14,717 – 16,054	480
	for each additional 1,337-foot increment	an additional 40 acres
All Formations Below Base of Wolfcamp	100* – 871	80
	872 – 2,674	160
	2,675 – 4,012	240
	4,013 – 5,350	320
	5,351 – 6,688	400
	6,689 – 8,026	480
	8,027 – 9,364	560
	9,365 – 10,702	640
	10,703 – 12,040	720
	12,041 – 13,378	800
	13,379 – 14,716	880
	14,717 – 16,054	960
	for each additional 1,337-foot increment	an additional 80 acres
** If the distance from the first take point to the last take point is less than 100', then, for purposes of computing the maximum amount of acreage that may be included in the Participation Unit designated for such well, the well shall be deemed to be a Vertical Well.*		

b. Each Participation Unit shall also be as nearly in the form of a square or rectangle as is reasonably practicable, and the take point locations of the well or wells to which such Participation Unit has been dedicated shall be at legal locations in, on or under such Participation Unit. GLO, any Parties ratifying this Agreement and, subject to that certain Surface Use Agreement dated effective June 20, 2013, between CHEVRON and Wise, as amended (the "Chevron/Wise SUA"), WISE authorize and consent to

the development of the Unit Area utilizing Horizontal Drainhole Wells, offsite tract surface locations and offsite tract penetration points for wells on any Participation Unit or Retained Participation Unit, as permitted by Ford, West (Wolfcamp) Field Rule No. 2 issued in Texas Railroad Commission Oil and Gas Docket No. 08-0297138 on January 12, 2016, by RRC Rule 86, subsection (g), by other applicable field rules or laws, or by any successor rule, regulation or law. "Penetration point" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

c. Nothing herein shall be construed as prohibiting Unit Operator from revising an existing Participation Unit as to the amount or configuration of acreage included therein, or other matters; provided, however, the revised Participation Unit must comply with the requirements of this Article V.D. Unit Operator may revise a Participation Unit as provided herein by recording in Culberson County, Texas, a written instrument referencing or describing the existing Participation Unit, and the well or wells to which such Participation Unit is dedicated, and describing the revised Participation Unit, and furnishing the GLO and Wise with a copy of the recorded instrument, with the recording information prominently displayed thereon. The effective date of the revised Participation Unit shall be the date such instrument is received by the GLO and Wise, or as otherwise agreed by the Parties. The provisions of this paragraph apply also to Retained Participation Units after Termination of Continuous Development.

d. Except as otherwise expressly provided in this Agreement or agreed in writing by the GLO and Wise, in advance, a Participation Unit or Retained Participation Unit formed or revised pursuant to this provision shall never contain lands other than lands in the Unit Area; provided, however, at Unit Operator's option, which must be exercised reasonably and in good faith, a Participation Unit may consist of lands situated partially in the Unit Area and partially in the Wise Unit No. 2 Unit Area.

2. Retained Participation Unit Termination Events. Notwithstanding any other provision of this Agreement to the contrary:

a. If at any time after the Termination of Continuous Development production of Unitized Substances in paying quantities from any Retained Participation Unit, after once obtained, should cease from any cause, then, subject to the further provisions of this Article V.D.2.a., this Agreement shall automatically terminate insofar as it covers such Participation Unit; provided, however, this Agreement shall not terminate as to such unit if Unit Operator commences additional drilling or reworking operations on the Retained Participation Unit within ninety (90) days after such cessation, and this Agreement shall remain in full force and effect as to the Retained Participation Unit for so long as Unit Operator conducts such operations in accordance with the standards contained in Article V.B without interruptions totaling more than ninety (90) days. If such drilling or reworking operations result in the production of oil or gas in paying quantities, then this Agreement shall remain in full force and effect as to such Retained Participation Unit for so long as oil or gas is produced

therefrom in paying quantities or payment of shut-in oil or gas well royalties or payment of compensatory royalties is made with respect to such Retained Participation Unit as provided in the Delaware Ranch Lease or as provided by law. If the drilling or reworking operations result in the completion of a well as a dry hole, this Agreement will not terminate as to such Retained Participation Unit if Unit Operator commences additional drilling or reworking operations on such unit within ninety (90) days after the completion of the well as a dry hole, and this Agreement shall remain in effect as to such Retained Participation Unit for as long as Unit Operator continues drilling or reworking operations in accordance with the standards contained in Article V.B without interruptions totaling more than ninety (90) days. Unit Operator shall give written notice to the GLO and Wise within thirty (30) days of any cessation of production lasting more than the applicable time period specified in this Article V.B.2.a. within thirty (30) days after the expiration of such time period. In the event Unit Operator has drilled and completed 100 or more Horizontal Drainhole Wells on the Unit Area or Wise Unit No. 2 Unit Area, or on both of said unit areas, that are producing or capable of producing Unitized Substances in paying quantities at the time this Article V.B.2.a. is invoked, all references to "ninety (90) days" in this Article V.B.2.a. will be replaced with "one hundred twenty (120) days". In the event Unit Operator has drilled and completed 200 or more Horizontal Drainhole Wells on the Unit Area or Wise Unit No. 2 Unit Area, or on both of said unit areas, that are producing or capable of producing Unitized Substances in paying quantities at the time this Article V.B.2.a. is invoked, all references to "ninety (90) days" in this Article V.B.2.a. will be replaced with "one hundred fifty (150) days".

b. Upon the expiration of five (5) years following the Termination of Continuous Development, if any, or January 1, 2028, whichever is later to occur, this Agreement shall automatically expire as to all of the:

i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Retained Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except the depths situated between the top of the shallowest formation within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not) and the base of the deepest formation within such Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically

terminate insofar as it covers such Retained Participation Unit.

c. Upon the expiration of ten (10) years following the Termination of Continuous Development, if any, or January 1, 2038, whichever is later to occur, this Agreement shall automatically expire as to all of the:

i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except each formation within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

d. Upon the expiration of twenty (20) years following the Termination of Continuous Development, if any, or January 1, 2048, whichever is later to occur, this Agreement shall automatically expire as to all of the:

i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Retained Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except each Horizon within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

E. Pursuant to the consolidation and unitization of the lands and Leases in Article III of this Agreement and the creation of the Wise Unit No. 2, and subject to the provisions of the Chevron/Wise SUA, Unit Operator may develop the Unit Area utilizing Horizontal Drainhole Wells, offsite tract surface locations, or offsite tract penetration points drilled in,

under, or between the lands and Leases identified in Exhibits "A" and "B" or drilled in, under, or between the lands and Leases located in the Unit Area or in the Wise Unit No. 2, as permitted by Ford, West (Wolfcamp) Field Rule No. 2 issued in Texas Railroad Commission Oil and Gas Docket No. 08-0297138 on January 12, 2016, by 16 Tex. Admin. Code §3.86(g), by other applicable field rules, or by any successor rule, regulation or law.

F. Unit Operator shall conduct all of its activities hereunder as would a reasonable prudent operator under all of the relevant facts and circumstances to the end that the Unit Area shall be fully developed in accordance with all of the terms and conditions of this Agreement.

VI. TERM AND TERMINATION:

A. Subject to the Commissioner's approval, this Agreement shall be effective upon the Effective Date, and shall continue in force and effect as provided above. Unit Operator, together with Working Interest Owners owning not less than 75% of the working interest in the Unit Area on an acreage basis, may voluntarily terminate this Agreement as to all or any portion of the Unit Area, save and except any lands and depths comprising a Participation Unit or Retained Participation Unit that is dedicated to a well from which oil and/or gas is then being produced, or capable of being produced, in paying quantities, upon sixty (60) days advance written notice to the Commissioner. Termination of this Agreement, in whole or part, shall not relieve Unit Operator or the non-operating Working Interest Owners of any obligations, including without limitation plugging any well in accordance with the requirements of the Lease or applicable law, that may have accrued prior to the date of such termination.

B. Should this Agreement terminate in whole or part for any cause, the Leases and any other contracts affecting the lands within the Unit Area, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under such Leases or contracts and such production had ceased on the date of such termination or partial termination of this Agreement.

VII. ALLOCATION OF PRODUCTION:

A. Unit Area Wells. Subject to Article VII.B below, all unitized substances produced from the Unit Area, and from any Retained Participation Units subsequent to Termination of Continuous Development, shall be allocated to the below-listed owners, and all proceeds of such production and the royalties thereon shall be paid to the owners in the following proportions:

CHEVRON	86.052567%
GLO	06.251856%
WISE ASSET NO. 8, LTD.	06.013533%
WISE ASSET NO. 10, LTD.	01.630843%
Stephen Neil Prewitt	00.025601%
John Collins Prewitt	00.025601%

In addition to the surface commingling authorized under Article III.B, the GLO and WISE hereby grant Unit Operator the authority to surface commingle Unitized Substances produced solely from the Unit Area, including any Retained Participation Unit, or any

Participation Unit, and GLO and WISE agree that such authorization satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3), and any successor rule, regulation or law.

B. Unit Crossing Wells. The Unit Operator is hereby authorized to drill Horizontal Drainhole Wells across the boundary lines between the Unit Area and the Wise Unit No. 2 Unit Area ("Unit-Crossing Wells"). Each such unit area will be deemed to have produced a portion of the oil and gas produced from a Unit-Crossing Well on the basis of an allocation factor. For the Unit Area, the allocation factor is a fraction, the numerator of which is equal to the length of the Horizontal Drainhole Displacement of the Unit-Crossing Well that lies under the Unit Area and the denominator of which is equal to the total length of the Horizontal Drainhole Displacement of the Unit-Crossing Well. Likewise, for the Wise Unit No. 2 Unit Area, the allocation factor is a fraction, the numerator of which is equal to the length of the Horizontal Drainhole Displacement of the Unit-Crossing Well that lies under the Wise Unit No. 2 Unit Area and the denominator of which is the total length of the Horizontal Drainhole Displacement of the Unit-Crossing Well. Each owner in the Unit Area and the Wise Unit No. 2 Unit Area will receive its proportionate share, as described in the respective Agreement or Wise Unit No. 2 Unit Agreement, of the production or proceeds from a Unit-Crossing Well based upon the applicable allocation formula, as provided above.

C. Production in Kind. Nothing contained in this Agreement shall be construed to alter any person's or Party's right to take its allocated share of oil or gas production in kind. Royalties payable to the State of Texas and Owners on allocated production shall be computed and paid in the time and manner provided for in the Leases.

VIII. MINIMUM ROYALTY, COMPENSATORY ROYALTY AND DUTY TO PROTECT FROM DRAINAGE:

A. Any minimum royalties that become due under any of the Leases shall be computed and paid in accordance with the terms of such Lease, and nothing in this Agreement shall operate to relieve the lessee or lessees under such Lease from the obligation to pay such minimum royalty as provided therein.

B. The drilling and completion of a well within the Unit Area pursuant to this Agreement, or on both the Unit Area and the Wise Unit No. 2 Unit Area pursuant to this Agreement and the Wise Unit No. 2 Unit Agreement, shall not obligate the lessee under any express or implied provision of any of the Leases to drill an offset well, pay compensatory royalty or otherwise protect the lands covered by such Lease from drainage; however, nothing in this Agreement shall relieve Operator from protecting lands within the Unit Area, as would a reasonably prudent operator, from drainage occurring from wells on lands, other than lands then subject to the Wise Unit No. 2 Unit Agreement, situated outside the Unit Area.

IX. LEASES EXTENDED AND CONFORMED:

A. The terms and provisions of all Leases and any other contracts relating to exploration, drilling, development or operation for Unitized Substances on lands committed to this Agreement are hereby expressly modified and amended to the extent, and only to the extent, necessary to make them conform to the provisions hereof, but such Leases and contracts, if any, shall otherwise remain in force and effect subject to and in accordance with their terms; and the Commissioner by his approval hereof does hereby establish, alter,

or change the drilling, producing and royalty requirements of the Leases committed hereto to the extent, and only to the extent, necessary to conform said requirements to the provisions of this Agreement. Notwithstanding the provisions of this Article IX.A, the termination or partial termination of this Agreement alone will not in any way effect a similar, or any, termination or partial termination of any of the Leases, and the Leases are not modified or amended to effect such a termination or partial termination. Despite the termination or partial termination of this Agreement, the Leases will continue in full force and effect, or expire or terminate in whole or part, subject to and in accordance with their respective terms and in accordance with Article VI.B.

B. Prior to the Termination of Continuous Development, drilling operations on and/or production of Unitized Substances from any tract of land covered by this Agreement will be deemed to be drilling operations on and/or production of Unitized Substances from all of the tracts comprising the Unit Area, and no Lease shall be deemed to have expired by reason of the lessee's failure to conduct any such operations on, or produce Unitized Substances from, any of the lands covered by such Lease.

C. From and after the Termination of Continuous Development or any other partial termination of this Agreement, and notwithstanding any other provision of this Agreement to the contrary, each of the Leases may be maintained in force as to lands and depths that are not subject to this Agreement only as provided in such Leases without regard to operations on or production pursuant to this Agreement; and neither operations on nor production from the lands and depths subject to this Agreement, nor the payment of shut-in royalties from a well drilled pursuant to this Agreement, shall serve to maintain any of the Leases in force as to any lands or depths that are not subject to this Agreement, regardless of whether the production or operations on the Unit Area, or the well for which shut-in royalties are being paid, are actually located on such Lease or not.

X. GENERAL:

A. Notices. All notices, demands, or communications required hereunder shall be in writing and shall be delivered by certified mail, commercial courier, personal delivery, or facsimile, to the receiving party at its address listed under its signature line below. Parties may change their address of record on thirty (30) days advance written notice.

B. Force Majeure. If, after good faith effort and the exercise of due care and diligence Unit Operator is prevented from complying with any covenant or obligation to conduct drilling operations on or produce Unitized Substances from the lands covered by this Agreement by reason of war, rebellion, riots, strikes, acts of God, or any valid order, rule or regulation of government authority, then while so prevented, Unit Operator's obligation to comply with such covenant or obligation shall be suspended and Unit Operator shall not be liable for damages for failure to comply therewith; provided, however, nothing in this provision shall suspend any financial obligations.

C. Covenants run with the land. The covenants herein shall be construed to be covenants running with the land with respect to the interests of the Parties, their successors or assigns, and any grant, transfer or conveyance of an interest in any land or Lease subject to this Agreement shall be and is hereby conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, assignee, or other successor in interest.

D. Counterparts. This Agreement may be executed in any number of counterparties, none of which

need be executed by all Parties, or may be ratified or consented to by separate written instrument specifically referring hereto, and shall be binding upon all parties who have executed a counterpart, ratification or consent to this Agreement, with the same force and effect as if all such parties had signed the same document.

E. Wise execution. Wise, as Owner under the Delaware Ranch Lease, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

F. Exhibits. All exhibits attached to this Agreement are made a part hereof.

[Remainder of page intentionally left blank]

XI. EXECUTION:

IN WITNESS WHEREOF, this Agreement is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

Date Filed: 5/3/18

George P. Bush, Commissioner

By

UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 2 - STATE UNIT CULBERSON COUNTY, TEXAS

This AGREEMENT (herein "Agreement"), approved and executed by the Commissioner of the General Land Office and entered into as of the 3rd day of April, 2018, by and between the parties executing, ratifying, or consenting hereto, hereinafter the "Parties," but to be effective as of April 3, 2018 (the "Effective Date").

I. DEFINITIONS:

A. "Actual Drilling" (or "actual drilling") means the penetration of the earth with a rotary rig capable of drilling, and intended to drill, to the objective depth.

B. "CHEVRON" shall mean Chevron U.S.A. Inc.

C. "Commissioner" shall mean the Commissioner of the General Land Office of the State of Texas, his designee or authorized representative.

D. "Completed," when used to describe the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil and/or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged in accordance with applicable rules and regulations.

E. "Continuous Development" shall have the meaning ascribed thereto in Article V.C.1.a.

F. "Delaware Ranch Lease" means the first Lease listed in the Schedule of Leases in Exhibit A and described as that certain Oil and Gas Lease dated March 28, 2013, recorded in Volume 101, page 366, Oil and Gas Records of Culberson County, Texas, as amended, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as lessors, and COG Operating LLC, as lessee, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease, as amended by that certain Amendment of Oil and Gas Lease dated effective March 1, 2016, and that certain Second Amendment of Oil and Gas Lease dated effective September 1, 2017.

G. "Development Obligation" shall have the meaning ascribed thereto in Article V.C.1.a.

H. "Gas well" shall have the meaning ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

I. "GLO" shall mean the General Land Office of the State of Texas.

J. "Half Section" shall have the meaning ascribed thereto in Article V.C.3.b.i.

K. "Horizon" shall have the meaning ascribed thereto in Article V.C.3.b.i.

L. "Horizontal Drainhole Well" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

M. "Horizontal Drainhole Displacement" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

N. "Leases" shall mean those oil and gas leases identified on the Schedule of Leases in Exhibit "A."

O. "Oil well" shall have the definition ascribed thereto in Section 86.002 of the Texas Natural Resources Code.

P. "Owner" means the owner of the soil.

Q. "Participation Unit" shall have the meaning ascribed thereto in Article V.D.1.a.

R. "Plan" shall have the meaning ascribed thereto in Article 0.

S. "Retained Participation Unit" shall have the meaning ascribed thereto in Article 0.

T. "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

U. "RRC Rule 86" means Title 16, Part 1, Chapter 3, Section 86 of the Texas Administrative Code, as amended.

V. "Termination of Continuous Development" shall have the meaning ascribed thereto in Article V.C.2.a

W. "Unit Area" has the meaning ascribed thereto in Article III.A.

X. "Unitized Substances" shall have the meaning ascribed thereto in Article III.A.

Y. "Well" (or "well"), unless otherwise expressly provided in this Agreement, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

Z. "WISE" (or "Wise") shall mean collectively Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., the Owners of the lands covered by Delaware Ranch Lease.

AA. "Wise Unit No. 1 Unit Agreement" has the meaning ascribed thereto in Article III.C.

BB. "Wise Unit No. 1 Unit Area" has the meaning ascribed thereto in Article III.C.

CC. "Working interest" means the cost-bearing interest in an oil and gas lease.

DD. "Working Interest Owners" shall mean the party or parties owning the cost-bearing portion of the leasehold estate created by each Lease and the mineral fee estate committed to this Agreement; and currently being CHEVRON.

II. AUTHORITY:

A. The Commissioner is authorized by Texas Natural Resources Code §52.151, to enter into agreements that provide for operating areas as a unit for the exploration, development and production of oil or gas and to commit the interests of the State to same, and to take all actions set forth below in this Agreement.

B. CHEVRON is the current owner of all of the working interest in the Leases, and no other consent by a Working Interest Owner is required to commit to this Agreement all of the working interest in the Leases and lands lying within the Unit Area. CHEVRON is the current owner of all of the minerals under the land identified in Exhibit B as "Chevron Mineral Fee Tract", subject to non-participating royalty interests owned by Wise Asset No. 10, Ltd. under some or all of those tracts, as described in Exhibit B. No consent by a non-participating royalty interest owner is required to commit to this Agreement all of the non-participating royalty interests in the Chevron Mineral Fee Tracts lying within the Unit Area.

C. Each of the Leases that is a Relinquishment Act Lease, except the Delaware Ranch Lease, contains a provision that grants to CHEVRON as Lessee, or as successor Lessee, the right to pool or unitize the interest of the "Owner of the Soil" on the same terms as shall be approved by the School Land Board and Commissioner for pooling or unitizing the interests of the State in such Leases pursuant to Texas Natural Resources Code §§52.151-154, and which satisfies the requirements of §52.152. Paragraph 48.a. of the Delaware Ranch Lease provides: "Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas Natural Resources Code §§ 52.151 -52.154, the conflicting provision of said statutes shall control."

