No 3446
3547

General Land Office
Austin 13th April 1854

This is to certify that Jacob Harrison is
entitled to have surveyed any legally authorized
survey of the State of Texas upon any of the
undivided or unappropriated public domain of said
State. Three hundred and twenty acres of land
in accordance with the provisions of an Act authorizing
and requiring the Commissioner of the General
Land Office to issue to the said Jacob Harrison a
Certificate for Three hundred and twenty acres of
land -
Jas. Harrison 8th 1854

In testimony whereof I have to set
my hand and affix the Seal of said
Office the day and date first above written

filed Aug 2^d 1875

Rhoads Fisher,

Chief Clerk

In conflict with W.W. Alberry's
ptd survey - In all the Survey
statements he makes the East
line of Alberry a straight line
with bearings at the S.E. corner
and N.E. corner, all of which
is a mistake. Said statement
agrees with Alberry's original
field notes but not with his cor-
rected and ptd survey. Alberry
runs to the S.W. corner of Ran-
thum N. 30 W 67¹/₂ or; thence S 60 W.
478 ors; thence N 30 E 735 ors; thence
N 60 E 278 ors; thence N 30 E 1443 ors
(over) c Aug 7
M.H.N

to its original N.E. corner.
Correction required.
July 5/78 E.W. Ryker.

The west half of this
survey is covered by
Pre-emption survey in
name of S.B. Cranfill
(Milam P. 3792) patented -

The east half is
covered by a Pre-emption
survey in name of
Z. Cranfill - P. 4931.

It appears that S.B.
Cranfill owned this
survey, and on Feb 2/81
U.S. Cert. N^o 24/154 was
issued to him for 160
acres - (Amount of this survey)
and on Feb. 21/81 he
applied for the Pre-emption
which covers the W 1/2 as
above stated -

W. H. H. H. H.

Meridian July the 28 1875
Com of Gen Land Office

Is Enclosed

I send plot and field notes and of plot
for the benefit of V. Reed and S. B. Cranfield
of Jacob Harrison (in your office) Tice
2217 3rd class. The reason assigned by
your office for not granting pt was that
the Cranfield conflicted with the Renfro and
that Reed conflicted with the Edwards.
If you will examine the accompanying
plot you will see that the Reed survey
cannot conflict with the Edwards since
the Jacob Thomas conflicts with the Ab-
berry. The Large Boggs survey begins
with a small survey in the same name.
The Jacob Thomas with the Large Boggs.
The Olin Hazard begins with the small
Boggs survey. The S. M. Edwards with
the Hazard. The three latter are each 1900
acres making but 11 acres difference between
them and the width of the ~~and the~~
Boggs and Thomas. The O. M. Smith
also begins with the Hazard and ac-
though but 1646.00 square according to
its field notes; it goes to the Skin
survey. This appears to be where the
mistake is if the Smith was brought
up to the established corners of the Skin
or to its own corners as marked on
the ground (the Skin begins with the Smith)
it would show the Edwards over the
Renfro and the Thomas over the Abberry.

I have changed the filed notes of the
Reed & Crampell survey so that they
cannot conflict and forward them
with this — Please examine
this matter and let me know if
Reed & Crampell can get a pt —
Permit me to call your attention to
some mistakes on the map — The J. D.
Scrimpf according to filed notes begins
at the N. W. corner of the Allen survey
on the map it begins at the S. W.
corner — The John Corwin ⁶⁴⁰ according
to filed notes begins at the N. W. corner
of the J. D. Scrimpf on the map it is
set some distance N. W. E. from the begin
corner and made to overlap the Joseph
Dennis survey. By putting the Corwin
640 acre survey in the proper place it
would close the vacancy between the
Corwin 320 and a survey in name of
A. Greer as it is on the ground

Respectfully
J. M. Carlton

County Surveyor, Boone Co.

Explaining Jacob Harrison survey Situated ~~about~~
about 13 mi S 60 W from Meridian on Thurman Creek

Field notes of the 640 acre survey
in name of Sam. M. Edwards as
recorded in Surveyors office of Bosque Co.

