INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Instructions for Form W-15, Cementing Report

NOTICE: The Form W-15 must be submitted as an attachment to a Form G-1 (Gas Well Back Pressure Test, Completion or Recompletion Report, and Log), Form W-2 (Oil Well Potential Test, Completion or Recompletion Report, and Log), Form W-3 (Plugging Record), or Form W-4 (Application for Multiple Completion), any time cement is pumped in a wellbore.

A. **What to file:** An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form.
The Form W-15 should be filed with the Form W-3, Plugging Record, unless the Form W-3 is signed by the cementing company representative. When reporting dry holes, operators must complete Form W-15, in addition to Form W-3, to show any casing cemented in the hole.

B. **How to file:** An oil and gas completion report and Form W-15 may be filed online using the Commission's Online System (https://webapps.rrc.state.tx.us/security/login.do) or a paper copy of the form may be mailed to the Commission in Austin (P.O. Box 12967, Austin, Texas 78711- 2967).

C. **Surface casing:** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Groundwater Advisory Unit in Austin. Sufficient cement shall be used to fill the annular space outside the casing from the shoe to the ground surface or to the bottom of the cellar. Before drilling a well, an operator must obtain a letter from the Groundwater Advisory Unit stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.
To plug and abandon a well, operators must use only cementers approved by the Commission's Director of Field Operations in accordance with SWR 14 (http://info.sos.state.tx.us/pls/pub/readtac$ext.TacPage?sl=R&app=9&p_dir=&p_rloc=&p_tloc=&p_ploc=&pg=1&p_tac=&ti=16&pt=1&ch=3&rl=14). Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

D. **Estimated % wash-out:** If the estimated % wash-out is less than 20% (or 30% along the Gulf Coast), provide supporting documentation such as a caliper log to show how the estimated % wash-out was obtained.

E. **Multi-stage cement:** An operator must report the multi-stage cement shoe in II. Casing Cementing Data section by selecting the type of casing and Multi-stage cement shoe. The operator must report the multi-stage cement tool in III. Casing Cementing Data section by selecting the type of casing and Multi-stage cement/DV tool.

F. Multiple parallel strings: An operator should file the Form W-15 as an attachment to the Form W-4, Application for Multiple Completion. An operator may be required to submit multiple Form W-15s to show all data for multiple parallel strings.

G. Slurry data: If cement job exceeds three slurries, continue the list of slurries in the Slurry table in the subsequent Casing Cementing Data box.

County: CULBERSON
Survey Name: T&P RR CO

SWR13EX Application Number: 48283
Drilling Permit No: 846944

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for the **LEASE NAME:** DR STATE WISE UNIT 1 ;
WELL NUMBER: 0182WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 2200 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted on 11/28/2018
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

DISTRICT DIRECTOR

GROUNDWATER PROTECTION DETERMINATION

Groundwater Advisory Unit

GLO UNIT #8954
MF #114883

Form GW-2

Date Issued:	27 November 2018	**GAU Number:**	220468

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	10933424
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
Operator No.:	148113	**Lease Number:**	
		Well Number:	0182WA
		Total Vertical Depth:	9000
		Latitude:	31.941011
		Longitude:	-104.290396
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO ; Abstract-4755; Block-60 ; Township-1; Section-20

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 200 feet must be protected.

This recommendation is applicable for all wells drilled in this Section 20.

Please send Gamma/Porosity log of this well when it is available.

Note: Unless stated otherwise, this recommendation is intended to apply only to the subject well and not for area-wide use. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 11/20/2018. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

AMENDMENT TO UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 2 - STATE UNIT CULBERSON COUNTY, TEXAS

This **AMENDMENT TO UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 2 - STATE UNIT** (herein "Amendment"), approved and executed by the Commissioner of the General Land Office and entered into as of the 21st day of April, 2020, by and between the parties executing, ratifying, or consenting hereto, hereinafter the "Parties," but to be effective as of April 3, 2018 (the "Effective Date").

RECITALS

A. Chevron U.S.A. Inc. ("Chevron") and the General Land Office of the State of Texas entered into that certain Unit Agreement For The Development And Operation of The Delaware Ranch, Wise Unit No. 2 – State Unit dated effective April 3, 2018, recorded in Volume 37, Page 898, Official Public Records of Culberson County, Texas, (the "Agreement").

B. Wise Asset No. 8, Ltd., and Wise Asset No. 10, Ltd., as owner of the soil under the first lease described on Exhibit A of the Agreement, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

C. The Parties desire to amend, modify, delete, or replace certain provisions of the Agreement, as more particularly described below.

AMENDMENT

NOW, THEREFORE, in consideration of the mutual promises set out herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree to be bound by the following terms:

1. The first paragraph only of Article V.C.1.b of the Agreement is hereby deleted and replaced with the following two paragraphs:

> "Except as provided in the immediately succeeding paragraph below, for purposes of Articles V.C.1 and V.C.3.a. only, if actual drilling of a Horizontal Drainhole Well is commenced during 2018 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Article V.B. herein, it shall be deemed that the well has been drilled and completed during such calendar year, even if the well was actually drilled, in part, and/or completed, in whole or part, during the next succeeding calendar year.
>
> Notwithstanding the provisions of the immediately preceding paragraph above, for purposes of Articles V.C.1 and V.C.3.a. only, if actual drilling of a Horizontal Drainhole Well is commenced during the calendar year 2019, and such well is thereafter drilled and completed in accordance with Article V.B herein, it shall be deemed that the well has been drilled and completed during 2019, even if the well was actually drilled, in part, and/or completed, in whole or part, on or before June 30, 2021."

2. This Amendment may be executed in any number of counterparts, each of which will be deemed an original of this Amendment, and which together will constitute one and the same instrument; provided that none of the Parties hereto will be bound by this Amendment unless and until all Parties have executed the original or a counterpart thereof.

3. This Amendment is governed by and interpreted under the laws of the State of Texas, without regard to its choice of law rules.

IN WITNESS WHEREOF, this Amendment is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

AMENDMENT TO UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 1 - STATE UNIT CULBERSON COUNTY, TEXAS

This **AMENDMENT TO UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 1 - STATE UNIT** (herein "Amendment"), approved and executed by the Commissioner of the General Land Office and entered into as of the 21st day of April, 2020, by and between the parties executing, ratifying, or consenting hereto, hereinafter the "Parties," but to be effective as of April 3, 2018 (the "Effective Date").

RECITALS

A. Chevron U.S.A. Inc. ("Chevron") and the General Land Office of the State of Texas entered into that certain Unit Agreement For The Development And Operation of The Delaware Ranch, Wise Unit No. 1 – State Unit dated effective April 3, 2018, recorded in Volume 37, Page 871, Official Public Records of Culberson County, Texas, (the "Agreement").

B. Wise Asset No. 8, Ltd., and Wise Asset No. 10, Ltd., as owner of the soil under the first lease described on Exhibit A of the Agreement, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

C. The Parties desire to amend, modify, delete, or replace certain provisions of the Agreement, as more particularly described below.

AMENDMENT

NOW, THEREFORE, in consideration of the mutual promises set out herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree to be bound by the following terms:

1. The first paragraph only of Article V.C.1.b of the Agreement is hereby deleted and replaced with the following two paragraphs:

> "Except as provided in the immediately succeeding paragraph below, for purposes of Articles V.C.1 and V.C.3.a. only, if actual drilling of a Horizontal Drainhole Well is commenced during 2018 or any subsequent calendar year, and such well is thereafter drilled and completed in accordance with Article V.B. herein, it shall be deemed that the well has been drilled and completed during such calendar year, even if the well was actually drilled, in part, and/or completed, in whole or part, during the next succeeding calendar year.
>
> Notwithstanding the provisions of the immediately preceding paragraph above, for purposes of Articles V.C.1 and V.C.3.a. only, if actual drilling of a Horizontal Drainhole Well is commenced during the calendar year 2019, and such well is thereafter drilled and completed in accordance with Article V.B herein, it shall be deemed that the well has been drilled and completed during 2019, even if the well was actually drilled, in part, and/or completed, in whole or part, on or before June 30, 2021."

2. Article VII.A of the Agreement is hereby amended by deleting "Stephen Neil Prewitt" and replacing it with "Stephen Neil Prewit" and by deleting "John Collins Prewitt" and replacing it with "John C. Prewit, Trustee of the John C. Prewit Revocable Trust".

3. This Amendment may be executed in any number of counterparts, each of which will be deemed an original of this Amendment, and which together will constitute one and the same instrument; provided that none of the Parties hereto will be bound by this Amendment unless and until all Parties have executed the original or a counterpart thereof.

4. This Amendment is governed by and interpreted under the laws of the State of Texas, without regard to its choice of law rules.

IN WITNESS WHEREOF, this Amendment is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

DESIGNATION OF PARTICIPATION UNIT

STATE OF TEXAS §
§
COUNTY OF CULBERSON §

Chevron U.S.A. Inc. ("Chevron") is the Unit Operator of the Unit Agreement for the Development and Operation of the Delaware Ranch, Wise Unit No. 1 – State Unit dated effective April 3, 2018, recorded at Volume 37, Page 871, Official Public Records of Culberson County, Texas ("Delaware Ranch Unit"). Chevron drilled wells and completed them as producers of oil and/or gas, or capable producers of oil and/or gas, ("Well") pursuant to the Delaware Ranch Unit. Paragraph V.D.1. of the Delaware Ranch Unit provides that upon completion of any well drilled pursuant to the Delaware Ranch Unit as a producer of oil and/or gas, or capable producer of oil and/or gas, the Unit Operator shall designate by a written instrument the geographic area surrounding such Well ("Participation Unit"), with such instrument being suitable for recording in the county where the lands are located.

In compliance with Paragraph V.D.1. of the Delaware Ranch Unit, Chevron hereby designates the lands described on each of the plats attached as Exhibit A through Exhibit W as the Participation Unit for the applicable corresponding Well described on each of the plats attached as Exhibit A through Exhibit W.

Nothing contained in this Designation of Participation Unit expands the rights or diminishes the obligations in the Delaware Ranch Unit, or the oil and gas leases therein, except as expressly provided herein.

IN WITNESS WHEREOF, this Designation of Participation Unit is executed by the undersigned, as evidenced by the following signature, but is effective as to each Participation Unit beginning on the date of first production of the applicable corresponding Well.

Chevron U.S.A. Inc.

Signature: Kelly Coppins

Name: Kelly Coppins

Title: Attorney-in-Fact

STATE OF TEXAS §
§
COUNTY OF HARRIS §

This instrument was acknowledged before me on January 21, 2021, by Kelly Coppins, Attorney-in-Fact for Chevron U.S.A. Inc., a Pennsylvania corporation, on behalf of said corporation.

BLOCK 61, TOWNSHIP 1

CULBERSON COUNTY, TEXAS

DR STATE WISE UNIT 1 0091 WA

Description of a proposed participation unit containing 360.000 acres, more or less, located within the T & P RR Co. Survey, Abstract No. 4750, Section 6, T & P RR Co. Survey, Abstract No. 2798, Section 7, Block 60, Township 1 and T & P RR Co. Survey, Abstract No. 2914, Section 1, T & P RR Co. Survey, Abstract No. 4759, Section 12, Block 61, Township 1, Culberson County, Texas.

POINT OF BEGINNING at a Found ½" Rebar at the Northwest corner of said Section 6 having the following coordinates and being the **POINT OF BEGINNING**: X= 765,004.05 and Y= 870,759.47 (Texas Central State Plane Coordinate System, NAD 27);

Thence South 87 degrees 55 minutes 19 seconds East 1,207.09 feet to a point;

Thence South 02 degrees 16 minutes 19 seconds West 11,012.63 feet to a point;

Thence North 88 degrees 03 minutes 08 seconds West 1,233.76 feet to a point;

Thence North 87 degrees 48 minutes 49 seconds West 191.63 feet to a point;

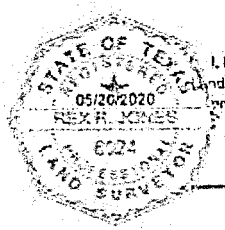
Thence North 02 degrees 17 minutes 19 seconds East 11,015.31 feet to a point;

Thence South 87 degrees 51 minutes 40 seconds East 215.08 feet back to the said **POINT OF BEGINNING**, containing 360.000 acres of land, more or less.

Reference is hereby made to a separate plat of the subject unit.

The bearings recited hereon are oriented to NAD 27 Texas Central Zone.

This description represents a proposed participation unit. This description does not represent a boundary survey.



FOR THE EXCLUSIVE USE OF
CHEVRON U.S.A. INC.
I, Rex R. Jones, Registered Professional Land Surveyor, do hereby state this plat is true and correct to the best of my knowledge.

RE: Delaware Ranch Prospect
Damage payment for Delaware Ranch Access Road

Dear Mr. Martin:

Enclosed please find check number 268897, dated December 11, 2014, in the amount of $23,902.13, as surface damage consideration for an access road from the DR STATE EAST #1803H to the DR STATE CENTRAL #3003H in Culberson County, Texas. This payment was split equally with the surface owner, Wise Asset No. 8, Ltd., who will also receive a check in the amount of $23,902.13. The total amount is calculated as 674.57 rods of new road @ $30.00 per rod plus 447.01 rods of existing road @ $15.00 per rod plus 6,954 yards of rock @ $3.00 per yard. Please acknowledge receipt of this check by signing below and returning the original copy of this letter in the enclosed self-addressed envelope. You may retain the copy for your records.

Respectfully,

COG Operating LLC

RE: Delaware Ranch Prospect
DR STATE CENTRAL #2501H

Dear Mr. Martin:

Enclosed please find two checks dated January 7, 2016, and described in more detail as follows:

- Check #314208 in the amount of $4,627.90 as surface damage consideration for Texas General Land Office's portion for a 4" produced water pipeline for the DR STATE CENTRAL #2501H. The total amount is calculated as 462.79 rods of pipeline @ $20.00 per rod and split evenly with the surface owner, Wise Asset No. 8, Ltd.

- Check #314209 in the amount of $2,052.80 as surface damage consideration for Texas General Land Office's portion of the well pad for the DR STATE CENTRAL #2501H. The total amount is calculated as $8,000.00 * 51.32% of the location and split evenly with the surface owner, Wise Asset No. 8, Ltd.

Please acknowledge receipt of these checks by signing below and returning the original copy of this letter in the enclosed self-addressed envelope. You may retain the copy for your records.

Respectfully,

RE: Delaware Ranch Prospect
Power Line Payment

Dear Mr. Martin:

Enclosed please find check number 340044, dated October 4, 2016, in the amount of $4,889.63, as surface damage consideration for Texas General Land Office's portion for a power line installed from an existing Oncor line over to the DR STATE EAST #20SW location. This amount is calculated as 651.95 rods of power line @ $15.00 per rod, and split equally with the surface owner, Wise Asset No. 8, Ltd. Please acknowledge receipt of this check by signing below and returning the original copy of this letter in the enclosed self-addressed envelope. You may retain the copy for your records.

Respectfully,

COG Operating LLC

RE: Delaware Ranch Prospect
Damage payment for DR STATE EAST #3028H & 3029H Pipeline

Dear Mr. Martin:

Enclosed please find check number 350694, dated February 2, 2017, in the amount of $752.40, as surface damage consideration for your portion of the DR State East #3028H & #3029H pipeline located in Section 30, Block 60, T1S, T&P RR Co. Survey, Culberson County, Texas and Section 24, Block 61, T1S, T&P RR Co. Survey, Culberson County, Texas. The total pipeline payment is $1,504.80 being 50.16 rods @ $30.00/rod for a 6" pipeline. Your payment is calculated as split with the Wise Asset No. 8, Ltd, Stephen N. Prewit, and John C. Prewit where they will also receive a payment for their proportionate share of the surface damages. Please acknowledge receipt of this check by signing below and returning the original copy of this letter in the enclosed self-addressed envelope. You may retain the copy for your records.

RE: **DR State East #3428H**
Well Location Payment
Section 34, Block 60, T1S, T&P RR Co. Survey
Culberson County, TX – Delaware Ranch Prospect

Dear Mr. Martin:

Enclosed please find check number 361744 in the amount of $2,888.00, dated June 6, 2017, as surface damage consideration for the DR State East #3428H well location. The total payment is $5,776.00 being $8,000.00 * 72.2% of the well pad. Your payment is proportionately split with Wise Asset No. 8, Ltd., who will also receive a payment for their share of the surface damages.

Please acknowledge receipt of this check by signing below and returning one (1) original copy of this letter in the enclosed self-addressed envelope. You may retain the included copy of this letter for your records. Should you have any questions, please do not hesitate to contact Landman Matt Russell at 432-685-2580 or mrussell@concho.com.

Respectfully,

A 3.02 ACRE SITE FOR THE DR STATE EAST 3428H
SECTION 34, BLOCK 60, T-1, TEXAS & PACIFIC R.R. CO. SURVEY
CULBERSON COUNTY, TEXAS

METES & BOUNDS DESCRIPTION

A tract of land located in Sections 27 & 34, Block 60, T-1, Texas & Pacific R.R. CO. Survey, Culberson County, Texas and being more particularly described by metes and bounds as follows:

BEGINNING at the Southwest corner of said site, whence a 1 1/2" iron pipe found for the Northwest corner of said Section 34 bears *N 22°40'51" W* a distance of *308.06* feet,

Thence N 00°24'38" E, at a distance of *280.88* feet cross the common line between said Sections 34 and 27, a distance of *390.23* feet in all to the Northwest corner of said site;

Thence S 87°36'36" E a distance of *347.53* feet to the Northeast corner of said site;

Thence S 04°41'18" W, at a distance of *104.66* feet cross said common line, a distance of *402.05* feet in all to the Southeast corner of said site;

Thence N 85°29'50" W, a distance of *318.14* feet to the **POINT OF BEGINNING**.

This tract contains 131724.2 Square feet or 3.02 Acres more or less.

All bearings are relative to GRID NORTH and were determined by GPS observation.
Bearings and distances shown are relative to **NAD-27** Grid Texas Central Zone.

CERTIFICATION:

THIS DRAWING DEPICTS A TRACT OF LAND THAT WAS CALCULATED FROM FIELD NOTES OR ELECTRONIC DATA FROM AN ACTUAL ON THE GROUND SURVEY MADE UNDER MY DIRECT SUPERVISION AND IS TRUE AND CORRECT TO THE BEST OF MY KNOWLEDGE AND BELIEF. IT DOES NOT CONSTITUTE A COMPLETE BOUNDARY SURVEY AS DEFINED BY THE T.B.P.L.S. "PROFESSIONAL LAND SURVEYING PRACTICES ACT". NO MONUMENTS WERE SET AND THE TRACT DEPICTED IS FOR REFERENCE PURPOSES ONLY.

RE: Delaware Ranch Prospect
Damage payment for DR STATE EAST #3428H Pipeline

Dear Mr. Martin:

Enclosed please find check number 350693, dated February 2, 2017, in the amount of $200.00, as surface damage consideration for your portion of the DR State East #3428H pipeline located in Section 34, Block 60, T1S, T&P RR Co. Survey, Culberson County, Texas. The total pipeline payment is $400.00 being 20.00 rods @ $20.00/rod for a 4" pipeline. Your payment is calculated as split with the Wise Asset No. 8, Ltd. where they will also receive a payment for their 1/2 share of the surface damages. Please acknowledge receipt of this check by signing below and returning the original copy of this letter in the enclosed self-addressed envelope. You may retain the copy for your records.

Respectfully,

COG Operating LLC

Matt Russell
Landman

Subject: RE: Damage Payment from Chevron

Hey Shane,
Just realized that the description was on the check but didn't see the MF # - do you have that as well.
You are required to use MF # when submitting payments.
Just did a quick check and I think the MF is MF114883 – please confirm.
Thank you,
Carl Bonn, CPL

Subject: [EXTERNAL] Damage Payment from Chevron

Carl....

The damage payment that was sent was for surface damages on Sec 20, Blk 60, T1 in Culberson County, Texas on the Delaware Ranch. Wise Assets should be the acting agent for the GLO.

Chevron's Check Number 0025530643 dated 2-09-2022 in the amount of $15,074.81 as for the
Pad 17 and roads; Sec 20, Blk 60, T1
Pad - 7.95 acres X $1503.18 = $11,950.28
Roads - 173.2 rods X $18.04 = $3,124.53

Total -- $15,074.81

Thank you for all your help and please let me know if you have nay other questions.

RE: **Notification of Plug and Abandonment**
DR State East #1602H Well (API: 42-109-3257700)
Sec. 16, Blk. 60 T-1-S, A-4753, T&P RR Co. Survey
10' FNL & 1,980' FEL, Lat: 31.955130° / Long: -104.271675°
Culberson County, Texas

To Whom It May Concern:

The subject well is governed by that certain Relinquishment Act Oil and Gas Lease by and between The State of Texas General Land Office acting through its agents, Wise Asset No. 8, LTD, a Texas limited partnership, and Wise Asset No. 10, LTD, a Texas limited partnership (Lessor) and COG Operating LLC, a Delaware limited liability company (Lessee), as predecessor in interest to Chevron U.S.A. Inc. (Chevron), dated 3/28/2013, and recorded in Volume 109, Page 366, Document #68871, of the Official Public Records of Culberson County, Texas, as amended.

This letter shall serve as Chevron's formal notice of its intent to plug and abandon the DR State East #1602H Well (API: 42-109-3257700). Plug and abandonment operations are currently scheduled to begin on or around the 15 day of December 2021.

A copy of Chevron's completed Notice of Intention to Plug and Abandon (RRC Form W-3A) is enclosed for your records. Chevron will provide the Texas General Land office with a copy of the Plugging Record (RRC Form W-3) and any associated attachments, if applicable, at the address above upon completion of the plug and abandonment operation.

Should you have any questions regarding the plug and abandonment operation for this well, please contact me via phone at (281) 726-9683 or via email at hayes.thibodeaux@chevron.com.

Sincerely,

Hayes Thibodeaux

DIVISION ORDER
USER: PBYN
Date: 11/03/2020
Effective Date: 07/01/2019
Property: 073885
Owner: 8040628

To **Chevron U.S.A. Inc.**
PO Box 4538
Houston, TX 77210-4538

The undersigned severally and not jointly certifies it is the legal owner of the interest in all the oil, gas and related liquid hydrocarbons produced from the property described on Exhibit A attached hereto. Until further written notice, Chevron U.S.A. Inc. is hereby authorized to receive and purchase the oil or gas belonging to the undersigned and to account to the undersigned for their interest.

THIS AGREEMENT DOES NOT AMEND ANY LEASE OR OPERATING AGREEMENT BETWEEN THE INTEREST OWNERS AND THE LESSEE OR OPERATOR OR ANY OTHER CONTRACTS FOR THE PURCHASE OF OIL OR GAS.

The following provisions apply to each interest owner ("owner") who executes this agreement:

INDEMNITY: The owner agrees to indemnify and hold payor harmless from all liability resulting from payments made to the owner in accordance with such division of interest, including but not limited to attorney fees or judgments in connection with any suit that affects the owner's interest to which payor is made a party.

WITHHOLDING OF FUNDS: If a suit is filed that affects the interest of the owner, written notice shall be given to payor by the owner together with a copy of the complaint or petition filed. In the event of a claim or dispute that affects title to the division of interest credited herein, payor is authorized to withhold payments accruing to such interest, without interest unless otherwise required by applicable statute, until the claim or dispute is settled.

TERMINATION: Termination of this agreement is effective on the first day of the month that begins after the 30th day after the date written notice of termination is received by either party.

NOTICES: The owner agrees to notify payor in writing of any change in the division of interest, including changes of interest contingent on payment of money or expiration of time.

No change of interest is binding on payor until the recorded copy of the instrument of change or documents satisfactorily evidencing such change are furnished to payor at the time the change occurs.