D. Execution of this Agreement is in the best interest of the State of Texas, will assure the orderly and efficient development of the Unit Area, and will prevent waste and protect the correlative rights of all affected parties.

III. UNIT AREA AND UNITIZED SUBSTANCES:

A. All of the lands described on the attached Exhibit "B" and depicted as the Wise Unit No. 2 on the plat attached as Exhibit "A-1" are hereby designated as the "Unit Area." Subject to all of the terms and conditions contained in this Agreement, all of said lands and Leases, insofar as same lie or cover lands within the Unit Area, together with all of the oil and gas in, under or that may be produced from the Unit Area (the "Unitized Substances"), are hereby consolidated and unitized.

B. GLO and WISE hereby grant to the Unit Operator the authority to surface commingle the oil produced from Wise Unit No. 1 or any oil that has been validly surface commingled with oil produced from Wise Unit No. 1 with oil produced from the Unit Area (including without limitation any Participation Unit or Retained Participation Unit), and to surface commingle the gas produced from Wise Unit No. 1 or any gas that has been validly surface commingled with gas produced from Wise Unit No. 1 with gas produced from the Unit Area (including without limitation any Participation Unit or Retained Participation Unit); provided, however, such authority shall be subject to Unit Operator's duty to allocate, for royalty purposes, the quantities of oil and gas produced from Wise Unit No. 1 or oil and gas that has been validly surface commingled with oil and gas produced from Wise Unit No. 1 based on monthly production tests of each of the wells located on Wise Unit No. 1 or the wells from which oil and gas has been validly surface commingled with oil and gas produced from Wise Unit No. 1. GLO and WISE each agree that such authority, if exercised by Unit Operator as provided herein, satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3) and any successor rule, regulation or law.

C. This Agreement is being entered into by the Parties simultaneously and in conjunction with that certain Unit Agreement for the Development and Operation of the Delaware Ranch, Wise Unit No. 1 – State Unit, by and among the Parties and of even date herewith (the "Wise Unit No. 1 Unit Agreement"). This Agreement covers the development and operation of the Unit Area, also known as the Wise Unit No. 2, which is a portion of the Delaware Ranch Lease. The Wise Unit No. 1 Unit Agreement covers the development and operation of a certain other portion of the Delaware Ranch Lease, as described in the Wise Unit No. 1 Unit Agreement, which portion is described herein as the "Wise Unit No. 1 Unit Area". This Agreement and the Wise Unit No. 1 Unit Agreement, together, will assure the orderly and efficient development of the Delaware Ranch Lease, prevent waste, and protect the correlative rights of all affected parties.

D. The Parties agree that the separation of the Delaware Ranch Lease into the Wise Unit No. 1 and the Wise Unit No. 2 does not create a lease line or property line for purposes of RRC spacing, density, or acreage assignment rules or regulation. Notwithstanding the foregoing, with regard to any Horizontal Drainhole Well drilled on the Unit Area whose orientation runs parallel to a boundary line between the Unit Area and the Wise Unit No. 1 Unit Area (a "Parallel Well"), the Unit Operator agrees that the Parallel Well will be permitted, drilled, and completed at a location that is at least as far away from the boundary line between the Unit Area and Wise Unit No. 1 as the standard minimum perpendicular distance to lease lines specified by applicable RRC rules.

IV. UNIT OPERATOR:

A. CHEVRON is hereby designated as Unit Operator and agrees to accept the duties and obligations as Unit Operator for the exploration, development and production of Unitized Substances as herein provided, and shall have the exclusive right, privilege and duty of exercising any and all rights of the Working Interest Owners necessary or convenient for prospecting for, exploring for, producing, storing, allocating, and distributing Unitized Substances.

B. Unit Operator shall have the right to resign at any time, but such resignation shall not become effective so as to release Unit Operator from any duties or obligations of Unit Operator or terminate Unit Operator's rights hereunder occurring or accruing prior to the effective date of its resignation. Any such resignation shall not become effective until ninety (90) days after such time as notice of Unit Operator's resignation has been served upon all other Working Interest Owners, the Commissioner and Owner unless a successor Unit Operator has been selected and is qualified to act as Unit Operator. Unit Operator, upon default or failure to perform its duties, may be removed by the Working Interest Owners, and a successor Unit Operator may be selected, in the manner provided in any Unit Operating Agreement covering the Unit Area.

C. Resignation or removal of Unit Operator under this Agreement shall not terminate its right, title or interest as a Working Interest Owner or as the owner of another interest in Unitized Substances.

D. If the Unit Operator is not the sole Working Interest Owner in the Unit Area, the costs and expenses incurred by the Unit Operator in conducting Unit operations shall be paid and apportioned among and borne by the Working Interest Owners in accordance with the Unit Operating Agreement and Accounting Procedure, or other applicable agreements, covering the Unit Area, if any, among the Working Interest Owners.

V. PLAN OF DEVELOPMENT AND OPERATIONS:

A. Plan of Development. Commencing as of the Effective Date, Unit Operator will develop the Unit Area in accordance with the terms and provisions of this Article V, generally referred to as the "Plan".

B. Standards of Unit Operator's Conduct; Drilling and Completion of Wells. At all times while this Agreement is in force, either in whole or in part, Unit Operator shall conduct its operations and activities, and otherwise fulfill its obligations, under this Agreement as would a reasonably prudent operator, in a good and workmanlike manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations and orders. Without limiting the foregoing, and except as otherwise agreed in writing by WISE, GLO, and Unit Operator, each well commenced by Unit Operator pursuant to this Agreement shall be drilled:

1. in a bona fide attempt to produce oil and/or gas;

2. at a legal location (or locations) of Unit Operator's choice on the Unit Area; and

3. with reasonable diligence through completion.

C. Continuous Development; Partial Expiration in Absence of Continuous Development.

1. Continuous Development.

a. This Agreement shall continue in force and effect as to the entire Unit Area for as long as Unit Operator has the right to conduct, and is conducting, Continuous Development. "Continuous Development" means:

i. during 2018 only, the drilling and completion, subject to Article V.C.1.b, of Horizontal Drainhole Wells on the Unit Area or on the Wise Unit No. 1 Unit Area, or on both of said unit areas, having an aggregate Horizontal Drainhole Displacement of a minimum of 176,400 feet; and

ii. during every calendar year thereafter, the drilling and completion, subject to Article V.C.1.b, of Horizontal Drainhole Wells on the Unit Area or on the Wise Unit No. 1 Unit Area, or on both of said unit areas, having an aggregate Horizontal Drainhole Displacement of a minimum of 294,000 feet.

The minimum aggregate Horizontal Drainhole Displacement that must be drilled and completed in 2018 or any subsequent calendar year in order to constitute Continuous Development, as provided above, is the "Development Obligation" for such year.

b. For purposes of Articles V.C.1 and V.C.3.a only, if actual drilling of a Horizontal Drainhole Well is commenced during 2018 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Article V.B herein, it shall be deemed that the well has

been drilled and completed during such calendar year, even if the well was actually drilled, in part, and/or completed, in whole or part, during the next succeeding calendar year.

Further, if:

(a) Unit Operator commences actual drilling of one or more Horizontal Drainhole Wells during any calendar year (the "Obligation Year") and completes such well(s) in accordance with Article V.B during the next succeeding calendar year;

(b) the Horizontal Drainhole Displacement of such well(s), if completed as planned, when taken together with any other credits earned by Unit Operator toward its Development Obligation for the Obligation Year under Articles V.C.1, V.C.3.a and V.C.3.b, would allow Unit Operator to achieve its Development Obligation for the Obligation Year; and

(c) due to causes not reasonably within Unit Operator's control (excluding economics), such wells are not completed as planned and the aggregate Horizontal Drainhole Displacement of the wells is insufficient to allow Unit Operator to meet its Development Obligation for the Obligation Year;

then, notwithstanding any other provision in Article V.C to the contrary, this Agreement will not terminate because Unit Operator failed to meet its Development Obligation for the Obligation Year due to such causes alone and Unit Operator's Development Obligation for the calendar year next succeeding the Obligation Year will automatically increase by the number of feet equal to the positive difference between Unit Operator's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Unit Operator actually earned (or for which Unit Operator was credited) toward its Development Obligation for the Obligation Year; provided, however, the provisions of this paragraph (beginning with the phrase "Further, if:") will not apply if the number of feet that is the positive difference between Unit Operator's Development Obligation for the Obligation Year and the aggregate Horizontal Drainhole Displacement Unit Operator actually earned (or for which Unit Operator was credited) toward its Development Obligation for the Obligation Year is greater than 9,800 feet.

2. Partial Expiration in Absence or Upon Cessation of Continuous Development.

a. If during 2018 or any subsequent calendar year Unit Operator fails to meet its Development Obligation for the year, then, effective as of the end of such year (the "Termination of Continuous Development"), this Agreement shall automatically terminate insofar as it covers the entire Unit Area, save and except any Retained Participation Unit. A "Retained Participation Unit" means:

i. a well producing or capable of producing Unitized Substances in

paying quantities; and

ii. that portion of the Unit Area situated within the geographic boundaries of the Participation Unit designated for such well, limited to those depths situated between the top of the Bell Canyon formation and the base of the deepest formation from which such well is then producing Unitized Substances, whether or not in paying quantities.

b. Subject to the agreements and requirements stated in subparagraphs i. and ii. immediately below, if at such time there exists more than one Retained Participation Unit, then this Agreement shall automatically be segregated into separate and distinct agreements, each of which shall cover a single Retained Participation Unit (a "Participation Unit Agreement"). Each such Participation Unit Agreement shall be deemed to contain the same terms and provisions as those set forth in this Agreement, except that the Unit Area subject to such Participation Unit Agreement shall consist solely of the single Retained Participation Unit covered thereby. Operations on and/or production from (or attributable to) the lands covered by one Participation Unit Agreement shall not serve to maintain or otherwise affect the status of any other Participation Unit Agreement. For operations on each Retained Participation Unit, Unit Operator shall retain surface and subsurface easements across or under, and rights of ingress and egress across or under, that portion of the Unit Area not included in the Retained Participation Unit for wells, production facilities, roads, pipelines, power lines, communications facilities, and otherwise necessary or useful for the purpose of producing, operating, drilling, reworking, storing, transporting, marketing, plugging and abandoning wells for oil or gas situated on the Retained Participation Unit.

i. The segregation of this Agreement into separate Participation Unit Agreements shall not create lease lines or boundary lines for purposes of the permitting of any well or take point in a Participation Unit Agreement under the rules of the RRC, and the Parties agree that no well or take point in a Participation Unit Agreement shall be required to be permitted or re-permitted because of such segregation. However, if the permitting or re-permitting of a well or take point in a Participation Unit Agreement is required because the well or take point will be nearer to a boundary of that Participation Unit Agreement than the minimum lease line spacing distance under then applicable RRC rules, the Parties agree to waive notice, hearing, and objection to a spacing exception permit for that well or take point with regard to that boundary.

ii. The provisions of the immediately preceding subparagraph i. shall be binding upon the Parties to this Agreement and their respective successors and assigns, as well as each owner of any interest in any subsequent oil or gas lease covering all or part of the Unit Area, and shall be a covenant running with the land.

3. Credits Toward Development Obligation.

a. Credit for Excess Drilling. Subject to the further provisions of this Article 5.C.3.a., if the aggregate Horizontal Drainhole Displacement of the Horizontal Drainhole Wells Unit Operator drills and completes during 2018 or any subsequent calendar year exceeds Unit Operator's Development Obligation for the year, Unit Operator shall have the right to apply the excess (i.e., the positive difference between the aggregate Horizontal Drainhole Displacement Unit Operator actually drilled and completed during such year and Unit Operator's Development Obligation for the year) as a credit toward its Development Obligation for the next succeeding calendar year ("Displacement Credit"). The aggregate Horizontal Drainhole Displacement drilled and completed by Unit Operator during any given calendar year shall be computed as the Horizontal Drainhole Displacement actually drilled and completed by Unit Operator during such year plus any Displacement Credit Unit Operator has the right to apply toward its Development Obligation for the year; provided, however, the maximum Displacement Credit that may be earned during any given calendar year and applied as a credit toward Unit Operator's Development Obligation during the next succeeding calendar year is 176,400 feet, if the credit is earned during 2018, or 294,000 feet, if the credit is earned during any subsequent calendar year.

b. Credit for Density Drilling.

i. For purposes of this Agreement, "Horizon" means a stratum of earth thought to contain a common accumulation of oil or gas separately producible from any other common accumulation of oil or gas. A Horizon may comprise one of several stratigraphic intervals or zones within a geologic formation or an entire formation. By way of illustration and not limitation, the Wolfcamp formation or interval may consist of four (or more) Horizons known as the Wolfcamp A, Wolfcamp B, Wolfcamp C and Wolfcamp D, and the Bone Spring formation or interval may consist of eight (or more) Horizons known as the Avalon (or Avalon formation), Charkey (or Charkey formation), the 1st, 2nd and 3rd Bone Spring Carbonates and the 1st, 2nd and 3rd Bone Spring Sands. A "Half Section" means a single legal subdivision of a section of land comprising one-half of the section.

ii. If during any rolling 365-day time period Unit Operator completes Horizontal Drainhole Wells on the Unit Area having an aggregate Horizontal Drainhole Displacement within the same Horizon in any two adjacent Half Sections equal to at least 78,400 feet, then Lessee shall receive credit toward its Development Obligation equal to 25% of the aggregate Horizontal Drainhole Displacement of such wells situated within such Half Sections for the calendar year in which the completion of the last of such wells occurs. For purposes of the immediately preceding sentence, the last of such wells is the well which when completed in accordance this paragraph causes the aggregate Horizontal Drainhole

Displacement for such 365-day time period to meet or exceed 78,400 feet. Two Half Sections shall be considered to be adjacent if:

(a) the wells for which credit is being given are oriented in generally a north-south direction and the eastern boundary line of one of the Half Sections is common with the western boundary line of the other Half Section; or

(b) the wells for which credit is being given are oriented in generally an east-west direction and the northern boundary line of one of the Half Sections is common with the southern boundary line of the other Half Section.

Any credit earned under this Article V.C.3.b. shall be in addition to any Continuous Development credited earned under Section V.C.1 and any Displacement Credit earned under Article V.C.3.a.

D. Participation Units: Additional Participation Unit Termination Events.

1. Participation Units.

a. Upon completion of any well on the Unit Area as a producer of, or as a well capable of producing, Unitized Substances in paying quantities, Unit Operator shall dedicate to such well, in accordance with the further provisions of this Article V.D., a geographic area encompassing and surrounding such well (a "Participation Unit"); provided, however:

i. if the well is completed in an existing Participation Unit and under the further provisions of this Article V.D. the Participation Unit for such well can be the same in size and location as the existing Participation Unit, then Unit Operator may, but shall not be required, to dedicate the existing Participation Unit as the Participation Unit for such well; or

ii. if the well is completed in an existing Participation Unit, but under the further provisions of this Article V.D. the Participation Unit for such well is required or allowed to be different in size or location as the existing Participation Unit, then Unit Operator shall dedicate a new Participation Unit to such well in accordance with the further provisions of this Article V.D.

It is understood and agreed that a Participation Unit dedicated to one well or wells may overlap with the Participation Unit dedicated to another well or wells; and in the event two or more Participation Units do overlap, each of such Participation Units shall, for all purposes of this lease, be treated as a separate and distinct Participation Unit.

On or before January 31 of each calendar year beginning in 2019, but in

no event later than 45 days following the Termination of Continuous Development or any other termination or partial termination of this Agreement, Unit Operator shall designate for each of the wells completed during the preceding calendar year the Participation Unit dedicated thereto by one or more written instruments, record the instruments in Culberson County, Texas, and furnish copies of the recorded instruments, with the recording information prominently displayed thereon, to Owner and the State of Texas.

Each Participation Unit shall be effective as of the date of first production of Unitized Substances from the first well to which such Participation Unit was dedicated. Each Participation Unit shall conform to the spacing, density and proration provisions for such well, as permitted or prescribed in applicable RRC rules and/or orders; provided, however, no Participation Unit shall contain more than the maximum amount of acreage specified in the following tables, plus a tolerance of ten percent (10%):

VERTICAL WELLS		
Deepest Producing Formation in Participation Unit		**Maximum Size of Participation Unit (in acres)**
Top of Bell Canyon through Base of Brushy Canyon		40
Top of Bone Spring through Base of Wolfcamp		80

	for each additional 1,337-foot increment	an additional 80 acres
** If the distance from the first take point to the last take point is less than 100', then, for purposes of computing the maximum amount of acreage that may be included in the Participation Unit designated for such well, the well shall be deemed to be a Vertical Well.*		

b. Each Participation Unit shall also be as nearly in the form of a square or rectangle as is reasonably practicable, and the take point locations of the well or wells to which such Participation Unit has been dedicated shall be at legal locations in, on or under such Participation Unit. GLO, any Parties ratifying this Agreement and, subject to that certain Surface Use Agreement dated effective June 20, 2013, between CHEVRON and Wise, as amended (the "Chevron/Wise SUA"), WISE authorize and consent to the development of the Unit Area utilizing Horizontal Drainhole Wells, offsite tract surface locations and offsite tract penetration points for wells on any Participation Unit or Retained Participation Unit, as permitted by Ford, West (Wolfcamp) Field Rule No. 2 issued in Texas Railroad Commission Oil and Gas Docket No. 08-0297138 on January 12, 2016, by RRC Rule 86, subsection (g), by other applicable field rules or laws, or by any successor rule, regulation or law. "Penetration point" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

c. Nothing herein shall be construed as prohibiting Unit Operator from revising an existing Participation Unit as to the amount or configuration of acreage included therein, or other matters; provided, however, the revised Participation Unit must comply with the requirements of this Article V.D. Unit Operator may revise a Participation Unit as provided herein by recording in Culberson County, Texas, a written instrument referencing or describing the existing Participation Unit, and the well or wells to which such Participation Unit is dedicated, and describing the revised Participation Unit, and furnishing the GLO and Wise with a copy of the recorded instrument, with the recording information prominently displayed thereon. The effective date of the revised Participation Unit shall be the date such instrument is received by the GLO and Wise, or as otherwise agreed by the Parties. The provisions of this paragraph apply also to Retained Participation Units after Termination of Continuous Development.

d. Except as otherwise expressly provided in this Agreement or agreed in writing by the GLO and Wise, in advance, a Participation Unit or Retained Participation Unit formed or revised pursuant to this provision shall never contain lands other than lands in the Unit Area; provided, however, at Unit Operator's option, which must be exercised reasonably and in good faith, a Participation Unit may consist of lands situated partially in the Unit Area and partially in the Wise Unit No. 1 Unit Area.