Beginning at the N.W. corner of
William Hassard survey for the S.W.
corner of this survey Running from thence
N 30 W 1900 rods to the N.W. corner of this
survey from which a live oak ~~tree~~
marked V bears S 61 W 125 rods Thence S 60 E
1900 rods to the S.E. corner in prairie
Thence S 30 E 1900 rods to the S.E. corner
from which a live oak marked
W bears S 43 W 45 rods and another bears
N 47 W 47 rods Thence ^{1900 rods} 2400 rods ~~1400 rods~~
crossed branching to the begin

Field notes of a survey of 40 acres made
for C. Renfro as recorded in Surveyors
office of Bosque county. Beginning 13 1/2 mi S 60 W
from the N.W. corner of a 640 acre survey
made for S. M. Edwards for S.W. cor of
this Thence N 30 W 672 to N.W. corner in
prairie Thence S 60 E 672 rods to S.E. cor
in prairie Thence S 30 E 672 rods to S.E.
corner from which a Spanish oak
marked C bears S 47 W 21 rods Thence
S 60 W 672 rods to the begin

Field notes of an 40 acre survey as

recorded in Surveyors Office of Boston
in name of F. H. Renfro

Beginning at the N. W. corner of a survey
made for G. Renfro for the S. W. corner
of this Thence N 30 W 6 1/2 vars to the N. W.
corner in plain Thence N 40 E 6 1/2
vars to the N. E. corner from which a
live oak marked E has S 30 W 6 1/2
vars and another marked R has S 25 W 6 1/2 vars
Thence S 30 E 6 1/2 vars to S. E. corner in
plain Thence S 60 W 6 1/2 vars to
beginning

The reason for sending the above
field notes is to show that the
N. W. corner of S. H. Edwards and
the corner on the division line between
the two Renfro surveys as shown
on your sketch is not the same
by the records of my office

Wm. Carter.

Meridian Dec the 24 1875-

Com of Genl Land Office

Dear Sir Involunt

I return you sketches received in yours of the 15 inst. and also send you field notes of the S. M. Colwells & two Rees surveys as they are recorded, ^{in my office} By them you will see that if your sketch is correct there is a difference in the records of your office and mine. By the sketch and explanations I sent you some months since and to which you refer in yours of the 15th you will see that on the ground there is room for the two Jacob Harrison surveys. The corners and distances given in that sketch is correct. The real trouble is that as in most all the old surveys they are larger on the ground than the field notes call for. The Smith survey is by its field notes but 1646 square

While on the ground it is much larger
than the Edwards survey and contains
nearly double the number of acres it is
intitled to. The S.E. corner of the C Renfro
and N.W. corner of the Edwards are on the
ground also the S.W. & S.E. corner of the
Lower Wm Skin survey. The S.W. corner
of the Skin & N.W. corner of the Smith
is on a tree in the prairie from which
the N.W. corner of the Edwards can be
seen. The Skin corner from that point
shows it to be further North than the Edwards
corner. By my sketch you will see that
there is 243 vars between the two Renfro
surveys & St Albans. This is also correct
I have done a good deal of work on
these surveys and the parties that
own them are very anxious to get a pt
which I am satisfied they are intitled to
and will be obliged if you will give

Letter of Explanation

Filed January 26/76

J. P. Carr

Explanation not
satisfactory - If the
surveyor finds a line
of a previous survey
larger on the ground
or its complement
in the field notes he
must state exactly
how much larger it is
and mind the words
quency it will bear
on other adjoining
surveys. July 28/76

Meridian Basque County Texas
April 17th 1877

Mr. J. J. Groves

Commissioner of the
General Land Office

Austin Texas

Dear Sir enclosed

please find plat
and field notes of Isaac Reed and the
surrounding surveys I began at the NW
corner of the S. M. Edwards Survey at stake
from which a live ^{Oak} stump bears S 81° W
125° 18' I found the stake ~~but~~ the question
on is whether a stake would last from ~~the~~
1850 to the present or not. though it
was decayed until I could pick it
to pieces with my thumb nail.

and the balance of the proof I found
was the Old Allsbery S E corner from
which a Live Oak marked ^{born} W 84° 54' W 58° 18'
and a Spanish Oak stump bears S 104° E 31° 18'
actual measurement is ~~SW~~ S 90° W 24° 12'
from the C Benfro SW corner and the
C Benfro S E corner the bearing tree is
still standing with the letter on it
I did not find any more markers to
prove the Edwards survey but I went
to the South line of the R T Boyce 640
acre survey I run N 30° W 54° 40' to the

NW corner of S. M. Edwards Survey.

there is a Live Oak marked M which is S 30 E 2402 vs and N 60 E 234 vs from the NW corner of the Edwards Survey and but one tree marked and plenty of Live Oaks. but 2844 vs S 30 E from the NW corner of Edwards 1440 acre Survey there is a Live ^{Oak}, the proper distance but not on the degree called for in the field notes and it is the proper distance from there to the South boundary of R. P. Boyce Survey.