Any change of interest shall be made effective on the first day of the month following receipt of such notice by payor.

In addition to the legal rights provided by the terms and provisions of this division order, an owner may have certain statutory rights under the laws of this state.

Signature of Interest Owner	Social Security/ Tax I.D. No.	Address

Failure to furnish your Social Security/Tax I.D. number will result in withholding tax in accordance with federal law, and any tax withheld will not be refundable by payor.

AUSTIN TX 78701-1436

Dear Interest Owner,

Please find enclosed a Division Order, in duplicate, for your share of the production proceeds that will be distributed by Chevron U.S.A. Inc. (Chevron) on the identified property(ies). Please review the Division Order, confirm the information is current and correct, and sign and return one copy to Chevron using the enclosed prepaid envelope. The duplicate form should be retained for your records.

If your address on the Division Order is not correct please provide updated information and initial the change. If your name has changed or if you no longer own the interest, please update and initial the Division Order and provide Chevron the documentation to support your name change or change in ownership.

In compliance with Internal Revenue Service regulations, payments made to owners for whom we have not been provided a tax identification number will be subject to a 24% backup withholding. To avoid this withholding please complete and return the enclosed IRS W-9 form.

Chevron offers an Electronic Funds Transfer (EFT) payment option which allows funds to be transferred directly to your U.S. financial institution (bank, credit union, etc.) and eliminates the need for you to cash or deposit a printed check. If you would like to receive payment via EFT, please complete and return the enclosed authorization form. It should be noted that funds remitted by EFT are quite often available to you a day or two sooner than when you would receive a paper check and also reduces the risk of your payment being delayed or lost in the mail.

Finally, unless otherwise instructed, Chevron will distribute payment to you when your production proceeds reach a minimum of one hundred dollars ($100.00). If after 6 months your total accumulated proceeds are less than $100.00, a semiannual payment will be made regardless of the amount. Semiannual payments are made in January and July of each year.

If you have questions, please do not hesitate to contact me.

Sincerely,

Land Ownership
Enclosure

TEXAS GENERAL LAND OFFICE
GEORGE P. BUSH, COMMISSIONER

Re: State Lease Nos. MF114883, MF116650, MF116317 and MF119304 Taylor Ranch State Unit 9335

Dear Mr. Bindu:

The Texas General Land Office (GLO) has received your Division Order for the referenced Unit. This Division Order has been filed in the appropriate mineral file(s).

The payment of royalties attributable to state-owned mineral and royalty interests is set by contract and applicable statutes and rules. The execution of division orders may, in some cases, affect the manner in which such payments are made or calculated. Therefore, Title 31, §9.32, of the Texas Administrative Code specifies that GLO staff cannot execute a division order or bind the state to any terms contained within it.

Subject to applicable state law and the state's right to take its production in-kind, the GLO acquiesces to the sale of oil and gas in accordance with the terms and conditions set out in the oil and gas leases. If you have questions concerning this matter, please feel free to e-mail me at the address below my signature.

We look forward to being put on pay status as soon as you are able to set up the wells in our RRAC system.

Thank you,

Vivian Zamora

SECOND AMENDMENT TO UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 1 – STATE UNIT CULBERSON COUNTY, TEXAS

This **SECOND AMENDMENT TO THE UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE DELAWARE RANCH, WISE UNIT NO. 1 – STATE UNIT** (herein "Second Amendment"), approved and executed by the Commissioner of the General Land Office and entered into as of the 4th day of August, 2021, by and between the parties executing, ratifying, or considering hereto, hereinafter the "Parties," but to be effective as of June 9, 2021 (the "Effective Date").

RECITALS

A. Chevron U.S.A. Inc. ("Chevron") and the General Land Office of the State of Texas entered into that certain Unit Agreement For The Development And Operation of The Delaware Ranch, Wise Unit No. 1 – State Unit dated effective April 3, 2018, recorded in Volume 37, Page 871, Official Public Records of Culberson County, Texas (the "Original Agreement"), as amended by that certain Amendment to the Unit Agreement For The Development And Operation of The Delaware Ranch, Wise Unit No. 1 – State Unit dated April 21, 2020, but effective April 3, 2018, recorded in Volume 67, Page 917, Official Public Records of Culberson County, Texas (the Original Agreement as amended being referred to as the "Agreement").

B. Wise Asset No. 8, Ltd., as owner of the soil and agent for the State of Texas under the first lease described in Exhibit "A" of the Agreement, and Wise Asset No. 10, Ltd., as owner of a non-participating royalty interest in each tract identified in Exhibit "B" of the Agreement as a "Chevron Mineral Fee Tract," join in execution of this Second Amendment to evidence their consent and agreement to the terms and provisions hereof.

C. The Parties desire to amend, modify, delete, or replace certain provisions of the Agreement, as more particularly described below. Capitalized terms used, but not defined, in this Second Amendment shall have the meanings given in the Agreement.

AMENDMENTS

NOW, THEREFORE, in consideration of the mutual promises set out herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree to be bound by the following terms:

1. Term of Second Amendment. Unless extended pursuant to Section 4 below, this Second Amendment shall continue in force for a period of five (5) years from January 1, 2022, through December 31, 2026 (the "Term"), at which time it will expire and be of no further force or effect.

2. Revised Definitions. Article 1.F and Article 1.AA of the Original Agreement are hereby superseded and replaced by the following provisions, respectively:

F. "Delaware Ranch Lease" means the first Lease listed in the Schedule of Leases in Exhibit "A" and described as that certain Oil and Gas Lease dated March 28, 2013, recorded in Volume 101, page 366, Oil and Gas Records of Culberson County, Texas, as amended, from the State of Texas, acting by and through its agent and the owner of the soil, Wise Asset No. 8, Ltd., as lessors, to COG Operating LLC, as lessee, covering 30,518.72 acres of land, more or less, located in Culberson County, Texas, which lands are more particularly described in said lease, as amended by that certain Amendment of Oil and Gas Lease dated effective March 1, 2016, and that certain Second Amendment of Oil and Gas Lease dated effective September 1, 2017.

AA. "WISE" (or "Wise") shall mean, collectively, Wise Asset No. 8, Ltd., as owner of the soil and agent for the State of Texas under the first Lease listed in the Schedule of Leases in Exhibit "A," and Wise Asset No. 10, Ltd., as owner of a non-participating royalty interest in the each of the tracts described in Exhibit "B" as a "Chevron Mineral Fee Tract."

3. Continuous Development: During the Term, the Agreement is amended as provided below.

i. Footage Obligation: Under Article V.C.1.a.ii of the Agreement, "147,000 feet" is inserted in place of "294,000 feet."

ii. Credits for Excess and Density Drilling: Article C.3 of the Agreement does not apply.

iii. Banking and Carry Forward: Subject to Article V.C.1.b of the Agreement, if during any of the first 4 calendar years of the Term, Chevron drills and completes Horizontal Drainhole Wells having an aggregate Horizontal Drainhole Displacement:

(1) in excess of 147,000 feet, it may apply the number of feet of Horizontal Drainhole Displacement drilled and completed in excess of its Development Obligation, up to a maximum of 73,500 feet, as a credit against the next (and only the next) succeeding year's Development Obligation;

(2) of at least 73,500 feet, but less than 147,000 feet, it may defer its obligation to drill the deficiency (i.e., the difference between 147,000 feet and the actual number of feet of Horizontal Drainhole Displacement drilled and completed) to the next succeeding calendar year without penalty, provided that Chevron both drills and completes the deficiency and actually complies with the next succeeding calendar year's Development Obligation.

Notwithstanding anything else herein to the contrary, in no event shall Chevron drill and complete Horizontal Drainhole Wells having an aggregate Horizontal Drainhole Displacement of less than 735,000 feet prior to the end of the Term.

iv Contingency Payments:

(1) If Chevron fails to drill and complete Horizontal Drainhole Wells in the Unit Area having an aggregate Horizontal Drainhole Displacement of at least 73,500 feet during any calendar year this Second Amendment is in force, then, on or before January 31 of the next succeeding calendar year, Chevron will pay the State of

Texas (in care of the GLO) and Wise, in the proportions of 50% to the State and 25% each to Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., a cash amount equal to $236.74 times the difference between 73,500 and the total number of feet of Horizontal Drainhole Displacement actually drilled and completed in the Unit Area by Chevron during that year.

(2) If Chevron fails to drill and complete Horizontal Drainhole Wells in the Unit Area having an aggregate Horizontal Drainhole Displacement of at least 735,000 feet prior to the expiration of the Term, then, on or before January 31,2027, Chevron will pay the State of Texas (in care of the GLO) and Wise, in the same proportionate provided in subsection (1) immediately above, a cash amount equal to $236.74 times the difference between 735,000 and the total number of feet of Horizontal Drainhole Displacement actually drilled and completed in the Unit Area by Chevron during the Term, less any cash amounts already paid by Chevron to the State and Wise pursuant to said subsection (1).

4. Additional Footage: This Section 3 applies for all purposes of the Second Amendment notwithstanding any other provision of the Second Amendment to the contrary.

Subject to Article V.C.1.b of the Agreement, and in addition to its other obligations under this Second Amendment, at any time or times after the execution of this Second Amendment, but prior to the expiration of the Term, Chevron will drill and complete Horizontal Drainhole Wells in the Unit Area having an aggregate Horizontal Drainhole Displacement equal to 105,000 feet (Chevron's "Additional Development Obligation"). If Chevron fails to fully comply with its Additional Development Obligation, then, on or before January 31, 2027, Chevron will pay the State of Texas (to the attention of the GLO) and Wise, in the proportions of 50% to the State and 25% each to Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., a cash amount equal to $236.74 times the difference between 105,000 and the actual number of feet of Horizontal Drainhole Displacement drilled and completed in the Unit Area by Chevron pursuant to its Additional Development Obligation.

If the Second Amendment is extended pursuant to Section 5 below, then the time by which Chevron must have fully complied with its Additional Development Obligation will likewise be extended to the time the Second Amendment, as extended, expires.

If Chevron fails to fully comply with its Additional Development Obligation as provided above, then, on or before January 31, 2027, or if the Second Amendment is not extended pursuant to Section 5, on or before the first January 31st following the time the Second Amendment fully and finally expires, Chevron will pay the State of Texas (to the attention of the GLO) and Wise, in the proportions of 50% to the State and 25% each to Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., a cash amount equal to $236.74 times the difference between 105,000 and the actual number of feet of Horizontal Drainhole Displacement drilled and completed in the Unit Area by Chevron pursuant to its Additional Development Obligation.

5. Options to Extend; Extended Term:

i. Options to Extend. Chevron has the option to extend the Second Amendment for up to five (5) successive periods of one (1) calendar year each (each such 1-year period, if any, being an "Extension Period," and all such Extension Periods, whether five or less, being the "Extended Term") upon 12 months' advance written notice of each such Extension Period.

ii. Development Obligation During an Extension Period. During each Extension Period, if any, Chevron will drill and complete Horizontal Drainhole Wells in the Unit Area having an aggregate Horizontal Drainhole Displacement of at least 147,000 feet.

iii. Continuous Development During Extended Term: During the Extended Term, if any, the Agreement is amended as provided below.

(1) Footage Obligation: Under Article V.C.1.a.ii of the Agreement, "147,000 feet" is inserted in place of "294,000 feet."

(2) Credits for Excess and Density Drilling: Article C.3 of the Agreement does not apply.

(3) Banking and Carry Forward: Subject to Article V.C.1.b of the Agreement, if during any Extension Period Chevron drills and completes Horizontal Drainhole Wells in the Unit Area having an aggregate Horizontal Drainhole Displacement:

(I) in excess of 147,000 feet, it may apply the number of feet of Horizontal Drainhole Displacement drilled and completed in excess of its Development Obligation, up to a maximum of 73,500 feet, as a credit against the next (and only the next) succeeding Extension Period's Development Obligation; provided, however, if there is no succeeding Extension Period, then this subsection (I) does not apply;

(II) of at least 73,500 feet, but less than 147,000 feet, it may defer its obligation to drill and complete the deficiency (i.e., the difference between 147,000 feet and the number of feet of Horizontal Drainhole Displacement actually drilled and completed) to the next succeeding (and only the next) Extension Period without penalty if, and only if, Chevron drills and completes the deficiency and also fully complies with the next succeeding calendar year's Development Obligation; provided, however, if there is no succeeding Extension Period, then this subsection (II) does not apply

Notwithstanding anything else herein to the contrary, during the Extended Term, if any, Chevron shall drill and complete Horizontal Drainhole Wells in the Unit Area having not less than an aggregate Horizontal Drainhole Displacement of 147,000 feet times the total number of Extension Periods comprising the Extended Term.

iv. Contingency Payments:

(1) If Chevron fails to drill and complete Horizontal Drainhole Wells in the Unit Area having an aggregate Horizontal Drainhole Displacement of at

least 73,500 feet during any Extension Period, , then, on or before January 31 of the next succeeding calendar year, Chevron will pay the State of Texas (in care of the GLO) and Wise, in the proportions of 50% to the State and 25% each to Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd., a cash amount equal to $236.74 times the difference between 73,500 and the total number of feet of Horizontal Drainhole Displacement actually drilled and completed by Chevron during that Extension Period.

(2) If during the Extended Term Chevron fails to drill and complete Horizontal Drainhole Wells having an aggregate Horizontal Drainhole Displacement of 147,000 feet times the number of Extension Periods comprising the Extended Term (the "Total Extension Obligation"), then, on or before January 31 of the calendar year next succeeding the end of the last Extension Period, Chevron will pay the State of Texas (in care of the GLO) and Wise, in the same proportionate provided in subsection (I) immediately above, a cash amount equal to $236.74 times the difference between the Total Extension Obligation and the total number of feet of Horizontal Drainhole Displacement actually drilled and completed by Chevron during the Extended Term, less any cash amounts already paid by Chevron to the State and Wise pursuant to said subsection (I).

v. If, in accordance with Section 5.i above, Chevron extends the Second Amendment five (5) Extension Periods and is in full compliance with its obligations under the Second Amendment relating to the Extension Periods and Extended Term, then, notwithstanding any other provision of the Second Amendment to the contrary, Article V.C.1.a.ii of the Original Agreement shall be permanently amended by the Parties, in writing, to read as follows:

> "subject to Article V.C.1.b, during every calendar year thereafter, the drilling and completion of Horizontal Drainhole Wells on the Unit Area or on the Wise Unit No. 2 Unit Area, or on both of said unit areas, having an aggregate Horizontal Drainhole Displacement of a minimum of 147,000 feet."

If Chevron fails to extend the Second Amendment all five Extension Periods in accordance with subsection i, or extends the Second Amendment all five Extension Periods in accordance with said provision but fails to fully comply with its obligations under the Second Amendment pertaining to the Extension Periods and Extended Term, then this subsection v will not apply.

6. Accrued Obligations to Survive. The expiration of this Second Amendment, whether at the end of the Term or any Extension Period, and whether in whole or in part, will not relieve Chevron of the obligation to (i) complete a well, the actual drilling of which has been commenced but which has not yet been completed, or (ii) make cash payments to the State of Texas and Wise accruing prior to such expiration.

7. Consideration of Future Leasing Opportunities: Following the partial termination (i.e., contraction) or full termination of the Agreement as to any of the lands designated in Exhibit "B" to the Agreement as "Chevron Mineral Fee Tract" (or depths in and under such lands), and Delaware Ranch Lease as to any of the lands covered thereby (or depths in and under such lands) Chevron agrees to reasonably, and in good faith, consider all (but shall not be obligated to accept any) opportunities to lease or enter into a joint development agreement, such as an operating agreement or unit exploratory agreement, covering its oil and gas rights in any such lands and depths.

8. Counterparts. This Second Amendment may be executed in any number of counterparts, each of which will be deemed an original of this Second Amendment, and which together will constitute one and the same instrument; provided that none of the Parties hereto will be bound by this Second Amendment unless and until all Parties have executed the original or a counterpart thereof.

9. Governing Laws. This Second Amendment is governed by and interpreted under the laws of the State of Texas, without regard to its choice of law rules.

10. Conflicting Provisions. In the event of a conflict between a provision of this Second Amendment and a provision of the Agreement, the conflicting provision of this Second Amendment shall control and govern. To the extent, but only to the extent, necessary to fully effectuate the provisions of this Second Amendment or prevent ambiguity, the provisions of the Agreement are conformed to those of the Second Amendment.

IN WITNESS WHEREOF, this Second Amendment is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

Subject: [**EXTERNAL**] RE: Unleased Highway ROW_Delaware Ranch-Wise State Unit #1

Hi Kristen,

Hope you had a nice time away.

I need an acreage breakdown for the 4 RAL sections that RR 652 passes through:

Sec. 32, A-6764 (Basefile 146204)

Sec. 40, A-6765 (Basefile 146205)

Sec. 38, A-4765 (Basefile 136480)

Sec. 48, A-6768 (Basefile 146208)

Thank you,

Mary Beth

The Texas General Land Office,

Enclosed is Chevron U.S.A. Inc.'s check number 25594024 dated May 5, 2022 in the amount of $1,722.46 which represents The State of Texas' share for the installation of a 4" steel residue line and a 6" steel gas lift line, both of which replace the previously installed FlexPipe, in the subject section. See enclosed survey for details.

The new steel pipelines were buried in a new trench located in Section 16, Block 60 T2S, Culberson County, Texas. Said replacement lines benefit the transfer of production from Chevron's oil and gas operations in the Delaware Ranch from State-owned minerals located in the above referenced section under Oil and Gas Lease #MF114883 effective March 28, 2013.

NOTE:
Please be advised, that while reasonable efforts are made to locate and verify pipelines and anomalies using our standard pipeline locating equipment, it is impossible to be 100 % effective. As such, we advise using caution when performing work as there is a possibility that pipelines and other hazards, such as fiber optic cables, PVC pipelines, etc. may exist undetected on site.

NOTE:
Many states maintain information centers that establish links between those who dig (excavators) and those who own and operate underground facilities (operators). It is advisable and in most states, law, for the contractor to contact the center for assistance in locating and marking underground utilities. For guidance: Texas One Call System- www.texas811.org.

REMARKS

CEMENTER'S CERTIFICATE: I declare under penalties prescribed in Sec. 91.143, Texas Natural Resources Code, that I am authorized to make this certification, that the cementing of casing and/or the placing of cement plugs in this well as shown in the report was performed by me or under my supervision, and that the cementing data and facts presented on both sides of this form are true, correct, and complete, to the best of my knowledge. This certification covers cementing data only.

Instructions for Form W-15, Cementing Report

NOTICE: The Form W-15 must be submitted as an attachment to a Form G-1 (Gas Well Back Pressure Test, Completion or Recompletion Report, and Log), Form W-2 (Oil Well Potential Test, Completion or Recompletion Report, and Log), Form W-3 (Plugging Record), or Form W-4 (Application for Multiple Completion), any time cement is pumped in a wellbore.

A. **What to file:** An operator should file an original and one copy of the completed Form W-15 for each cementing company used on a well. The cementing of different casing strings on a well by one cementing company may be reported on one form.
The Form W-15 should be filed with the Form W-3, Plugging Record, unless the Form W-3 is signed by the cementing company representative. When reporting dry holes, operators must complete Form W-15, in addition to Form W-3, to show any casing cemented in the hole.

B. **How to file:** An oil and gas completion report and Form W-15 may be filed online using the Commission's Online System (https://webapps.rrc.texas.gov/security/login.do) or a paper copy of the form may be mailed to the Commission in Austin (P.O. Box 12967, Austin, Texas 78711-2967).

C. **Surface casing:** An operator must set and cement sufficient surface casing to protect all usable-quality water strata, as defined by the Groundwater Advisory Unit in Austin. Sufficient cement shall be used to fill the annular space outside the casing from the shoe to the ground surface or to the bottom of the cellar. Before drilling a well, an operator must obtain a letter from the Groundwater Advisory Unit stating the protection depth. Surface casing should not be set deeper than 200 feet below the specified depth without prior approval from the Commission.
To plug and abandon a well, operators must use only cementers approved by the Commission's Director of Field Operations in accordance with SWR 14 (http://info.sos.state.tx.us/pls/pub/readtac$ext.TacPage?sl=R&app=9&p_dir=&p_rloc=&p_tloc=&p_ploc=&pg=1&p_tac=&ti=16&pt=1&ch=3&rl=14). Cementing companies, service companies, or operators can qualify as approved cementers by demonstrating that they are able to mix and pump cement in compliance with Commission rules and regulations.

D. **Estimated % wash-out:** If the estimated % wash-out is less than 20% (or 30% along the Gulf Coast), provide supporting documentation such as a caliper log to show how the estimated % wash-out was obtained.

E. **Multi-stage cement:** An operator must report the multi-stage cement shoe in II. Casing Cementing Data section by selecting the type of casing **and** Multi-stage cement shoe. The operator must report the multi-stage cement tool in III. Casing Cementing Data section by selecting the type of casing and Multi-stage cement/DV tool.

F. **Multiple parallel strings:** An operator should file the Form W-15 as an attachment to the Form W-4, Application for Multiple Completion. An operator may be required to submit multiple Form W-15s to show all data for multiple parallel strings.

G. **Slurry data:** If cement job exceeds three slurries, continue the list of slurries in the Slurry table in the subsequent Casing Cementing Data box.

Operations Summary
Held jsa safety meeting. Check pressure on well do bubble test. Pressure test cement plug 1000 psi for 15 minutes. Trip in tubing tag toc with 52 jts 2 7/8 depth 1673. Pump 27 bls MLF and displace 2.5 bls tom at 500. Pull lay down all tubing. Nipple up Lubricator. Run and perf casing at 500 with 2 1/16 dp then pull out of hole. Rig down lubricator. Establish injection rat pump 3 bpm at 350 psi. Pump 180 sacks class C 1.32 yield at 14.8 lbs till circulate. Rig down tools, floor and birdbath. Nipple down bop. Rig down service unit. Load equipment and clean up location. End of Report.

Projected Operations
Move equipment.

Operations Summary
Held jsa safety meeting. Check pressure on well and do bubble test. Rig up lubricator. Had troubles testing lubricator, changed out pack off rubber and tested good. Run wire line and perf at 2115 with 2 1/16 dp and pull out of hole. Rig down lubricator. Establish injection rate, had to work before we were able to pump into. Pump 2 bpm at 980 psi. Talked with Hayes Thibodeaux (chev-eng) and Erik Hanson (Trrc). Pump 110 sacks class C 1.32 yield at 14.8 lbs and displace 40 bls toc at 1752, shut in well with 620. Shut in and secure well, shut down due to high winds.

Projected Operations
Pressure test and tag toc mud up to 500, if bubble test passes, perf at 500 and circulate well with cement rig down and move.

Operations Summary:
Held jsa safety meeting. Check pressure on well and monitor bubble test. Rig up birdbath, floor and tools. Pick up tested 2 7/8 work string. Run 203 jts and tag existing cibp with cement on top, depth 6548. Circulate well clean. Pressure test casing 1000 psi for 15 minutes. Pump 13.5 bls MLF and displace 34.5 bls tom 5985. Pull lay down 17 jts leaving 186 jts in hole depth 5985. Pump 39 bls mud tom 4050. Pump 25 sacks class C 1.32 yield at 14.8 lbs and displace 33 bls toc 5732. Pull lay down 60 jts 2 7/8 leaving 126 jts in hole depth 4050. Pump 19.5 bls MLF tom 2962. Pump 25 sacks class C 1.32 yield at 14.8 lbs and displace 22 bls toc 3800. Pull lay down 34 jts leaving 92 jts in hole depth 2962. Pump 14 bls MLF tom 2115. Pump 25 sacks class C 1.32 yield at 14.8 lbs and displace 15.5 bls toc 2712. Pull stand back all tubing. Shut in and secure well, held debrief meeting.