2. Retained Participation Unit Termination Events. Notwithstanding any other provision of this Agreement to the contrary:

a. If at any time after the Termination of Continuous Development production of Unitized Substances in paying quantities from any Retained Participation Unit, after once obtained, should cease from any cause, then, subject to the further provisions of this Article V.D.2.a., this Agreement shall automatically terminate insofar as it covers such unit; provided, however, this Agreement shall not terminate as to such Participation Unit if Unit Operator commences additional drilling or reworking operations on the Retained Participation Unit within ninety (90) days after such cessation, and this Agreement shall remain in full force and effect as to the Retained Participation Unit for so long as Unit Operator conducts such operations in accordance with the standards contained in Article V.B without interruptions totaling more than ninety (90) days. If such drilling or reworking operations result in the production of oil or gas in paying quantities, then this Agreement shall remain in full force and effect as to such Retained Participation Unit for so long as oil or gas is produced therefrom in paying quantities or payment of shut-in oil or gas well royalties or payment of compensatory royalties is made with respect to such Retained Participation Unit as provided in the Delaware Ranch Lease or as provided by law. If the drilling or reworking operations result in the completion of a well as a dry hole, this Agreement will not terminate as to such Retained Participation Unit if Unit Operator commences additional drilling or reworking operations on such unit within ninety (90) days after the completion of the well as a dry hole, and this Agreement shall remain

in effect as to such Retained Participation Unit for as long as Unit Operator continues drilling or reworking operations in accordance with the standards contained in Article V.B without interruptions totaling more than ninety (90) days. Unit Operator shall give written notice to the GLO and Wise within thirty (30) days of any cessation of production lasting more than the applicable time period specified in this Article V.B.2.a. within thirty (30) days after the expiration of such time period. In the event Unit Operator has drilled and completed 100 or more Horizontal Drainhole Wells on the Unit Area or Wise Unit No. 1 Unit Area, or on both of said unit areas, that are producing or capable of producing Unitized Substances in paying quantities at the time this Article V.B.2.a. is invoked, all references to "ninety (90) days" in this Article V.B.2.a. will be replaced with "one hundred twenty (120) days". In the event Unit Operator has drilled and completed 200 or more Horizontal Drainhole Wells on the Unit Area or Wise Unit No. 1 Unit Area, or on both of said unit areas, that are producing or capable of producing Unitized Substances in paying quantities at the time this Article V.B.2.a. is invoked, all references to "ninety (90) days" in this Article V.B.2.a. will be replaced with "one hundred fifty (150) days".

b. Upon the expiration of five (5) years following the Termination of Continuous Development, if any, or January 1, 2028, whichever is later to occur, this Agreement shall automatically expire as to all of the:

i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Retained Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except the depths situated between the top of the shallowest formation within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not) and the base of the deepest formation within such Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

c. Upon the expiration of ten (10) years following the Termination of Continuous Development, if any, or January 1, 2038, whichever is later to occur, this Agreement shall automatically expire as to all of the:

i. lands within the geographic boundaries of the Retained

Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except each formation within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

d. Upon the expiration of twenty (20) years following the Termination of Continuous Development, if any, or January 1, 2048, whichever is later to occur, this Agreement shall automatically expire as to all of the:

i. lands within the geographic boundaries of the Retained Participation Unit then covered by this Agreement, save and except the minimum amount of acreage then necessary under RRC rules for each well to which such Retained Participation Unit is dedicated to be produced at maximum allowables; and

ii. depths in and under such Retained Participation Unit, save and except each Horizon within such Retained Participation Unit from which Unitized Substances are then being produced (whether in paying quantities or not);

provided, however, if at the time of such expiration Unitized Substances are not being produced, or capable of being produced, in paying quantities from such Retained Participation Unit, and this Agreement is not being maintained in force with respect to such Retained Participation Unit under another provision hereof, then this Agreement shall automatically terminate insofar as it covers such Retained Participation Unit.

E. Pursuant to the consolidation and unitization of the lands and Leases in Article III of this Agreement and the creation of the Wise Unit No. 1, and subject to the provisions of the Chevron/Wise SUA, Unit Operator may develop the Unit Area utilizing Horizontal Drainhole Wells, offsite tract surface locations, or offsite tract penetration points drilled in, under, or between the lands and Leases identified in Exhibits "A" and "B" or drilled in, under, or between the lands and Leases located in the Unit Area or in the Wise Unit No. 1, as permitted by Ford, West (Wolfcamp) Field Rule No. 2 issued in Texas Railroad Commission Oil and Gas Docket No. 08-0297138 on January 12, 2016, by 16 Tex. Admin. Code §3.86(g), by other applicable field rules, or by any successor rule, regulation or law.

F. Unit Operator shall conduct all of its activities hereunder as would a reasonable prudent operator under all of the relevant facts and circumstances to the end that the Unit Area

shall be fully developed in accordance with all of the terms and conditions of this Agreement.

VI. TERM AND TERMINATION:

A. Subject to the Commissioner's approval, this Agreement shall be effective upon the Effective Date, and shall continue in force and effect as provided above. Unit Operator, together with Working Interest Owners owning not less than 75% of the working interest in the Unit Area on an acreage basis, may voluntarily terminate this Agreement as to all or any portion of the Unit Area, save and except any lands and depths comprising a Participation Unit or Retained Participation Unit that is dedicated to a well from which oil and/or gas is then being produced, or capable of being produced, in paying quantities, upon sixty (60) days advance written notice to the Commissioner. Termination of this Agreement, in whole or part, shall not relieve Unit Operator or the non-operating Working Interest Owners of any obligations, including without limitation plugging any well in accordance with the requirements of the Lease or applicable law, that may have accrued prior to the date of such termination.

B. Should this Agreement terminate in whole or part for any cause, the Leases and any other contracts affecting the lands within the Unit Area, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under such Leases or contracts and such production had ceased on the date of such termination or partial termination of this Agreement.

VII. ALLOCATION OF PRODUCTION:

A. Unit Area Wells. Subject to Article VII.B below, all unitized substances produced from the Unit Area, and from any Retained Participation Units subsequent to Termination of Continuous Development, shall be allocated to the below-listed owners, and all proceeds of such production and the royalties thereon shall be paid to the owners in the following proportions:

CHEVRON	86.255559%
GLO	06.245201%
WISE ASSET NO. 8, LTD.	03.749620%
WISE ASSET NO. 10, LTD.	02.495581%
Texas Pacific Land Trust	01.254038%

In addition to the surface commingling authorized under Article III.B, the GLO and WISE hereby grant Unit Operator the authority to surface commingle Unitized Substances produced solely from the Unit Area, including any Retained Participation Unit, or any Participation Unit, and GLO and WISE agree that such authorization satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3), and any successor rule, regulation or law.

B. Unit Crossing Wells. The Unit Operator is hereby authorized to drill Horizontal Drainhole Wells across the boundary lines between the Unit Area and the Wise Unit No. 1 Unit Area ("Unit-Crossing Wells"). Each such unit area will be deemed to have produced a portion of the oil and gas produced from a Unit-Crossing Well on the basis of an allocation factor. For the Unit Area, the allocation factor is a fraction, the numerator of which is equal to the

length of the Horizontal Drainhole Displacement of the Unit-Crossing Well that lies under the Unit Area and the denominator of which is equal to the total length of the Horizontal Drainhole Displacement of the Unit-Crossing Well. Likewise, for the Wise Unit No. 1 Unit Area, the allocation factor is a fraction, the numerator of which is equal to the length of the Horizontal Drainhole Displacement of the Unit-Crossing Well that lies under the Wise Unit No. 1 Unit Area and the denominator of which is the total length of the Horizontal Drainhole Displacement of the Unit-Crossing Well. Each owner in the Unit Area and the Wise Unit No. 1 Unit Area will receive its proportionate share, as described in the respective Agreement or Wise Unit No. 1 Unit Agreement, of the production or proceeds from a Unit-Crossing Well based upon the applicable allocation formula, as provided above.

C. Production in Kind. Nothing contained in this Agreement shall be construed to alter any person's or Party's right to take its allocated share of oil or gas production in kind. Royalties payable to the State of Texas and Owners on allocated production shall be computed and paid in the time and manner provided for in the Leases.

VIII. MINIMUM ROYALTY, COMPENSATORY ROYALTY AND DUTY TO PROTECT FROM DRAINAGE:

A. Any minimum royalties that become due under any of the Leases shall be computed and paid in accordance with the terms of such Lease, and nothing in this Agreement shall operate to relieve the lessee or lessees under such Lease from the obligation to pay such minimum royalty as provided therein.

B. The drilling and completion of a well within the Unit Area pursuant to this Agreement, or on both the Unit Area and the Wise Unit No. 1 Unit Area pursuant to this Agreement and the Wise Unit No. 1 Unit Agreement, shall not obligate the lessee under any express or implied provision of any of the Leases to drill an offset well, pay compensatory royalty or otherwise protect the lands covered by such Lease from drainage; however, nothing in this Agreement shall relieve Operator from protecting lands within the Unit Area, as would a reasonably prudent operator, from drainage occurring from wells on lands, other than lands then subject to the Wise Unit No. 1 Unit Agreement, situated outside the Unit Area.

IX. LEASES EXTENDED AND CONFORMED:

A. The terms and provisions of all Leases and any other contracts relating to exploration, drilling, development or operation for Unitized Substances on lands committed to this Agreement are hereby expressly modified and amended to the extent, and only to the extent, necessary to make them conform to the provisions hereof, but such Leases and contracts, if any, shall otherwise remain in force and effect subject to and in accordance with their terms; and the Commissioner by his approval hereof does hereby establish, alter, or change the drilling, producing and royalty requirements of the Leases committed hereto to the extent, and only to the extent, necessary to conform said requirements to the provisions of this Agreement. Notwithstanding the provisions of this Article IX.A, the termination or partial termination of this Agreement alone will not in any way effect a similar, or any, termination or partial termination of any of the Leases, and the Leases are not modified or amended to effect such a termination or partial termination. Despite the termination or partial termination of this Agreement, the Leases will continue in full force and effect, or expire or terminate in whole or part, subject to and in accordance with their respective terms and in accordance with Article 0.

B. Prior to the Termination of Continuous Development, drilling operations on and/or production of Unitized Substances from any tract of land covered by this Agreement will be deemed to be drilling operations on and/or production of Unitized Substances from all of the tracts comprising the Unit Area, and no Lease shall be deemed to have expired by reason of the lessee's failure to conduct any such operations on, or produce Unitized Substances from, any of the lands covered by such Lease.

C. From and after the Termination of Continuous Development or any other partial termination of this Agreement, and notwithstanding any other provision of this Agreement to the contrary, each of the Leases may be maintained in force as to lands and depths that are not subject to this Agreement only as provided in such Leases without regard to operations on or production pursuant to this Agreement; and neither operations on nor production from the lands and depths subject to this Agreement, nor the payment of shut-in royalties from a well drilled pursuant to this Agreement, shall serve to maintain any of the Leases in force as to any lands or depths that are not subject to this Agreement, regardless of whether the production or operations on the Unit Area, or the well for which shut-in royalties are being paid, are actually located on such Lease or not.

X. GENERAL:

A. Notices. All notices, demands, or communications required hereunder shall be in writing and shall be delivered by certified mail, commercial courier, personal delivery, or facsimile, to the receiving party at its address listed under its signature line below. Parties may change their address of record on thirty (30) days advance written notice.

B. Force Majeure. If, after good faith effort and the exercise of due care and diligence Unit Operator is prevented from complying with any covenant or obligation to conduct drilling operations on or produce Unitized Substances from the lands covered by this Agreement by reason of war, rebellion, riots, strikes, acts of God, or any valid order, rule or regulation of government authority, then while so prevented, Unit Operator's obligation to comply with such covenant or obligation shall be suspended and Unit Operator shall not be liable for damages for failure to comply therewith; provided, however, nothing in this provision shall suspend any financial obligations.

C. Covenants run with the land. The covenants herein shall be construed to be covenants running with the land with respect to the interests of the Parties, their successors or assigns, and any grant, transfer or conveyance of an interest in any land or Lease subject to this Agreement shall be and is hereby conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, assignee, or other successor in interest.

D. Counterparts. This Agreement may be executed in any number of counterparties, none of which need be executed by all Parties, or may be ratified or consented to by separate written instrument specifically referring hereto, and shall be binding upon all parties who have executed a counterpart, ratification or consent to this Agreement, with the same force and effect as if all such parties had signed the same document.

E. Wise execution. Wise, as Owner under the Delaware Ranch Lease, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

F. Exhibits. All exhibits attached to this Agreement are made a part hereof.

[Remainder of page intentionally left blank]

XI. EXECUTION:

IN WITNESS WHEREOF, this Agreement is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.: 166150
2. Operator's Name (as shown on form P-5, Organization Report): COG OPERATING LLC
3. Operator Address (include street, city, state, zip): ONE CONCHO CENTER, 600 W ILLINOIS AVE, MIDLAND, TX 79701-0000
4. Lease Name: DR STATE EAST
5. Well No.: 3028H

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 8300
9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No
10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [ ] Yes [X] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08
12. County: CULBERSON
13. Surface Location: [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 68.97 miles in a NE direction from Van Horn, TX which is the nearest town in the county of the well site.

15. Section	16. Block	17. Survey	18. Abstract No.	19. Distance to nearest lease line	20. Number of contiguous acres in lease, pooled unit, or unitized tract:
30	60 T1S	T&P RR CO / HOLLEBEKE, P V	A-5569	200 ft.	6070.12

21. Lease Perpendiculars: 10 ft from the N line and 330 ft from the W line
22. Survey Perpendiculars: 10 ft from the N line and 330 ft from the W line

23. Is this a pooled unit? [ ] Yes [X] No
24. Unitization Docket No.:
25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION — List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	31913800	FORD, WEST (WOLFCAMP)	Oil or Gas Well	8300	50.00	4

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

[RRC STAFF Jan 5, 2017 11:29 AM]: Well count corrected to four, per RRC records. The well count for this acreage and field was 4, prior to this permit. This is a stacked lateral well and will not increase the well. Application was filed with a count of 2.; [RRC STAFF Jan 5, 2017 11:39 AM]: Nearest well distance is correct as filed. A child well can call to its own parent well in fields with zero between well spacing.

Certificate:

I certify that information stated in this application is true and complete, to the best of my knowledge.

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION
SWR #13 Formation Data

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013

ELECTRIC LOG STATUS REPORT

FORM L-1

Tracking No.: 178155

This facsimile L-1 was generated electronically from data submitted to the RRC.

Instructions

When to File Form L-1:
- with Forms G-1, W-2, and GT-1 for new and deepened gas, oil, and geothermal wells
- with Form W-3 for plugged dry holes
- when sending in a log which was held under a request for confidentiality and the period for confidentiality has not yet expired.

When is Form L-1 NOT required:
- with Forms W-2, G-1, and GT-1 filed for injection wells, disposal wells, water supply wells, service wells, re-test wells, re-classifications, and plugbacks of oil, gas or geothermal wells
- with Form W-3 for plugging of other than a dry hole

Where to File Form L-1:
- with the appropriate Commission district office

Filling out Form L-1:
- Section I and the signature section must be filled out for all wells
- complete only the appropriate part of Section II

Type of log required:
- any wireline survey run for the purpose of obtaining lithology, porosity, or resistivity information
- no more than one such log is required but it must be of the subject well
- if such log is NOT run on the subject well, do NOT substitute any other type of log; just select Section II, Part A below

SECTION I. IDENTIFICATION

Operator Name: COG OPERATING LLC	District No. 08	Completion Date: 06/29/2017
Field Name FORD, WEST (WOLFCAMP)	Drilling Permit No. 821608	
Lease Name DR STATE EAST	Lease/ID No. 283166	Well No. 3028H
County CULBERSON	API No. 42- 109-33034	

SECTION II. LOG STATUS (Complete either A or B)

☐ A. BASIC ELECTRIC LOG NOT RUN

☒ B. BASIC ELECTRIC LOG RUN. (Select one)

☒ 1. Confidentiality is requested and a copy of the header for each log that has been run on the well is attached.

☐ 2. Confidentiality already granted on basic electric log covering this interval (applicable to deepened wells only).

☐ 3. Basic electric log covering this interval already on file with Commission (applicable to deepened wells only).

☐ 4. Log attached to (select one):

☐ (a) Form L-1 (this form). If the company/lease name on log is different from that shown in Section I, please enter name on log here: _____

Check here if attached log is being submitted after being held confidential. ☐

☐ (b) Form P-7, Application for Discovery Allowable and New Field Designation.

☐ (c) Form W-4, Application for Multiple Completion:

Lease or ID No(s). _____

Well No(s). _____

Purpose: ND

Location: SUR-T&P,A-5569,BLK-60,TSHP-1S,SEC-30,--[TD=10000],[RRC 8],

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Texas Railroad Commission recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells drilled in this section 30.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. **This recommendation is intended for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).**

If you have any questions, please contact us at 512-463-2741, gau@rrc.state.tx.us, or by mail

REMARKS

CEMENTER'S CERTIFICATE: I declare under penalties prescribed in Sec. 91.143, Texas Natural Resources Code, that I am authorized to make this certification, that the cementing of casing and/or the placing of cement plugs in this well as shown in the report was performed by me or under my supervision, and that the cementing data and facts presented on both sides of this form are true, correct, and complete, to the best of my knowledge. This certification covers cementing data only.

Instructions for Form W-15, Cementing Report

NOTICE: The Form W-15 must be submitted as an attachment to a Form G-1 (Gas Well Back Pressure Test, Completion or Recompletion Report, and Log), Form W-2 (Oil Well Potential Test, Completion or Recompletion Report, and Log), Form W-3 (Plugging Record), or Form W-4 (Application for Multiple Completion), any time cement is pumped in a wellbore.

A. **What to file:** An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form.
The Form W-15 should be filed with the Form W-3, Plugging Record, unless the Form W-3 is signed by the cementing company representative. When reporting dry holes, operators must complete Form W-15, in addition to Form W-3, to show any casing cemented in the hole.

B. **How to file:** An oil and gas completion report and Form W-15 may be filed online using the Commission's Online System

(https://webapps.rrc.state.tx.us/security/login.do) or a paper copy of the form may be mailed to the Commission in Austin (P.O. Box 12967, Austin, Texas 787112967).

C. **Surface casing:** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Groundwater Advisory Unit in Austin. Sufficient cement shall be used to fill the annular space outside the casing from the shoe to the ground surface or to the bottom of the cellar. Before drilling a well, an operator must obtain a letter from the Groundwater Advisory Unit stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

To plug and abandon a well, operators must use only cementers approved by the Commission's Director of Field Operations in accordance with SWR 14 (http://info.sos.state.tx.us/pls/pub/readtac$ext.TacPage?sl=R&app=9&p_dir=&p_rloc=&p_tloc=&p_ploc=&pg=1&p_tac=&ti=16&pt=1&ch=3&rl=14). Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

D. **Estimated % wash-out:** If the estimated % wash-out is less than 20% (or 30% along the Gulf Coast), provide supporting documentation such as a caliper log to show how the estimated % wash-out was obtained.

E. **Multi-stage cement:** An operator must report the multi-stage cement shoe in II. Casing Cementing Data section by selecting the type of casing **and** Multi-stage cement shoe. The operator must report the multi-stage cement tool in III. Casing Cementing Data section by selecting the type of casing and Multi-stage cement/DV tool.

F. **Multiple parallel strings:** An operator should file the Form W-15 as an attachment to the Form W-4, Application for Multiple Completion. An operator may be required to submit multiple Form W-15s to show all data for multiple parallel strings.

G. **Slurry data:** If cement job exceeds three slurries, continue the list of slurries in the Slurry table in the subsequent Casing Cementing Data box.

Instructions for Form W-15, Cementing Report

NOTICE: The Form W-15 must be submitted as an attachment to a Form G-1 (Gas Well Back Pressure Test, Completion or Recompletion Report, and Log), Form W-2 (Oil Well Potential Test, Completion or Recompletion Report, and Log), Form W-3 (Plugging Record), or Form W-4 (Application for Multiple Completion), any time cement is pumped in a wellbore.

A. **What to file:** An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form.
The Form W-15 should be filed with the Form W-3, Plugging Record, unless the Form W-3 is signed by the cementing company representative. When reporting dry holes, operators must complete Form W-15, in addition to Form W-3, to show any casing cemented in the hole.

