Revised

P. 6

These three calls in original survey made in 1800
 are standing from 1857. observations

The 1st Call in the Pat. G. G. Gary is clearly a mistake & should be $20200 \text{ m. } N. 30^{\circ} W. \text{ of } 5600 \text{ m. } N. 60^{\circ} E.$ instead of $S. 6^{\circ} N.$ as this line bearing is on the ground & with this correction the other survey is a record. - H. M. D.

Meridian, Texas, June 4, 1895

Com. of Genl. Ld. Ofc.

Austin, Texas.

Dear Sir:

In regard to the C. A. Gatwood patent and A. M. Mts. will say that I went on the ground on May 28, 1895, and with sworn chainmen measured the North line of the Seaborn Harris Survey, and found it to measure 2060 rods. I then went to the S.E. cor. of the T. R. Rampey and measured the distance between this cor. in N. line of sd. Harris, and where the W. line of Drapeau bro. produced would strike the S. Harris to be covered amply by the Gatwood A. Mts. There is no conflict on the ground between either or any of these three surveys, all of the above I hereby certify to. yours Tom Greer, Co Surveyor.