Projected Operations:
run wireline and perf at 2115 and squeezing 110 sacks woc and if bubble test pass perf at 500 and ciculate well if not cut and pull casing.

RE: **Notification of Plug and Abandonment**
DR State East #812H Well (API: 42-109-3266000) RRC ID# 08-278900
Sec. 8, Blk. 60 T-1-S, A-4751, T&P RR Co. Survey
10' FSL & 1,980' FEL, Lat: 31.9695299° / Long: -104.2891435°
Culberson County, Texas

To Whom It May Concern:

The subject well is governed by that certain Relinquishment Act Oil and Gas Lease by and between The State of Texas General Land Office acting through its agents, Wise Asset No. 8, LTD, a Texas limited partnership, and Wise Asset No. 10, LTD, a Texas limited partnership (Lessor) and COG Operating LLC, a Delaware limited liability company (Lessee), as predecessor in interest to Chevron U.S.A. Inc. (Chevron), dated 3/28/2013, and recorded in Volume 109, Page 366, Document #68871, of the Official Public Records of Culberson County, Texas, as amended.

This letter shall serve as Chevron's formal notice of its intent to plug and abandon the DR State East #812H Well (API: 42-109-3266000). Plug and abandonment operations are currently scheduled to begin on or around the 10 day of March 2022.

A copy of Chevron's completed Notice of Intention to Plug and Abandon (RRC Form W-3A) is enclosed for your records. Chevron will provide the Texas General Land office with a copy of the Plugging Record (RRC Form W-3) and any associated attachments, if applicable, at the address above upon completion of the plug and abandonment operation.

Should you have any questions regarding the plug and abandonment operation for this well, please contact me via phone at (281) 726-9683 or via email at hayes.thibodeaux@chevron.com.

Sincerely,

Hayes Thibodeaux
Well Abandonment Engineer

REMARKS:

- Chevron U.S.A. Inc is requesting to amend the Taylor Ranch State Unit which was approved by the School Land Board on June 5, 2018 and amended on December 10, 2018.
- This amendment is to allow a six month extension of the unit drilling obligation.
- The applicant has agreed to pay the Permanent School Fund $500.00 per net mineral acre for the six month extension of the drilling obligation. The total to be split with the RAL surface owner is $693,350.00.

POOLING COMMITTEE RECOMMENDATION:

The Pooling Committee recommends Board approval of the amendment to the Taylor Ranch State Unit under the above-stated provisions.

THIRD AMENDMENT TO UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE TAYLOR RANCH STATE UNIT

This **THIRD AMENDMENT TO UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE TAYLOR RANCH STATE UNIT** ("Amendment") is entered into and made effective as of the 1ST day of May, 2023 ("Effective Date"), by and between **Chevron U.S.A. Inc.**, a Pennsylvania corporation ("Chevron") and the **Commissioner of the General Land Office, on behalf of the State of Texas** ("Lessor"). Chevron and Lessor are collectively referred to as the "Parties" and individually as "Party".

RECITALS

A. Chevron and Lessor entered into that certain Unit Agreement For The Development And Operation Of The Taylor Ranch State Unit dated effective June 5, 2018, recorded in Volume 40, Page 920, Official Public Records of Culberson County, Texas, as amended by Amendment to Unit Agreement For The Development And Operation Of The Taylor Ranch State Unit dated effective December 1, 2018, recorded in Volume 48, Page 752, Official Public Records of Culberson County, Texas, and as further amended by that Replacement Of Exhibit "A" To Unit Agreement For The Development And Operation Of The Taylor Ranch State Unit dated effective July 1, 2020, recorded in Volume 67, Page 902, Official Public Records of Culberson County, Texas (the "Agreement").

B. Wise Asset No. 8, Ltd., and Wise Asset No. 10, Ltd., as owner of the soil under the first lease described on Exhibit A of the Agreement, joins in execution of this Agreement to evidence its consent and agreement to the terms and provisions hereof.

C. The Parties desire to amend, modify, delete, or replace certain provisions of the Agreement, as more particularly described below.

AMENDMENT

NOW, THEREFORE, in consideration of the mutual promises set out herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree to be bound by the following terms:

1. The following paragraph is hereby added as V.C.1.3:

   For purposes of Articles V.C.1 and V.C.3, if actual drilling of three or more Horizontal Drainhole Wells are commenced during the calendar year 2022, and such wells are thereafter drilled and completed in accordance with Article V.B herein, such wells are deemed to have been drilled and completed during calendar year 2022, even if the wells were actually drilled in part, and/or completed in whole or part, on or before June 30, 2024.

2. This Amendment may be executed in any number of counterparts, each of which will be deemed an original of this Amendment, and which together will constitute one and the same instrument; provided that none of the Parties hereto will be bound by this Amendment unless and until all Parties have executed the original or a counterpart thereof.

3. This Amendment is governed by and interpreted under the laws of the State of Texas, without regard to its choice of law rules.

23-T-8

IN WITNESS WHEREOF, this Amendment is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

Attachments: DR Wise 2015WC drlg permit to EWF.pdf; DR Wise 2016SB drlg permit to EWF.pdf

I tried to send the below email, but it got kicked back. I'm assuming due to size limitations. I will re-send in three parts. This is Part 3.

Deborah,

Please consider this notice under State leases M-121030, M-114883, M-116786, M-121439 of Chevron's intent to drill six wells within the Delaware Ranch, Wise Unit No. 1 – State Unit (GLO Unit No. 12916). The current estimated spud date is January 19, 2024. The attached PDFs include the W-1, drilling permits, plats, P-12, P-16, etc. for each well. The well names are:

DR State Wise Unit 1 No. 2011SB
DR State Wise Unit 1 No. 2012WC
DR State Wise Unit 1 No. 2013SB
DR State Wise Unit 1 No. 2014SB
DR State Wise Unit 1 No. 2015WC
DR State Wise Unit 1 No. 2016SB

Please confirm this email notice will suffice or if you need hard copies of the attached mailed to you. If you need anything else, please let me know.

Thanks,

Kristen

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

NAD 27 TEXAS CENTRAL ZONE

NOTES:

1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Lead Reg Affairs Coord (Title) | (E-mail *(if available)*) | 11/09/2023 (Date) | (432) 687-7575 (Phone)

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Rev. 06/2022

Acreage Designation

Filer is the owner or lessee, or has been authorized by the owner or lessee, of all or an undivided portion of the mineral estate under each tract for which filer is listed as operator below. For all leases operated by other entities, the number of assigned acres shown are reflected on current Commission records or the filer has been authorized by the current operator to change the assigned acreage of that operator as shown below.

SECTION III (CONTINUED). LISTING OF ALL WELLS IN THE REGULATORY FIELD ON THE SAME ACREAGE AS THE LEASE, POOLED UNIT, OR UNITIZED TRACT DESIGNATED IN SECTION II ABOVE BY FILER

Federal Aviation Administration

Notice Criteria Tool

Notice Criteria Tool - Desk Reference Guide V_2018.2.0

The requirements for filing with the Federal Aviation Administration for proposed structures vary based on a number of factors: height, proximity to an airport, location, and frequencies emitted from the structure, etc. For more details, please reference CFR Title 14 Part 77.9.

You must file with the FAA at least 45 days prior to construction if:

- your structure will exceed 200ft above ground level
- your structure will be in proximity to an airport and will exceed the slope ratio
- your structure involves construction of a traverseway (i.e. highway, railroad, waterway etc...) and once adjusted upward with the appropriate vertical distance would exceed a standard of 77.9(a) or (b)
- your structure will emit frequencies, and does not meet the conditions of the FAA Co-location Policy
- your structure will be in an instrument approach area and might exceed part 77 Subpart C
- your proposed structure will be in proximity to a navigation facility and may impact the assurance of navigation signal reception
- your structure will be on an airport or heliport
- filing has been requested by the FAA

If you require additional information regarding the filing requirements for your structure, please identify and contact the appropriate FAA representative using the Air Traffic Areas of Responsibility map for Off Airport construction, or contact the FAA Airports Region / District Office for On Airport construction.

The tool below will assist in applying Part 77 Notice Criteria.

* **Structure Type:**	RIG | Oil Derrick / Rig Please select structure type and complete location point information.
Latitude:	31 Deg 58 M 13.13 S N
Longitude:	104 Deg 17 M 8.668 S W
Horizontal Datum:	NAD83
Site Elevation (SE):	3470 (nearest foot)
Structure Height :	190 (nearest foot)
Is structure on airport:	(●) No ( ) Yes

Results

You do not exceed Notice Criteria.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

NAD 27 TEXAS CENTRAL ZONE

NOTES:

1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Notice Criteria Tool

Notice Criteria Tool - Desk Reference Guide V_2018.2.0

The requirements for filing with the Federal Aviation Administration for proposed structures vary based on a number of factors: height, proximity to an airport, location, and frequencies emitted from the structure, etc. For more details, please reference CFR Title 14 Part 77.9.

You must file with the FAA at least 45 days prior to construction if:

- your structure will exceed 200ft above ground level
- your structure will be in proximity to an airport and will exceed the slope ratio
- your structure involves construction of a traverseway (i.e. highway, railroad, waterway etc...) and once adjusted upward with the appropriate vertical distance would exceed a standard of 77.9(a) or (b)
- your structure will emit frequencies, and does not meet the conditions of the FAA Co-location Policy
- your structure will be in an instrument approach area and might exceed part 77 Subpart C
- your proposed structure will be in proximity to a navigation facility and may impact the assurance of navigation signal reception
- your structure will be on an airport or heliport
- filing has been requested by the FAA

If you require additional information regarding the filing requirements for your structure, please identify and contact the appropriate FAA representative using the Air Traffic Areas of Responsibility map for Off Airport construction, or contact the FAA Airports Region / District Office for On Airport construction.

The tool below will assist in applying Part 77 Notice Criteria.

* **Structure Type:**	RIG | Oil Derrick / Rig Please select structure type and complete location point information.
Latitude:	31 Deg 58 M 13.13 S N
Longitude:	104 Deg 17 M 8.668 S W
Horizontal Datum:	NAD83
Site Elevation (SE):	3470 (nearest foot)
Structure Height :	190 (nearest foot)
Is structure on airport:	(●) No ( ) Yes

Results

You do not exceed Notice Criteria.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The above list may not be all inclusive, and may also include formations that do not intersect all wellbores. The listing order of the Formation information reflects the general stratigraphic order and relative geologic age. This is a dynamic list subject to updates and revisions. It is the operator's responsibility to make sure that at the time of spudding the well the most current list is being referenced. Refer to the RRC website at the following address for the most recent information.

API No. 42-109-34177

Drilling Permit # 895181

SWR Exception Case/Docket No.

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION
APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC.
A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.	2. Operator's Name (as shown on form P-5, Organization Report)	3. Operator Address (include street, city, state, zip):
148113	CHEVRON U. S. A. INC.	6301 DEAUVILLE BLVD MIDLAND, TX 79706

4. Lease Name	5. Well No.
DR STATE WISE UNIT 1	2014SB

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 10000

9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No

10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08

12. County: CULBERSON

13. Surface Location: [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 24.3 miles in a NW direction from Orla which is the nearest town in the county of the well site.

15. Section	16. Block	17. Survey	18. Abstract No.	19. Distance to nearest lease line: ft.	20. Number of contiguous acres in lease, pooled unit, or unitized tract:
8	60 T1	T&P RR CO/BELL, I J	A-4751		46533.82

21. Lease Perpendiculars: 10830 ft from the NORTH line and 823 ft from the EAST line.

22. Survey Perpendiculars: 162 ft from the SOUTH line and 823 ft from the EAST line.

23. Is this a pooled unit? [X] Yes [ ] No

24. Unitization Docket No:

25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	80544500	SANDBAR (BONE SPRING)	Oil or Gas Well	10000	780.00	28

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

[FILER Nov 9, 2023 11:07 AM]: DR Wise State Unit 1 wells 2011SB (895178), 2013SB (895180), 2014SB, & 2016SB are being permitted concurrently; [RRC STAFF Nov 15, 2023 11:04 AM]: Well count corrected per RRC records.

Certificate:

I certify that information stated in this application is true and complete, to the best of my knowledge.

NOTES:

1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Federal Aviation Administration

Notice Criteria Tool

Notice Criteria Tool - Desk Reference Guide V_2018.2.0

The requirements for filing with the Federal Aviation Administration for proposed structures vary based on a number of factors: height, proximity to an airport, location, and frequencies emitted from the structure, etc. For more details, please reference CFR Title 14 Part 77.9.

You must file with the FAA at least 45 days prior to construction if:

- your structure will exceed 200ft above ground level
- your structure will be in proximity to an airport and will exceed the slope ratio
- your structure involves construction of a traverseway (i.e. highway, railroad, waterway etc...) and once adjusted upward with the appropriate vertical distance would exceed a standard of 77.9(a) or (b)
- your structure will emit frequencies, and does not meet the conditions of the FAA Co-location Policy
- your structure will be in an instrument approach area and might exceed part 77 Subpart C
- your proposed structure will be in proximity to a navigation facility and may impact the assurance of navigation signal reception
- your structure will be on an airport or heliport
- filing has been requested by the FAA

If you require additional information regarding the filing requirements for your structure, please identify and contact the appropriate FAA representative using the Air Traffic Areas of Responsibility map for Off Airport construction, or contact the FAA Airports Region / District Office for On Airport construction.

The tool below will assist in applying Part 77 Notice Criteria.

* **Structure Type:**	RIG | Oil Derrick / Rig Please select structure type and complete location point information.
Latitude:	31 Deg 58 M 13.13 S N
Longitude:	104 Deg 17 M 8.668 S W
Horizontal Datum:	NAD83
Site Elevation (SE):	3470 (nearest foot)
Structure Height :	190 (nearest foot)
Is structure on airport:	(●) No ( ) Yes

Results

You do not exceed Notice Criteria.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.	2. Operator's Name (as shown on form P-5, Organization Report)	3. Operator Address (include street, city, state, zip):
148113	CHEVRON U. S. A. INC.	6301 DEAUVILLE BLVD MIDLAND, TX 79706

4. Lease Name	5. Well No.
DR STATE WISE UNIT 1	2011SB

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 10000

9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No

10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08

12. County: CULBERSON

13. Surface Location [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 24.3 miles in a NW direction from Orla which is the nearest town in the county of the well site.

15. Section	16. Block	17. Survey	18. Abstract No.	19. Distance to nearest lease line: ft.	20. Number of contiguous acres in lease, pooled unit, or unitized tract:
8	60 T1	T&P RR CO/BELL, I J	A-4751		46533.82

21. Lease Perpendiculars: 10831 ft from the NORTH line and 888 ft from the EAST line.

22. Survey Perpendiculars: 162 ft from the SOUTH line and 888 ft from the EAST line.

23. Is this a pooled unit? [X] Yes [ ] No

24. Unitization Docket No:

25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	80544500	SANDBAR (BONE SPRING)	Oil or Gas Well	10000	850.00	26

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

[FILER Nov 9, 2023 10:53 AM]: DR Wise State Unit 1 wells 2011SB, 2013SB, 2014SB & 2016SB are being permitted concurrently.; [RRC STAFF Nov 14, 2023 11:19 AM]: There have been problems identified with this permit (see problem letter attachment). Notification sent.; [RRC STAFF Nov 14, 2023 2:03 PM]: There have been problems identified with this permit (see problem letter attachment). Notification sent.; [RRC STAFF Nov 15, 2023 10:28 AM]: Well count changed from 31 to 26 to match RRC records.; [RRC STAFF Nov 15, 2023 2:57 PM]: Filer submitted corrected P-12 and P-16, problem resolved.; [RRC STAFF Nov 15, 2023 2:58 PM]: Problems identified with this permit are resolved.

Certificate:

I certify that information stated in this application is true and complete, to the best of my knowledge.

NOTES:

1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Lead Reg Affairs Coord (Title) | E-mail *(if available)* | 11/09/2023 (Date) | (432) 687-7575 (Phone)

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Notice Criteria Tool

Notice Criteria Tool - Desk Reference Guide V_2018.2.0

The requirements for filing with the Federal Aviation Administration for proposed structures vary based on a number of factors: height, proximity to an airport, location, and frequencies emitted from the structure, etc. For more details, please reference CFR Title 14 Part 77.9.

You must file with the FAA at least 45 days prior to construction if:

- your structure will exceed 200ft above ground level
- your structure will be in proximity to an airport and will exceed the slope ratio
- your structure involves construction of a traverseway (i.e. highway, railroad, waterway etc...) and once adjusted upward with the appropriate vertical distance would exceed a standard of 77.9(a) or (b)
- your structure will emit frequencies, and does not meet the conditions of the FAA Co-location Policy
- your structure will be in an instrument approach area and might exceed part 77 Subpart C
- your proposed structure will be in proximity to a navigation facility and may impact the assurance of navigation signal reception
- your structure will be on an airport or heliport
- filing has been requested by the FAA

If you require additional information regarding the filing requirements for your structure, please identify and contact the appropriate FAA representative using the Air Traffic Areas of Responsibility map for Off Airport construction, or contact the FAA Airports Region / District Office for On Airport construction.

The tool below will assist in applying Part 77 Notice Criteria.

*** Structure Type:**	RIG | Oil Derrick / Rig Please select structure type and complete location point information.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION
SWR #13 Formation Data

CULBERSON (109) County

Formation	Remarks	Geological Order	Effective Date
RUSTLER		1	02/09/2020
CAPITAN REEF		2	02/09/2020
FORD / DELAWARE		3	02/09/2020
DELAWARE		4	02/09/2020

NOTES:

1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Federal Aviation Administration

Notice Criteria Tool

Notice Criteria Tool - Desk Reference Guide V_2018.2.0

The requirements for filing with the Federal Aviation Administration for proposed structures vary based on a number of factors: height, proximity to an airport, location, and frequencies emitted from the structure, etc. For more details, please reference CFR Title 14 Part 77.9.

You must file with the FAA at least 45 days prior to construction if:

- your structure will exceed 200ft above ground level
- your structure will be in proximity to an airport and will exceed the slope ratio
- your structure involves construction of a traverseway (i.e. highway, railroad, waterway etc...) and once adjusted upward with the appropriate vertical distance would exceed a standard of 77.9(a) or (b)
- your structure will emit frequencies, and does not meet the conditions of the FAA Co-location Policy
- your structure will be in an instrument approach area and might exceed part 77 Subpart C
- your proposed structure will be in proximity to a navigation facility and may impact the assurance of navigation signal reception
- your structure will be on an airport or heliport
- filing has been requested by the FAA

If you require additional information regarding the filing requirements for your structure, please identify and contact the appropriate FAA representative using the Air Traffic Areas of Responsibility map for Off Airport construction, or contact the FAA Airports Region / District Office for On Airport construction.

The tool below will assist in applying Part 77 Notice Criteria.

* **Structure Type:**	RIG | Oil Derrick / Rig Please select structure type and complete location point information.
Latitude:	31 Deg 58 M 13.13 S N
Longitude:	104 Deg 17 M 8.668 S W
Horizontal Datum:	NAD83
Site Elevation (SE):	3470 (nearest foot)
Structure Height :	190 (nearest foot)
Is structure on airport:	(●) No ( ) Yes

Results

You do not exceed Notice Criteria.

335.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Notice Criteria Tool

Notice Criteria Tool - Desk Reference Guide V_2018.2.0

The requirements for filing with the Federal Aviation Administration for proposed structures vary based on a number of factors: height, proximity to an airport, location, and frequencies emitted from the structure, etc. For more details, please reference CFR Title 14 Part 77.9.

You must file with the FAA at least 45 days prior to construction if:

- your structure will exceed 200ft above ground level
- your structure will be in proximity to an airport and will exceed the slope ratio
- your structure involves construction of a traverseway (i.e. highway, railroad, waterway etc...) and once adjusted upward with the appropriate vertical distance would exceed a standard of 77.9(a) or (b)
- your structure will emit frequencies, and does not meet the conditions of the FAA Co-location Policy
- your structure will be in an instrument approach area and might exceed part 77 Subpart C
- your proposed structure will be in proximity to a navigation facility and may impact the assurance of navigation signal reception
- your structure will be on an airport or heliport
- filing has been requested by the FAA

If you require additional information regarding the filing requirements for your structure, please identify and contact the appropriate FAA representative using the Air Traffic Areas of Responsibility map for Off Airport construction, or contact the FAA Airports Region / District Office for On Airport construction.

The tool below will assist in applying Part 77 Notice Criteria.

* **Structure Type:**	RIG | Oil Derrick / Rig Please select structure type and complete location point information.
Latitude:	31 Deg 58 M 13.13 S N
Longitude:	104 Deg 17 M 8.668 S W
Horizontal Datum:	NAD83
Site Elevation (SE):	3470 (nearest foot)
Structure Height :	190 (nearest foot)
Is structure on airport:	(●) No ( ) Yes

Results

You do not exceed Notice Criteria.

FOURTH AMENDMENT OF POOLING AGREEMENT
DELAWARE RANCH – WISE STATE UNIT #1
GLO UNIT NO. 12916
(FORMERLY GLO UNIT NO. 12095)
CULBERSON COUNTY, TEXAS

WHEREAS, on August 3, 2018, the Delaware Ranch – Wise State Unit #1 ("Unit") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, pursuant to such approval, Chevron U.S.A. Inc. ("Chevron") and the Commissioner of the General Land Office of the State of Texas entered into that certain Unit Agreement ("Agreement") to pool certain State lands into said Unit covering 46,533.82 acres of land, more particularly described in said Agreement on file in the Archives and Records of the Texas General Land Office at Austin, Texas, in Mineral File M-114883; and

WHEREAS, on April 21, 2020, an amendment to the Delaware Ranch – Wise State Unit #1 ("First Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on August 4, 2021, an amendment to the Delaware Ranch – Wise State Unit #1 ("Second Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on November 2, 2022, an amendment to the Delaware Ranch – Wise State Unit #1 ("Third Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on October 3, 2023, the application for an amendment to the Delaware Ranch – Wise State Unit #1 ("Fourth Amendment") was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, Chevron is the current operator of the Delaware Ranch – Wise State Unit #1; and

WHEREAS, Chevron timely made application and, at its regular meeting on October 3, 2023, the School Land Board approved its application to add 1.00 acres that were previously unleased, now leased under M-121439, to the Agreement by deleting the existing Exhibits "A", "B" and "C" and replacing them with Exhibits "A", "B" and "C" attached to this Fourth Amendment; and

23-51-21

WHEREAS, the Commissioner of the General Land Office finds that amending said amended Agreement as approved by the School Land Board is in the best interests of the State of Texas:

NOW THEREFORE, in consideration of ten U.S. Dollars ($10.00), the premises and the mutual agreements contained in this Fourth Amendment of Pooling Agreement, it is agreed that RAL lease M-121439 is subject to and made a part of this Agreement.

This Fourth Amendment shall in all other respects remain subject to the terms and provisions of the Agreement. A copy of Exhibits "A", "B" and "C" to the Agreement are attached to this Fourth Amendment of Pooling Agreement for reference purposes.

Nothing in this Fourth Amendment, nor the approval of this Fourth Amendment by the School Land Board, nor the execution of this Fourth Amendment by the Commissioner shall: (1) operate as a ratification or revivor of any State lease that has expired, terminated, or has been released in whole or in part or terminated under the terms of such State lease or the laws applicable thereto; (2) constitute a waiver or release of any claim for money, oil, gas or other hydrocarbons, or other thing due to the State by reason of the existence or failure of such lease; (3) constitute a waiver or release of any claim by the State that such lease is void or voidable for any reason, including, without limitation, violations of the laws of the State with respect to such lease or failure of consideration; or (4) constitute a confirmation or recognition of any boundary or acreage of any tract or parcel of land in which the State has or claims an interest; or (5) constitute a ratification of, or a waiver or release of any claim by the State with respect to any violation of a statute, regulation, or any of the common laws of this State, or any breach of any contract, duty or other obligation owed to the State.