B. **How to file:** An oil and gas completion report and Form W-15 may be filed online using the Commission's Online System

(https://webapps.rrc.state.tx.us/security/login.do) or a paper copy of the form may be mailed to the Commission in Austin (P.O. Box 12967, Austin, Texas 787112967).

C. **Surface casing:** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Groundwater Advisory Unit in Austin. Sufficient cement shall be used to fill the annular space outside the casing from the shoe to the ground surface or to the bottom of the cellar. Before drilling a well, an operator must obtain a letter from the Groundwater Advisory Unit stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.

To plug and abandon a well, operators must use only cementers approved by the Commission's Director of Field Operations in accordance with SWR 14 (http://info.sos.state.tx.us/pls/pub/readtac$ext.TacPage?sl=R&app=9&p_dir=&p_rloc=&p_tloc=&p_ploc=&pg=1&p_tac=&ti=16&pt=1&ch=3&rl=14). Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

D. **Estimated % wash-out:** If the estimated % wash-out is less than 20% (or 30% along the Gulf Coast), provide supporting documentation such as a caliper log to show how the estimated % wash-out was obtained.

E. **Multi-stage cement:** An operator must report the multi-stage cement shoe in II. Casing Cementing Data section by selecting the type of casing **and** Multi-stage cement shoe. The operator must report the multi-stage cement tool in III. Casing Cementing Data section by selecting the type of casing and Multi-stage cement/DV tool.

F. **Multiple parallel strings:** An operator should file the Form W-15 as an attachment to the Form W-4, Application for Multiple Completion. An operator may be required to submit multiple Form W-15s to show all data for multiple parallel strings.

G. **Slurry data:** If cement job exceeds three slurries, continue the list of slurries in the Slurry table in the subsequent Casing Cementing Data box.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

GLO UNIT #8954

Re: Request for Commission Statewide Rule 37 Exception Waiver
DR State Wise Unit 1 No. 0021 WA
Sections 5 & 8, Block 60, Township 1, T&P RR Co. Survey, Culberson County, Texas

Mr. Sadler:

Chevron U.S.A. Inc. ("Chevron") hereby requests that Cimarex Energy Co. ("Cimarex") waive any and all objections to the granting of an exception to Commission Statewide Rule 37 for between well spacing subject to Oil and Gas Docket No. 08-0297138, Rule 2 of the Ford, West (Wolfcamp) Field Rules of the Railroad Commission of the State of Texas for the DR State Wise Unit 1 No. 0021 WA situated in Sections 5 & 8, Block, 60, Township 1, T&P RR Co. Survey, Culberson County, Texas as shown on the attached plat.

Chevron requests Cimarex's agreement to the above by causing their authorized representative to sign and date this letter in the space provided. In consideration for Cimarex's waiver for the for the DR State Wise Unit 1 No. 0021 WA, Chevron will grant Cimarex a similar waiver for one well permitted in the Ford, West (Wolfcamp) Field.

Sincerely,

Robert Endicott
Land Representative

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Date Issued:	16 March 2018	**GAU Number:**	190817

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 17/05 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0021WA
		Total Vertical Depth:	9000
		Latitude:	31.969511
		Longitude:	-104.287814
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2803; Block-60; Township-1; Section-17

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/15/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

RE: Lease: DR STATE WISE UNIT 1
Well No: 0021WA
Sec: 17 **Block:** 60 T1
County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 29362 **Drilling Permit No:** 839203

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ;
WELL NUMBER: 0021WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2000 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

Please notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface
casing is set.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 05/04/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

GLO UNIT #8954
MF #114883

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Date Issued:	16 March 2018	**GAU Number:**	190819

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 17/05 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0023WA
		Total Vertical Depth:	9000
		Latitude:	31.969512
		Longitude:	-104.287653
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2803; Block-60; Township-1; Section-17

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/15/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 29381 **Drilling Permit No:** 839126

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ;
WELL NUMBER: 0023WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2000 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 05/04/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

NOTES:

1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

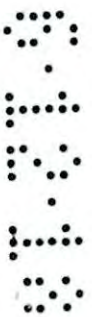
SWR #13 Formation Data

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013
WOLFCAMP	7,900	9,100		7	12/17/2013
ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.
http://www.rrc.texas.gov/oil-gas/compliance-enforcement/rule-13-geologic-formation-info



MF #114883 GLO Unit #8954

Application Status # 839152

SWR Exception Case/Docket No.

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION

APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Pending Approval

The RRC has not approved this application. Duplication or distribution of information is at the user's own risk.

1. RRC Operator No.	2. Operator's Name (as shown on form P-5, Organization Report)	3. Operator Address (include street, city, state, zip):
148113	CHEVRON U. S. A. INC.	6301 DEAUVILLE BLVD MIDLAND, TX 79706-0000

4. Lease Name	5. Well No.
DR STATE WISE UNIT 1	0024WA

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 9000

9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No

10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08

12. County: CULBERSON

13. Surface Location [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 24.45 miles in a NW direction from ORLA which is the nearest town in the county of the well site.

15. Section	16. Block	17. Survey	18. Abstract No.	19. Distance to nearest lease line:	20. Number of contiguous acres in lease, pooled unit, or unitized tract:
17	60 T1	T&P RR CO	A-2803	330 ft.	46533.82

21. Lease Perpendiculars: 11079 ft from the N line and 6982 ft from the E line.

22. Survey Perpendiculars: 85 ft from the N line and 1565 ft from the E line.

23. Is this a pooled unit? [X] Yes [ ] No

24. Unitization Docket No:

25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	31913800	FORD, WEST (WOLFCAMP)	Oil or Gas Well	9000	513.00	11

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

Certificate:

I certify that information stated in this application is true and complete, to the best of my knowledge.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Title: PERMIT SPECIALIST | E-mail (if available) | Date: 04/23/2018 | Phone: (432) 687-7167

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO Unit # 8954
MF # 114883

Date Issued:	16 March 2018	**GAU Number:**	190819

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 17/05 STATE
Operator No.:	148113	**Lease Number:**	
		Well Number:	0023WA
		Total Vertical Depth:	9000
		Latitude:	31.969512
		Longitude:	-104.287653
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2803; Block-60; Township-1; Section-17

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/15/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 29382 **Drilling Permit No:** 839152

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ;
WELL NUMBER: 0024WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2000 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 05/04/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

GLO UNIT #8954
MF #114883

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION
SWR #13 Formation Data

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013
WOLFCAMP	7,900	9,100		7	12/17/2013
ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.
http://www.rrc.texas.gov/oil-gas/compliance-enforcement/rule-13-geologic-formation-info

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

		Phone: (432) 687-7167

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Date Issued:	16 March 2018	**GAU Number:**	190817

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 17/05 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0021WA
		Total Vertical Depth:	9000
		Latitude:	31.969511
		Longitude:	-104.287814
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2803; Block-60; Township-1; Section-17

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/15/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 29363 **Drilling Permit No:** 839125

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ; **WELL NUMBER:** 0022WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2000 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 05/04/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION
SWR #13 Formation Data

GLO UNIT #8954
MF #114883

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013
WOLFCAMP	7,900	9,100		7	12/17/2013
ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.

APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.	2. Operator's Name (as shown on form P-5, Organization Report)	3. Operator Address (include street, city, state, zip)
148113	CHEVRON U. S. A. INC.	6301 DEAUVILLE BLVD MIDLAND, TX 79706-0000

4. Lease Name	5. Well No.
DR STATE WISE UNIT 1	0011WA

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 9000

9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No

10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08

12. County: CULBERSON

13. Surface Location [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 24.88 miles in a NW direction from ORLA which is the nearest town in the county of the well site.

15. Section	16. Block	17. Survey	18. Abstract No.	19. Distance to nearest lease line:	20. Number of contiguous acres in lease, pooled unit, or unitized tract:
17	60 T1S	T&P RR CO	A-2803	85 ft.	46533.82

21. Lease Perpendiculars: 39860 ft from the W line and 11085 ft from the N line.

22. Survey Perpendiculars: 85 ft from the N (OFFLEASE) line and 1360 ft from the W (OFFLEASE) line.

23. Is this a pooled unit? [X] Yes [ ] No

24. Unitization Docket No:

25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	31913800	FORD, WEST (WOLFCAMP)	Oil or Gas Well	9000	2915.00	5

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

Permit # 838801

Approved Date: Apr 17, 2018

[FILER Apr 12, 2018 10:55 AM]: P-4s are being submitted for existing wells to change the lease names for the wells that are listed on the P-16, to DR State Wise Unit 1 04/12/18 (walking the P-4s to Austin RRC for quick approval).; [RRC STAFF Apr 12, 2018 4:31 PM]: SHL marked as on lease.; [RRC STAFF Apr 12, 2018 4:35 PM]: There have been problems identified with this permit (see problem letter attachment). Notification sent.; [RRC STAFF Apr 16, 2018 11:02 AM]: Problems identified with this permit are resolved.; [RRC STAFF Apr 16, 2018 11:26 AM]: Per Luis Aceves; "Regarding Issue #1 on the attached letter, our surveyor has confirmed that the coordinates shown on the plats are correct. Please advise if you need any additional information." A revised plat has been attached to correct item #2 in the problem letter.; [RRC STAFF Apr 16, 2018 12:35 PM]: There have been problems identified with this permit (see problem letter attachment). Notification sent.; [RRC STAFF Apr 17, 2018 10:40 AM]: Problems identified with this permit are resolved.; [RRC STAFF Apr 17, 2018 10:46 AM]: Dorian Fuentes provided a revised P-16.; [RRC STAFF Apr 17, 2018 10:51 AM]: Well count reduced to 5. Well #3028H is a stacked lateral. Stacked lateral wells are not included in the well count.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Date Issued:	16 March 2018	**GAU Number:**	190812

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 17/05 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0011WA
		Total Vertical Depth:	9000
		Latitude:	31.969501
		Longitude:	-104.295825
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2803; Block-60; Township-1; Section-17

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/15/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 28112 **Drilling Permit No:** 838801

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ;
WELL NUMBER: 0011WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2550 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

Please notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 05/10/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

Hello Joy,

Attached hereto, are copies of the subject drill permit packets as required by Title 31 Section 9.32(C) and the hard copies will follow via overnight mail. As per your instructions, we are utilizing the lowest mineral file number in the unit as indicated on each of the forms.

Please let us know if you have any questions.

Regards,

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION

SWR #13 Formation Data

GLO UNIT #8954
MF #114883

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013
WOLFCAMP	7,900	9,100		7	12/17/2013
ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Date Issued:	16 March 2018	**GAU Number:**	190812

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 17/05 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0011WA
		Total Vertical Depth:	9000
		Latitude:	31.969501
		Longitude:	-104.295825
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2803; Block-60; Township-1; Section-17

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/15/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

State: TX

RE: Lease: DR STATE WISE UNIT 1
Well No: 0012WA
Sec: 17 **Block:** 60 T1S
County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 28113 **Drilling Permit No:** 838806

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ;
WELL NUMBER: 0012WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2550 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 04/17/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

Hello Joy,

Attached hereto, are copies of the subject drill permit packets as required by Title 31 Section 9.32(C) and the hard copies will follow via overnight mail. As per your instructions, we are utilizing the lowest mineral file number in the unit as indicated on each of the forms.

Please let us know if you have any questions.

RE: DR State East 1602H
API #42-109-32577
Cessation of production

In accordance with the terms of that certain Relinquishment Act Oil and Gas Lease dated March 28, 2013, between Wise Asset No. 8, LTD and Wise Asset No. 10, LTD, as Agent, and COG Operating LLC, as Lessee (GLO Number MF114883), the letter provides notice of cessation of production of the DR State East 1602H well (API 42-109-32577).

The subject well went down on 4/23/2018 due to pumping unit repairs. The plan is to restore it to production once the repairs are completed.

Technical questions regarding this well should be directed to Hussein Chebli at (432) 687-7914 or hachebli@chevron.com. Land-related questions regarding this well should be directed to Katie Halley at (432)-687-7572 or khalley@chevron.com.

Sincerely,

Hussein Chebli
Production Engineer

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

GLO UNIT #8954
MF #114883

RAILROAD COMMISSION OF TEXAS

ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Date Issued:	09 April 2018	**GAU Number:**	190813

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 17/05 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0013WA
		Total Vertical Depth:	9000
		Latitude:	31.969501
		Longitude:	-104.295664
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2803; Block-60; Township-1; Section-17

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells within a radius of 500 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/30/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

RE: Lease: DR STATE WISE UNIT 1
Well No: 0014WA
Sec: 17 **Block:** 60 T1S
County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 28115 **Drilling Permit No:** 838809

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ;
WELL NUMBER: 0014WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2550 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 04/17/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

Hello Joy,

Attached hereto, is a copy of the subject drill permit packet as required by Title 31 Section 9.32© and the hard copies will follow via USPS certified mail. As per your directive, we are utilizing the lowest mineral file number in the unit as indicated on each of the forms.

Please let us know if you have any questions.

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

GLO Unit #8954
MF #114883

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION

SWR #13 Formation Data

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013

ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.
http://www.rrc.texas.gov/oil-gas/compliance-enforcement/rule-13-geologic-formation-info

MF #114883

Permit Status: As Submitted

The RRC has not approved this application. Duplication or distribution of information is at the user's own risk.

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION

Form W-1H 07/2004
Supplemental Horizontal Well Information

APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

Status # 838807

Approved Date:

1. RRC Operator No.	2. Operator's Name (exactly as shown on form P-5, Organization Report)	3. Lease Name	4. Well No.
148113	CHEVRON U. S. A. INC.	DR STATE WISE UNIT 1	0013WA

Lateral Drainhole Location Information

5. Field as shown on Form W-1: FORD, WEST (WOLFCAMP) (Field # 31913800, RRC District 08)

6. Section	7. Block	8. Survey	9. Abstract	10. County of BHL
17	60 T1S	T&P RR CO	2803	CULBERSON

11. Terminus Lease Line Perpendiculars
20 ft. from the N line. and 1650 ft. from the W line

12. Terminus Survey Line Perpendiculars
20 ft. from the N line. and 1650 ft. from the W line

13. Penetration Point Lease Line Perpendiculars
200 ft. from the S line. and 1650 ft. from the W line

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 17/05 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0013WA
		Total Vertical Depth:	9000
		Latitude:	31.969501
		Longitude:	-104.295664
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2803; Block-60; Township-1; Section-17

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 150 feet must be protected.

This recommendation is applicable to all wells within a radius of 500 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/30/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 28114
Drilling Permit No: 838807

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ; **WELL NUMBER:** 0013WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2550 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 04/17/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

Term:	

RRC Rules:	**Spacing Acres:**
Yes	1,820 acres for a 10,000 foot lateral (FTP to LTP).

Working File Number: UPA180121

REMARKS:

- Chevron U.S.A. Inc. is requesting permanent oil and gas pooling of all depths in order to test the Wolfcamp formation.
- With Board appoval of the unit the State's unit royalty participation will be 7.10%.
- The State will participate on a unitized basis from the date of first production.
- The applicant agrees to spud three wells per year for a total of 28 unit wells.

POOLING COMMITTEE RECOMMENDATION:

The Pooling Committee recommends Board approval of a permanent oil and gas unit under the above-stated provisions.

UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE TAYLOR RANCH STATE UNIT CULBERSON COUNTY, TEXAS

This AGREEMENT (herein "Agreement"), approved and executed by the Commissioner of the General Land Office and effective as of the 5th day of June 2018 (the "Effective Date"), by and between the parties executing, ratifying, or consenting hereto, hereinafter the "Parties."

I. DEFINITIONS:

A. "CHEVRON" shall mean Chevron U.S.A. Inc.

B. "Commissioner" shall mean the Commissioner of the General Land Office of the State of Texas, his designee or authorized representative.

C. "Completed" when used to describe the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged in accordance with applicable rules and regulations.

D. "Continuous Development" shall have the meaning ascribed thereto in Article V.C.1.a.

E. "Delaware Ranch Lease" means the first Lease listed in the Schedule of Leases in Exhibit A and described as that certain Oil and Gas Lease dated March 28, 2013, recorded in Volume 101, page 366, Oil and Gas Records of Culberson County, Texas, as amended, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as lessors, and COG Operating LLC, as lessee, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease, as amended by that certain Amendment of Oil and Gas Lease dated effective March 1, 2016, that certain Second Amendment of Oil and Gas Lease dated effective September 1, 2017, and that certain Third Amendment of Oil and Gas Lease dated effective February 6, 2018.

F. "Development Obligation" shall have the meaning ascribed thereto in Article V.C.1.a.

G. "GLO" shall mean the General Land Office of the State of Texas.

H. "Horizontal Drainhole Well" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

I. "Leases" shall mean those oil and gas leases identified on the Schedule of Leases in Exhibit "A."

J. "Owner" means the owner of the soil.

K. "Retained Unit" shall have the meaning ascribed thereto in Article V.C.2.a.

L. "Revised Unit Area" shall have the meaning ascribed thereto in Article VI.A.

M. "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

N. "RRC Rule 86" means Title 16, Part 1, Chapter 3, Section 86 of the Texas Administrative Code, as amended.

O. "Take Point" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

P. "Termination of Continuous Development" shall have the meaning ascribed thereto in Article V.C.2.a.

Q. "Unit Area" has the meaning ascribed thereto in Article III.A.

R. "Unitized Substances" shall have the meaning ascribed thereto in Article III.A.

S. "Well" (or "well"), unless otherwise expressly provided in this Agreement, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

T. "WISE" (or "Wise") shall mean collectively Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., the Owners of the lands covered by Delaware Ranch Lease.

U. "Working Interest" means the cost-bearing interest in an oil and gas lease.

V. "Working Interest Owners" shall mean the party or parties owning the cost-bearing portion of the leasehold estate created by each Lease and the mineral fee estate committed to this Agreement; and currently being CHEVRON.

II. AUTHORITY:

A. The Commissioner is authorized by Texas Natural Resources Code §52.151, to enter into agreements that provide for operating areas as a unit for the exploration, development and production of oil or gas and to commit the interests of the State of Texas to same, and to take all actions set forth below in this Agreement.

B. CHEVRON is the current owner of all of the Working Interest in the Leases, and no other consent by a Working Interest Owner is required to commit to this Agreement all of the Working Interest in the Leases and lands lying within the Unit Area. CHEVRON is the current owner of all of the minerals under the land identified in Exhibit "B" as "Chevron Mineral Fee Tract", subject to non-participating royalty interests owned by Texas Pacific Land Trust, or its successors or assigns, under some or all of those tracts, as described in Exhibit "B". No consent by a non-participating royalty interest owner is required to commit to this Agreement all of the non-participating royalty interests in the Chevron Mineral Fee Tracts lying within the Unit Area.

C. Each of the Leases, except the Delaware Ranch Lease, contains a provision that grants to CHEVRON as Lessee, or as successor Lessee, the right to pool or unitize the interest of the "Owner of the Soil" on the same terms as shall be approved by the School Land Board and Commissioner for pooling or unitizing the interests of the State of Texas in such Leases pursuant to Texas Natural Resources Code §§52.151-154, and which satisfies the requirements of §52.152. Paragraph 48.a. of the Delaware Ranch Lease provides: "Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas

Natural Resources Code §§ 52.151 -52.154, the conflicting provision of said statutes shall control."