I think I have given all the particulars as regards that land Survey and its surrounding please answer in receipt and

oblige Yours very Respectfully

J. J. Siddall

Sketch

plotted in Office

Dec. 14/72

C. W. Peckham.

Statement.

The Surveyor gives himself great trouble by sending copies of field notes, which we have in the Gen. Land Office in the same way, while his sketch and explanation is not satisfactory at all. And this Office must sustain the conflict of the two J. Harrison surveys as mentioned before, until the Surveyor sends a more correct sketch and shows plain by figures and not by guessing, where the discrepancy lies.

Beginning at the S.W. cor. of the 640 acres survey made for R. P. Boyle which is established by bearing trees and is the beginning corner of the '13 League survey of R. P. Boyle, which established its N. E. cor. N. 30 W. 2887 vs thereof by bearing trees; this corner is the beginning cor. of J. Thomas survey which runs from thence S 60 W. 5774 vs. to corner which is established by bearing trees thence N 30 W. 2802 vs. to N. W. corner where are no bearing trees. - Jas. Pritch begins with its S. E. cor. at said Thomas established S. W. cor. and runs N. 30 W. 2887 to cor. no bearing trees constructing an offset from said Thomas N. W. cor. of 85 vs. thence S. 60 W. 2887 establishing its N. W. cor. by bearing trees, which is the S. W. and beginning cor. of J. Skidmore's survey. - The S. M. Edwards survey begins at the S. E. cor. of said Skidmore and runs N. 60 E 3800 vs. to cor. which is established by bearing trees and which is the beginning cor. of Wm W. Alsberry's corrected survey, runs N. 60 E. 2735 vs. to E. Renfro's S. W. cor. 188 vs from the N. W. cor. of S. M. Edwards 640 acres survey,

thence N 30 W. 672 vs to said Peafros N. W. cor. and thence running around G. Cranfills survey S. 60 W. 478 vs, N 30 W. 735 vs, N 60 E 278 vs. to S. W. cor. of John Cornin's 320 acres survey thence N 30 W. 1443 vs to its N. E. cor. etc.

The Surveyor J. De Cordova who framed this correction was not aware that between the Edwards S. line and the Thomas N. line is a vacancy of 85 vs. otherwise he should have respected it, nevertheless the Herberry survey will hold the ground by its calls.

Here the surveyor is in error with his explanation, he refers to the original survey, while he should begin at the S. E. cor. of the corrected and pt'd fieldnotes of the said Herberry survey.

The W^m Harper survey begins 2550 vs. N. 30 W. from the S. E. cor. of S. J. St. Johns survey runs N 60 E 1450 vs and N 30 W. 1915 vs etc. - G. Janssow survey begins at said Harpers S. W. cor. and runs N 60 E 672 vs. for cor. from which a Hackberry marked T bears S. 30 E 65 vs. and calling besides for the N. W. cor. of W. Midlen's survey which is also established by bearing trees to wit: a Gumelartie S. 25 E 110 vs and an other S. 23 E 120 vs. - This shows evidently that the call in Janssows fieldnotes for the N. W. cor. of Midlen's survey is erroneous.

The same way the Surveyor can trace the surveys N. of R. P. Boyce's 640 acres survey as they are made on the ground, to wit: W^m Burrard, W^m M. Smith, W^m Atkins two surveys, J. W. Schrimpf, John Cornin's two surveys and W^m Midlen survey. And by calculation he may find a vacancy of 828 vs. between W^m Harpers S. line

and W^m Middle's N. line, and very likely the same vacancy he is looking ^{for} S. of Cornin and N. of C. Neufro, he may find N. of W^m Middle and Jas. Dennis.

What the Surveyor means by "delineating" W^m Atkins survey about $\frac{1}{2}$ mile N 60 E & $\frac{1}{2}$ mile N 30 W. from the N. W. corner of W. M. Smith's N. W. corner is difficult to understand as both corners are marked by identical bearing trees and can not be separated, and, as the Surveyor admits the correctness of the Edwards survey, the W. M. Smith survey may be true as large as its complement, the W^m Atkins survey has to begin at its N. W. cor. and the consequence will be, that the vacancy between the Schrimpp's N. line and Neufro's E. line is 91 vs. and not more.

The surveyor has to show where the discrepancy lies in a similar sketch as the accompanying one figuring the distances as found on the ground and not by guessing, and describing the corners as found on the ground.

Testifying the same officially