This Fourth Amendment of Pooling Agreement may be executed in counterparts and if so executed, shall be valid, binding and have the same effect as if all the parties hereto actually joined in and executed one and the same document. For recording purposes and in the event counterparts of this Fourth Amendment of Pooling Agreement are executed, the executed pages, together with the pages necessary to show acknowledgments, may be combined with the other pages of this Fourth Amendment of Pooling Agreement to form what shall be deemed and treated as a single original instrument showing execution by all parties thereto.

IN WITNESS WHEREOF, the parties hereto have executed this Fourth Amendment of Pooling Agreement upon the respective dates indicated below but effective as of July 1, 2023.

Total Gross Acres:			30,518.72*

*The lease was described as covering all of Section 24, 32, 38, 40 & 48, Block 61, Township 1 and Section 36, Block 62, Township 1. Subsequent title found that a 1 acre tract within Section 24 Block 61 T1 was reserved by George H. Brantley and was not covered by this lease and 40.95 acres in Sections 32, 38, 40 & 48 of Block 61 T1 and Section 36 Block 62 T1 was reserved to the State of Texas, by and through the State Highway Commission and was also not covered by this lease. Therefore, the gross acres for the above referenced sections as well as total gross acres under the lease should be reduced accordingly for purposes of calculating the amount of acreage within the Delaware Ranch- Wise State Unit #1 and the associated ownership.

Exhibit "A-2"
Attached to and made a part of that certain Fourth Amendment of Pooling Agreement for the Delaware Ranch – Wise State Unit #1, Culberson County, Texas

This lease covers the following described lands located in Block 61 & 62, Township 1, T&P RR. Co. Survey, Culberson County, Texas:

Tracts 1, 2, 4, 6, 8, 10, [illegible]

Tract 1

Section 36

BEGINNING at a concrete monument South 00°40'46" West 925.1 feet, North 76°02' West 385.4 feet, and North 13°58' East 50 feet from the apparent Northeast corner of section 36, Block 62, TSR. 1, T & P Ry. Company Survey;

THENCE: South 76°02' East 134.2 feet to a concrete monument in a curved boundary line whose radius is 905.37 feet;

THENCE: Northwesterly with said curve deflection uniformly and continuously to the right 134.7 feet to a concrete monument located North 13°58' East 50 feet from centerline Station 366+12.5 of R.V. Hwy way 652 as surveyed by the Resident Engineer of the Texas Highway Department;

THENCE: North 13°58' East 10.0 feet to the place of beginning and containing 0.02 acres of land more or less.

Tract 2

Section 36

BEGINNING at a stake in the East boundary line of Section 36, Block 62, TSR. 1, T & P Ry, Company Survey, from which the apparent Northeast corner of Section 36 bears North 00°40'46" East 89[illegible].8 feet;

CONTINUED ON NEXT PAGE

THENCE: South 00°40'46" West with said East boundary line 27.4 feet to a concrete monument in a curved boundary line whose radius is 11,399. feet;

THENCE: Northwesterly with said curve deflecting uniformly and continuously to the left 134.7 feet to a concrete monument at its end;

THENCE: North 76°0[illegible]' West [illegible]. feet to a concrete monument South 13°58' East 60 feet from centerline Station 366+1[illegible].4 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department;

THENCE: North 13°58' East [illegible] feet to a concrete monument at the beginning of a curved boundary line whose radius is 100[illegible].97 feet;

THENCE: Northerly with said curve deflecting uniformly and continuously to the left 389.7 feet to the place of beginning and containing 0.325 acres of land more or less.

Tract 4 Section [illegible]

BEGINNING at a concrete monument in the West boundary line of Section 32, Block 61, TSP. 1, T & P by Company Survey, from which a concrete monument marked $\frac{10 \mid 9}{31 \mid 32}$ bears North 0°40'46" East [illegible] feet;

THENCE: North 0°40'46" East with said West boundary line, at [illegible] feet crossing centerline Station 4[illegible] of R.M. Highway [illegible] as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of [illegible] feet to a concrete monument;

THENCE: South 73°24' East 1,61[illegible] feet to a concrete monument at the beginning of a curved boundary line whose radius is 11,[illegible] feet;

THENCE: Southeasterly with said curve deflecting uniformly and continuously to the left 676.4 feet to a concrete monument at its end;

THENCE: South 76°48' East 3,401.4 feet to a concrete monument in the East boundary line of Section 32 from which the apparent Southeast corner of said Section 32 bears South 0°40'46" West ~~1,437.0~~ 1698.4 feet; E.E.P.

THENCE: South 0°40'46" West with said East boundary line of Section 32, at 61.4 feet crossing centerline Station 4[illegible]69.5 of R.M. Highway 652 as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 1[illegible] feet to a concrete monument;

THENCE: North 76°48' West 3,4[illegible].0 feet to a concrete monument at the beginning of a curved boundary line whose radius is 11,519.2 feet;

THENCE: Northwesterly with said curve deflecting uniformly and continuously to the right [illegible].6 feet to a concrete monument at its end;

THENCE: North 73°24' West 1,[illegible] feet to the place of beginning and containing 15.6[illegible] acres of land more or less.

CONTINUED ON NEXT PAGE

Tract 7 Section 40

BEGINNING at a concrete monument in the North boundary line of Section 40, Block 61, TSP. 1, T. & P. Ry. Company Survey from which the Northeast corner of Section 40 bears South 89°19'18" East 1,150.7 feet;

THENCE: South 89°19'18" East with said North boundary line, at 137.8 feet crossing centerline Station 631+97.6 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 275.6 feet to a concrete monument;

THENCE: South 63°31' East 454.8 feet to a concrete monument at the beginning of a curved boundary line whose radius is 11,515.2 feet;

THENCE: Southeasterly with said curve deflecting uniformly and continuously to the right 527.7 feet to a concrete monument in the East boundary line of section 40 from which the apparent Northeast corner of Section 40 bears North 0°40'46" East 438.4 feet;

THENCE: South 0°40'46" East with said East boundary line at 49.3 feet crossing centerline Station 543+33.9 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 136.7 feet to a concrete monument in a curved boundary line whose radius is 11,399.2 feet;

THENCE: Northwesterly with said curve deflecting uniformly and continuously to the left 589.3 feet to a concrete monument at its end;

THENCE: North 63°31' West 703.0 feet to the place of beginning and containing 3.13 acres of land more or less.

Tract 8 Section 38

BEGINNING at a concrete monument in the West boundary line of Section 38, Block 61, TSP. 1, T & P Ry. Company Survey, from which a concrete monument marked $\frac{39+38}{45+47}$ bears South 01°53' West 1,141.4 feet;

THENCE: North 01°53' East with said West boundary line, at 72.4 feet crossing centerline Station 610+23.5 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 145.6 feet to a concrete monument;

THENCE: South 53°37' East 2,250.4 feet to a concrete monument at the beginning of a curved boundary line whose radius is 3,759.8 feet;

THENCE: Southeasterly with said curve uniformly and continuously to the left 22.2 feet to a concrete monument in the South boundary line of Section 38 from which concrete monument marked $\frac{39+38}{45+47}$ bears North 88°07' West 1,872.7 feet;

THENCE: North 88°07' West with said South boundary line, at 106.1 feet crossing centerline Station 631+67.2 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 212.0 feet to a concrete monument;

THENCE: North 53°37' West 2,015.2 feet to the place of beginning and containing 5.91 acres of land more or less.

CONTINUED ON NEXT PAGE

Tract 10 (corrected field notes) Section 48

Beginning at a concrete monument in the East boundary line of Section 48, Block 61, T.C.R. 1, T&P R. Company Survey, from which the apparent Northwest corner of Section 48 bears N 01° 53' W., 1519.9 feet;

Thence: N 01° 53' W. with the East boundary line of Section 48, at 63.3 feet crossing centerline Station 672+64.0 of R. W. Highway 652 as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 126.6 feet to a concrete monument;

Thence: S 69° 29' E, 2734.2 feet to a concrete monument at the beginning of a curved boundary line whose radius is 5789.6 feet;

Thence Southeasterly with said curve deflecting uniformly and continuously to the right 650.1 feet to a concrete monument at its end;

Thence: S 63° 03' E, 1219.1 feet to a concrete monument at the beginning of a curved boundary line whose radius is 1850.1 feet;

Thence: Southeasterly with said curve deflecting uniformly and continuously to the left 816.5 feet to a concrete monument at its end;

Thence: S 88° 24' E, 25.4 feet to a concrete monument;

Thence: S 85° 11' E, 92.0 feet to a concrete monument;

Thence: S 82° 00' E, 103.0 feet to a concrete monument;

Thence: S 79° 00' E, 101.0 feet to a concrete monument;

Thence: S 76° 00' E, 102.5 feet to a concrete monument;

Thence: S 72° 44' E, 13.0 feet to a concrete monument in the East boundary line of Section 48, from which the apparent Southeast corner of said Section 48 bears S 01° 53' W, 2252.1 feet;

Thence: S 01° 53' W with the East boundary line of Section 48, at 45.1 feet crossing centerline Station 731+21.9 of R. W. Highway 652 as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 126.6 feet to a concrete monument;

Thence: N 79° 16' W, 412.8 feet to a concrete monument;

Thence: N 88° 24' W, 25.4 feet to a concrete monument at the beginning of a curved boundary line whose radius is 1970.1 feet;

Thence: Northwesterly with said curve deflecting uniformly and continuously to the right 871.5 to a concrete monument at its end;

Thence: N 63° 03' W, 1219.1 feet to a concrete monument at the beginning of a curved boundary line whose radius is 5969.6 feet;

Thence: Northwesterly with said curve deflecting uniformly and continuously to the left 636.6 feet to a concrete monument at its end;

Thence: N 69° 29' W, 2693.8 feet to the place of beginning and containing 16.23 acres of land more or less.

Exhibit "A-3"
Attached to and made a part of that certain Fourth Amendment of Pooling Agreement for the Delaware Ranch – Wise State Unit #1, Culberson County, Texas

This lease covers the following described lands located in Block 61, Township 1, T&P RR. Co. Survey, Culberson County, Texas:

A 1.00 acre tract of land located in the NW/4 of the NW/4 of Section 24, Block 61, Township 1, of the Texas and Pacific Railway Surveys in Culberson County, Texas, being that certain tract of land more particularly described in that certain Warranty Deed dated October 13, 1961, and recorded in Volume 67, Page 77, of the Deed Records of Culberson County, from E.E. Pokorny and Isabell S. Pokorny to American Telegraph and Telegraph Company:

A 1.00 acre tract of land located in the Northwest ¼ of the Northwest ¼ of Section 24, Block 61, Township 1 of the Texas and Pacific Railway Surveys in Culberson County, Texas, said 1.00 acre of land being more particularly described as follows:

Beginning at a point on the line between Sections 23 and 24, Block 61, Township 1, T. & P. Ry. Surveys which bears South 752.50 feet from a pipe set for the Northwest corner of said Section 24; thence East 208.71 feet; thence South 208.71 feet; thence West 208.71 feet to the line between said Sections 23 and 24, thence along the line between said Sections 23 and 24 North 208.71 feet to the place of beginning and containing 1.00 acre of land.

Exhibit "B"

Subject: [EXTERNAL] RAL Lease & Pooling Application_Delaware Ranch - Wise State Unit No. 1

Deborah/Joy,

This should be the last round of leasing/amendments needed to the Delaware Ranch – Wise State Unit No. 1 (knock on wood!). I've included you both on this email because as with the previous requests, you each handle different aspects of the items Chevron is requesting pertaining to the below mentioned tract of land. The request pertains to leasing Relinquishment Act lands (Deborah) and the pooling of the RAL lease tract into an existing unit (Joy).

Chevron operates the Delaware Ranch – Wise State Unit No. 1, located in Culberson County, Texas. The unit number is 12916 and the applicable State Leases are M-114883 (the "Wise Lease"), M-116786, M-121030 & M-121439. These are Relinquishment Act/Highway ROW leases, and when we took the Wise Lease, we believed Wise owned the entire surface of Section 30, Block 61 T1. Through new title we learned that a 20-acre tract within Section 30 was retained by El Paso Natural Gas Company L.L.C. and was not conveyed to Wise. Therefore, this is an unleased tract within the unit. Though we are currently paying royalties as if it were leased to both the State and Wise.

We have agreed to lease terms with El Paso Natural Gas Company L.L.C. in line with the other leases we have taken in the unit (1/4 royalty, 3 year term, $1,000/acre bonus) and they have executed the RAL lease form with an addendum. You should be getting a separate email with a OneDrive link that includes the lease application, cover letter, lease form, plat and schedule of owners that I will be mailing to you. Please note that since the State is already getting paid as if this interest was leased, there will be no change to the State's ownership decimal in the unit deck going forward. Once the lease is approved, we will add El Paso Natural Gas Company L.L.C. on the deck and remove Wise as to this tract.

Once approved we also need to amend the Delaware Ranch – Wise State Unit No. 1 Unit Agreement to include this new lease. In the OneDrive link you will be receiving, I've also included the preliminary pooling application, unit agreements, unit plat and an updated list of wells. Please note that for the pooling application, to keep the unit numbers correct, I have reduced the acres shown under Wise lease (M-114883) by 20 acres and added the new El Paso Natural Gas Company L.L.C. RAL lease.

There was an oversight in our check processing department a couple weeks ago and they have already mailed the State the lease application processing fee, the RAL lease bonus and the pooling application fee. Joy was aware of the issue and was involved in communications with us on that. I've included copies of the checks in the OneDrive link you are getting.

I will also be sending you hard copies of these documents, but I will be out of town all next week and am not in the office today, so the hard copies of all these documents may be delayed ~a week getting to you. Please let me know if there's anything else you need to process these applications.

Thanks,

Kristen

Culberson County, Texas

Dear Ms. Marek:

On May 7, 2024, the School Land Board approved your application to amend the referenced unit subject to the conditions in the enclosed Fifth Amendment of Unit & Pooling Agreement.

Enclosed are duplicate originals of the Agreement to be executed and acknowledged by a duly authorized representative of Chevron U.S.A Inc. and any other working interest owners. Additional pages may be added for execution and acknowledgement by the other working interest owners, if any.

Please attach the following to the agreement: a list of all the oil and gas leases included in the unit as Exhibit "A"; a legal description (metes and bounds or a list of tracts in the unit, if they are readily identifiable) of the unit as Exhibit "B", a legible, accurate plat as Exhibit "C".

After proper execution and acknowledgment, please return the duplicate originals of the Pooling Agreement for execution by the Commissioner. **The Board requires that execution be complete within ninety (90) days of approval by the Board.** An executed original of the Pooling Agreement will then be returned to you.

Thank you for your assistance with this matter and if you have any questions please do not hesitate to email or call.

Sincerely,

COPY

REMARKS:

- Chevron U. S. A. Inc. is requesting School Land Board approval of the Fifth Amendment of the Delaware Ranch - Wise State Unit # 1 which was previously approved by the School Land Board on August 3, 2018, first amendment on April 21, 2020 , second amendment on August 4, 2021, third amendment November 2, 2022, and the fourth amendment on October 3, 2023.
- This amendment is to add State RAL lease MF121658 which is twenty acres that were previously unleased. The acreage was previously accounted for in State RAL lease MF114883. Through title work it was discovered that there was a different surface owner who had not been leased.
- With School Land Board approval of the amendment the State's unit royalty participation will remain 6.26%.

POOLING COMMITTEE RECOMMENDATION:

The Pooling Committee recommends School Land Board approval of the Fifth Amendment of the Delaware Ranch - Wise State Unit # 1 under the above-stated provisions.

FIFTH AMENDMENT OF POOLING AGREEMENT
DELAWARE RANCH – WISE STATE UNIT #1
GLO UNIT NO. 13490
(FORMERLY GLO UNIT NO. 12916)
CULBERSON COUNTY, TEXAS

WHEREAS, on August 3, 2018, the Delaware Ranch – Wise State Unit #1 ("Unit") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, pursuant to such approval, Chevron U.S.A. Inc. ("Chevron") and the Commissioner of the General Land Office of the State of Texas entered into that certain Unit Agreement ("Agreement") to pool certain State lands into said Unit covering 46,533.82 acres of land, more particularly described in said Agreement on file in the Archives and Records of the Texas General Land Office at Austin, Texas, in Mineral File M-114883; and

WHEREAS, on April 21, 2020, an amendment to the Delaware Ranch – Wise State Unit #1 ("First Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on August 4, 2021, an amendment to the Delaware Ranch – Wise State Unit #1 ("Second Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on November 2, 2022, an amendment to the Delaware Ranch – Wise State Unit #1 ("Third Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on October 3, 2023, an amendment to the Delaware Ranch – Wise State Unit #1 ("Fourth Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on May 7, 2024, the application for an amendment to the Delaware Ranch – Wise State Unit #1 ("Fifth Amendment") was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, Chevron is the current operator of the Delaware Ranch – Wise State Unit #1; and

WHEREAS, Chevron timely made application and, at its regular meeting on May 7, 2024, the School Land Board approved its application to add 20.00 acres that were previously unleased, now leased under M-121658, to the Agreement by deleting the existing Exhibits "A", "B" and "C" and replacing them with Exhibits "A", "B" and "C" attached to this Fifth Amendment; and

WHEREAS, the Commissioner of the General Land Office finds that amending said amended Agreement as approved by the School Land Board is in the best interests of the State of Texas:

NOW THEREFORE, in consideration of ten U.S. Dollars ($10.00), the premises and the mutual agreements contained in this Fifth Amendment of Pooling Agreement, it is agreed that RAL Lease MF-121658 is subject to and made a part of this Agreement.

This Fifth Amendment shall in all other respects remain subject to the terms and provisions of the Agreement. A copy of Exhibits "A", "B" and "C" to the Agreement are attached to this Fifth Amendment of Pooling Agreement for reference purposes.

Nothing in this Fifth Amendment, nor the approval of this Fifth Amendment by the School Land Board, nor the execution of this Fifh Amendment by the Commissioner shall: (1) operate as a ratification or revivor of any State lease that has expired, terminated, or has been released in whole or in part or terminated under the terms of such State lease or the laws applicable thereto; (2) constitute a waiver or release of any claim for money, oil, gas or other hydrocarbons, or other thing due to the State by reason of the existence or failure of such lease; (3) constitute a waiver or release of any claim by the State that such lease is void or voidable for any reason, including, without limitation, violations of the laws of the State with respect to such lease or failure of consideration; or (4) constitute a confirmation or recognition of any boundary or acreage of any tract or parcel of land in which the State has or claims an interest; or (5) constitute a ratification of, or a waiver or release of any claim by the State with respect to any violation of a statute, regulation, or any of the common laws of this State, or any breach of any contract, duty or other obligation owed to the State.

This Fifth Amendment of Pooling Agreement may be executed in counterparts and if so executed, shall be valid, binding and have the same effect as if all the parties hereto actually joined in and executed one and the same document. For recording purposes and in the event counterparts of this Fifth Amendment of Pooling Agreement are executed, the executed pages, together with the pages necessary to show acknowledgments, may be combined with the other pages of this Fifth Amendment of Pooling Agreement to form what shall be deemed and treated as a single original instrument showing execution by all parties thereto.

IN WITNESS WHEREOF, the parties hereto have executed this Fifth Amendment of Pooling Agreement upon the respective dates indicated below but effective as of April 3, 2018.

20	61	2	696.60
28	61	2	685.00
30	61	2	677.00
Total Gross Acres:			30,518.72*

*The lease was described as covering all of Section 24, 30, 32, 38, 40 & 48, Block 61, Township 1 and Section 36, Block 62, Township 1. Subsequent title found that the owner of the soil of a 1 acre tract within Section 24 Block 61 T1 was George H. Brantley and this tract was not covered by this lease, a 20 acre tract within Section 30 Block 61 T1 was owned by El Paso Natural Gas Company, L.L.C. and this tract was not covered by this lease, and 40.95 acres in Sections 32, 38, 40 & 48 of Block 61 T1 and Section 36 Block 62 T1 was owned by the State of Texas, by and through the State Highway Commission and this highway tract was also not covered by this lease. Subsequent leases have been taken from the owners of the soil for the above referenced tracts. Therefore, as to the M-114883 lease, the total gross and net acres should be reduced accordingly for purposes of calculating the amount of acreage within the Delaware Ranch- Wise State Unit #1 and the associated ownership.

Exhibit "A-2"

Attached to and made a part of that certain Fifth Amendment of Pooling Agreement for the Delaware Ranch – Wise State Unit #1, Culberson County, Texas

This lease covers the following described lands located in Block 61 & 62, Township 1, T&P RR. Co. Survey, Culberson County, Texas:

Tracts 1, 2, 4, 6, 8, 10, #####

Tract 1 Section 35

BEGINNING at a concrete monument South 00°40'46" West 925.1 feet, North 76°02' West 385.4 feet, and North 13°58' East 50 feet from the apparent Northeast corner of section 35, Block 62, TSP. 1, T & P Ry. Company Survey;

THENCE: South 76°02' East 134.2 feet to a concrete monument in a curved boundary line whose radius is 905.37 feet;

THENCE: Northwesterly with said curve deflection uniformly and continuously to the right 134.7 feet to a concrete monument located North 13°58' East 50 feet from centerline Station 366+12.5 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department;

THENCE: North 13°58' East 10.0 feet to the place of beginning and containing 0.02 acres of land more or less.

Tract 2 Section 35

BEGINNING at a stake in the East boundary line of Section 35, Block 62, TSP. 1, T & P Ry, Company Survey, from which the apparent Northeast corner of Section 36 bears North 00°40'46" East 899.8 feet;

CONTINUED ON NEXT PAGE

THENCE: South 00°40'46" West with said East boundary line 87.8 feet to a concrete monument in a curved boundary line whose radius is 11,399.[illegible] feet;

THENCE: Northwesterly with said curve deflecting uniformly and continuously to the left 174.7 feet to a concrete monument at its end;

THENCE: North 76°0[illegible]' West [illegible] feet to a concrete monument South 13°58' East 60 feet from centerline Station 366+1[illegible].4 of R.M. Highway 65[illegible] as surveyed by the Resident Engineer of the Texas Highway Department;

THENCE: North 13°58' East [illegible].0 feet to a concrete monument at the beginning of a curved boundary line whose radius is 1005.57 feet;

THENCE: Northerly with said curve deflecting uniformly and continuously to the left 389.7 feet to the place of beginning and containing 0.3[illegible] acres of land more or less.

Tract 4 Section 3

BEGINNING at a concrete monument in the West boundary line of Section 3[illegible], Block 61, TSP. 1, T.&P. by Company Survey, from which a concrete monument marked $\frac{10}{31}\Big|\frac{29}{3}$ bears North 0°40'4[illegible]" East [illegible],541.9 feet;

THENCE: North 0°40'46" East with said West boundary line, at 6[illegible].4 feet crossing centerline Station 4[illegible] of R.M. Highway 65[illegible] as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 1[illegible].[illegible] feet to a concrete monument;

THENCE: South 73°24' East 1,61[illegible].[illegible] feet to a concrete monument at the beginning of a curved boundary line whose radius is 11,399.[illegible] feet;

THENCE: Southeasterly with said curve deflecting uniformly and continuously to the left 676.4 feet to a concrete monument at its end;

THENCE: South 76°48' East 3,401.4 feet to a concrete monument in the East boundary line of Section 3[illegible] from which the apparent Southeast corner of said Section 3[illegible] bears South 0°40'46" West ~~1,637.0~~ 1698.4 feet; E.E.I.