D. As of the Effective Date, CHEVRON does not own the Working Interest or have pooling authority underlying the Horse Shoe Mineral Claim, as defined in Exhibit "B". If CHEVRON acquires any portion of the mineral ownership or the Working Interest underlying the Horse Shoe Mineral Claim, and assuming CHEVRON also acquires the right to pool that Working Interest or the lessor of that Working Interest ratifies this Agreement, then CHEVRON will prepare a revised Exhibit "A" incorporating such acquisition of mineral ownership or working interest, record the revised Exhibit "A" in Culberson County, Texas, and furnish copies of the recorded revised Exhibit "A", with the recording information prominently displayed thereon, to the GLO. If CHEVRON is unable to acquire all of the mineral or Working Interest in the Horse Shoe Mineral Claim and CHEVRON completes an oil or gas well beneath the Horse Shoe Mineral Claim, then the owner(s) of the unleased or unpooled interest in the Horse Shoe Mineral Claim may be entitled to an undiluted (by this Agreement) share of the proceeds from the sale of hydrocarbons produced from that well and attributable to the said unleased or unpooled interest. In that event, CHEVRON alone will bear the difference between (i) the share of such proceeds the said unleased or unpooled interest would have been entitled had that interest been validly pooled under this Agreement and (ii) the undiluted share of such proceeds that said unleased or unpooled interest is otherwise entitled.

E. Execution of this Agreement is in the best interest of the State of Texas, will assure the orderly and efficient development of the Unit Area, and will prevent waste and protect the correlative rights of all affected parties.

III. UNIT AREA AND UNITIZED SUBSTANCES:

A. All of the lands described on the attached Exhibit "B" and depicted as the Taylor Ranch State Unit on the plat attached as Exhibit "C" are hereby designated as the "Unit Area." Subject to all of the terms and conditions contained in this Agreement, all of said lands and Leases, insofar as same lie or cover lands within the Unit Area, together with all of the oil and gas in, under or that may be produced from the Unit Area (the "Unitized Substances"), are hereby consolidated and unitized.

IV. UNIT OPERATOR:

A. CHEVRON is hereby designated as Unit Operator and agrees to accept the duties and obligations as Unit Operator for the exploration, development and production of Unitized Substances as herein provided, and shall have the exclusive right, privilege and duty of exercising any and all rights of the Working Interest Owners necessary or convenient for prospecting for, exploring for, producing, storing, allocating, and distributing Unitized Substances.

B. Unit Operator shall have the right to resign at any time, but such resignation shall not become effective so as to release Unit Operator from any duties or obligations of Unit Operator or terminate Unit Operator's rights hereunder occurring or accruing prior to the effective date of its resignation. Any such resignation shall not become effective until ninety (90) days after such time as notice of Unit Operator's resignation has been served upon all other Working Interest Owners, the Commissioner and Owner unless a successor Unit Operator has been selected and is qualified to act as Unit Operator. Unit Operator,

upon default or failure to perform its duties, may be removed by the Working Interest Owners, and a successor Unit Operator may be selected, in the manner provided in any Unit Operating Agreement covering the Unit Area.

C. Resignation or removal of Unit Operator under this Agreement shall not terminate its right, title or interest as a Working Interest Owner or as the owner of another interest in the Unitized Substances.

D. If the Unit Operator is not the sole Working Interest Owner in the Unit Area, the costs and expenses incurred by the Unit Operator in conducting Unit operations shall be paid and apportioned among and borne by the Working Interest Owners in accordance with the Unit Operating Agreement and Accounting Procedure, or other applicable agreements, covering the Unit Area, if any, among the Working Interest Owners.

V. PLAN OF DEVELOPMENT AND OPERATIONS:

A. Plan of Development. Commencing as of the Effective Date, Unit Operator will develop the Unit Area in accordance with the terms and provisions of this Article V., generally referred to as the "Plan".

B. Standards of Unit Operator's Conduct; Drilling and Completion of Wells. At all times while this Agreement is in force, either in whole or in part, Unit Operator shall conduct its operations and activities, and otherwise fulfill its obligations, under this Agreement as would a reasonably prudent operator, in a good and workmanlike manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations, and orders.

C. Continuous Development; Partial Expiration in Absence of Continuous Development.

1. Continuous Development.

a. This Agreement shall continue in force and effect as to the entire Unit Area for as long as Unit Operator has the right to conduct, and is conducting, Continuous Development. "Continuous Development" means:

i. during 2019 and every calendar year thereafter, the drilling and completion, subject to Article V.C.1.b., of three Horizontal Drainhole Wells on the Unit Area until Unit Operator has drilled and completed, subject to Article V.C.1.b., 28 Horizontal Drainhole Wells on the Unit Area.

The minimum number of Horizontal Drainhole Wells that must be drilled and completed in 2019 or any subsequent calendar year in order to constitute Continuous Development, as provided above, is the "Development Obligation" for such year.

b. For purposes of Articles V.C.1. and V.C.3.a. only, if actual drilling of a Horizontal Drainhole Well is commenced during 2019 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Article V.B. herein, it shall be deemed that the well has been drilled and completed during such calendar year, even if the well was

actually drilled, in part, or completed, in whole or part, during the next succeeding calendar year.

2. Partial Expiration in Absence or Upon Cessation of Continuous Development.

a. If during 2019 or any subsequent calendar year Unit Operator fails to meet its Development Obligation for the year, then, effective as of the end of such year (the "Termination of Continuous Development"), this Agreement shall automatically terminate as to those portions of the Unit Area not contained within "Retained Units". A "Retained Unit" is defined in accordance with one of the following descriptions, as applicable, and will comprise the Revised Unit Area, as defined in Article VI.A.:

i. for each section of land on, or under, which there then exists four Horizontal Drainhole Wells producing or capable of producing Unitized Substances, the Retained Unit will be the entire section, limited in depth from the surface to the base of the deepest producing formation;

ii. for each section of land on, or under, which there then exists three or less Horizontal Drainhole Wells producing or capable of producing Unitized Substances, the Retained Unit will be a geographic area designated by Lessee in accordance with the provisions of Article VI.A. and containing the number of acres equal to 160 multiplied by the number of horizontal drainhole wells producing or capable of producing Unitized Substances in that section, plus a tolerance of 10 percent, limited in depth from the surface to the base of the deepest producing formation.

b. The termination of this Agreement shall not create lease lines or boundary lines for purposes of the permitting of any well or Take Point on a Retained Unit under the rules of the RRC, and the Parties agree that no well or Take Point on a Retained Unit shall be required to be permitted or re-permitted because of such segregation. However, if the permitting or re-permitting of a well or Take Point on a Retained Unit is required because the well or Take Point will be nearer to a boundary of that Unit than the minimum lease line spacing distance under then applicable RRC rules, the Parties agree to waive notice, hearing, and objection to a spacing exception permit for that well or Take Point with regard to that boundary.

i. The provisions of the immediately preceding Article V.C.2.b. shall be binding upon the Parties to this Agreement and their respective successors and assigns, as well as each owner of any interest in any subsequent oil or gas lease covering all or part of the Unit Area, and shall be a covenant running with the land.

3. Credits Toward Development Obligation.

a. Credit for Excess Drilling. Subject to the further provisions of this Article V.C.3.a., if the aggregate number of Horizontal Drainhole Wells Unit Operator drills and completes, subject to Article V.C.1.b., during 2019 or

any subsequent calendar year exceeds Unit Operator's Development Obligation for the year, Unit Operator shall have the right to apply the excess (i.e., the positive difference between the aggregate number of Horizontal Drainhole Wells Unit Operator actually drilled and completed, subject to Article V.C.1.b., during such year and Unit Operator's Development Obligation for the year) as a credit toward its Development Obligation for the next succeeding calendar year ("Credit"). The aggregate number of Horizontal Drainhole Wells drilled and completed, subject to Article V.C.1.b., by Unit Operator during any given calendar year shall be computed as the Horizontal Drainhole Wells actually drilled and completed, subject to Article V.C.1.b., by Unit Operator during such year plus any Credit Unit Operator has the right to apply toward its Development Obligation for the year; provided, however, the maximum Credit that may be earned during any given calendar year and applied as a credit toward Unit Operator's Development Obligation during the next succeeding calendar year is six Horizontal Drainhole Wells.

VI. TERM AND TERMINATION:

A. As long as Unit Operator conducts Continuous Development, this Agreement shall remain in force and effect as to the entire Unit Area until January 1, 2038, at which time this Agreement will terminate as to all land not contained within Retained Units. Within 30 days following the partial termination of this Agreement in accordance with the immediately preceding sentence or following Termination of Continuous Development, whichever first occurs, Unit Operator shall, as required by the provisions of Article V.C.2.a., designate the Retained Units for the appropriate Horizonal Drainhole Wells completed on the Unit Area, prepare revised Exhibits "A", "B", and "C" to this Agreement to conform the Unit Area to the area covered by the Retained Units in accordance with the provisions of Article V.C.2.a., record the revised Exhibits "A", "B", and "C" in Culberson County, Texas, and furnish copies of the recorded revised Exhibits, with the recording information prominently displayed thereon, to the GLO. If the Unit Area is revised by the Retained Units in accordance with this Article VI.A. or Article VI.C., the Unit Area and Exhibits "A", "B", and "C", as revised, is the "Revised Unit Area".

B. Subject to Article V.C.2.a. and VI.A., this Agreement will remain in effect until the last Horizontal Drainhole Well on the Unit Area or Revised Unit Area ceases to produce without any reworking or drilling operations being conducted by Unit Operator to restore or obtain production within 90 days of such cessation of production.

C. Notwithstanding Article VI.B., following partial termination in accordance with Article VI.A., production from or reworking or drilling operations on one Retained Unit does not constitute production from or reworking or drilling operations on any other Retained Unit. When the last Horizontal Drainhole Well on any Retained Unit ceases to produce without any reworking or drilling operations being conducted by Unit Operator to restore or obtain production within 90 days of such cessation of production, such Retained Unit will terminate and Unit Operator shall prepare revised Exhibits "A", "B", and "C" to the Agreement to conform to the Revised Unit Area, record the revised Exhibits "A", "B", and "C" in Culberson County, Texas, and furnish copies of the recorded revised Exhibits, with the recording information prominently displayed thereon, to the GLO.

D. As long this Agreement remains in effect as to the Unit Area or Revised Unit Area and for such time thereafter as is reasonable required for Unit Operator to plug and abandon the Horizontal Drainhole Wells on such area, Unit Operator is hereby granted all necessary easements and rights of way across any lands that were originally included in the Unit Area so that Unit Operator can continue to use or access any facilities installed by Unit Operator.

E. Subject to the Commissioner's approval, this Agreement shall be effective upon the Effective Date, and shall continue in force and effect as provided above. Unit Operator, together with Working Interest Owners owning not less than 75% of the Working Interest in the Unit Area on an acreage basis, may voluntarily terminate this Agreement as to all or any portion of the Unit Area, save and except any lands comprising a Retained Unit or Units from which oil or gas is then being produced, or capable of being produced, in paying quantities, upon 60 days advance written notice to the Commissioner. Termination of this Agreement, in whole or part, shall not relieve Unit Operator or the non-operating Working Interest Owners of any obligations, including without limitation plugging any well in accordance with the requirements of the Lease or applicable law, that may have accrued prior to the date of such termination.

F. Should this Agreement terminate in whole or part for any cause, the Leases and any other contracts affecting the lands within the Unit Area, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under such Leases or contracts and such production had ceased on the date of such termination or partial termination of this Agreement.

VII. ALLOCATION OF PRODUCTION:

A. Unit Area Wells. For the purposes of computing the share of production of the Unitized Substances from the Unit Area to which each interest owner is entitled, there shall be allocated to each of the tracts comprising the Unit Area the pro rata share of the Unitized Substances produced from the Unit Area that the number of surface acres covered by such tract bears to the total number of surface acres covered by the entire Unit Area, and the share of such production to which each interest owner is entitled shall be computed on the basis of such owner's interest in the production so allocated to such tract.

B. Following the partial termination of this Agreement in accordance with Article VI.A. or Article VI.C., for the purposes of computing the share of production of the Unitized Substances from the Revised Unit Area, if applicable, to which each interest owner may be entitled, there shall be allocated to each of the tracts comprising the Revised Unit Area the pro rata share of the Unitized Substances produced from the Revised Unit Area that the number of surface acres covered by such tract bears to the total number of surface acres covered by the entire Revised Unit Area, and the share of production to which each interest owner is entitled shall be computed on the basis of such owner's interest in the production so allocated to such tract.

C. GLO and WISE hereby grant Unit Operator the authority to surface commingle Unitized Substances produced solely from the Unit Area, including the Revised Unit Area, and GLO and WISE agree that such authorization satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3), and any successor rule, regulation or law.

D. Production in Kind. Nothing contained in this Agreement shall be construed to alter any

person's or Party's right to take its allocated share of oil or gas production in kind. Royalties payable to the GLO and Owners on allocated production shall be computed and paid in the time and manner provided for in the Leases.

VIII. MINIMUM ROYALTY, COMPENSATORY ROYALTY AND DUTY TO PROTECT FROM DRAINAGE:

A. Any minimum royalties that become due under any of the Leases shall be computed and paid in accordance with the terms of such Lease, and nothing in this Agreement shall operate to relieve the lessee or lessees under such Lease from the obligation to pay such minimum royalty as provided therein.

B. The drilling and completion of a well within the Unit Area pursuant to this Agreement shall not obligate the lessee under any express or implied provision of any of the Leases to drill an offset well, pay compensatory royalty or otherwise protect the lands covered by such Lease from drainage; however, nothing in this Agreement shall relieve Operator from protecting lands within the Unit Area, as would a reasonably prudent operator, from drainage occurring from wells on lands situated outside the Unit Area.

IX. LEASES EXTENDED AND CONFORMED:

A. The terms and provisions of all Leases and any other contracts relating to exploration, drilling, development, or operation for Unitized Substances on lands committed to this Agreement are hereby expressly modified and amended to the extent, and only to the extent, necessary to make them conform to the provisions hereof, but such Leases and contracts, if any, shall otherwise remain in force and effect subject to and in accordance with their terms; and the Commissioner by his approval hereof does hereby establish, alter, or change the drilling, producing, and royalty requirements of the Leases committed hereto to the extent, and only to the extent, necessary to conform said requirements to the provisions of this Agreement. Notwithstanding the provisions of this Article IX.A., the termination or partial termination of this Agreement alone will not in any way effect a similar, or any, termination or partial termination of any of the Leases, and the Leases are not modified or amended to affect such a termination or partial termination. Despite the termination or partial termination of this Agreement, the Leases will continue in full force and effect, or expire or terminate in whole or part, subject to and in accordance with their respective terms and in accordance with Article VI.E.

B. Prior to the termination of this Agreement, drilling operations on or production of Unitized Substances from any tract of land covered by this Agreement will be deemed to be drilling operations on or production of Unitized Substances from all of the tracts comprising the Unit Area, and no Lease shall be deemed to have expired by reason of the lessee's failure to conduct any such operations on, or produce Unitized Substances from, any of the lands covered by such Lease.

C. From and after the Termination of Continuous Development or any other partial termination of this Agreement, and notwithstanding any other provision of this Agreement to the contrary, each of the Leases may be maintained in force as to lands and depths that are not subject to this Agreement only as provided in such Leases without regard to operations on or production pursuant to this Agreement; and neither operations on nor production from the lands and depths subject to this Agreement, nor the payment of shut-in royalties from a well drilled pursuant to this Agreement, shall serve to maintain any of

the Leases in force as to any lands or depths that are not subject to this Agreement, regardless of whether the production or operations on the Unit Area, or the well for which shut-in royalties are being paid, are actually located on such Lease or not.

D. Notwithstanding the provisions of Article IX.A., from and after the Termination of Continuous Development or any other partial termination of this Agreement, and with regard to that portion of the Delaware Ranch Lease that is subject to this Agreement, the provisions of the Delaware Ranch Lease pertaining to the termination of the Delaware Ranch Lease as to certain depths will control over Articles V.C.2.a.i. and V.C.2.a.ii. of this Agreement.

X. GENERAL:

A. Notices. All notices, demands, or communications required hereunder shall be in writing and shall be delivered by certified mail, commercial courier, personal delivery, or facsimile, to the receiving party at its address listed under its signature line below. Parties may change their address of record on 30 days advance written notice.

B. Force Majeure. If, after good faith effort and the exercise of due care and diligence Unit Operator is prevented from complying with any covenant or obligation to conduct drilling operations on or produce Unitized Substances from the lands covered by this Agreement by reason of war, rebellion, riots, strikes, acts of God, or any valid order, rule or regulation of government authority, then while so prevented, Unit Operator's obligation to comply with such covenant or obligation shall be suspended and Unit Operator shall not be liable for damages for failure to comply therewith; provided, however, nothing in this provision shall suspend any financial obligations.

C. Covenants run with the land. The covenants herein shall be construed to be covenants running with the land with respect to the interests of the Parties, their successors or assigns, and any grant, transfer or conveyance of an interest in any land or Lease subject to this Agreement shall be and is hereby conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, assignee, or other successor in interest.

D. Counterparts. This Agreement may be executed in any number of counterparties, none of which need be executed by all Parties, or may be ratified or consented to by separate written instrument specifically referring hereto, and shall be binding upon all parties who have executed a counterpart, ratification or consent to this Agreement, with the same force and effect as if all such parties had signed the same document.

E. Wise execution. Wise, as Owner under the Delaware Ranch Lease, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

F. Exhibits. All exhibits attached to this Agreement are made a part hereof.

[Remainder of page intentionally left blank]

XI. EXECUTION:

IN WITNESS WHEREOF, this Agreement is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE TAYLOR RANCH STATE UNIT CULBERSON COUNTY, TEXAS

This AGREEMENT (herein "Agreement"), approved and executed by the Commissioner of the General Land Office and effective as of the 5th day of June 2018 (the "Effective Date"), by and between the parties executing, ratifying, or consenting hereto, hereinafter the "Parties."

I. DEFINITIONS:

A. "CHEVRON" shall mean Chevron U.S.A. Inc.

B. "Commissioner" shall mean the Commissioner of the General Land Office of the State of Texas, his designee or authorized representative.

C. "Completed" when used to describe the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged in accordance with applicable rules and regulations.

D. "Continuous Development" shall have the meaning ascribed thereto in Article V.C.1.a.

E. "Delaware Ranch Lease" means the first Lease listed in the Schedule of Leases in Exhibit A and described as that certain Oil and Gas Lease dated March 28, 2013, recorded in Volume 101, page 366, Oil and Gas Records of Culberson County, Texas, as amended, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as lessors, and COG Operating LLC, as lessee, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease, as amended by that certain Amendment of Oil and Gas Lease dated effective March 1, 2016, that certain Second Amendment of Oil and Gas Lease dated effective September 1, 2017, and that certain Third Amendment of Oil and Gas Lease dated effective February 6, 2018.

F. "Development Obligation" shall have the meaning ascribed thereto in Article V.C.1.a.

G. "GLO" shall mean the General Land Office of the State of Texas.

H. "Horizontal Drainhole Well" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

I. "Leases" shall mean those oil and gas leases identified on the Schedule of Leases in Exhibit "A."

J. "Owner" means the owner of the soil.

K. "Retained Unit" shall have the meaning ascribed thereto in Article V.C.2.a.

L. "Revised Unit Area" shall have the meaning ascribed thereto in Article VI.A.

M. "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

N. "RRC Rule 86" means Title 16, Part 1, Chapter 3, Section 86 of the Texas Administrative Code, as amended.

O. "Take Point" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

P. "Termination of Continuous Development" shall have the meaning ascribed thereto in Article V.C.2.a.

Q. "Unit Area" has the meaning ascribed thereto in Article III.A.

R. "Unitized Substances" shall have the meaning ascribed thereto in Article III.A.

S. "Well" (or "well"), unless otherwise expressly provided in this Agreement, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

T. "WISE" (or "Wise") shall mean collectively Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., the Owners of the lands covered by Delaware Ranch Lease.

U. "Working Interest" means the cost-bearing interest in an oil and gas lease.

V. "Working Interest Owners" shall mean the party or parties owning the cost-bearing portion of the leasehold estate created by each Lease and the mineral fee estate committed to this Agreement; and currently being CHEVRON.

II. AUTHORITY:

A. The Commissioner is authorized by Texas Natural Resources Code §52.151, to enter into agreements that provide for operating areas as a unit for the exploration, development and production of oil or gas and to commit the interests of the State of Texas to same, and to take all actions set forth below in this Agreement.

B. CHEVRON is the current owner of all of the Working Interest in the Leases, and no other consent by a Working Interest Owner is required to commit to this Agreement all of the Working Interest in the Leases and lands lying within the Unit Area. CHEVRON is the current owner of all of the minerals under the land identified in Exhibit "B" as "Chevron Mineral Fee Tract", subject to non-participating royalty interests owned by Texas Pacific Land Trust, or its successors or assigns, under some or all of those tracts, as described in Exhibit "B". No consent by a non-participating royalty interest owner is required to commit to this Agreement all of the non-participating royalty interests in the Chevron Mineral Fee Tracts lying within the Unit Area.

C. Each of the Leases, except the Delaware Ranch Lease, contains a provision that grants to CHEVRON as Lessee, or as successor Lessee, the right to pool or unitize the interest of the "Owner of the Soil" on the same terms as shall be approved by the School Land Board and Commissioner for pooling or unitizing the interests of the State of Texas in such Leases pursuant to Texas Natural Resources Code §§52.151-154, and which satisfies the requirements of §52.152. Paragraph 48.a. of the Delaware Ranch Lease provides: "Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas

Natural Resources Code §§ 52.151 -52.154, the conflicting provision of said statutes shall control."

D. As of the Effective Date, CHEVRON does not own the Working Interest or have pooling authority underlying the Horse Shoe Mineral Claim, as defined in Exhibit "B". If CHEVRON acquires any portion of the mineral ownership or the Working Interest underlying the Horse Shoe Mineral Claim, and assuming CHEVRON also acquires the right to pool that Working Interest or the lessor of that Working Interest ratifies this Agreement, then CHEVRON will prepare a revised Exhibit "A" incorporating such acquisition of mineral ownership or working interest, record the revised Exhibit "A" in Culberson County, Texas, and furnish copies of the recorded revised Exhibit "A", with the recording information prominently displayed thereon, to the GLO. If CHEVRON is unable to acquire all of the mineral or Working Interest in the Horse Shoe Mineral Claim and CHEVRON completes an oil or gas well beneath the Horse Shoe Mineral Claim, then the owner(s) of the unleased or unpooled interest in the Horse Shoe Mineral Claim may be entitled to an undiluted (by this Agreement) share of the proceeds from the sale of hydrocarbons produced from that well and attributable to the said unleased or unpooled interest. In that event, CHEVRON alone will bear the difference between (i) the share of such proceeds the said unleased or unpooled interest would have been entitled had that interest been validly pooled under this Agreement and (ii) the undiluted share of such proceeds that said unleased or unpooled interest is otherwise entitled.

E. Execution of this Agreement is in the best interest of the State of Texas, will assure the orderly and efficient development of the Unit Area, and will prevent waste and protect the correlative rights of all affected parties.

III. UNIT AREA AND UNITIZED SUBSTANCES:

A. All of the lands described on the attached Exhibit "B" and depicted as the Taylor Ranch State Unit on the plat attached as Exhibit "C" are hereby designated as the "Unit Area." Subject to all of the terms and conditions contained in this Agreement, all of said lands and Leases, insofar as same lie or cover lands within the Unit Area, together with all of the oil and gas in, under or that may be produced from the Unit Area (the "Unitized Substances"), are hereby consolidated and unitized.

IV. UNIT OPERATOR:

A. CHEVRON is hereby designated as Unit Operator and agrees to accept the duties and obligations as Unit Operator for the exploration, development and production of Unitized Substances as herein provided, and shall have the exclusive right, privilege and duty of exercising any and all rights of the Working Interest Owners necessary or convenient for prospecting for, exploring for, producing, storing, allocating, and distributing Unitized Substances.

B. Unit Operator shall have the right to resign at any time, but such resignation shall not become effective so as to release Unit Operator from any duties or obligations of Unit Operator or terminate Unit Operator's rights hereunder occurring or accruing prior to the effective date of its resignation. Any such resignation shall not become effective until ninety (90) days after such time as notice of Unit Operator's resignation has been served upon all other Working Interest Owners, the Commissioner and Owner unless a successor Unit Operator has been selected and is qualified to act as Unit Operator. Unit Operator,

upon default or failure to perform its duties, may be removed by the Working Interest Owners, and a successor Unit Operator may be selected, in the manner provided in any Unit Operating Agreement covering the Unit Area.

C. Resignation or removal of Unit Operator under this Agreement shall not terminate its right, title or interest as a Working Interest Owner or as the owner of another interest in the Unitized Substances.

D. If the Unit Operator is not the sole Working Interest Owner in the Unit Area, the costs and expenses incurred by the Unit Operator in conducting Unit operations shall be paid and apportioned among and borne by the Working Interest Owners in accordance with the Unit Operating Agreement and Accounting Procedure, or other applicable agreements, covering the Unit Area, if any, among the Working Interest Owners.

V. PLAN OF DEVELOPMENT AND OPERATIONS:

A. Plan of Development. Commencing as of the Effective Date, Unit Operator will develop the Unit Area in accordance with the terms and provisions of this Article V., generally referred to as the "Plan".

B. Standards of Unit Operator's Conduct; Drilling and Completion of Wells. At all times while this Agreement is in force, either in whole or in part, Unit Operator shall conduct its operations and activities, and otherwise fulfill its obligations, under this Agreement as would a reasonably prudent operator, in a good and workmanlike manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations, and orders.

C. Continuous Development; Partial Expiration in Absence of Continuous Development.

1. Continuous Development.

a. This Agreement shall continue in force and effect as to the entire Unit Area for as long as Unit Operator has the right to conduct, and is conducting, Continuous Development. "Continuous Development" means:

i. during 2019 and every calendar year thereafter, the drilling and completion, subject to Article V.C.1.b., of three Horizontal Drainhole Wells on the Unit Area until Unit Operator has drilled and completed, subject to Article V.C.1.b., 28 Horizontal Drainhole Wells on the Unit Area.

The minimum number of Horizontal Drainhole Wells that must be drilled and completed in 2019 or any subsequent calendar year in order to constitute Continuous Development, as provided above, is the "Development Obligation" for such year.

b. For purposes of Articles V.C.1. and V.C.3.a. only, if actual drilling of a Horizontal Drainhole Well is commenced during 2019 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Article V.B. herein, it shall be deemed that the well has been drilled and completed during such calendar year, even if the well was

actually drilled, in part, or completed, in whole or part, during the next succeeding calendar year.

2. Partial Expiration in Absence or Upon Cessation of Continuous Development.

a. If during 2019 or any subsequent calendar year Unit Operator fails to meet its Development Obligation for the year, then, effective as of the end of such year (the "Termination of Continuous Development"), this Agreement shall automatically terminate as to those portions of the Unit Area not contained within "Retained Units". A "Retained Unit" is defined in accordance with one of the following descriptions, as applicable, and will comprise the Revised Unit Area, as defined in Article VI.A.:

i. for each section of land on, or under, which there then exists four Horizontal Drainhole Wells producing or capable of producing Unitized Substances, the Retained Unit will be the entire section, limited in depth from the surface to the base of the deepest producing formation;

ii. for each section of land on, or under, which there then exists three or less Horizontal Drainhole Wells producing or capable of producing Unitized Substances, the Retained Unit will be a geographic area designated by Lessee in accordance with the provisions of Article VI.A. and containing the number of acres equal to 160 multiplied by the number of horizontal drainhole wells producing or capable of producing Unitized Substances in that section, plus a tolerance of 10 percent, limited in depth from the surface to the base of the deepest producing formation.

b. The termination of this Agreement shall not create lease lines or boundary lines for purposes of the permitting of any well or Take Point on a Retained Unit under the rules of the RRC, and the Parties agree that no well or Take Point on a Retained Unit shall be required to be permitted or re-permitted because of such segregation. However, if the permitting or re-permitting of a well or Take Point on a Retained Unit is required because the well or Take Point will be nearer to a boundary of that Unit than the minimum lease line spacing distance under then applicable RRC rules, the Parties agree to waive notice, hearing, and objection to a spacing exception permit for that well or Take Point with regard to that boundary.

i. The provisions of the immediately preceding Article V.C.2.b. shall be binding upon the Parties to this Agreement and their respective successors and assigns, as well as each owner of any interest in any subsequent oil or gas lease covering all or part of the Unit Area, and shall be a covenant running with the land.

3. Credits Toward Development Obligation.

a. Credit for Excess Drilling. Subject to the further provisions of this Article V.C.3.a., if the aggregate number of Horizontal Drainhole Wells Unit Operator drills and completes, subject to Article V.C.1.b., during 2019 or

any subsequent calendar year exceeds Unit Operator's Development Obligation for the year, Unit Operator shall have the right to apply the excess (i.e., the positive difference between the aggregate number of Horizontal Drainhole Wells Unit Operator actually drilled and completed, subject to Article V.C.1.b., during such year and Unit Operator's Development Obligation for the year) as a credit toward its Development Obligation for the next succeeding calendar year ("Credit"). The aggregate number of Horizontal Drainhole Wells drilled and completed, subject to Article V.C.1.b., by Unit Operator during any given calendar year shall be computed as the Horizontal Drainhole Wells actually drilled and completed, subject to Article V.C.1.b., by Unit Operator during such year plus any Credit Unit Operator has the right to apply toward its Development Obligation for the year; provided, however, the maximum Credit that may be earned during any given calendar year and applied as a credit toward Unit Operator's Development Obligation during the next succeeding calendar year is six Horizontal Drainhole Wells.

VI. TERM AND TERMINATION:

A. As long as Unit Operator conducts Continuous Development, this Agreement shall remain in force and effect as to the entire Unit Area until January 1, 2038, at which time this Agreement will terminate as to all land not contained within Retained Units. Within 30 days following the partial termination of this Agreement in accordance with the immediately preceding sentence or following Termination of Continuous Development, whichever first occurs, Unit Operator shall, as required by the provisions of Article V.C.2.a., designate the Retained Units for the appropriate Horizonal Drainhole Wells completed on the Unit Area, prepare revised Exhibits "A", "B", and "C" to this Agreement to conform the Unit Area to the area covered by the Retained Units in accordance with the provisions of Article V.C.2.a., record the revised Exhibits "A", "B", and "C" in Culberson County, Texas, and furnish copies of the recorded revised Exhibits, with the recording information prominently displayed thereon, to the GLO. If the Unit Area is revised by the Retained Units in accordance with this Article VI.A. or Article VI.C., the Unit Area and Exhibits "A", "B", and "C", as revised, is the "Revised Unit Area".

B. Subject to Article V.C.2.a. and VI.A., this Agreement will remain in effect until the last Horizontal Drainhole Well on the Unit Area or Revised Unit Area ceases to produce without any reworking or drilling operations being conducted by Unit Operator to restore or obtain production within 90 days of such cessation of production.

C. Notwithstanding Article VI.B., following partial termination in accordance with Article VI.A., production from or reworking or drilling operations on one Retained Unit does not constitute production from or reworking or drilling operations on any other Retained Unit. When the last Horizontal Drainhole Well on any Retained Unit ceases to produce without any reworking or drilling operations being conducted by Unit Operator to restore or obtain production within 90 days of such cessation of production, such Retained Unit will terminate and Unit Operator shall prepare revised Exhibits "A", "B", and "C" to the Agreement to conform to the Revised Unit Area, record the revised Exhibits "A", "B", and "C" in Culberson County, Texas, and furnish copies of the recorded revised Exhibits, with the recording information prominently displayed thereon, to the GLO.

D. As long this Agreement remains in effect as to the Unit Area or Revised Unit Area and for such time thereafter as is reasonable required for Unit Operator to plug and abandon the Horizontal Drainhole Wells on such area, Unit Operator is hereby granted all necessary easements and rights of way across any lands that were originally included in the Unit Area so that Unit Operator can continue to use or access any facilities installed by Unit Operator.

E. Subject to the Commissioner's approval, this Agreement shall be effective upon the Effective Date, and shall continue in force and effect as provided above. Unit Operator, together with Working Interest Owners owning not less than 75% of the Working Interest in the Unit Area on an acreage basis, may voluntarily terminate this Agreement as to all or any portion of the Unit Area, save and except any lands comprising a Retained Unit or Units from which oil or gas is then being produced, or capable of being produced, in paying quantities, upon 60 days advance written notice to the Commissioner. Termination of this Agreement, in whole or part, shall not relieve Unit Operator or the non-operating Working Interest Owners of any obligations, including without limitation plugging any well in accordance with the requirements of the Lease or applicable law, that may have accrued prior to the date of such termination.

F. Should this Agreement terminate in whole or part for any cause, the Leases and any other contracts affecting the lands within the Unit Area, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under such Leases or contracts and such production had ceased on the date of such termination or partial termination of this Agreement.

VII. ALLOCATION OF PRODUCTION:

A. Unit Area Wells. For the purposes of computing the share of production of the Unitized Substances from the Unit Area to which each interest owner is entitled, there shall be allocated to each of the tracts comprising the Unit Area the pro rata share of the Unitized Substances produced from the Unit Area that the number of surface acres covered by such tract bears to the total number of surface acres covered by the entire Unit Area, and the share of such production to which each interest owner is entitled shall be computed on the basis of such owner's interest in the production so allocated to such tract.

B. Following the partial termination of this Agreement in accordance with Article VI.A. or Article VI.C., for the purposes of computing the share of production of the Unitized Substances from the Revised Unit Area, if applicable, to which each interest owner may be entitled, there shall be allocated to each of the tracts comprising the Revised Unit Area the pro rata share of the Unitized Substances produced from the Revised Unit Area that the number of surface acres covered by such tract bears to the total number of surface acres covered by the entire Revised Unit Area, and the share of production to which each interest owner is entitled shall be computed on the basis of such owner's interest in the production so allocated to such tract.

C. GLO and WISE hereby grant Unit Operator the authority to surface commingle Unitized Substances produced solely from the Unit Area, including the Revised Unit Area, and GLO and WISE agree that such authorization satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3), and any successor rule, regulation or law.

D. Production in Kind. Nothing contained in this Agreement shall be construed to alter any

person's or Party's right to take its allocated share of oil or gas production in kind. Royalties payable to the GLO and Owners on allocated production shall be computed and paid in the time and manner provided for in the Leases.

VIII. MINIMUM ROYALTY, COMPENSATORY ROYALTY AND DUTY TO PROTECT FROM DRAINAGE:

A. Any minimum royalties that become due under any of the Leases shall be computed and paid in accordance with the terms of such Lease, and nothing in this Agreement shall operate to relieve the lessee or lessees under such Lease from the obligation to pay such minimum royalty as provided therein.

B. The drilling and completion of a well within the Unit Area pursuant to this Agreement shall not obligate the lessee under any express or implied provision of any of the Leases to drill an offset well, pay compensatory royalty or otherwise protect the lands covered by such Lease from drainage; however, nothing in this Agreement shall relieve Operator from protecting lands within the Unit Area, as would a reasonably prudent operator, from drainage occurring from wells on lands situated outside the Unit Area.

IX. LEASES EXTENDED AND CONFORMED:

A. The terms and provisions of all Leases and any other contracts relating to exploration, drilling, development, or operation for Unitized Substances on lands committed to this Agreement are hereby expressly modified and amended to the extent, and only to the extent, necessary to make them conform to the provisions hereof, but such Leases and contracts, if any, shall otherwise remain in force and effect subject to and in accordance with their terms; and the Commissioner by his approval hereof does hereby establish, alter, or change the drilling, producing, and royalty requirements of the Leases committed hereto to the extent, and only to the extent, necessary to conform said requirements to the provisions of this Agreement. Notwithstanding the provisions of this Article IX.A., the termination or partial termination of this Agreement alone will not in any way effect a similar, or any, termination or partial termination of any of the Leases, and the Leases are not modified or amended to affect such a termination or partial termination. Despite the termination or partial termination of this Agreement, the Leases will continue in full force and effect, or expire or terminate in whole or part, subject to and in accordance with their respective terms and in accordance with Article VI.E.

B. Prior to the termination of this Agreement, drilling operations on or production of Unitized Substances from any tract of land covered by this Agreement will be deemed to be drilling operations on or production of Unitized Substances from all of the tracts comprising the Unit Area, and no Lease shall be deemed to have expired by reason of the lessee's failure to conduct any such operations on, or produce Unitized Substances from, any of the lands covered by such Lease.

C. From and after the Termination of Continuous Development or any other partial termination of this Agreement, and notwithstanding any other provision of this Agreement to the contrary, each of the Leases may be maintained in force as to lands and depths that are not subject to this Agreement only as provided in such Leases without regard to operations on or production pursuant to this Agreement; and neither operations on nor production from the lands and depths subject to this Agreement, nor the payment of shut-in royalties from a well drilled pursuant to this Agreement, shall serve to maintain any of

the Leases in force as to any lands or depths that are not subject to this Agreement, regardless of whether the production or operations on the Unit Area, or the well for which shut-in royalties are being paid, are actually located on such Lease or not.

D. Notwithstanding the provisions of Article IX.A., from and after the Termination of Continuous Development or any other partial termination of this Agreement, and with regard to that portion of the Delaware Ranch Lease that is subject to this Agreement, the provisions of the Delaware Ranch Lease pertaining to the termination of the Delaware Ranch Lease as to certain depths will control over Articles V.C.2.a.i. and V.C.2.a.ii. of this Agreement.

X. GENERAL:

A. Notices. All notices, demands, or communications required hereunder shall be in writing and shall be delivered by certified mail, commercial courier, personal delivery, or facsimile, to the receiving party at its address listed under its signature line below. Parties may change their address of record on 30 days advance written notice.

B. Force Majeure. If, after good faith effort and the exercise of due care and diligence Unit Operator is prevented from complying with any covenant or obligation to conduct drilling operations on or produce Unitized Substances from the lands covered by this Agreement by reason of war, rebellion, riots, strikes, acts of God, or any valid order, rule or regulation of government authority, then while so prevented, Unit Operator's obligation to comply with such covenant or obligation shall be suspended and Unit Operator shall not be liable for damages for failure to comply therewith; provided, however, nothing in this provision shall suspend any financial obligations.

C. Covenants run with the land. The covenants herein shall be construed to be covenants running with the land with respect to the interests of the Parties, their successors or assigns, and any grant, transfer or conveyance of an interest in any land or Lease subject to this Agreement shall be and is hereby conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, assignee, or other successor in interest.

D. Counterparts. This Agreement may be executed in any number of counterparties, none of which need be executed by all Parties, or may be ratified or consented to by separate written instrument specifically referring hereto, and shall be binding upon all parties who have executed a counterpart, ratification or consent to this Agreement, with the same force and effect as if all such parties had signed the same document.