THENCE: South 0°40'46" West with said East boundary line of Section 3[illegible], at 61.4 feet crossing centerline Station 483+69.5 of R.M. Highway 65[illegible] as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 1[illegible].[illegible] feet to a concrete monument;

THENCE: North 76°48' West 3,4[illegible].0 feet to a concrete monument at the beginning of a curved boundary line whose radius is 11,519.[illegible] feet;

THENCE: Northwesterly with said curve deflecting uniformly and continuously to the right 6[illegible].6 feet to a concrete monument at its end;

THENCE: North 73°[illegible]4' West 1,5[illegible].1 feet to the place of beginning and containing 15.6[illegible] acres of land more or less.

CONTINUED ON NEXT PAGE

Tract 6 Section 40

BEGINNING at a concrete monument in the North boundary line of Section 40, Block 61, TSP. 1, T. & P. Ry. Company Survey from which the Northeast corner of Section 40 bears South 84°19'14" East 1,154.7 feet;

THENCE: South 84°19'14" East with said North boundary line, at 137.8 feet crossing centerline Station 631+97.5 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 275.6 feet to a concrete monument;

THENCE: South 63°31' East 454.8 feet to a concrete monument at the beginning of a curved boundary line whose radius is 11,518.2 feet;

THENCE: Southeasterly with said curve deflecting uniformly and continuously to the right 527.7 feet to a concrete monument in the East boundary line of Section 40 from which the apparent Northeast corner of Section 40 bears North 0°40'46" East 438.4 feet;

THENCE: South 0°40'46" East with said East boundary line at 64.3 feet crossing centerline Station 643+33.9 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 136.7 feet to a concrete monument in a curved boundary line whose radius is 11,392.2 feet;

THENCE: Northwesterly with said curve deflecting uniformly and continuously to the left 588.3 feet to a concrete monument at its end;

THENCE: North 63°31' West 703.0 feet to the place of beginning and containing 3.13 acres of land more or less.

Tract 8 Section 38

BEGINNING at a concrete monument in the West boundary line of Section 38, Block 61, TSP. 1, T. & P. Ry. Company Survey, from which a concrete monument marked $\frac{32+38}{45+47}$ bears South 01°53' West 1,141.4 feet;

THENCE: North 01°53' East with said West boundary line, at 72.4 feet crossing centerline Station 610+23.5 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 145.6 feet to a concrete monument;

THENCE: South 53°37' East 2,250.4 feet to a concrete monument at the beginning of a curved boundary line whose radius is 3,759.8 feet;

THENCE: Southeastorly with said curve uniformly and continuously to the left 22.2 feet to a concrete monument in the South boundary line of Section 38 from which concrete monument marked $\frac{32+38}{45+47}$ bears North 88°07' West 1,872.7 feet;

THENCE: North 88°07' West with said South boundary line, at 106.1 feet crossing centerline Station 631+67.2 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 212.0 feet to a concrete monument;

THENCE: North 53°37' West 2,015.2 feet to the place of beginning and containing 5.91 acres of land more or less.

CONTINUED ON NEXT PAGE

Tract 10 (corrected field notes) Section 48

Beginning at a concrete monument in the East boundary line of Section 48, Block 61, TSP. 1, T&P Ry. Company Survey, from which the apparent Northwest corner of Section 48 bears N 01° 53' E., 1519.9 feet;

Thence: N 01° 53' E. with the East boundary line of Section 48, at 63.3 feet crossing centerline Station 672+64.0 of R. M. Highway 652 as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 126.6 feet to a concrete monument;

Thence: S 69° 29' E, 2734.2 feet to a concrete monument at the beginning of a curved boundary line whose radius is 5789.6 feet;

Thence Southeasterly with said curve deflecting uniformly and continuously to the right 650.1 feet to a concrete monument at its end;

Thence: S 63° 03' E, 1219.1 feet to a concrete monument at the beginning of a curved boundary line whose radius is 1850.1 feet;

Thence: Southeasterly with said curve deflecting uniformly and continuously to the left 818.5 feet to a concrete monument at its end;

Thence: S 88° 24' E, 25.4 feet to a concrete monument;

Thence: S 85° 11' E, 92.0 feet to a concrete monument;

Thence: S 82° 00' E, 103.0 feet to a concrete monument;

Thence: S 79° 00' E, 103.0 feet to a concrete monument;

Thence: S 76° 00' E, 102.5 feet to a concrete monument;

Thence: S 72° 44' E, 13.0 feet to a concrete monument in the East boundary line of Section 48, from which the apparent Southeast corner of said Section 48 bears S 01° 53' W, 2252.1 feet;

Thence: S 01° 53' W with the East boundary line of Section 48, at 45.1 feet crossing centerline Station 731+21.9 of R. M. Highway 652 as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 126.6 feet to a concrete monument;

Thence: N 79° 16' W, 412.8 feet to a concrete monument;

Thence: N 88° 24' W, 25.4 feet to a concrete monument at the beginning of a curved boundary line whose radius is 1970.1 feet;

Thence: Northwesterly with said curve deflecting uniformly and continuously to the right 871.5 to a concrete monument at its end;

Thence: N 63° 03' W,1219.1 feet to a concrete monument at the beginning of a curved boundary line whose radius is 5669.6 feet;

Thence: Northwesterly with said curve deflecting uniformly and continuously to the left 636.6 feet to a concrete monument at its end;

Thence: N 69° 29' W, 2693.8 feet to the place of beginning and containing 16.23 acres of land more or less.

Exhibit "A-3"
Attached to and made a part of that certain Fifth Amendment of Pooling Agreement for the Delaware Ranch – Wise State Unit #1, Culberson County, Texas

This lease covers the following described lands located in Block 61, Township 1, T&P RR. Co. Survey, Culberson County, Texas:

A 1.00 acre tract of land located in the NW/4 of the NW/4 of Section 24, Block 61, Township 1, of the Texas and Pacific Railway Surveys in Culberson County, Texas, being that certain tract of land more particularly described in that certain Warranty Deed dated October 13, 1961, and recorded in Volume 67, Page 77, of the Deed Records of Culberson County, from E.E. Pokorny and Isabell S. Pokorny to American Telegraph and Telegraph Company:

A 1.00 acre tract of land located in the Northwest ¼ of the Northwest ¼ of Section 24, Block 61, Township 1 of the Texas and Pacific Railway Surveys in Culberson County, Texas, said 1.00 acre of land being more particularly described as follows:

Beginning at a point on the line between Sections 23 and 24, Block 61, Township 1, T. & P. Ry. Surveys which bears South 752.56 feet from a pipe set for the Northwest corner of said Section 24; thence East 208.71 feet; thence South 208.71 feet; thence West 208.71 feet to the line between said Sections 23 and 24; thence along the line between said Sections 23 and 24 North 208.71 feet to the place of beginning and containing 1.00 acre of land.

Exhibit "B"
Attached to and made a part of that certain Fifth Amendment of Pooling Agreement for the Delaware Ranch – Wise State Unit #1, Culberson County, Texas

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.: 148113
2. Operator's Name (as shown on form P-5, Organization Report): CHEVRON U. S. A. INC.
3. Operator Address (include street, city, state, zip): 6301 DEAUVILLE BLVD, MIDLAND, TX 79706
4. Lease Name: DR STATE WISE UNIT 1
5. Well No.: 2213SB

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 7500
9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No
10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08
12. County: CULBERSON
13. Surface Location: [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 28.33 miles in a NW direction from Orla which is the nearest town in the county of the well site.

15. Section	16. Block	17. Survey	18. Abstract No.	19. Distance to nearest lease line: ft.	20. Number of contiguous acres in lease, pooled unit, or unitized tract:
15	61 T1	T&P RR CO	A-2921		46533.82

21. Lease Perpendiculars: 12289 ft from the NORTH line and 19136 ft from the WEST line.
22. Survey Perpendiculars: 1296 ft from the NORTH line and 2720 ft from the WEST line.

23. Is this a pooled unit? [X] Yes [ ] No
24. Unitization Docket No:
25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	80544500	SANDBAR (BONE SPRING)	Oil or Gas Well	7500	1000.00	33

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

[FILER Apr 17, 2024 5:49 PM]: Wells 2211SB (#898969), 2212SB (#898970), 2213SB & 2215SB are being permitted concurrently.

Certificate:

I certify that information stated in this application is true and complete, to the best of my knowledge.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION **Form GW-2**

Groundwater Advisory Unit

Date Issued:	25 April 2024	**GAU Number:**	381548

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR State Wise Unit 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	2214WC
		Total Vertical	9500
		Latitude:	31.966232
		Longitude:	-104.362327
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2921; Block-61; Township-1; Section-15

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 100 feet must be protected.

This recommendation is applicable for all wells drilled in this section 15.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 04/24/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 131029 **Drilling Permit No:** 898971

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 2213SB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1750 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

NOTE: The Delaware Mountain Group must NOT be penetrated prior to setting and cementing the surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 05/13/2024 .
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

[RRC STAFF Apr 19, 2024 6:18 PM]: There have been problems identified with this permit (see problem letter attachment). Notification sent.; [RRC STAFF Apr 24, 2024 12:42 PM]: Problems identified with this permit are resolved.; [RRC STAFF Apr 24, 2024 12:44 PM]: Tracie Cherry has confirmed that the well count of 89 is accurate. There have been permits that have expired or wells that were moved to other fields. There are 94 wells listed on the P-16 (which is correct), 5 of them are stacked lateral child wells. It is required to list the child wells on the P-16, however, they are not included in the well count. 89 is verified and correct.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Acreage Designation

Filer is the owner or lessee, or has been authorized by the owner or lessee, of all or an undivided portion of the mineral estate under each tract for which filer is listed as operator below. For all leases operated by other entities, the number of assigned acres shown are reflected on current Commission records or the filer has been authorized by the current operator to change the assigned acreage of that operator as shown below.

SECTION III (CONTINUED). LISTING OF ALL WELLS IN THE REGULATORY FIELD ON THE SAME ACREAGE AS THE LEASE, POOLED UNIT, OR UNITIZED TRACT DESIGNATED IN SECTION II ABOVE BY FILER

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	25 April 2024	**GAU Number:**	381548

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR State Wise Unit 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	2214WC
		Total Vertical	9500
		Latitude:	31.966232
		Longitude:	-104.362327
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2921; Block-61; Township-1; Section-15

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 100 feet must be protected.

This recommendation is applicable for all wells drilled in this section 15.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 04/24/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 130981 **Drilling Permit No:** 898973

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ; **WELL** 2214WC has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1750 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

Please notify the Midland District Office immediately if any of the following is encountered prior to setting surface casing: gas, H2S or otherwise, flows encountered, well goes on a vacuum.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 05/09/2024 .
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

5. Well No.: 2215SB

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 7500

9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No

10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08

12. County: CULBERSON

13. Surface Location [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 28.33 miles in a NW direction from Orla which is the nearest town in the county of the well site.

15. Section: 15

16. Block: 61 T1

17. Survey: T&P RR CO

18. Abstract No.: A-2921

19. Distance to nearest lease line: ft.

20. Number of contiguous acres in lease, pooled unit, or unitized tract: 46533.82

21. Lease Perpendiculars: 12287 ft from the NORTH line and 19176 ft from the WEST line.

22. Survey Perpendiculars: 1295 ft from the NORTH line and 2760 ft from the WEST line.

23. Is this a pooled unit? [X] Yes [ ] No

24. Unitization Docket No:

25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION — List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	80544500	SANDBAR (BONE SPRING)	Oil or Gas Well	7500	990.00	34

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

[FILER Apr 17, 2024 5:51 PM]: Wells 2211SB (#898969), 2212SB (#898970), 2213SB (#89871) & 2215SB are being permitted concurrently

Certificate:

I certify that information stated in this application is true and complete, to the best of my knowledge.

NOTES:

1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	25 April 2024	**GAU Number:**	381548

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR State Wise Unit 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	2214WC
		Total Vertical	9500
		Latitude:	31.966232
		Longitude:	-104.362327
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2921; Block-61; Township-1; Section-15

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 100 feet must be protected.

This recommendation is applicable for all wells drilled in this section 15.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 04/24/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 131030 **Drilling Permit No:** 898972

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 2215SB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1750 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

NOTE: The Delaware Mountain Group must NOT be penetrated prior to setting and cementing the surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 05/13/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

12290 ft. NORTH 19096 ft. WEST	See FIELD(s) Below

FIELD(s) and LIMITATIONS:

* SEE FIELD DISTRICT FOR REPORTING PURPOSES *

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.	2. Operator's Name (as shown on form P-5, Organization Report)	3. Operator Address (include street, city, state, zip):
148113	CHEVRON U. S. A. INC.	6301 DEAUVILLE BLVD MIDLAND, TX 79706

4. Lease Name	5. Well No.
DR STATE WISE UNIT 1	2211SB

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): ☒ New Drill ☐ Recompletion ☐ Reclass ☐ Field Transfer ☐ Re-Enter ☐ Amended ☐ Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): ☐ Vertical ☒ Horizontal (Also File Form W-1H) ☐ Directional (Also File Form W-1D) ☐ Sidetrack

8. Total Depth	9. Do you have the right to develop the minerals under any right-of-way ?	10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)?
7500	☒ Yes ☐ No	☒ Yes ☐ No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.	12. County	13. Surface Location
08	CULBERSON	☒ Land ☐ Bay/Estuary ☐ Inland Waterway ☐ Offshore

14. This well is to be located 28.33 miles in a NW direction from Orla which is the nearest town in the county of the well site.

15. Section	16. Block	17. Survey	18. Abstract No.	19. Distance to nearest lease line: ft.	20. Number of contiguous acres in lease, pooled unit, or unitized tract:
15	61 T1	T&P RR CO	A-2921		46533.82

21. Lease Perpendiculars: 12290 ft from the NORTH line and 19096 ft from the WEST line.

22. Survey Perpendiculars: 1298 ft from the NORTH line and 2680 ft from the WEST line.

23. Is this a pooled unit?	24. Unitization Docket No:	25. Are you applying for Substandard Acreage Field?
☒ Yes ☐ No		☐ Yes (attach Form W-1A) ☒ No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir
08	80544500	SANDBAR (BONE SPRING)	Oil or Gas Well	7500	990.00	31

BOTTOMHOLE LOCATION INFORMATION is required for DIRECTIONAL, HORIZONTAL, AND AMENDED AS DRILLED PERMIT APPLICATIONS (see W-1H attachment)

Remarks

[FILER Apr 16, 2024 3:50 PM]: Wells 2211SB, 2212SB, 2213SB & 2215SB are being permitted concurrently

Certificate:

I certify that information stated in this application is true and complete, to the best of my knowledge.

NOTES:

1. This plat represents a survey made on the ground and meets the requirements for filing a well location plat with the Texas Railroad Commission and is intended solely for that purpose. Lease lines shown hereon were established from field measurements and record data. Mineral title shown hereon was furnished by Chevron U.S.A. Inc. and/or their agent(s). This plat does not meet the requirements for boundary surveys in the State of Texas.
2. All bearings, distances, areas and coordinates refer to the Texas Coordinate System of 1927, Central Zone.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	25 April 2024	**GAU Number:**	381548

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR State Wise Unit 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	2214WC
		Total Vertical	9500
		Latitude:	31.966232
		Longitude:	-104.362327
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2921; Block-61; Township-1; Section-15

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The interval from the land surface to a depth of 100 feet must be protected.

This recommendation is applicable for all wells drilled in this section 15.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 04/24/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

		Survey Name:	T&P RR CO

SWR13EX Application Number: 131025 **Drilling Permit No:** 898969

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ; **WELL** 2211SB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1750 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

NOTE: The Delaware Mountain Group must NOT be penetrated prior to setting and cementing the surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 05/13/2024 .
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

AMENDMENT OF OIL AND GAS LEASE

("AMENDMENT")

STATE OF TEXAS

MF- 114883

COUNTY OF CULBERSON

WHEREAS, under the date of March 28, 2013, **Wise Asset No. 8, LTD.**, a Texas limited partnership, and **Wise Asset No. 10, LTD.**, a Texas limited partnership, individually and as agent for the State of Texas (hereinafter referred to as "**Lessor**"), did execute and deliver to **COG OPERATING LLC,** a Delaware limited liability company, as Lessee, an Oil and Gas Lease, including Addendum 1 attached thereto and made a part thereof (hereinafter referred to as the "**Lease**"), covering 30,518.72 acres of land, more or less, located in Culbertson County, Texas, which is recorded in Volume 109, Page 366, of the Oil and Gas Lease Records of Culberson County, Texas;

WHEREAS, COG Operating LLC (hereinafter referred to as "**Operator**") is still the owner and operator of the Lease;

WHEREAS, Paragraph 45(a) of Addendum 1 of the Lease, entitled "Exploration Program: Delay in Expiration of Primary Term; Initial Lease Segregation", requires Operator to drill at least Eleven (11) Exploration Program Wells on the leased premises within the first Three (3) years of the Lease, and the Lease further provides that each Exploration Program Well shall be drilled and completed in accordance with the provisions of Paragraph 44 of Addendum 1;

WHEREAS, Operator has drilled and completed a total of Ten (10) Exploration Program Wells on the leased premises within the first Three (3) years of the Lease and the Eleventh (11th) Exploration Program Well, being the DR State Central Unit #2501H well (the "**Final Exploration Program Well**"), was drilled to TD and the drilling rig for such well was released on November 21, 2015;

WHEREAS, completion of the Final Exploration Program Well was scheduled for December 10, 2015 and, upon completion of said well, gas produced from said well was to be connected to and processed by Anadarko Petroleum Corporation's Ramsey Gas Plant (the "**Plant**"), located in the vicinity of Orla, Texas.

WHEREAS, on December 3, 2015, an explosion occurred at the Plant, causing the Plant to cease operations until necessary repairs can be made, and Operator was unable to obtain other gas processing alternatives for the gas production anticipated from the completion of the Final Exploration Program Well;

WHEREAS, Operator notified Lessor and the State of Texas, acting through its General Land Office (the "**State of Texas**"), as to the above circumstances and requested that an amendment of the Lease and a "delay of completion" be granted to Operator for the Final Exploration Program Well until such time as gas produced from the Final Exploration Program Well can be delivered to the Plant for processing in order to avoid gas having to be flared and wasted from such well; and

WHEREAS, Lessor and the State of Texas have agreed, and do hereby agree, to grant Operator the requested amendment and "delay of completion" of the Final Exploration Program Well, notwithstanding any terms and provisions of the Lease that would require action on the part of Operator to complete such well.

NOW THEREFORE, in consideration of the above circumstances and other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Lessor, the State of Texas and Operator do hereby agree, notwithstanding the terms and provisions of the Lease, including but not limited to the provisions of Paragraphs 44 and 45(a) of Addendum 1 thereof, as follows:

1. Operator has fully complied with the terms and provisions of the Lease by timely commencing the drilling of Eleven (11) Exploration Program Wells during the first Three (3) years of the Lease.

2. Due to the exercise of due diligence by Operator and the occurrence of events that were beyond the control of Operator, completion of the Final Exploration Program Well has been, and is hereby, excused, and it is hereby deemed that Operator has fully and completely complied with the terms and provisions of the Lease with respect to the drilling and completion of the Eleven (11) Exploration Program Wells, including the provisions of Paragraphs 44 and 45 of Addendum 1, notwithstanding the fact that the Final Exploration Program Well has not been completed.

3. In consideration of the agreements set forth in this Amendment, Operator agrees that within Ninety (90) days after the date on which Operator has been notified, in writing, by an authorized representative of the Plant that not less than 15,000 MCFD of gas production from the lands covered by the Lease (including lands pooled therewith) may be delivered to the Plant, Operator shall commence operations for the completion of the Final Exploration Program Well.

4. The Lease is deemed to be amended to the extent necessary to comply with and reflect the terms of this Amendment.

5. In the event of a conflict between the terms of this Amendment and the terms of the Lease, the terms of this Amendment shall control and prevail.

This Amendment may be executed in any number of counterparts, each of which may be combined and shall be considered an original for all purposes.

DATED to be effective as of the 1st day of March, 2016.

Re: Notice of Operations
Section 26 & 35, Block 61, Township 2
Taylor Ranch State Unit (Unit #9335)
Culberson County, Texas

Ms. McCauley,

Chevron U.S.A. Inc. is providing notice to the State of its intent to drill six wells within the Taylor Ranch State Unit (GLO Unit No. 9335) under State leases M-114883, M-116317, M-116650 & M-119304. The current estimated spud date is March 27, 2024. Included herein are the applicable regulatory documents pertaining to the wells. The well names are:

WELL NAME	API #
Taylor Ranch State Unit No. 0051WA	42-109- 34190
Taylor Ranch State Unit No. 0052TB	42-109- 34193
Taylor Ranch State Unit No. 0053WA	42-109- 34191
Taylor Ranch State Unit No. 0054TB	42-109- 34194
Taylor Ranch State Unit No. 0055WA	42-109- 34192

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Rev. 06/2022

Acreage Designation

Filer is the owner or lessee, or has been authorized by the owner or lessee, of all or an undivided portion of the mineral estate under each tract for which filer is listed as operator below. For all leases operated by other entities, the number of assigned acres shown are reflected on current Commission records or the filer has been authorized by the current operator to change the assigned acreage of that operator as shown below.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	29 January 2024	**GAU Number:**	377981

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	Taylor Ranch
		Lease Number:	
Operator No.:	148113	**Well Number:**	0053WA
		Total Vertical	12000
		Latitude:	31.819740
		Longitude:	-104.345186
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2949; Block-61; Township-T2; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 125 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 01/26/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

			Survey Name:	T&P RR CO	

SWR13EX Application Number: 129575 **Drilling Permit No:** 896568

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** TAYLOR RANCH STATE UNIT ; **WELL** 0054TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Application returned per operator's request.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 02/14/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

RRC APPROVAL BY: Ade Alase DATE: 03/04/2024

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	29 January 2024	**GAU Number:**	377981

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	Taylor Ranch
		Lease Number:	
Operator No.:	148113	**Well Number:**	0053WA
		Total Vertical	12000
		Latitude:	31.819740
		Longitude:	-104.345186
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2949; Block-61; Township-T2; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 125 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 01/26/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 129582 **Drilling Permit No:** 896569

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** TAYLOR RANCH STATE UNIT ; **WELL** 0056TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

Please notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

Penetration into the Delaware Mountain Group (DMG) formation is prohibited and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 03/05/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

FIELD(s) and LIMITATIONS:

* SEE FIELD DISTRICT FOR REPORTING PURPOSES *

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Form P-16

1701 N. Congress
P.O. Box 12967
Austin, Texas 78701-2967

Rev. 06/2022

Acreage Designation

Filer is the owner or lessee, or has been authorized by the owner or lessee, of all or an undivided portion of the mineral estate under each tract for which filer is listed as operator below. For all leases operated by other entities, the number of assigned acres shown are reflected on current Commission records or the filer has been authorized by the current operator to change the assigned acreage of that operator as shown below.