E. Wise execution. Wise, as Owner under the Delaware Ranch Lease, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

F. Exhibits. All exhibits attached to this Agreement are made a part hereof.

[Remainder of page intentionally left blank]

XI. EXECUTION:

IN WITNESS WHEREOF, this Agreement is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

Certified Mail service provides the following benefits:

- A receipt (this portion of the Certified Mail label).
- A unique identifier for your mailpiece.
- Electronic verification of delivery or attempted delivery.
- A record of delivery (including the recipient's signature) that is retained by the Postal Service™ for a specified period.

Important Reminders:

- You may purchase Certified Mail service with First-Class Mail®, First-Class Package Service®, or Priority Mail® service.
- Certified Mail service is *not* available for international mail.
- Insurance coverage is *not* available for purchase with Certified Mail service. However, the purchase of Certified Mail service does not change the insurance coverage automatically included with certain Priority Mail items.
- For an additional fee, and with a proper endorsement on the mailpiece, you may request the following services:
  - Return receipt service, which provides a record of delivery (including the recipient's signature). You can request a hardcopy return receipt or an electronic version. For a hardcopy return receipt, complete PS Form 3811, *Domestic Return Receipt;* attach PS Form 3811 to your mailpiece; for an electronic return receipt, see a retail associate for assistance. To receive a duplicate return receipt for no additional fee, present this USPS®-postmarked Certified Mail receipt to the retail associate.
  - Restricted delivery service, which provides delivery to the addressee specified by name, or to the addressee's authorized agent.
  - Adult signature service, which requires the signee to be at least 21 years of age (not available at retail).
  - Adult signature restricted delivery service, which requires the signee to be at least 21 years of age and provides delivery to the addressee specified by name, or to the addressee's authorized agent (not available at retail).
- To ensure that your Certified Mail receipt is accepted as legal proof of mailing, it should bear a USPS postmark. If you would like a postmark on this Certified Mail receipt, please present your Certified Mail item at a Post Office™ for postmarking. If you don't need a postmark on this Certified Mail receipt, detach the barcoded portion of this label, affix it to the mailpiece, apply appropriate postage, and deposit the mailpiece.

IMPORTANT: Save this receipt for your records.

SUBJECT: **Amendment of Unit Agreement for signature**

.....

SUMMARY: Attached for your approval and signature are four originals of an Amendment of Unit Agreement for a Unit that was approved by the School Land Board on June 5, 2018.

DETAILS: The Amendment is to add additional leases that have been taken within the Unit area. This agreement complies with existing GLO rules and policies and has been reviewed and approved by Energy Resources staff and the Legal Services Division. Chapter 52, Subchapter E of the Texas Natural Resources Code gives authority to the Commissioner to execute agreements that provide for operating areas as a unit for the exploration, development and production of oil or gas or both.

Re: Amendment to Unit Agreement
The Taylor Ranch State Unit
Culberson County, Texas

Dear Ms. Guerra:

Enclosed are the four originals of the Amendment Agreement that have been executed by George P. Bush, Commissioner of the Texas General Land Office. We have retained a copy for our files. Please provide our office with a recorded copy of the Amendment Agreement or a fully executed original if it is not going to be recorded.

Thank you for your assistance.

Sincerely,

J. Daryl Morgan, CPL

AMENDMENT TO UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE TAYLOR RANCH STATE UNIT

This **AMENDMENT TO UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE TAYLOR RANCH STATE UNIT** ("Amendment") is entered into and made effective as of the 1st day of December, 2018 ("Effective Date"), by and between **Chevron U.S.A. Inc.**, a Pennsylvania corporation ("Chevron") and the **Commissioner of the General Land Office, on behalf of the State of Texas** ("Lessor"). Chevron and Lessor are collectively referred to as the "Parties" and individually as "Party".

RECITALS

A. Chevron and Lessor entered into that certain Unit Agreement For The Development And Operation Of The Taylor Ranch State Unit dated effective June 5, 2018, recorded in Volume 40, Page 920, Official Public Records of Culberson County, Texas, (the "Agreement").

B. Wise Asset No. 8, Ltd., and Wise Asset No. 10, Ltd., as owner of the soil under the first lease described on Exhibit A of the Agreement, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

C. The Parties desire to amend, modify, delete, or replace certain provisions of the Agreement, as more particularly described below.

AMENDMENT

NOW, THEREFORE, in consideration of the mutual promises set out herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree to be bound by the following terms:

1. Effective as of the Effective Date, the Agreement shall be replaced and superseded for all purposes by the Amended and Restated Unit Agreement For The Development And Operation Of The Taylor Ranch State Unit attached hereto and made a part hereof.

2. This Amendment may be executed in any number of counterparts, each of which will be deemed an original of this Amendment, and which together will constitute one and the same instrument; provided that none of the Parties hereto will be bound by this Amendment unless and until all Parties have executed the original or a counterpart thereof.

3. This Amendment is governed by and interpreted under the laws of the State of Texas, without regard to its choice of law rules.

IN WITNESS WHEREOF, this Agreement is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

AMENDED AND RESTATED UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE TAYLOR RANCH STATE UNIT CULBERSON COUNTY, TEXAS

This AGREEMENT (herein "Agreement"), approved and executed by the Commissioner of the General Land Office and effective as of the 5th day of June 2018 (the "Effective Date"), by and between the parties executing, ratifying, or consenting hereto, hereinafter the "Parties."

I. DEFINITIONS:

A. "CHEVRON" shall mean Chevron U.S.A. Inc.

B. "Commissioner" shall mean the Commissioner of the General Land Office of the State of Texas, his designee or authorized representative.

C. "Completed" when used to describe the status of a well (e.g., a "completed well"), means that the well has been completed as a well that is producing, or capable of producing, oil or gas in paying quantities, or, after having been drilled to the objective depth, has been permanently plugged in accordance with applicable rules and regulations.

D. "Continuous Development" shall have the meaning ascribed thereto in Article V.C.1.a.

E. "Delaware Ranch Lease" means the first Lease listed in the Schedule of Leases in Exhibit A and described as that certain Oil and Gas Lease dated March 28, 2013, recorded in Volume 101, page 366, Oil and Gas Records of Culberson County, Texas, as amended, from the State of Texas, acting by and through its agents, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., as lessors, and COG Operating LLC, as lessee, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease, as amended by that certain Amendment of Oil and Gas Lease dated effective March 1, 2016, that certain Second Amendment of Oil and Gas Lease dated effective September 1, 2017, and that certain Third Amendment of Oil and Gas Lease dated effective February 6, 2018.

F. "Development Obligation" shall have the meaning ascribed thereto in Article V.C.1.a.

G. "GLO" shall mean the General Land Office of the State of Texas.

H. "Horizontal Drainhole Well" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

I. "Leases" shall mean those oil and gas leases identified on the Schedule of Leases in Exhibit "A."

J. "Owner" means the owner of the soil.

K. "Retained Unit" shall have the meaning ascribed thereto in Article V.C.2.a.

L. "Revised Unit Area" shall have the meaning ascribed thereto in Article VI.A.

M. "RRC" means the Texas Railroad Commission, or any successor agency or other governmental authority having the same jurisdiction as the Texas Railroad Commission.

N. "RRC Rule 86" means Title 16, Part 1, Chapter 3, Section 86 of the Texas Administrative Code, as amended.

O. "Take Point" shall have the meaning ascribed thereto as of the Effective Date in RRC Rule 86.

P. "Termination of Continuous Development" shall have the meaning ascribed thereto in Article V.C.2.a.

Q. "Unit Area" has the meaning ascribed thereto in Article III.A.

R. "Unitized Substances" shall have the meaning ascribed thereto in Article III.A.

S. "Well" (or "well"), unless otherwise expressly provided in this Agreement, means an oil or gas well, or a hole drilled for the sole purpose of making an oil or gas well.

T. "WISE" (or "Wise") shall mean collectively Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., the Owners of the lands covered by Delaware Ranch Lease.

U. "Working Interest" means the cost-bearing interest in an oil and gas lease.

V. "Working Interest Owners" shall mean the party or parties owning the cost-bearing portion of the leasehold estate created by each Lease and the mineral fee estate committed to this Agreement; and currently being CHEVRON.

II. AUTHORITY:

A. The Commissioner is authorized by Texas Natural Resources Code §52.151, to enter into agreements that provide for operating areas as a unit for the exploration, development and production of oil or gas and to commit the interests of the State of Texas to same, and to take all actions set forth below in this Agreement.

B. CHEVRON is the current owner of all of the Working Interest in the Leases, and no other consent by a Working Interest Owner is required to commit to this Agreement all of the Working Interest in the Leases and lands lying within the Unit Area. CHEVRON is the current owner of all of the minerals under the land identified in Exhibit "B" as "Chevron Mineral Fee Tract", subject to non-participating royalty interests owned by Texas Pacific Land Trust, or its successors or assigns, under some or all of those tracts, as described in Exhibit "B". No consent by a non-participating royalty interest owner is required to commit to this Agreement all of the non-participating royalty interests in the Chevron Mineral Fee Tracts lying within the Unit Area.

C. Each of the Leases, except the Delaware Ranch Lease, contains a provision that grants to CHEVRON as Lessee, or as successor Lessee, the right to pool or unitize the interest of the "Owner of the Soil" on the same terms as shall be approved by the School Land Board and Commissioner for pooling or unitizing the interests of the State of Texas in such Leases pursuant to Texas Natural Resources Code §§52.151-154, and which satisfies the requirements of §52.152. Paragraph 48.a. of the Delaware Ranch Lease provides: "Lessee shall have no right to pool or unitize any of the lands covered by this lease with any other leases or lands absent the prior written consent of Owner, which consent shall not be unreasonably withheld; provided, if this provision is in conflict with a provision of Texas

Natural Resources Code §§ 52.151 -52.154, the conflicting provision of said statutes shall control."

D. As of the Effective Date, CHEVRON does not own all of the Working Interest or have all of the pooling authority underlying the Horse Shoe Mineral Claim, as defined in Exhibit "B". If CHEVRON acquires any portion of the remaining mineral ownership or the remaining Working Interest underlying the Horse Shoe Mineral Claim, and assuming CHEVRON also acquires the right to pool that Working Interest or the lessor of that Working Interest ratifies this Agreement, then CHEVRON will prepare a revised Exhibit "A" incorporating such acquisition of mineral ownership or working interest, record the revised Exhibit "A" in Culberson County, Texas, and furnish copies of the recorded revised Exhibit "A", with the recording information prominently displayed thereon, to the GLO. If CHEVRON is unable to acquire all of the mineral or Working Interest in the Horse Shoe Mineral Claim and CHEVRON completes an oil or gas well beneath the Horse Shoe Mineral Claim, then the owner(s) of the unleased or unpooled interest in the Horse Shoe Mineral Claim may be entitled to an undiluted (by this Agreement) share of the proceeds from the sale of hydrocarbons produced from that well and attributable to the said unleased or unpooled interest. In that event, CHEVRON alone will bear the difference between (i) the share of such proceeds the said unleased or unpooled interest would have been entitled had that interest been validly pooled under this Agreement and (ii) the undiluted share of such proceeds that said unleased or unpooled interest is otherwise entitled.

E. Execution of this Agreement is in the best interest of the State of Texas, will assure the orderly and efficient development of the Unit Area, and will prevent waste and protect the correlative rights of all affected parties.

III. UNIT AREA AND UNITIZED SUBSTANCES:

A. All of the lands described on the attached Exhibit "B" and depicted as the Taylor Ranch State Unit on the plat attached as Exhibit "C" are hereby designated as the "Unit Area." Subject to all of the terms and conditions contained in this Agreement, all of said lands and Leases, insofar as same lie or cover lands within the Unit Area, together with all of the oil and gas in, under or that may be produced from the Unit Area (the "Unitized Substances"), are hereby consolidated and unitized.

IV. UNIT OPERATOR:

A. CHEVRON is hereby designated as Unit Operator and agrees to accept the duties and obligations as Unit Operator for the exploration, development and production of Unitized Substances as herein provided, and shall have the exclusive right, privilege and duty of exercising any and all rights of the Working Interest Owners necessary or convenient for prospecting for, exploring for, producing, storing, allocating, and distributing Unitized Substances.

B. Unit Operator shall have the right to resign at any time, but such resignation shall not become effective so as to release Unit Operator from any duties or obligations of Unit Operator or terminate Unit Operator's rights hereunder occurring or accruing prior to the effective date of its resignation. Any such resignation shall not become effective until ninety (90) days after such time as notice of Unit Operator's resignation has been served upon all other Working Interest Owners, the Commissioner and Owner unless a successor Unit Operator has been selected and is qualified to act as Unit Operator. Unit Operator,

upon default or failure to perform its duties, may be removed by the Working Interest Owners, and a successor Unit Operator may be selected, in the manner provided in any Unit Operating Agreement covering the Unit Area.

C. Resignation or removal of Unit Operator under this Agreement shall not terminate its right, title or interest as a Working Interest Owner or as the owner of another interest in the Unitized Substances.

D. If the Unit Operator is not the sole Working Interest Owner in the Unit Area, the costs and expenses incurred by the Unit Operator in conducting Unit operations shall be paid and apportioned among and borne by the Working Interest Owners in accordance with the Unit Operating Agreement and Accounting Procedure, or other applicable agreements, covering the Unit Area, if any, among the Working Interest Owners.

V. PLAN OF DEVELOPMENT AND OPERATIONS:

A. Plan of Development. Commencing as of the Effective Date, Unit Operator will develop the Unit Area in accordance with the terms and provisions of this Article V., generally referred to as the "Plan".

B. Standards of Unit Operator's Conduct; Drilling and Completion of Wells. At all times while this Agreement is in force, either in whole or in part, Unit Operator shall conduct its operations and activities, and otherwise fulfill its obligations, under this Agreement as would a reasonably prudent operator, in a good and workmanlike manner, with due diligence and dispatch, in accordance with good oilfield practice, and in compliance with all applicable laws, ordinances, rules, regulations, and orders.

C. Continuous Development; Partial Expiration in Absence of Continuous Development.

1. Continuous Development.

a. This Agreement shall continue in force and effect as to the entire Unit Area for as long as Unit Operator has the right to conduct, and is conducting, Continuous Development. "Continuous Development" means:

i. during 2019 and every calendar year thereafter, the drilling and completion, subject to Article V.C.1.b., of three Horizontal Drainhole Wells on the Unit Area until Unit Operator has drilled and completed, subject to Article V.C.1.b., 28 Horizontal Drainhole Wells on the Unit Area.

The minimum number of Horizontal Drainhole Wells that must be drilled and completed in 2019 or any subsequent calendar year in order to constitute Continuous Development, as provided above, is the "Development Obligation" for such year.

b. For purposes of Articles V.C.1. and V.C.3.a. only, if actual drilling of a Horizontal Drainhole Well is commenced during 2019 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Article V.B. herein, it shall be deemed that the well has been drilled and completed during such calendar year, even if the well was

actually drilled, in part, or completed, in whole or part, during the next succeeding calendar year.

2. Partial Expiration in Absence or Upon Cessation of Continuous Development.

a. If during 2019 or any subsequent calendar year Unit Operator fails to meet its Development Obligation for the year, then, effective as of the end of such year (the "Termination of Continuous Development"), this Agreement shall automatically terminate as to those portions of the Unit Area not contained within "Retained Units". A "Retained Unit" is defined in accordance with one of the following descriptions, as applicable, and will comprise the Revised Unit Area, as defined in Article VI.A.:

i. for each section of land on, or under, which there then exists four Horizontal Drainhole Wells producing or capable of producing Unitized Substances, the Retained Unit will be the entire section, limited in depth from the surface to the base of the deepest producing formation;

ii. for each section of land on, or under, which there then exists three or less Horizontal Drainhole Wells producing or capable of producing Unitized Substances, the Retained Unit will be a geographic area designated by Lessee in accordance with the provisions of Article VI.A. and containing the number of acres equal to 160 multiplied by the number of horizontal drainhole wells producing or capable of producing Unitized Substances in that section, plus a tolerance of 10 percent, limited in depth from the surface to the base of the deepest producing formation.

b. The termination of this Agreement shall not create lease lines or boundary lines for purposes of the permitting of any well or Take Point on a Retained Unit under the rules of the RRC, and the Parties agree that no well or Take Point on a Retained Unit shall be required to be permitted or re-permitted because of such segregation. However, if the permitting or re-permitting of a well or Take Point on a Retained Unit is required because the well or Take Point will be nearer to a boundary of that Unit than the minimum lease line spacing distance under then applicable RRC rules, the Parties agree to waive notice, hearing, and objection to a spacing exception permit for that well or Take Point with regard to that boundary.

i. The provisions of the immediately preceding Article V.C.2.b. shall be binding upon the Parties to this Agreement and their respective successors and assigns, as well as each owner of any interest in any subsequent oil or gas lease covering all or part of the Unit Area, and shall be a covenant running with the land.

3. Credits Toward Development Obligation.

a. Credit for Excess Drilling. Subject to the further provisions of this Article V.C.3.a., if the aggregate number of Horizontal Drainhole Wells Unit Operator drills and completes, subject to Article V.C.1.b., during 2019 or

any subsequent calendar year exceeds Unit Operator's Development Obligation for the year, Unit Operator shall have the right to apply the excess (i.e., the positive difference between the aggregate number of Horizontal Drainhole Wells Unit Operator actually drilled and completed, subject to Article V.C.1.b., during such year and Unit Operator's Development Obligation for the year) as a credit toward its Development Obligation for the next succeeding calendar year ("Credit"). The aggregate number of Horizontal Drainhole Wells drilled and completed, subject to Article V.C.1.b., by Unit Operator during any given calendar year shall be computed as the Horizontal Drainhole Wells actually drilled and completed, subject to Article V.C.1.b., by Unit Operator during such year plus any Credit Unit Operator has the right to apply toward its Development Obligation for the year; provided, however, the maximum Credit that may be earned during any given calendar year and applied as a credit toward Unit Operator's Development Obligation during the next succeeding calendar year is six Horizontal Drainhole Wells.

VI. TERM AND TERMINATION:

A. As long as Unit Operator conducts Continuous Development, this Agreement shall remain in force and effect as to the entire Unit Area until January 1, 2038, at which time this Agreement will terminate as to all land not contained within Retained Units. Within 30 days following the partial termination of this Agreement in accordance with the immediately preceding sentence or following Termination of Continuous Development, whichever first occurs, Unit Operator shall, as required by the provisions of Article V.C.2.a., designate the Retained Units for the appropriate Horizonal Drainhole Wells completed on the Unit Area, prepare revised Exhibits "A", "B", and "C" to this Agreement to conform the Unit Area to the area covered by the Retained Units in accordance with the provisions of Article V.C.2.a., record the revised Exhibits "A", "B", and "C" in Culberson County, Texas, and furnish copies of the recorded revised Exhibits, with the recording information prominently displayed thereon, to the GLO. If the Unit Area is revised by the Retained Units in accordance with this Article VI.A. or Article VI.C., the Unit Area and Exhibits "A", "B", and "C", as revised, is the "Revised Unit Area".

B. Subject to Article V.C.2.a. and VI.A., this Agreement will remain in effect until the last Horizontal Drainhole Well on the Unit Area or Revised Unit Area ceases to produce without any reworking or drilling operations being conducted by Unit Operator to restore or obtain production within 90 days of such cessation of production.

C. Notwithstanding Article VI.B., following partial termination in accordance with Article VI.A., production from or reworking or drilling operations on one Retained Unit does not constitute production from or reworking or drilling operations on any other Retained Unit. When the last Horizontal Drainhole Well on any Retained Unit ceases to produce without any reworking or drilling operations being conducted by Unit Operator to restore or obtain production within 90 days of such cessation of production, such Retained Unit will terminate and Unit Operator shall prepare revised Exhibits "A", "B", and "C" to the Agreement to conform to the Revised Unit Area, record the revised Exhibits "A", "B", and "C" in Culberson County, Texas, and furnish copies of the recorded revised Exhibits, with the recording information prominently displayed thereon, to the GLO.