SECTION I. OPERATOR INFORMATION

Operator Name:	Chevron U.S.A., Inc	**Operator P-5 No.:**	148113
Operator Address:	6301 Deauville Blvd. Midland, Texas 79706		

SECTION II. WELL INFORMATION

District No.:	08	**API No.:**		**Purpose of Filing:**

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	29 January 2024	**GAU Number:**	377981

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	Taylor Ranch
		Lease Number:	
Operator No.:	148113	**Well Number:**	0053WA
		Total Vertical	12000
		Latitude:	31.819740
		Longitude:	-104.345186
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2949; Block-61; Township-T2; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 125 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 01/26/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 129572 **Drilling Permit No:** 896564

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** TAYLOR RANCH STATE UNIT ; **WELL** 0053WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

Please notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

Penetration into the Delaware Mountain Group (DMG) formation is prohibited and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 03/05/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

Acreage Designation

Filer is the owner or lessee, or has been authorized by the owner or lessee, of all or an undivided portion of the mineral estate under each tract for which filer is listed as operator below. For all leases operated by other entities, the number of assigned acres shown are reflected on current Commission records or the filer has been authorized by the current operator to change the assigned acreage of that operator as shown below.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	29 January 2024	**GAU Number:**	377981

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	Taylor Ranch
		Lease Number:	
Operator No.:	148113	**Well Number:**	0053WA
		Total Vertical	12000
		Latitude:	31.819740
		Longitude:	-104.345186
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2949; Block-61; Township-T2; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 125 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 01/26/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 129548 **Drilling Permit No:** 896567

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** TAYLOR RANCH STATE UNIT ; **WELL** 0052TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

Please notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

Penetration into the Delaware Mountain Group (DMG) formation is prohibited and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 03/05/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

INSTRUCTIONS — Reference: Statewide Rules 31, 38 and 40

1. When two or more tracts are pooled to form a unit to obtain a drilling permit, file completion paperwork, or reform a pooled unit pursuant to Rule 38(d)(3) the operator must file an original Certificate of Pooling Authority and certified plat.
2. The certified plat shall designate each tract with an outline and a tract identifier. The tract identifier on the plat shall correspond to the tract identifier and associated information listed on the Certificate.
3. If within an individual tract, a non-pooled and/or unleased interest exists, indicate by checking the appropriate box.
4. If the Purpose of Filing is to obtain a drilling permit, in box #1 list all applicable fields separately or enter "All Fields" if the Certificate pertains to all fields requested on Form W-1.
5. If the Purpose of Filing is to file completion paperwork, enter the applicable field name in box #1 for the completion.
6. Identify the drill site tract with an * to the left of the tract identifier.
7. The total number of acres in the pooled unit in #11 should equal the total of all acres in the individual tracts listed.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	29 January 2024	**GAU Number:**	377981

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	Taylor Ranch
		Lease Number:	
Operator No.:	148113	**Well Number:**	0053WA
		Total Vertical	12000
		Latitude:	31.819740
		Longitude:	-104.345186
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2949; Block-61; Township-T2; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 125 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23.

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 01/26/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

		Survey Name:	T&P RR CO

SWR13EX Application Number: 129538 **Drilling Permit No:** 896563

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** TAYLOR RANCH STATE UNIT ; **WELL** 0051WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

The proposed alternative drilling fluid program for the fresh water protected interval is hereby approved.

Please notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set.

Penetration into the Delaware Mountain Group (DMG) formation is prohibited and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 03/05/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

RRC APPROVAL BY: Ade Alase DATE: 03/08/2024

FIFTH AMENDMENT OF POOLING AGREEMENT
DELAWARE RANCH – WISE STATE UNIT #1
GLO UNIT NO. 13490
(FORMERLY GLO UNIT NO. 12916)
CULBERSON COUNTY, TEXAS

WHEREAS, on August 3, 2018, the Delaware Ranch – Wise State Unit #1 ("Unit") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, pursuant to such approval, Chevron U.S.A. Inc. ("Chevron") and the Commissioner of the General Land Office of the State of Texas entered into that certain Unit Agreement ("Agreement") to pool certain State lands into said Unit covering 46,533.82 acres of land, more particularly described in said Agreement on file in the Archives and Records of the Texas General Land Office at Austin, Texas, in Mineral File M-114883; and

WHEREAS, on April 21, 2020, an amendment to the Delaware Ranch – Wise State Unit #1 ("First Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on August 4, 2021, an amendment to the Delaware Ranch – Wise State Unit #1 ("Second Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on November 2, 2022, an amendment to the Delaware Ranch – Wise State Unit #1 ("Third Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on October 3, 2023, an amendment to the Delaware Ranch – Wise State Unit #1 ("Fourth Amendment") in Culberson County, Texas, was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, on May 7, 2024, the application for an amendment to the Delaware Ranch – Wise State Unit #1 ("Fifth Amendment") was presented to and approved by the School Land Board of the State of Texas pursuant to the provisions of Subchapter E, Chapter 52, of the Texas Natural Resources Code; and

WHEREAS, Chevron is the current operator of the Delaware Ranch – Wise State Unit #1; and

WHEREAS, Chevron timely made application and, at its regular meeting on May 7, 2024, the School Land Board approved its application to add 20.00 acres that were previously unleased, now leased under M-121658, to the Agreement by deleting the existing Exhibits "A", "B" and "C" and replacing them with Exhibits "A", "B" and "C" attached to this Fifth Amendment; and

WHEREAS, the Commissioner of the General Land Office finds that amending said amended Agreement as approved by the School Land Board is in the best interests of the State of Texas:

NOW THEREFORE, in consideration of ten U.S. Dollars ($10.00), the premises and the mutual agreements contained in this Fifth Amendment of Pooling Agreement, it is agreed that RAL Lease MF-121658 is subject to and made a part of this Agreement.

This Fifth Amendment shall in all other respects remain subject to the terms and provisions of the Agreement. A copy of Exhibits "A", "B" and "C" to the Agreement are attached to this Fifth Amendment of Pooling Agreement for reference purposes.

Nothing in this Fifth Amendment, nor the approval of this Fifth Amendment by the School Land Board, nor the execution of this Fifh Amendment by the Commissioner shall: (1) operate as a ratification or revivor of any State lease that has expired, terminated, or has been released in whole or in part or terminated under the terms of such State lease or the laws applicable thereto; (2) constitute a waiver or release of any claim for money, oil, gas or other hydrocarbons, or other thing due to the State by reason of the existence or failure of such lease; (3) constitute a waiver or release of any claim by the State that such lease is void or voidable for any reason, including, without limitation, violations of the laws of the State with respect to such lease or failure of consideration; or (4) constitute a confirmation or recognition of any boundary or acreage of any tract or parcel of land in which the State has or claims an interest; or (5) constitute a ratification of, or a waiver or release of any claim by the State with respect to any violation of a statute, regulation, or any of the common laws of this State, or any breach of any contract, duty or other obligation owed to the State.

This Fifth Amendment of Pooling Agreement may be executed in counterparts and if so executed, shall be valid, binding and have the same effect as if all the parties hereto actually joined in and executed one and the same document. For recording purposes and in the event counterparts of this Fifth Amendment of Pooling Agreement are executed, the executed pages, together with the pages necessary to show acknowledgments, may be combined with the other pages of this Fifth Amendment of Pooling Agreement to form what shall be deemed and treated as a single original instrument showing execution by all parties thereto.

IN WITNESS WHEREOF, the parties hereto have executed this Fifth Amendment of Pooling Agreement upon the respective dates indicated below but effective as of April 3, 2018.

N/2 of 10	61	2	347.50
12	61	2	697.60
20	61	2	696.60
28	61	2	685.00
30	61	2	677.00
Total Gross Acres:			30,518.72*

*The lease was described as covering all of Section 24, 30, 32, 38, 40 & 48, Block 61, Township 1 and Section 36, Block 62, Township 1. Subsequent title found that the owner of the soil of a 1 acre tract within Section 24 Block 61 T1 was George H. Brantley and this tract was not covered by this lease, a 20 acre tract within Section 30 Block 61 T1 was owned by El Paso Natural Gas Company, L.L.C. and this tract was not covered by this lease, and 40.95 acres in Sections 32, 38, 40 & 48 of Block 61 T1 and Section 36 Block 62 T1 was owned by the State of Texas, by and through the State Highway Commission and this highway tract was also not covered by this lease. Subsequent leases have been taken from the owners of the soil for the above referenced tracts. Therefore, as to the M-114883 lease, the total gross and net acres should be reduced accordingly for purposes of calculating the amount of acreage within the Delaware Ranch- Wise State Unit #1 and the associated ownership.

Exhibit "A-2"

Attached to and made a part of that certain Fifth Amendment of Pooling Agreement for the Delaware Ranch – Wise State Unit #1, Culberson County, Texas

This lease covers the following described lands located in Block 61 & 62, Township 1, T&P RR. Co. Survey, Culberson County, Texas:

Tracts 1, 2, 4, 6, 8, 10, #####

Tract 1 **Section 35**

BEGINNING at a concrete monument South 00°40'46" West 925.1 feet, North 76°02' West 385.4 feet, and North 13°58' East 50 feet from the apparent Northeast corner of section 36, Block 62, TSP. 1, T & P Ry. Company Survey;

THENCE: South 76°02' East 134.2 feet to a concrete monument in a curved boundary line whose radius is 905.37 feet;

THENCE: Northwesterly with said curve deflection uniformly and continuously to the right 134.7 feet to a concrete monument located North 13°58' East 50 feet from centerline Station 366+12.5 of R.M. Hig way 652 as surveyed by the Resident Engineer of the Texas Highway Department;

THENCE: North 13°58' East 10.0 feet to the place of beginning and containing 0.02 acres of land more or less.

Tract 2 **Section 35**

BEGINNING at a stake in the East boundary line of Section 35, Block 62, TSP. 1, T & P Ry, Company Survey, from which the apparent Northeast corner of Section 36 bears North 00°40'46" East 895.8 feet;

CONTINUED ON NEXT PAGE

THENCE: South 60°40'46" West with said East boundary line 87.8 feet to a concrete monument in a curved boundary line whose radius is 11,399.2 feet;

THENCE: Northwesterly with said curve deflecting uniformly and continuously to the left 734.7 feet to a concrete monument at its end;

THENCE: North 76°02' West 266.[illegible] feet to a concrete monument South 13°58' East 60 feet from centerline Station 366+12.4 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department;

THENCE: North 13°58' East 10.0 feet to a concrete monument at the beginning of a curved boundary line whose radius is 1005.37 feet;

THENCE: Northerly with said curve deflecting uniformly and continuously to the left 389.7 feet to the place of beginning and containing 0.325 acres of land more or less.

Tract 4 Section 32

BEGINNING at a concrete monument in the West boundary line of Section 32, Block 61, TSP, 1, T & P Ry Company Survey, from which a concrete monument marked 30|29 / 31|32 bears North 0°40'46" East 2,541.9 feet;

THENCE: North 0°40'46" East with said West boundary line, at 62.4 feet crossing centerline Station 426+76.0 of R.M. Highway 652 as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 1[illegible].3 feet to a concrete monument;

THENCE: South 73°24' East 1,615.3 feet to a concrete monument at the beginning of a curved boundary line whose radius is 11,399.2 feet;

THENCE: Southeasterly with said curve deflecting uniformly and continuously to the left 676.4 feet to a concrete monument at its end;

THENCE: South 76°48' East 3,401.4 feet to a concrete monument in the East boundary line of Section 32 from which the apparent Southeast corner of said Section 32 bears South 0°40'46" West ~~1,637.0~~ 1698.4 feet; E.E.P.

THENCE: South 0°40'46" West with said East boundary line of Section 32, at 61.4 feet crossing centerline Station 48+69.5 of R.M. Highway 652 as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 1[illegible] feet to a concrete monument;

THENCE: North 76°48' West 3,4[illegible].0 feet to a concrete monument at the beginning of a curved boundary line whose radius is 11,519.2 feet;

THENCE: Northwesterly with said curve deflecting uniformly and continuously to the right [illegible] feet to a concrete monument at its end;

THENCE: North 73°24' West 1,[illegible],1 feet to the place of beginning and containing 15.6[illegible] acres of land more or less.

CONTINUED ON NEXT PAGE

Tract A Section 40

BEGINNING at a concrete monument in the North boundary line of Section 40, Block 61, TSP. 1, T. & P. Ry. Company Survey from which the Northeast corner of Section 40 bears South 89°19'18" East 1,158.7 feet;

THENCE: South 89°19'18" East with said North boundary line, at 137.8 feet crossing centerline Station 531+97.4 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 275.6 feet to a concrete monument;

THENCE: South 43°31' East 454.8 feet to a concrete monument at the beginning of a curved boundary line whose radius is 11,515.2 feet;

THENCE: Southeasterly with said curve deflecting uniformly and continuously to the right 527.7 feet to a concrete monument in the East boundary line of Section 40 from which the apparent Northeast corner of Section 40 bears North 0°40'46" East 438.4 feet;

THENCE: South 0°40'46" East with said East boundary line at 48.3 feet crossing centerline Station 543+33.9 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 136.7 feet to a concrete monument in a curved boundary line whose radius is 11,399.2 feet;

THENCE: Northwesterly with said curve deflecting uniformly and continuously to the left 587.3 feet to a concrete monument at its end;

THENCE: North 63°31' West 703.0 feet to the place of beginning and containing 3.13 acres of land more or less.

Tract B Section 38

BEGINNING at a concrete monument in the West boundary line of Section 38, Block 61, TSP. 1, T. & P. Ry. Company Survey, from which a concrete monument marked $\frac{32+38}{45+47}$ bears South 01°53' West 1,141.4 feet;

THENCE: North 01°53' East with said West boundary line, at 72.8 feet crossing centerline Station 610+23.5 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 145.5 feet to a concrete monument;

THENCE: South 53°37' East 2,250.4 feet to a concrete monument at the beginning of a curved boundary line whose radius is 3,759.8 feet;

THENCE: Southeastorly with said curve uniformly and continuously to the left 22.2 feet to a concrete monument in the South boundary line of Section 38 from which concrete monument marked $\frac{32+38}{45+47}$ bears North 88°07' West 1,872.7 feet;

THENCE: North 88°07' West with said South boundary line, at 104.1 feet crossing centerline Station 631+67.2 of R.M. Highway 652 as surveyed by the Resident Engineer of the Texas Highway Department, and continuing for a total distance of 212.0 feet to a concrete monument;

THENCE: North 53°37' West 2,015.2 feet to the place of beginning and containing 5.91 acres of land more or less.

CONTINUED ON NEXT PAGE

Tract 10 (corrected field notes) Section 48

Beginning at a concrete monument in the East boundary line of Section 48, Block 61, T&P. 1, T&P Ry. Company Survey, from which the apparent Northwest corner of Section 48 bears N 01° 53' W., 1519.4 feet;

Thence: N 01° 53' W. with the East boundary line of Section 48, at 63.3 feet crossing centerline Station 672+64.0 of R. M. Highway 652 as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 126.6 feet to a concrete monument;

Thence: S 69° 29' W, 2734.2 feet to a concrete monument at the beginning of a curved boundary line whose radius is 5789.6 feet;

Thence Southwesterly with said curve deflecting uniformly and continuously to the right 650.1 feet to a concrete monument at its end;

Thence: S 63° 03' E, 1219.1 feet to a concrete monument at the beginning of a curved boundary line whose radius is 1850.1 feet;

Thence: Southeasterly with said curve deflecting uniformly and continuously to the left 816.5 feet to a concrete monument at its end;

Thence: S 88° 24' E, 25.4 feet to a concrete monument;

Thence: S 85° 11' E, 92.0 feet to a concrete monument;

Thence: S 82° 00' E, 103.0 feet to a concrete monument;

Thence: S 79° 00' E, 102.8 feet to a concrete monument;

Thence: S 76° 00' E, 102.5 feet to a concrete monument;

Thence: S 72° 44' E, 13.0 feet to a concrete monument in the East boundary line of Section 48, from which the apparent Southeast corner of said Section 48 bears S 01° 53' W, 2252.1 feet;

Thence: S 01° 53' W with the East boundary line of Section 48, at 45.1 feet crossing centerline Station 731+21.9 of R. M. Highway 652 as surveyed by Resident Engineer of the Texas Highway Department, and continuing for a total distance of 126.6 feet to a concrete monument;

Thence: N 79° 16' W, 412.8 feet to a concrete monument;

Thence: N 88° 24' W, 25.4 feet to a concrete monument at the beginning of a curved boundary line whose radius is 1970.1 feet;

Thence: Northwesterly with said curve deflecting uniformly and continuously to the right 871.5 to a concrete monument at its end;

Thence: N 63° 03' W,1219.1 feet to a concrete monument at the beginning of a curved boundary line whose radius is 5569.6 feet;

Thence: Northwesterly with said curve deflecting uniformly and continuously to the left 636.6 feet to a concrete monument at its end;

Thence: N 69° 29' W, 2693.8 feet to the place of beginning and containing 16.23 acres of land more or less.

Exhibit "A-3"
Attached to and made a part of that certain Fifth Amendment of Pooling Agreement for the Delaware Ranch – Wise State Unit #1, Culberson County, Texas

This lease covers the following described lands located in Block 61, Township 1, T&P RR. Co. Survey, Culberson County, Texas:

A 1.00 acre tract of land located in the NW/4 of the NW/4 of Section 24, Block 61, Township 1, of the Texas and Pacific Railway Surveys in Culberson County, Texas, being that certain tract of land more particularly described in that certain Warranty Deed dated October 13, 1961, and recorded in Volume 67, Page 77, of the Deed Records of Culberson County, from E.E. Pokorny and Isabell S. Pokorny to American Telegraph and Telegraph Company:

A 1.00 acre tract of land located in the Northwest ¼ of the Northwest ¼ of Section 24, Block 61, Township 1 of the Texas and Pacific Railway Surveys in Culberson County, Texas, said 1.00 acre of land being more particularly described as follows:

Beginning at a point on the line between Sections 23 and 24, Block 61, Township 1, T. & P. Ry. Surveys which bears South 752.56 feet from a pipe set for the Northwest corner of said Section 24; thence East 208.71 feet; thence South 208.71 feet; thence West 208.71 feet to the line between said Sections 23 and 24; thence along the line between said Sections 23 and 24 North 208.71 feet to the place of beginning and containing 1.00 acre of land.

Re: Notice of Operations
Section 25 & 36, Block 61, Township 1S
Delaware Ranch – Wise State Unit #1 (Unit #13490)
Culberson County, Texas

Ms. McCauley,

Chevron U.S.A. Inc. is providing notice to the State of its intent to drill five wells within the Delaware Ranch – Wise State Unit #1 (GLO Unit No. 13490) under State leases M-114883, M-116786 (A&B), M-121439 & M-121658 & M-121030. The current estimated spud date is October 15, 2024. Included herein are the applicable regulatory documents pertaining to the wells. The well names are:

WELL NAME	API #
DR State Wise Unit 1 No. 291WA	42-109-34321
DR State Wise Unit 1 No. 292TB	42-109-34325
DR State Wise Unit 1 No. 293WA	42-109-34322
DR State Wise Unit 1 No. 294TB	42-109-34326
DR State Wise Unit 1 No. 295WA	42-109-34323
DR State Wise Unit 1 No. 296TB	42-109-34327
DR State Wise Unit 1 No. 297WA	42-109-34324

If you have any questions, you can reach me via the contact details listed below.

Sincerely,

Jeremy Lang

FIELD NAME LEASE NAME	ACRES NEAREST LEASE	DEPTH	WELL # NEAREST WE	DIST

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

*NOTIFICATION

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	19 August 2024	**GAU Number:**	385754

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0291WA
		Total Vertical	12000
		Latitude:	31.940693
		Longitude:	-104.344741
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2925; Block-61; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23 (A-2925).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/19/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133408 **Drilling Permit No:** 902106

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0294TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

12-12-01

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/11/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

RRC APPROVAL BY: Cody Wisniewski DATE: 09/18/2024

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

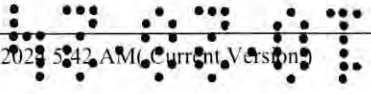
This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.



Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

*NOTIFICATION

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	19 August 2024	**GAU Number:**	385754

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0291WA
		Total Vertical	12000
		Latitude:	31.940693
		Longitude:	-104.344741
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2925; Block-61; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23 (A-2925).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/19/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133403 **Drilling Permit No:** 902102

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0293WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

12-12-01

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/11/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

FIELD NAME LEASE NAME	ACRES NEAREST LEASE	DEPTH	WELL # NEAREST WE	DIST

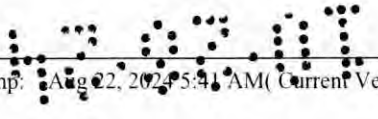
This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.



Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

*NOTIFICATION

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	19 August 2024	**GAU Number:**	385754

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0291WA
		Total Vertical	12000
		Latitude:	31.940693
		Longitude:	-104.344741
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2925; Block-61; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23 (A-2925).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/19/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

State:	TX	**County:**	CULBERSON
		Survey Name:	T&P RR CO

SWR13EX Application Number: 133407 **Drilling Permit No:** 902105

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ; **WELL** 0292TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

42-02-01

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/11/2024 .
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

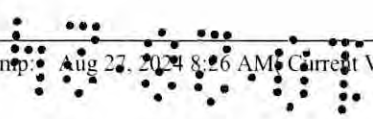
This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.



Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

***NOTIFICATION**

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION **Form GW-2**

Groundwater Advisory Unit

Date Issued:	19 August 2024	**GAU Number:**	385754

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0291WA
		Total Vertical	12000
		Latitude:	31.940693
		Longitude:	-104.344741
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2925; Block-61; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23 (A-2925).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/19/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133379 **Drilling Permit No:** 902101

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0291WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

Notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set or if any flow is encountered prior to the setting and cementing of the surface casing.

NOTE: The Delaware Mountain Group must NOT be penetrated prior to setting and cementing the surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

12.02.01

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/10/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

RRC APPROVAL BY: Jeffery Morgan DATE: 09/11/2024

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

*NOTIFICATION

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	19 August 2024	**GAU Number:**	385754

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0291WA
		Total Vertical	12000
		Latitude:	31.940693
		Longitude:	-104.344741
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2925; Block-61; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23 (A-2925).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/19/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133405 **Drilling Permit No:** 902104

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0297WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

12-02-01

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/11/2024 .
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

* SEE FIELD DISTRICT FOR REPORTING PURPOSES *

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

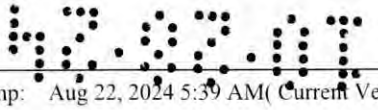
This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.



Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

***NOTIFICATION**

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	19 August 2024	**GAU Number:**	385754

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0291WA
		Total Vertical	12000
		Latitude:	31.940693
		Longitude:	-104.344741
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2925; Block-61; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23 (A-2925).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/19/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

State:	TX	**Survey Name:**	T&P RR CO

SWR13EX Application Number: 133409 **Drilling Permit No:** 902107

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0296TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

12-02-01

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/11/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

* SEE FIELD DISTRICT FOR REPORTING PURPOSES *

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

*NOTIFICATION

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	19 August 2024	**GAU Number:**	385754

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0291WA
		Total Vertical	12000
		Latitude:	31.940693
		Longitude:	-104.344741
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-2925; Block-61; Township-1; Section-23

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 23 (A-2925).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/19/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133404 **Drilling Permit No:** 902103

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0295WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1500 feet of surface casing and circulate cement from the shoe to the ground surface.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

12-02-01

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/11/2024 .
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

FIELD(s) and LIMITATIONS:

* SEE FIELD DISTRICT FOR REPORTING PURPOSES *

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

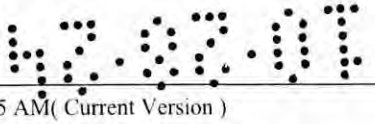
This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.



Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

*NOTIFICATION

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	22 August 2024	**GAU Number:**	385914

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0271TB
		Total Vertical	12000
		Latitude:	31.940969
		Longitude:	-104.326870
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-4762; Block-61; Township-T1; Section-24

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 24 (A-4762 & 6976).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/22/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133593 **Drilling Permit No:** 902224

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0274WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1600 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/24/2024 .
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

FIELD(s) and LIMITATIONS:

* SEE FIELD DISTRICT FOR REPORTING PURPOSES *

FIELD NAME LEASE NAME	ACRES NEAREST LEASE	DEPTH	WELL # NEAREST WE	DIST

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

*NOTIFICATION

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION **Form GW-2**

Groundwater Advisory Unit

Date Issued:	22 August 2024	**GAU Number:**	385914

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0271TB
		Total Vertical	12000
		Latitude:	31.940969
		Longitude:	-104.326870
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-4762; Block-61; Township-T1; Section-24

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 24 (A-4762 & 6976).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/22/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133596 **Drilling Permit No:** 902227

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ; **WELL** 0277TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1600 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

12-02-01

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/24/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

1740.0 F W L

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

*NOTIFICATION

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

FIELD(s) and LIMITATIONS:

* SEE FIELD DISTRICT FOR REPORTING PURPOSES *

FIELD NAME / LEASE NAME	ACRES / NEAREST LEASE	DEPTH	WELL # / NEAREST WE	DIST

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

		Total Vertical	12000
		Latitude:	31.940969
		Longitude:	-104.326870
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-4762; Block-61; Township-T1; Section-24

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 24 (A-4762 & 6976).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/22/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133592 **Drilling Permit No:** 902223

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0273TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1600 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/24/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

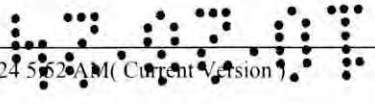
In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.



Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

***NOTIFICATION**

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	22 August 2024	**GAU Number:**	385914

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0271TB
		Total Vertical	12000
		Latitude:	31.940969
		Longitude:	-104.326870
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-4762; Block-61; Township-T1; Section-24

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 24 (A-4762 & 6976).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/22/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133595 **Drilling Permit No:** 902226

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ; **WELL** 0276WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1600 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

- You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

  This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

  This exception is based on information provided when the application was submitted 09/24/2024
  If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

970.0 F W L

THE FOLLOWING RESTRICTIONS APPLY TO ALL FIELDS

Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

***NOTIFICATION**

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

Permit # 902222

Approved Date: Aug 26, 2024

[RRC STAFF Aug 23, 2024 4:33 PM]: There have been problems identified with this permit (see problem letter attachment). Notification sent.; [RRC STAFF Aug 23, 2024 4:33 PM]: This W-1 is being sent back to the previous review phase to determine if an additional problem is needed.; [RRC STAFF Aug 26, 2024 8:15 AM]: There have been problems identified with this permit (see problem letter attachment). Notification sent.; [RRC STAFF Aug 26, 2024 10:32 AM]: Brenda Hoffman revised P16 with corrections.; [RRC STAFF Aug 26, 2024 10:41 AM]: Problems identified with this permit are resolved.; [RRC STAFF Aug 26, 2024 10:46 AM]: There have been problems identified with this permit (see problem letter attachment). Notification sent.; [RRC STAFF Aug 26, 2024 1:49 PM]: Problems identified with this permit are resolved.; [RRC STAFF Aug 26, 2024 1:50 PM]: Brenda Hoffman advised via phone call to update the field to FORD, WEST (WOLFCAMP) on the W-1. FORD, WEST (WOLFCAMP) P-16 has been marked visible again and SANDBAR (BONE SPRING) P-16 archived.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	22 August 2024	**GAU Number:**	385914

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0271TB
		Total Vertical	12000
		Latitude:	31.940969
		Longitude:	-104.326870
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-4762; Block-61; Township-T1; Section-24

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 24 (A-4762 & 6976).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/22/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133591 **Drilling Permit No:** 902222

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0272WA has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1600 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

12-02-01

.You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/24/2024 .
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

RRC APPROVAL BY: Cody Wisniewski DATE: 10/04/2024

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

***NOTIFICATION**

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.: 148113
2. Operator's Name (as shown on form P-5, Organization Report): CHEVRON U. S. A. INC.
3. Operator Address (include street, city, state, zip): 6301 DEAUVILLE BLVD MIDLAND, TX 79706
4. Lease Name: DR STATE WISE UNIT 1
5. Well No.: 0275TB

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 12000

9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No

10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08
12. County: CULBERSON
13. Surface Location [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 25.86 miles in a NW direction from ORLA which is the nearest town in the county of the well site.

15. Section	16. Block	17. Survey	18. Abstract No.	19. Distance to nearest lease line: ft.	20. Number of contiguous acres in lease, pooled unit, or unitized tract:
24	61 T1	T&P RR CO / BELL, I J	A-4762		46533.82

21. Lease Perpendiculars: 21466 ft from the N line and 19081 ft from the E line.
22. Survey Perpendiculars: 779 ft from the S line and 2666 ft from the E line.

23. Is this a pooled unit? [X] Yes [ ] No
24. Unitization Docket No:
25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

26. RRC District No.	27. Field No.	28. Field Name (exactly as shown in RRC records)	29. Well Type	30. Completion Depth	31. Distance to Nearest Well in this Reservoir	32. Number of Wells on this lease in this Reservoir

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	22 August 2024	**GAU Number:**	385914

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0271TB
		Total Vertical	12000
		Latitude:	31.940969
		Longitude:	-104.326870
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-4762; Block-61; Township-T1; Section-24

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 24 (A-4762 & 6976).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/22/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133594 **Drilling Permit No:** 902225

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ; **WELL** 0275TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1600 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any flow(s), H2S or otherwise, is encountered during operations.

NOTE: Penetration into the Delaware Mountain Group (DMG) formation is not allowed and shall not be penetrated while drilling surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/24/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

This well shall be completed and produced in compliance with applicable special field or statewide spacing and density rules. If this well is to be used for brine mining, underground storage of liquid hydrocarbons in salt formations, or underground storage of gas in salt formations, a permit for that specific purpose must be obtained from Environmental Services prior to construction, including drilling, of the well in accordance with Statewide Rules 81, 95, and 97.

This well must comply to the new SWR 3.13 requirements concerning the isolation of any potential flow zones and zones with corrosive formation fluids. See approved permit for those formations that have been identified for the county in which you are drilling the well in.

The designated interval for one or more of the fields approved in this permit appears to overlap with the designated interval of another field or fields in this district. In the case of conflicting designated intervals you will be required to be consistent in field designation on this lease. Further, if the designated interval overlap of wells on this lease results in an actual or potential double assignment of reservoir and the applicant cannot conclusively demonstrate that there is no double assignment, the permitted well may not be assigned an allowable until the conflict is resolved. Because of the overlapping designated intervals in this area, issuance of this permit does not guarantee that the completion of the well will be approved or that the well will receive an allowable in any given field, even if that field is listed on the approved permit application.

Railroad Commission of Texas

PERMIT TO DRILL, RE-COMPLETE, OR RE-ENTER ON REGULAR OR ADMINISTRATIVE EXCEPTION LOCATION

CONDITIONS AND INSTRUCTIONS

Permit Invalidation. It is the operator's responsibility to make sure that the permitted location complies with Commission density and spacing rules in effect on the spud date. The permit becomes invalid automatically if, because of a field rule change or the drilling of another well, the stated location is not in compliance with Commission field rules on the spud date. If this occurs, application for an exception to Statewide Rules 37 and 38 must be made and a special permit granted prior to spudding. Failure to do so may result in an allowable not being assigned and/or enforcement procedures being initiated.

Notice Requirements. Per H.B 630, signed May 8, 2007, the operator is required to provide notice to the surface owner no later than the 15th business day after the Commission issues a permit to drill. Please refer to subchapter Q Sec. 91.751-91.755 of the Texas Natural Resources Code for applicability.

Permit expiration. This permit expires two (2) years from the date of issuance shown on the original permit. The permit period will not be extended.

Drilling Permit Number. The drilling permit number shown on the permit MUST be given as a reference with any notification to the district (see below), correspondence, or application concerning this permit.

Rule 37 Exception Permits. This Statewide Rule 37 exception permit is granted under either provision Rule 37 (h)(2)(A) or 37(h)(2)(B). Be advised that a permit granted under Rule 37(h)(2)(A), notice of application, is subject to the General Rules of Practice and Procedures and if a protest is received under Section 1.3, "Filing of Documents," and/or Section 1.4, "Computation of Time," the permit may be deemed invalid.

Before Drilling

Fresh Water Sand Protection. The operator must set and cement sufficient surface casing to protect all usable-quality water, as defined by the Railroad Commission of Texas (RRC) Groundwater Advisory Unit (GWAU). Before drilling a well, the operator must obtain a letter from the Railroad Commission of Texas stating the depth to which water needs protection, Write: Railroad Commission of Texas, Groundwater Advisory Unit (GWAU), P.O. Box 12967, Austin, TX 78711-3087. File a copy of the letter with the appropriate district office.

Accessing the Well Site. If an OPERATOR, well equipment TRANSPORTER or WELL service provider must access the well site from a roadway on the state highway system (Interstate, U.S. Highway, State Highway, Farm-to-Market Road, Ranch-to-Market Road, etc.), an access permit is required from TxDOT. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

Water Transport to Well Site. If an operator intends to transport water to the well site through a temporary pipeline laid above ground on the state's right-of-way, an additional TxDOT permit is required. Permit applications are submitted to the respective TxDOT Area Office serving the county where the well is located.

*NOTIFICATION

The operator is **REQUIRED** to notify the district office when setting surface casing, intermediate casing, and production casing, or when plugging a dry hole. The district office **MUST** also be notified if the operator intends to re-enter a plugged well or re-complete a well into a different regulatory field. Time requirements are given below. The drilling permit number **MUST** be given with such notifications.

During Drilling

Permit at Drilling Site. A copy of the Form W-1 Drilling Permit Application, the location plat, a copy of Statewide Rule 13 alternate surface casing setting depth approval from the district office, if applicable, and this drilling permit must be kept at the permitted well site throughout drilling operations.

***Notification of Setting Casing.** The operator MUST call in notification to the appropriate district office (phone number shown the on permit) a minimum of eight (8) hours prior to the setting of surface casing, intermediate casing, AND production casing. The individual giving notification MUST be able to advise the district office of the drilling permit number.

***Notification of Re-completion/Re-entry.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of eight (8) hours prior to the initiation of drilling or re-completion operations. The individual giving notification MUST be able to advise the district office of the drilling permit number.

Completion and Plugging Reports

Hydraulic Fracture Stimulation using Diesel Fuel: Most operators in Texas do not use diesel fuel in hydraulic fracturing fluids. Section 322 of the Energy Policy Act of 2005 amended the Underground Injection Control (UIC) portion of the federal Safe Drinking Water Act (42 USC 300h(d)) to define "underground Injection" to *EXCLUDE* " ...the underground injection of fluids or propping agents (*other than diesel fuels*) pursuant to hydraulic fracturing operations related to oil, gas, or geothermal production activities." (italic and underlining added.) Therefore, hydraulic fracturing may be subject to regulation under the federal UIC regulations if diesel fuel is injected or used as a propping agent. EPA defined "diesel fuel" using the following five (5) Chemical Abstract Service numbers: 68334-30-5 Primary Name: Fuels, diesel; 68476-34-6 Primary Name: Fuels, diesel, No. 2; 68476-30-2 Primary Name: Fuel oil No. 2; 68476-31-3 Primary Name: Fuel oil, No. 4; and 8008-20-6 Primary Name: Kerosene. As a result, an injection well permit would be required before performing hydraulic fracture stimulation using diesel fuel as defined by EPA on any well in Texas. Hydraulic fracture stimulation using diesel fuel as defined by EPA on a well in Texas without an injection well permit could result in enforcement action.

Producing Well. Statewide Rule 16 states that the operator of a well shall file with the Commission the appropriate completion report within ninety (90) days after completion of the well or within one hundred and fifty (150) days after the date on which the drilling operation is completed, whichever is earlier. Completion of the well in a field authorized by this permit voids the permit for all other fields included in the permit unless the operator indicates on the initial completion report that the well is to be a dual or multiple completion and promptly submits an application for multiple completion. All zones are required to be completed before the expiration date on the existing permit. Statewide Rule 40(d) requires that upon successful completion of a well in the same reservoir as any other well previously assigned the same acreage, proration plats and P-15s or P-16s (if required) or a lease plat and P-16 must be submitted with no double assignment of acreage unless authorized by rule.

Dry or Noncommercial Hole. Statewide Rule 14(b)(2) prohibits suspension of operations on each dry or non-commercial well without plugging unless the hole is cased and the casing is cemented in compliance with Commission rules. If properly cased, Statewide Rule 14(b)(2) requires that plugging operations must begin within a period of one (1) year after drilling or operations have ceased. Plugging operations must proceed with due diligence until completed. An extension to the one-year plugging requirement may be granted under the provisions stated in Statewide Rule 14(b)(2).

Intention to Plug. The operator must file a Form W-3A (Notice of Intention to Plug and Abandon) with the district office at least five (5) days prior to beginning plugging operations. If, however, a drilling rig is already at work on location and ready to begin plugging operations, the district director or the director's delegate may waive this requirement upon request, and verbally approve the proposed plugging procedures.

***Notification of Plugging a Dry Hole.** The operator MUST call in notification to the appropriate district office (phone number shown on permit) a minimum of four (4) hours prior to beginning plugging operations. The individual giving the notification MUST be able to advise the district office of the drilling permit number and all water protection depths for that location as stated in the Groundwater Advisory Unit letter.

SWR Exception

RAILROAD COMMISSION OF TEXAS
OIL & GAS DIVISION
APPLICATION FOR PERMIT TO DRILL, RECOMPLETE, OR RE-ENTER

This facsimile W-1 was generated electronically from data submitted to the RRC. A certification of the automated data is available in the RRC's Austin office.

FORM W-1 07/2004

Permit Status: Approved

1. RRC Operator No.: 148113

2. Operator's Name (as shown on form P-5, Organization Report): CHEVRON U. S. A. INC.

3. Operator Address (include street, city, state, zip): 6301 DEAUVILLE BLVD MIDLAND, TX 79706

4. Lease Name: DR STATE WISE UNIT 1

5. Well No.: 0271TB

GENERAL INFORMATION

6. Purpose of filing (mark ALL appropriate boxes): [X] New Drill [ ] Recompletion [ ] Reclass [ ] Field Transfer [ ] Re-Enter [ ] Amended [ ] Amended as Drilled (BHL) (Also File Form W-1D)

7. Wellbore Profile (mark ALL appropriate boxes): [ ] Vertical [X] Horizontal (Also File Form W-1H) [ ] Directional (Also File Form W-1D) [ ] Sidetrack

8. Total Depth: 12000

9. Do you have the right to develop the minerals under any right-of-way ? [X] Yes [ ] No

10. Is this well subject to Statewide Rule 36 (hydrogen sulfide area)? [X] Yes [ ] No

SURFACE LOCATION AND ACREAGE INFORMATION

11. RRC District No.: 08

12. County: CULBERSON

13. Surface Location [X] Land [ ] Bay/Estuary [ ] Inland Waterway [ ] Offshore

14. This well is to be located 25.86 miles in a NW direction from ORLA which is the nearest town in the county of the well site.

15. Section: 24

16. Block: 61 T1

17. Survey: T&P RR CO / BELL, I J

18. Abstract No.: A-4762

19. Distance to nearest lease line: ft.

20. Number of contiguous acres in lease, pooled unit, or unitized tract: 46533.82

21. Lease Perpendiculars: 21469 ft from the N line and 19161 ft from the E line.

22. Survey Perpendiculars: 776 ft from the S line and 2746 ft from the E line.

23. Is this a pooled unit? [X] Yes [ ] No

24. Unitization Docket No:

25. Are you applying for Substandard Acreage Field? [ ] Yes (attach Form W-1A) [X] No

FIELD INFORMATION List all fields of anticipated completion including Wildcat. List one zone per line.

GROUNDWATER PROTECTION DETERMINATION

Form GW-2

Groundwater Advisory Unit

Date Issued:	22 August 2024	**GAU Number:**	385914

Attention:	CHEVRON U. S. A. INC. 6301 DEAUVILLE BLVD MIDLAND, TX 79706	**API Number:**	
		County:	CULBERSON
		Lease Name:	DR STATE WISE UNIT 1
		Lease Number:	
Operator No.:	148113	**Well Number:**	0271TB
		Total Vertical	12000
		Latitude:	31.940969
		Longitude:	-104.326870
		Datum:	NAD27

Purpose: New Production Well

Location: Survey-T&P RR CO; Abstract-4762; Block-61; Township-T1; Section-24

To protect usable-quality groundwater at this location, the Groundwater Advisory Unit of the Railroad Commission of Texas recommends:

The base of usable-quality water-bearing strata is estimated to occur at a depth of 150 feet at the site of the referenced well.

This recommendation is applicable for all wells drilled in this section 24 (A-4762 & 6976).

Note: Unless stated otherwise, this recommendation is intended to apply to all wells drilled within 200 feet of the subject well. Unless stated otherwise, this recommendation is for normal drilling, production, and plugging operations only.

This determination is based on information provided when the application was submitted on 08/22/2024. If the location information has changed, you must contact the Groundwater Advisory Unit, and submit a new application if necessary. If you have questions, please contact us at 512-463-2741 or gau@rrc.texas.gov.

SWR13EX Application Number: 133537 **Drilling Permit No:** 902221

SWR 13 CASING EXCEPTION APPLICATION/ALTERNATIVE REQUEST APPROVED

The Proposed Casing and Cementing Program submitted for **LEASE** DR STATE WISE UNIT 1 ;
WELL 0271TB has been approved by the Railroad Commission of Texas District Office.

a. A copy of this approved letter must be kept on location during all phases of drilling and/or plugging operations. Once approved, changes CANNOT be made to the Proposed Casing Program on the original application without additional approval from the Railroad Commission of Texas District Office.

b. Any substantive modifications to the cement program require prior approval from the Railroad Commission of Texas District Office, and may require re-submission of the SWR 13 (Statewide Rule 13) Alternate Surface Casing Application. Contact the Railroad Commission of Texas District Office for more information.

c. The tail slurry must be sufficient to fill the Zone of Critical Cement as described in Statewide Rule 13(b)(1)(H)(i). In addition, all cement slurries must be mixed on location as described in Application for Alternate Surface Casing Program.

d. The casing and cement program shall adhere to the following specifications:

Set 1600 feet of surface casing and circulate cement from the shoe to the ground surface.

An extension to omit the installation of tubing in the above-referenced well is approved for a period of up to 180 days from the date the application was received or the date the well began producing, whichever occurred last.

Notify the Midland District Office immediately if any gas, H2S or otherwise, is encountered before surface casing is set or if any flow is encountered prior to the setting and cementing of the surface casing.

NOTE: The Delaware Mountain Group must NOT be penetrated prior to setting and cementing the surface casing.

IF CEMENT IS NOT CIRCULATED TO THE GROUND SURFACE AS REQUIRED BY THIS EXCEPTION, YOU MUST CONTACT THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE IMMEDIATELY AND FOLLOW THE PROCEDURES SET OUT IN RULE 13(b)(1)(H)(iii) OR AS REQUIRED BY THE RAILROAD COMMISSION OF TEXAS DISTRICT OFFICE.

12-02-01

You must comply with all other provisions of SWR 13 (Statewide Rule 13) and a representative of the cementing company who performs the cementing job for the protection of usable quality water strata must sign the Form W-15 attesting to the information regarding cementing operations performed; including circulation of cement. (Note: If surface casing is set below the approved depth, this can result in denial of future Statewide Rule 13(b)(1)(H)(i) requests.) A condition of the approved drilling permit requires notification to the Railroad Commission of Texas District Office eight (8) hours prior to the time casing is to be set/cemented in the well. If your exception request was submitted after the subject well has been drilled and completed, the operator may be referred for enforcement action.

This authorization shall expire within five (5) years from the date the Groundwater Protection Determination was issued, or at the expiration of the drilling permit (if the well is not spudded prior to expiration) for the referenced well, whichever occurs first. Furthermore, this authorization supersedes any prior authorizations issued for the referenced well.

This exception is based on information provided when the application was submitted 09/23/2024
If any information has changed, you must contact the appropriate Railroad Commission of Texas District Office, and submit a new application if applicable. If you have questions, please contact the appropriate Oil and Gas District office.

MEMORANDUM

TEXAS GENERAL LAND OFFICE • GEORGE P. BUSH • COMMISSIONER

TIME SENSITIVE: Action Required by: (February 21, 2020)

DATE: **February 14, 2020**

TO: **Commissioner Bush**

FROM: **Matt Edling**

SUBJECT: **Amendment to Pooling Agreement for signature**

.....

SUMMARY: Attached for your approval and signature are triplicate originals of an Amendment to Pooling Agreement that was approved by the School Land Board on November 3, 2015.

DETAILS: This agreement complies with existing GLO rules and policies and has been reviewed and approved by Energy Resources staff and the Legal Services Division. Chapter 52, Subchapter E of the Texas Natural Resources Code gives authority to the Commissioner to execute agreements that provide for operating areas as a unit for the exploration, development and production of oil or gas or both.

GLO Unit No. 7703
Culberson County, Texas

Dear Mr. Endicott:

Enclosed are duplicate originals of the above referenced Amendment to Pooling Agreement that has been executed by George P. Bush, Commissioner of the Texas General Land Office ("GLO"). We have retained the other original of the Pooling Agreement for our files. Please refer to the referenced GLO Unit No. 7703 when filing Royalty Reports with the GLO.

Thank you for your assistance with this matter, if you have any questions or need anything further, please feel free to call.

Very truly yours,

Matt Edling

AMENDMENT TO POOLING AGREEMENT

This **AMENDMENT TO POOLING AGREEMENT** ("Amendment") is entered into and made effective as of the 3rd day of November 2015 ("Effective Date"), by and between **Chevron U.S.A. Inc.**, a Pennsylvania corporation ("Chevron") and the **Commissioner of the General Land Office, on behalf of the State of Texas** ("Lessor"). Chevron and Lessor are collectively referred to as the "Parties" and individually as "Party".

RECITALS

A. COG Operating LLC ("COG") and Lessor entered into that certain Pooling Agreement dated effective November 3, 2015, recorded at Volume 81, Page 293, of the Oil and Gas Records of Culberson County, Texas, (the "Agreement").

B. Chevron joined in the execution of the Agreement as the owner of an unleased mineral interest included in the Agreement.

C. Chevron acquired the interest under the Agreement from COG through a certain Assignment, Bill of Sale, Deed, and Conveyance dated February 1, 2018, and recorded at Volume 35, Page 850, of the Official Public Records of Culberson County, Texas.

D. Wise Asset No. 8, Ltd., and Wise Asset No. 10, Ltd., as owner of the soil under the lease described on Exhibit "A" of the Agreement, joins in execution of the Amendment to evidence its consent and agreement to the terms and provisions hereof.

E. The Parties desire to amend, modify, delete, or replace certain provisions of the Agreement, as more particularly described below.

AMENDMENT

NOW, THEREFORE, in consideration of the mutual promises set out herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree to be bound by the following terms effective as of the Effective Date:

1. Effective as of the Effective Date, the Agreement shall be replaced and superseded for all purposes by the Amended and Restated Pooling Agreement attached hereto and made a part hereof.

2. This Amendment may be executed in any number of counterparts, each of which will be deemed an original of this Amendment, and which together will constitute one and the same instrument; provided that none of the Parties hereto will be bound by this Amendment unless and until all Parties have executed the original or a counterpart thereof.

3. This Amendment is governed by and interpreted under the laws of the State of Texas, without regard to its choice of law rules.

IN WITNESS WHEREOF, this Agreement is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

AMENDED AND RESTATED POOLING AGREEMENT
CHEVRON U.S.A. INC.
DR STATE CENTRAL #2501H UNIT
GLO UNIT NO. 7703
CULBERSON COUNTY, TEXAS

THIS AGREEMENT is entered into by and between the Commissioner of the General Land Office, on behalf of the State of Texas, as "Lessor" and Chevron U.S.A. Inc., herein referred to as "Lessee", and such other interested parties as may join in the execution hereof, the undersigned parties herein collectively referred to as the "parties", in consideration of the mutual agreements hereinafter set forth and other valuable considerations, the receipt and sufficiency of which are hereby acknowledged, and for the purposes and upon the terms and conditions which follow:

PURPOSES: 1.