D. As long this Agreement remains in effect as to the Unit Area or Revised Unit Area and for such time thereafter as is reasonable required for Unit Operator to plug and abandon the Horizontal Drainhole Wells on such area, Unit Operator is hereby granted all necessary easements and rights of way across any lands that were originally included in the Unit Area so that Unit Operator can continue to use or access any facilities installed by Unit Operator.

E. Subject to the Commissioner's approval, this Agreement shall be effective upon the Effective Date, and shall continue in force and effect as provided above. Unit Operator, together with Working Interest Owners owning not less than 75% of the Working Interest in the Unit Area on an acreage basis, may voluntarily terminate this Agreement as to all or any portion of the Unit Area, save and except any lands comprising a Retained Unit or Units from which oil or gas is then being produced, or capable of being produced, in paying quantities, upon 60 days advance written notice to the Commissioner. Termination of this Agreement, in whole or part, shall not relieve Unit Operator or the non-operating Working Interest Owners of any obligations, including without limitation plugging any well in accordance with the requirements of the Lease or applicable law, that may have accrued prior to the date of such termination.

F. Should this Agreement terminate in whole or part for any cause, the Leases and any other contracts affecting the lands within the Unit Area, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under such Leases or contracts and such production had ceased on the date of such termination or partial termination of this Agreement.

VII. ALLOCATION OF PRODUCTION:

A. Unit Area Wells. For the purposes of computing the share of production of the Unitized Substances from the Unit Area to which each interest owner is entitled, there shall be allocated to each of the tracts comprising the Unit Area the pro rata share of the Unitized Substances produced from the Unit Area that the number of surface acres covered by such tract bears to the total number of surface acres covered by the entire Unit Area, and the share of such production to which each interest owner is entitled shall be computed on the basis of such owner's interest in the production so allocated to such tract.

B. Following the partial termination of this Agreement in accordance with Article VI.A. or Article VI.C., for the purposes of computing the share of production of the Unitized Substances from the Revised Unit Area, if applicable, to which each interest owner may be entitled, there shall be allocated to each of the tracts comprising the Revised Unit Area the pro rata share of the Unitized Substances produced from the Revised Unit Area that the number of surface acres covered by such tract bears to the total number of surface acres covered by the entire Revised Unit Area, and the share of production to which each interest owner is entitled shall be computed on the basis of such owner's interest in the production so allocated to such tract.

C. GLO and WISE hereby grant Unit Operator the authority to surface commingle Unitized Substances produced solely from the Unit Area, including the Revised Unit Area, and GLO and WISE agree that such authorization satisfies 16 Tex. Admin. Code §§3.26(b) and 3.27(e), and 31 Tex. Admin. Code §9.35(a)(3), and any successor rule, regulation or law.

D. Production in Kind. Nothing contained in this Agreement shall be construed to alter any

person's or Party's right to take its allocated share of oil or gas production in kind. Royalties payable to the GLO and Owners on allocated production shall be computed and paid in the time and manner provided for in the Leases.

VIII. MINIMUM ROYALTY, COMPENSATORY ROYALTY AND DUTY TO PROTECT FROM DRAINAGE:

A. Any minimum royalties that become due under any of the Leases shall be computed and paid in accordance with the terms of such Lease, and nothing in this Agreement shall operate to relieve the lessee or lessees under such Lease from the obligation to pay such minimum royalty as provided therein.

B. The drilling and completion of a well within the Unit Area pursuant to this Agreement shall not obligate the lessee under any express or implied provision of any of the Leases to drill an offset well, pay compensatory royalty or otherwise protect the lands covered by such Lease from drainage; however, nothing in this Agreement shall relieve Operator from protecting lands within the Unit Area, as would a reasonably prudent operator, from drainage occurring from wells on lands situated outside the Unit Area.

IX. LEASES EXTENDED AND CONFORMED:

A. The terms and provisions of all Leases and any other contracts relating to exploration, drilling, development, or operation for Unitized Substances on lands committed to this Agreement are hereby expressly modified and amended to the extent, and only to the extent, necessary to make them conform to the provisions hereof, and to make them remain in force and effect as to acreage included in the Unit Area or Revised Unit Area as long as this Agreement remains in effect, but, subject to the immediately preceding phrase, such Leases and contracts, if any, shall otherwise remain in force and effect subject to and in accordance with their terms; and the Commissioner by his approval hereof does hereby establish, alter, or change the drilling, producing, and royalty requirements of the Leases committed hereto to the extent, and only to the extent, necessary to conform said requirements to the provisions of this Agreement. Notwithstanding the provisions of this Article IX.A., the termination or partial termination of this Agreement alone will not in any way effect a similar, or any, termination or partial termination of any of the Leases, and the Leases are not modified or amended to affect such a termination or partial termination. Despite the termination or partial termination of this Agreement, the Leases will continue in full force and effect, or expire or terminate in whole or part, subject to and in accordance with their respective terms and in accordance with Article VI.E.

B. Prior to the termination of this Agreement, drilling operations on or production of Unitized Substances from any tract of land covered by this Agreement will be deemed to be drilling operations on or production of Unitized Substances from all of the tracts comprising the Unit Area, and no Lease shall be deemed to have expired by reason of the lessee's failure to conduct any such operations on, or produce Unitized Substances from, any of the lands covered by such Lease.

C. From and after the Termination of Continuous Development or any other partial termination of this Agreement, and notwithstanding any other provision of this Agreement to the contrary, each of the Leases may be maintained in force as to lands and depths that are not subject to this Agreement only as provided in such Leases without regard to operations on or production pursuant to this Agreement; and neither operations on nor

production from the lands and depths subject to this Agreement, nor the payment of shut-in royalties from a well drilled pursuant to this Agreement, shall serve to maintain any of the Leases in force as to any lands or depths that are not subject to this Agreement, regardless of whether the production or operations on the Unit Area, or the well for which shut-in royalties are being paid, are actually located on such Lease or not.

D. Notwithstanding the provisions of Article IX.A., from and after the Termination of Continuous Development or any other partial termination of this Agreement, and with regard to that portion of the Delaware Ranch Lease that is subject to this Agreement, the provisions of the Delaware Ranch Lease pertaining to the termination of the Delaware Ranch Lease as to certain depths will control over Articles V.C.2.a.i. and V.C.2.a.ii. of this Agreement.

X. GENERAL:

A. Notices. All notices, demands, or communications required hereunder shall be in writing and shall be delivered by certified mail, commercial courier, personal delivery, or facsimile, to the receiving party at its address listed under its signature line below. Parties may change their address of record on 30 days advance written notice.

B. Force Majeure. If, after good faith effort and the exercise of due care and diligence Unit Operator is prevented from complying with any covenant or obligation to conduct drilling operations on or produce Unitized Substances from the lands covered by this Agreement by reason of war, rebellion, riots, strikes, acts of God, or any valid order, rule or regulation of government authority, then while so prevented, Unit Operator's obligation to comply with such covenant or obligation shall be suspended and Unit Operator shall not be liable for damages for failure to comply therewith; provided, however, nothing in this provision shall suspend any financial obligations.

C. Covenants run with the land. The covenants herein shall be construed to be covenants running with the land with respect to the interests of the Parties, their successors or assigns, and any grant, transfer or conveyance of an interest in any land or Lease subject to this Agreement shall be and is hereby conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, assignee, or other successor in interest.

D. Counterparts. This Agreement may be executed in any number of counterparties, none of which need be executed by all Parties, or may be ratified or consented to by separate written instrument specifically referring hereto, and shall be binding upon all parties who have executed a counterpart, ratification or consent to this Agreement, with the same force and effect as if all such parties had signed the same document.

E. Wise execution. Wise, as Owner under the Delaware Ranch Lease, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

F. Exhibits. All exhibits attached to this Agreement are made a part hereof.

RE: DR ST CENTRAL 3405H
API #42-109-32681
Cessation of production

In accordance with the terms of that certain Relinquishment Act Oil and Gas Lease dated March 28, 2013, between Wise Asset No. 8, LTD and Wise Asset No. 10, LTD, as Agent, and COG Operating LLC, as Lessee (GLO Number MF114883), the letter provides notice of cessation of production of the DR State Central 3405H well (API 42-109-32681).

The subject well went down on 6/23/2018 due to vessel repairs. The plan is to restore it to production once the repairs are completed.

Technical questions regarding this well should be directed to Hussein Chebli at (432) 687-7914 or hachebli@chevron.com. Land-related questions regarding this well should be directed to Katie Halley at (432)-687-7572 or khalley@chevron.com.

Sincerely,

Hussein Chebli
Production Engineer

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

GLO UNIT#8954
MF #114883

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION

SWR #13 Formation Data

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013
WOLFCAMP	7,900	9,100		7	12/17/2013
ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information. http://www.rrc.texas.gov/oil-gas/compliance-enforcement/rule-13-geologic-formation-info

APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.: 148113
2. Operator's Name (as shown on form P-5, Organization Report): CHEVRON U. S. A. INC.
3. Operator Address (include street, city, state, zip): 6301 DEAUVILLE BLVD MIDLAND, TX 79706-0000
4. Lease Name: DR STATE WISE UNIT 1
5. Well No.: 0031WA

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 9000
9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No
10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08
12. County: CULBERSON
13. Surface Location: [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 21.23 miles in a NW direction from Orla which is the nearest town in the county of the well site.

15. Section: 23
16. Block: 60
17. Survey: T&P RR CO
18. Abstract No.: A-2806
19. Distance to nearest lease line: 200 ft.
20. Number of contiguous acres in lease, pooled unit, or unitized tract: 46533.82

21. Lease Perpendiculars: 603 ft from the SOUTH line and 1578 ft from the WEST line
22. Survey Perpendiculars: 603 ft from the SOUTH line and 1578 ft from the WEST line

23. Is this a pooled unit? [X] Yes [ ] No
24. Unitization Docket No.:
25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	31913800	FORD, WEST (WOLFCAMP)	Oil or Gas Well	9000	2724.00	17

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks
[FILER Jun 15, 2018 4:24 PM]: Well No. 3028H in Form P-16 is child well of a stacked lateral.

Certificate:
I certify that information stated in this application is true and complete, to the best of my knowledge

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Sec: 23 **Block:** 60
County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 33590 **Drilling Permit No:** 841300

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ; **WELL NUMBER:** 0031WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2300 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 07/13/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT#8954
MF #114883

Date Issued:	12 March 2018	**GAU Number:**	190804

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 23/14 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0031WA
		Total Vertical Depth:	9000
		Latitude:	31.941058
		Longitude:	-104.242596
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2806; Block-60; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to the base of the Rustler, which is estimated to occur at a depth between 150 and 200 feet, must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Please send Gamma/Porosity log of this well when it is available.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/02/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

NOTES:
1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION

GLO UNIT #8954
MF #114883

SWR #13 Formation Data

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013
WOLFCAMP	7,900	9,100		7	12/17/2013
ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

RE: Lease: DR STATE WISE UNIT 1
Well No: 0032WA
Sec: 23 **Block:** 60 T1
County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 33592 **Drilling Permit No:** 841373

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ; **WELL NUMBER:** 0032WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2300 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

Please notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 07/13/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Date Issued:	12 March 2018	**GAU Number:**	190804

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 23/14 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0031WA
		Total Vertical Depth:	9000
		Latitude:	31.941058
		Longitude:	-104.242596
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2806; Block-60; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to the base of the Rustler, which is estimated to occur at a depth between 150 and 200 feet, must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Please send Gamma/Porosity log of this well when it is available.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/02/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION

SWR #13 Formation Data

GLO UNIT #8954
MF #114883

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013
WOLFCAMP	7,900	9,100		7	12/17/2013
ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information. http://www.rrc.texas.gov/oil-gas/compliance-enforcement/rule-13-geologic-formation-info

APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No. 148113

2. Operator's Name (as shown on form P-5, Organization Report): CHEVRON U. S. A. INC.

3. Operator Address (include street, city, state, zip): 6301 DEAUVILLE BLVD MIDLAND, TX 79706-0000

4. Lease Name: DR STATE WISE UNIT 1

5. Well No.: 0033WA

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 9000

9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No

10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08

12. County: CULBERSON

13. Surface Location [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 21.23 miles in a NW direction from ORLA which is the nearest town in the county of the well site.

15. Section: 23

16. Block: 60 T1

17. Survey: T&P RR CO

18. Abstract No.: A-2806

19. Distance to nearest lease line: 200 ft.

20. Number of contiguous acres in lease, pooled unit, or unitized tract: 46533.82

21. Lease Perpendiculars: 603 ft from the S line and 1628 ft from the W line.

22. Survey Perpendiculars: 603 ft from the S line and 1628 ft from the W line.

23. Is this a pooled unit? [X] Yes [ ] No

24. Unitization Docket No.:

25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	31913800	FORD, WEST (WOLFCAMP)	Oil or Gas Well	9000	660.00	19

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

[FILER Jun 19, 2018 2:18 PM]: Well No. 3028H in Form P-16 is child well of a stacked lateral.

Certificate:

I certify that information stated in this application is true and complete, to the best of my knowledge.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

RE: Lease: DR STATE WISE UNIT 1
Well No: 0033WA
Sec: 23 **Block:** 60 T1
County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 33661 **Drilling Permit No:** 841427

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ; **WELL NUMBER:** 0033WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2300 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

Please notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 07/16/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Date Issued:	14 March 2018	**GAU Number:**	190807

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 23/14 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0033WA
		Total Vertical Depth:	9000
		Latitude:	31.941058
		Longitude:	-104.242435
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2806; Block-60; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to the base of the Rustler, which is estimated to occur at a depth of 200 feet, must be protected.

This recommendation is applicable to all wells within a radius of 200 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/06/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

Rev. 01/2016

Filer is the owner or lessee, or has been authorized by the owner or lessee, of all or an undivided portion of the mineral estate under each tract for which filer is listed as operator below. For all leases operated by other entities, the number of assigned acres shown are reflected on current Commission records or the filer has been authorized by the current operator to change the assigned acreage of that operator as shown below.

SECTION III (CONTINUED). LISTING OF ALL WELLS IN THE APPLIED-FOR FIELD ON THE SAME ACREAGE AS THE LEASE, POOLED UNIT, OR UNITIZED TRACT DESIGNATED IN SECTION II ABOVE BY FILER

NOTES:

1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.
http://www.rrc.texas.gov/oil-gas/compliance-enforcement/rule-13-geologic-formation-info

API No. 42-109-33355

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION
APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.: 148113
2. Operator's Name (as shown on form P-5, Organization Report): CHEVRON U. S. A. INC.
3. Operator Address (include street, city, state, zip): 6301 DEAUVILLE BLVD MIDLAND, TX 79706-0000
4. Lease Name: DR STATE WISE UNIT 1
5. Well No.: 0034WA

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 9000
9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No
10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08
12. County: CULBERSON
13. Surface Location [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 21.23 miles in a NW direction from ORLA which is the nearest town in the county of the well site.

15. Section: 23
16. Block: 60 T1
17. Survey: T&P RR CO
18. Abstract No.: A-2806
19. Distance to nearest lease line: 200 ft.
20. Number of contiguous acres in lease, pooled unit, or unitized tract: 46533.82

21. Lease Perpendiculars: 603 ft from the S line and 1653 ft from the W line.
22. Survey Perpendiculars: 603 ft from the S line and 1653 ft from the W line.

23. Is this a pooled unit? [X] Yes [ ] No
24. Unitization Docket No.:
25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	31913800	FORD, WEST (WOLFCAMP)	Oil or Gas Well	9000	660.00	20

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

[FILER Jun 19, 2018 5:03 PM]: Well No. 3028H in Form P-16 is child well of a stacked lateral.

Certificate:

I certify that information stated in this application is true and complete, to the best of my knowledge.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 33703
Drilling Permit No: 841460

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ; **WELL NUMBER:** 0034WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2300 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

Please notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 07/17/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Date Issued:	14 March 2018	**GAU Number:**	190807

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 23/14 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0033WA
		Total Vertical Depth:	9000
		Latitude:	31.941058
		Longitude:	-104.242435
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2806; Block-60; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to the base of the Rustler, which is estimated to occur at a depth of 200 feet, must be protected.

This recommendation is applicable to all wells within a radius of 200 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/06/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

NOTES:
1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

GLO #8954
MINERAL FILE NO #114883

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION

SWR #13 Formation Data

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013
WOLFCAMP	7,900	9,100		7	12/17/2013
ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information. http://www.rrc.texas.gov/oil-gas/compliance-enforcement/rule-13-geologic-formation-info

County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 30223 **Drilling Permit No:** 839728

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ; **WELL NUMBER:** 0041WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2000 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

GLO #8954
MINERAL FILE NO #114883

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 05/17/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

INSTRUCTIONS — Reference Statewide Rules 31, 38 and 40

1 When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat
2 The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3 If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4 If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1
5 If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6 Identify the drill site tract with an * to the left of the tract identifier
7 The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	14 March 2018	**GAU Number:**	190809

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 23/14 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0041WA
		Total Vertical Depth:	9000
		Latitude:	31.940631
		Longitude:	-104.234805
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2806; Block-60; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to the base of the Rustler, which is estimated to occur at a depth of 200 feet, must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/06/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

NOTES:
1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

Data Validation Time Stamp: May 10, 2018 10:39 AM('As Approved' Version)

SWR #13 Formation Data

CULBERSON (109) County

Formation	Shallow Top	Deep Top	Remarks	Geological Order	Effective Date
RUSTLER	450	450		1	12/17/2013
FORD-DELAWARE	2,500	2,500		2	12/17/2013
DELAWARE	2,600	3,400		3	12/17/2013
CHERRY CANYON	3,600	5,400		4	12/17/2013
BONE SPRINGS	6,150	6,150		5	12/17/2013
MISSISSIPPIAN	8,900	8,900		6	12/17/2013
WOLFCAMP	7,900	9,100		7	12/17/2013
ATOKA	11,600	11,600		8	12/17/2013
MORROW	11,800	11,800		9	12/17/2013
STRAWN	5,750	12,800		10	12/17/2013
SILURIAN	15,400	15,400		11	12/17/2013

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. Formation "TOP" information listed reflects an estimated range based on geologic variances across the county. To clarify, the "Deep Top" is not the bottom of the formation; it is the deepest depth at which the "TOP" of the formation has been or might be encountered. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	14 March 2018	**GAU Number:**	190809

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR A 23/14 STATE
		Lease Number:	
Operator No.:	148113	**Well Number:**	0041WA
		Total Vertical Depth:	9000
		Latitude:	31.940631
		Longitude:	-104.234805
		Datum:	NAD27

Purpose: New Drill

Location: Survey-T&P RR CO; Abstract-2806; Block-60; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to the base of the Rustler, which is estimated to occur at a depth of 200 feet, must be protected.

This recommendation is applicable to all wells within a radius of 2000 feet of this location.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. This recommendation is for normal drilling, production, and plugging operations only. It does not apply to saltwater disposal operation into a nonproductive zone (RRC Form W-14).

This determination is based on information provided when the application was submitted on 03/06/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

Well No: 0042WA
Sec: 23 **Block:** 60 T1
County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 30224 **Drilling Permit No:** 839761

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ; **WELL NUMBER:** 0042WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2000 feet of surface casing and circulate cement from the shoe to the ground surface.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

GLO: 8954
Mineral File No: 114883

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 05/17/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.