This Pooling Agreement ("Agreement") is made for the purposes of conservation and utilization of the pooled mineral, to prevent waste, to facilitate orderly development and to preserve correlative rights. To such end, it is the purpose of this Agreement to effect equitable participation within the unit formed hereby. This Agreement is intended to be performed pursuant to and in compliance with all applicable statutes, decisions, regulations, rules, orders and directives of any governmental agency having jurisdiction over the production and conservation of the pooled mineral and in its interpretation and application shall, in all things, be subject thereto.

UNIT DESCRIPTION: 2.

The oil and gas interests, which are included within the pooled unit, are listed on the attached Exhibit "A", to which interests and the records thereof reference is here made for all pertinent purposes. The pooled unit shall consist of all of the lands described in Exhibit "B" attached hereto and made a part hereof. A plat of the pooled unit is attached hereto as Exhibit "C".

MINERAL POOLED: 3.

The mineral pooled and unitized ("pooled mineral") hereby shall be oil and gas including all hydrocarbons that may be produced from the wellbore of the DR State Central #2501H (API 4210932893) only (the "Wellbore").

POOLING AND EFFECT: 4.

The parties hereto commit all of their interests which are within the unit to the extent and as above described into said unit and unitize and pool hereunder the separate tracts described on the attached Exhibit "B" as to the Wellbore only, for and during the term hereof, so that such pooling or unitization shall have the following effect:

(a) The unit, to the extent as above described and as limited to the Wellbore only, shall be operated as an entirety for the exploration, development and production of the pooled mineral, rather than as separate tracts.

(b) All drilling operations, reworking or other operations with respect to the pooled mineral on land within the unit shall be considered as though the same were on each separate tract in the unit, regardless of the actual location of the well thereon, for all purposes under the terms of the respective leases or other contracts thereon and this Agreement. In the event the unitized area covered by this Agreement is maintained in force by drilling or reworking operations conducted on a directional or horizontal well drilled under the unitized area from a surface location on adjacent or adjoining lands not included within the boundaries of the unitized area, such operations shall be considered to have been commenced on the unitized area when drilling is commenced on the adjacent or adjoining land for the purpose of directionally drilling under the unitized area and production of oil or gas from the unitized area through any directional or horizontal well surfaced on adjacent or adjoining land or drilling or reworking of any such well shall be considered production or drilling or reworking operations, as the case may be, on the unitized area for all purposes under this Agreement. Nothing in this Agreement is intended or shall be construed as granting to Lessee any leasehold interest, easements, or other rights in or with respect to any such adjacent or adjoining land in addition to any such leasehold interests, easements, or other rights which the lessee, operator or other interest owner in the unitized area may have lawfully acquired from the state or others.

(c) Production of the pooled mineral from the unit allocated to each separate tract, respectively, as hereinafter provided, shall be deemed to have been produced from each such separate tract in the unit, regardless of the actual location of the well or wells thereon, for all purposes under the terms of the respective leases or other contracts thereon and this Agreement.

(d) All rights to the production of the pooled mineral from the unit, including royalties and other payments, shall be determined and governed by the lease or other contract pertaining to each separate tract, respectively, based upon the production so allocated to such tract only, in lieu of the actual production of the pooled mineral therefrom. Provided that, payments that are made on a per acre basis shall be reduced according to the number of acres pooled and included herein, so that payments made on

a per acre basis shall be calculated based upon the number of acres actually included within the boundaries of the pooled unit covered by this Agreement.

(e) A shut-in oil or gas well located upon any land or lease included within said unit shall be considered as a shut-in oil or gas well located upon each land or lease included within said unit; provided, however, that shut-in oil or gas well royalty shall be paid to the State on each State lease wholly or partially within the unit, according to the terms of such lease as though such shut-in oil or gas well were located on said lease, it being agreed that shut-in royalties provided in each State lease shall not be shared with other royalty owners.

(f) Notwithstanding any other provision hereof, it is expressly agreed that each State lease may be maintained in force as to areas lying outside the unitized area described in Exhibit "B" only as provided in each such lease without regard to unit operations or unit production. Neither production of the pooled mineral, nor unit operations with respect thereto, nor the payment of shut-in royalties from a unit well, shall serve to hold any State lease in force as to any area outside the unitized area described in Exhibit "B" regardless of whether the production or operations on the unit are actually located on the State lease or not. "Area" as used in this paragraph shall be based upon surface acres to the end that, except as may otherwise be provided in each State Lease, the area inside the surface boundaries of the pooled unit, if held, will be held as to all depths and horizons.

(g) If the Railroad Commission of Texas (or any other Texas regulatory body having jurisdiction) shall adopt special field rules providing for oil and/or gas proration units of less than the number of acres included in the pooled unit, then Lessee agrees to either (1) drill to the density permitted by the Railroad Commission, (2) make application to the School Land Board of the State of Texas to reform the unit to comply with Railroad Commission unit rules, or (3) make application to the School Land Board of the State of Texas for such remedy as may be agreeable to the Board.

(h) This Agreement shall not relieve Lessee from the duty of protecting the State leases described in Exhibit "A" and the State lands within the boundaries of the pooled unit described in Exhibit "B" from drainage from any well situated on privately owned land, lying outside the unitized area described in Exhibit "B", but, subject to such obligation, Lessee may produce the allowable for the entire unit as fixed by the Railroad Commission of Texas or other lawful authority, from any one or more wells completed thereon.

(i) There shall be no obligation to drill internal offsets to any other well on separate tracts within the pooled unit, nor to develop the lands within the boundaries thereof separately, as to the pooled mineral.

(j) Should this Agreement terminate for any cause, the leases and other contracts affecting the lands within the unit, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under said lease or contract and the same had ceased on the date of the termination of this Agreement.

ALLOCATION OF PRODUCTION: 5.

For the purpose of computing the share of production of the pooled mineral to which each interest owner shall be entitled from the pooled unit, there shall be allocated to each tract committed to said unit that pro rata portion of the pooled mineral produced from the pooled unit which the number of surface acres covered by each such tract and included in the unit bears to the total number of surface acres included in said unit, and the share of production to which each interest owner is entitled shall be computed on the basis of such owner's interest in the production so allocated to each tract.

TAKING ROYALTY IN KIND: 6.

Notwithstanding anything contained herein to the contrary, the State may, at its option, upon not less than sixty (60) days notice to Lessee, require that payment of all or any royalties accruing to the State under this pooling or unitization agreement be made in kind, without deduction for the cost of producing, gathering, storing, separating, treating, dehydrating, compressing, processing, transporting and otherwise making the oil, gas and other products produced hereunder ready for sale or use.

EFFECTIVE DATE: 7.

Upon execution by the Commissioner of the General Land Office of the State of Texas this Agreement shall become effective as of November 3, 2015.

TERM: 8.

This Agreement shall remain in effect so long as the pooled mineral is being produced from said unit, or so long as all leases included in the pooled unit are maintained in force by payment of delay rentals or shut-in oil or gas well royalties, by drilling or rework, or by other means, in accordance with the terms of said leases. Nothing herein shall amend or modify Section 52.031 of the Natural Resources Code, or any of the provisions thereof, which are contained in any State lease covered by this Agreement.

STATE LAND: 9.

Insofar as the royalty interest of the State of Texas in and under any State tract committed to the unit is concerned, this Agreement is entered into, made and executed by the undersigned Commissioner of the General Land Office by virtue of the authority and pursuant to the provisions of Subchapter E, Chapter 52, of the Natural Resources Code, authorizing the same, after the prerequisites, findings and approval hereof, as provided in said Code having been duly considered, made and obtained.

DISSOLUTION: 10.

The unit covered by this Agreement may be dissolved by Lessee, his heirs, successors or assigns, by an instrument filed for record in Culberson County, Texas, and a certified copy thereof filed in the General Land Office at any time after the cessation of production on said unit or the completion of a dry hole thereon prior to production or upon such other date as may be approved by the School Land Board and mutually agreed to by the undersigned parties, their successors or assigns.

RATIFICATION/WAIVER: 11.

Nothing in this Agreement, nor the approval of this Agreement by the School Land Board, nor the execution of this Agreement by the Commissioner shall: (1) operate as a ratification or revivor of any State lease that has expired, terminated, or has been released in whole or in part or terminated under the terms of such State lease or the laws applicable thereto; (2) constitute a waiver or release of any claim for money, oil, gas or other hydrocarbons, or other thing due to the State by reason of the existence or failure of such lease; (3) constitute a waiver or release of any claim by the State that such lease is void or voidable for any reason, including, without limitation, violations of the laws of the State with respect to such lease or failure of consideration; (4) constitute a confirmation or recognition of any boundary or acreage of any tract or parcel of land in which the State has or claims an interest; or (5) constitute a ratification of, or a waiver or release of any claim by the State with respect to any violation of a statute, regulation, or any of the common laws of this State, or any breach of any contract, duty, or other obligation owed to the State.

AMENDMENT TO POOLING AGREEMENT

This **AMENDMENT TO POOLING AGREEMENT** ("Amendment") is entered into and made effective as of the 3rd day of November 2015 ("Effective Date"), by and between **Chevron U.S.A. Inc.**, a Pennsylvania corporation ("Chevron") and the **Commissioner of the General Land Office, on behalf of the State of Texas** ("Lessor"). Chevron and Lessor are collectively referred to as the "Parties" and individually as "Party".

RECITALS

A. COG Operating LLC ("COG") and Lessor entered into that certain Pooling Agreement dated effective November 3, 2015, recorded at Volume 81, Page 293, of the Oil and Gas Records of Culberson County, Texas, (the "Agreement").

B. Chevron joined in the execution of the Agreement as the owner of an unleased mineral interest included in the Agreement.

C. Chevron acquired the interest under the Agreement from COG through a certain Assignment, Bill of Sale, Deed, and Conveyance dated February 1, 2018, and recorded at Volume 35, Page 850, of the Official Public Records of Culberson County, Texas.

D. Wise Asset No. 8, Ltd., and Wise Asset No. 10, Ltd., as owner of the soil under the lease described on Exhibit "A" of the Agreement, joins in execution of the Amendment to evidence its consent and agreement to the terms and provisions hereof.

E. The Parties desire to amend, modify, delete, or replace certain provisions of the Agreement, as more particularly described below.

AMENDMENT

NOW, THEREFORE, in consideration of the mutual promises set out herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties agree to be bound by the following terms effective as of the Effective Date:

1. Effective as of the Effective Date, the Agreement shall be replaced and superseded for all purposes by the Amended and Restated Pooling Agreement attached hereto and made a part hereof.

2. This Amendment may be executed in any number of counterparts, each of which will be deemed an original of this Amendment, and which together will constitute one and the same instrument; provided that none of the Parties hereto will be bound by this Amendment unless and until all Parties have executed the original or a counterpart thereof.

3. This Amendment is governed by and interpreted under the laws of the State of Texas, without regard to its choice of law rules.

IN WITNESS WHEREOF, this Agreement is executed by each party as of the date evidenced by their acknowledgement or set out beneath their signature, but to be EFFECTIVE as of the Effective Date.

DR STATE CENTRAL #2501H UNIT
GLO UNIT NO. 7703
CULBERSON COUNTY, TEXAS

THIS AGREEMENT is entered into by and between the Commissioner of the General Land Office, on behalf of the State of Texas, as "Lessor" and Chevron U.S.A. Inc., herein referred to as "Lessee", and such other interested parties as may join in the execution hereof, the undersigned parties herein collectively referred to as the "parties", in consideration of the mutual agreements hereinafter set forth and other valuable considerations, the receipt and sufficiency of which are hereby acknowledged, and for the purposes and upon the terms and conditions which follow:

PURPOSES: 1.

This Pooling Agreement ("Agreement") is made for the purposes of conservation and utilization of the pooled mineral, to prevent waste, to facilitate orderly development and to preserve correlative rights. To such end, it is the purpose of this Agreement to effect equitable participation within the unit formed hereby. This Agreement is intended to be performed pursuant to and in compliance with all applicable statutes, decisions, regulations, rules, orders and directives of any governmental agency having jurisdiction over the production and conservation of the pooled mineral and in its interpretation and application shall, in all things, be subject thereto.

UNIT DESCRIPTION: 2.

The oil and gas interests, which are included within the pooled unit, are listed on the attached Exhibit "A", to which interests and the records thereof reference is here made for all pertinent purposes. The pooled unit shall consist of all of the lands described in Exhibit "B" attached hereto and made a part hereof. A plat of the pooled unit is attached hereto as Exhibit "C".

MINERAL POOLED: 3.

The mineral pooled and unitized ("pooled mineral") hereby shall be oil and gas including all hydrocarbons that may be produced from the wellbore of the DR State Central #2501H (API 4210932893) only (the "Wellbore").

POOLING AND EFFECT: 4.

The parties hereto commit all of their interests which are within the unit to the extent and as above described into said unit and unitize and pool hereunder the separate tracts described on the attached Exhibit "B" as to the Wellbore only, for and during the term hereof, so that such pooling or unitization shall have the following effect:

(a) The unit, to the extent as above described and as limited to the Wellbore only, shall be operated as an entirety for the exploration, development and production of the pooled mineral, rather than as separate tracts.

(b) All drilling operations, reworking or other operations with respect to the pooled mineral on land within the unit shall be considered as though the same were on each separate tract in the unit, regardless of the actual location of the well thereon, for all purposes under the terms of the respective leases or other contracts thereon and this Agreement. In the event the unitized area covered by this Agreement is maintained in force by drilling or reworking operations conducted on a directional or horizontal well drilled under the unitized area from a surface location on adjacent or adjoining lands not included within the boundaries of the unitized area, such operations shall be considered to have been commenced on the unitized area when drilling is commenced on the adjacent or adjoining land for the purpose of directionally drilling under the unitized area and production of oil or gas from the unitized area through any directional or horizontal well surfaced on adjacent or adjoining land or drilling or reworking of any such well shall be considered production or drilling or reworking operations, as the case may be, on the unitized area for all purposes under this Agreement. Nothing in this Agreement is intended or shall be construed as granting to Lessee any leasehold interest, easements, or other rights in or with respect to any such adjacent or adjoining land in addition to any such leasehold interests, easements, or other rights which the lessee, operator or other interest owner in the unitized area may have lawfully acquired from the state or others.

(c) Production of the pooled mineral from the unit allocated to each separate tract, respectively, as hereinafter provided, shall be deemed to have been produced from each such separate tract in the unit, regardless of the actual location of the well or wells thereon, for all purposes under the terms of the respective leases or other contracts thereon and this Agreement.

(d) All rights to the production of the pooled mineral from the unit, including royalties and other payments, shall be determined and governed by the lease or other contract pertaining to each separate tract, respectively, based upon the production so allocated to such tract only, in lieu of the actual production of the pooled mineral therefrom. Provided that, payments that are made on a per acre basis shall be reduced according to the number of acres pooled and included herein, so that payments made on

a per acre basis shall be calculated based upon the number of acres actually included within the boundaries of the pooled unit covered by this Agreement.

(e) A shut-in oil or gas well located upon any land or lease included within said unit shall be considered as a shut-in oil or gas well located upon each land or lease included within said unit; provided, however, that shut-in oil or gas well royalty shall be paid to the State on each State lease wholly or partially within the unit, according to the terms of such lease as though such shut-in oil or gas well were located on said lease, it being agreed that shut-in royalties provided in each State lease shall not be shared with other royalty owners.

(f) Notwithstanding any other provision hereof, it is expressly agreed that each State lease may be maintained in force as to areas lying outside the unitized area described in Exhibit "B" only as provided in each such lease without regard to unit operations or unit production. Neither production of the pooled mineral, nor unit operations with respect thereto, nor the payment of shut-in royalties from a unit well, shall serve to hold any State lease in force as to any area outside the unitized area described in Exhibit "B" regardless of whether the production or operations on the unit are actually located on the State lease or not. "Area" as used in this paragraph shall be based upon surface acres to the end that, except as may otherwise be provided in each State Lease, the area inside the surface boundaries of the pooled unit, if held, will be held as to all depths and horizons.

(g) If the Railroad Commission of Texas (or any other Texas regulatory body having jurisdiction) shall adopt special field rules providing for oil and/or gas proration units of less than the number of acres included in the pooled unit, then Lessee agrees to either (1) drill to the density permitted by the Railroad Commission, (2) make application to the School Land Board of the State of Texas to reform the unit to comply with Railroad Commission unit rules, or (3) make application to the School Land Board of the State of Texas for such remedy as may be agreeable to the Board.

(h) This Agreement shall not relieve Lessee from the duty of protecting the State leases described in Exhibit "A" and the State lands within the boundaries of the pooled unit described in Exhibit "B" from drainage from any well situated on privately owned land, lying outside the unitized area described in Exhibit "B", but, subject to such obligation, Lessee may produce the allowable for the entire unit as fixed by the Railroad Commission of Texas or other lawful authority, from any one or more wells completed thereon.

(i) There shall be no obligation to drill internal offsets to any other well on separate tracts within the pooled unit, nor to develop the lands within the boundaries thereof separately, as to the pooled mineral.

(j) Should this Agreement terminate for any cause, the leases and other contracts affecting the lands within the unit, if not then otherwise maintained in force and effect, shall remain and may be maintained in force and effect under their respective terms and conditions in the same manner as though there had been production or operations under said lease or contract and the same had ceased on the date of the termination of this Agreement.

ALLOCATION OF PRODUCTION: 5.

For the purpose of computing the share of production of the pooled mineral to which each interest owner shall be entitled from the pooled unit, there shall be allocated to each tract committed to said unit that pro rata portion of the pooled mineral produced from the pooled unit which the number of surface acres covered by each such tract and included in the unit bears to the total number of surface acres included in said unit, and the share of production to which each interest owner is entitled shall be computed on the basis of such owner's interest in the production so allocated to each tract.

TAKING ROYALTY IN KIND: 6.

Notwithstanding anything contained herein to the contrary, the State may, at its option, upon not less than sixty (60) days notice to Lessee, require that payment of all or any royalties accruing to the State under this pooling or unitization agreement be made in kind, without deduction for the cost of producing, gathering, storing, separating, treating, dehydrating, compressing, processing, transporting and otherwise making the oil, gas and other products produced hereunder ready for sale or use.

EFFECTIVE DATE: 7.

Upon execution by the Commissioner of the General Land Office of the State of Texas this Agreement shall become effective as of November 3, 2015.

TERM: 8.

This Agreement shall remain in effect so long as the pooled mineral is being produced from said unit, or so long as all leases included in the pooled unit are maintained in force by payment of delay rentals or shut-in oil or gas well royalties, by drilling or rework, or by other means, in accordance with the terms of said leases. Nothing herein shall amend or modify Section 52.031 of the Natural Resources Code, or any of the provisions thereof, which are contained in any State lease covered by this Agreement.

STATE LAND: 9.

Insofar as the royalty interest of the State of Texas in and under any State tract committed to the unit is concerned, this Agreement is entered into, made and executed by the undersigned Commissioner of the General Land Office by virtue of the authority and pursuant to the provisions of Subchapter E, Chapter 52, of the Natural Resources Code, authorizing the same, after the prerequisites, findings and approval hereof, as provided in said Code having been duly considered, made and obtained.

DISSOLUTION: 10.

The unit covered by this Agreement may be dissolved by Lessee, his heirs, successors or assigns, by an instrument filed for record in Culberson County, Texas, and a certified copy thereof filed in the General Land Office at any time after the cessation of production on said unit or the completion of a dry hole thereon prior to production or upon such other date as may be approved by the School Land Board and mutually agreed to by the undersigned parties, their successors or assigns.

RATIFICATION/WAIVER: 11.

Nothing in this Agreement, nor the approval of this Agreement by the School Land Board, nor the execution of this Agreement by the Commissioner shall: (1) operate as a ratification or revivor of any State lease that has expired, terminated, or has been released in whole or in part or terminated under the terms of such State lease or the laws applicable thereto; (2) constitute a waiver or release of any claim for money, oil, gas or other hydrocarbons, or other thing due to the State by reason of the existence or failure of such lease; (3) constitute a waiver or release of any claim by the State that such lease is void or voidable for any reason, including, without limitation, violations of the laws of the State with respect to such lease or failure of consideration; (4) constitute a confirmation or recognition of any boundary or acreage of any tract or parcel of land in which the State has or claims an interest; or (5) constitute a ratification of, or a waiver or release of any claim by the State with respect to any violation of a statute, regulation, or any of the common laws of this State, or any breach of any contract, duty, or other obligation owed to the State.

EXHIBIT "A"

I. Oil and Gas Leases subject to this Declaration of Unit

Lessor:	State of Texas, acting by and through its agent, Wise Asset No. 8, Ltd. and Wise Asset No. 10, Ltd.
Original Lessee:	COG Operating LLC
Dated:	March 28, 2013
Recorded:	Volume 109, Page 366, Official Public Records of Culberson County, Texas
Land Description:	E/2 E/2 of Section 36, Block 61, Township 1, T&P RR Co. Survey, Culberson County, Texas, limited to the production of pooled minerals from the Wellbore only

II. Oil and Gas Interests subject to this Declaration of Unit
E/2 E/2 of Section 25, Block 61, Township 1, T&P RR Co. Survey, Culberson County, Texas, limited to the production of pooled minerals from the Wellbore only

III. Non-Participating Royalty Interest subject to this Declaration of Unit
E/2 E/2 of Section 25, Block 61, Township 1, T&P RR Co. Survey, Culberson County, Texas, limited to the production of pooled minerals from the Wellbore only

EXHIBIT "B"

Description of Lands

Tract 1: E/2 E/2 of Section 25, Block 61, Township 1, T&P RR Co. Survey, Culberson County, Texas, containing 172.75 acres, more or less, limited to the production of pooled minerals from the Wellbore only

Tract 2: E/2 E/2 of Section 36, Block 61, Township 1, T&P RR Co. Survey, Culberson County, Texas, containing 173 acres, more or less, limited to the production of pooled minerals from the Wellbore only

Depth Limitation

The pooled unit is hereby limited in depth to the depth of the Wellbore only.

DESIGNATION OF PARTICIPATION UNIT

STATE OF TEXAS §
§
COUNTY OF CULBERSON §

Chevron U.S.A. Inc. ("Chevron") is the Unit Operator of the Unit Agreement for the Development and Operation of the Delaware Ranch, Wise Unit No. 1 – State Unit dated effective April 3, 2018, recorded at Volume 37, Page 871, Official Public Records of Culberson County, Texas, and as subsequently amended by the First, Second, Third, Fourth, and Fifth amendments to the Unit Agreement ("Delaware Ranch Unit"). Chevron drilled wells and completed them as producers of oil and/or gas, or capable producers of oil and/or gas, ("Well") pursuant to the Delaware Ranch Unit. Paragraph V.D.1. of the Delaware Ranch Unit provides that upon completion of any well drilled pursuant to the Delaware Ranch Unit as a producer of oil and/or gas, or capable producer of oil and/or gas, the Unit Operator shall designate by a written instrument the geographic area surrounding such Well ("Participation Unit"), with such instrument being suitable for recording in the county where the lands are located.

In compliance with Paragraph V.D.1. of the Delaware Ranch Unit, Chevron hereby designates the lands described on each of the plats attached as Exhibit A through Exhibit AC as the Participation Unit for the applicable corresponding Well described on each of the plats attached as Exhibit A through Exhibit AC.

Nothing contained in this Designation of Participation Unit expands the rights or diminishes the obligations in the Delaware Ranch Unit, or the oil and gas leases therein, except as expressly provided herein.

IN WITNESS WHEREOF, this Designation of Participation Unit is executed by the undersigned, as evidenced by the following signature, but is effective as to each Participation Unit beginning on the date of first production of the applicable corresponding Well.

Chevron U.S.A. Inc.
